

## **State Statutory Dedications Report**

<b>Statutory Dedication:</b>	54N	TTF-Federal
------------------------------	-----	-------------

**Activity ID:** 176

**Activity Name:**

Administration

**Department:** 07 Department of Transportation and Development

**Agency:** 273 Administration

**Program:** 1000 Office of the Secretary

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**

SEE ATTACHMENT "1".

**Activity Type:** Existing

**Objective:**

To limit administrative cost to no more than 5% total construction and maintenance expenditures so that all possible funds can be utilized for the DOTD construction and maintenance programs.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
16686	Key	Percent of administrative expenditures to construction/maintenance expenditures	2.4	2.9	3.5	4	4
22344	Supporting	Administrative Expenditures	59031590	57374917	52643585	50664600	50664600

**Activity ID:** 183

**Activity Name:**  
Program & Project Delivery

**Department:** 07 Department of Transportation and Development

**Agency:** 275 Public Works, Hurricane Protection, Intermodal

**Program:** 2000 Water Resources and Intermodal

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "4".

**Activity Type:** Existing

**Objective:**

Conduct the State’s maritime infrast. dev. activities to ensure that LA maintains its top position in maritime commerce as measured by the total foreign & domestic cargo tonnage by investing in port & harbor infrast that will return to the state at least 5 times LA's investment in benefits...

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21658	Key	Return on state's investment (per dollar invested)	6.16	7.09	4.42	5	5
21659	Supporting	Total construction expenditures (Federal and State)	46511678	35145751	27820000	27777778	27777778
21660	Supporting	State's share of construction expenditures	37648764	23716885	19856000	25000000	25000000

**Narrative:**

The mission of the Water Resources and Intermodal Transportation Program is multimodal in nature. It provides oversight and support in a number of different areas, including: (1) Port Priority Program, harbor, flood control, dam, levee and reservoir projects; (2) Planning and coordinating marine navigation projects; (3) Developing and constructing rail transportation projects.

The following functions are included in this activity: The Port Construction and Development Priority Program, the Marine Transportation System Project, Rail Projects, Flood Protection Projects, Floodplain Management Program (National Flood Insurance Program), Dam Safety Program, Levee Safety Program, and the Reservoir Development Program.

The Port Priority Program is the only program within the State that specifically targets public port infrastructure for development and improvement. The Port Priority Program considers job creation/retention in its benefit calculation and also considers many other factors in the prioritization process (i.e. design, revenue to the port, past management of the port, adequacy of existing port infrastructure to support the project). The Port Priority Program is a transportation-based program that facilitates intermodal connectivity of the marine transportation system with rail and road systems. It is a core function of the DOTD.

**Explain How This Activity Advances State Outcome Goal:**

The Port Priority, Marine and Rail programs are all initiatives to improve intermodal connectivity, efficiency, and capacity of the freight transportation system. With an improved freight intermodal transportation system, more goods

(including significant quantities of hazardous materials) will be moved through Louisiana ports via marine and rail transportation systems, which will reduce highway congestion and lower the cost of highway maintenance. These programs also support the Governor's Economic Development goal by decreasing the cost of transporting goods, which increases the state competitiveness in the global marketplace.

If the functions are not scaled down, the following will remain with the Department. The Flood Control, Floodplain Management, Dam Safety, Levee Safety, and the Reservoir programs are all initiatives to increase the safety of Louisiana's citizens. Approximately 60 percent of Louisiana falls within a floodplain, which includes a substantial number of roadways. The reduction or prevention of flooding makes roadways safer and more reliable.

#### Evidence:

These programs met performance expectations for fiscal year 08/09 and are on target for 09/10.

#### Port

Objective: To conduct the state's maritime infrastructure development activities to ensure that Louisiana maintains its top position in maritime commerce, as measured by total foreign and domestic cargo tonnage, by investing in port and harbor infrastructure.

PI: State's return on investment, Standard =, Actual = 6.16

#### Marine

Objective: Develop a Statewide Marine Transportation System (MTS) Program for Louisiana's navigable waterways to facilitate economic development and mitigate highway congestion by June 30, 2013.

PI: Number of navigation projects initiated in Louisiana, Standard = 4, Actual 4

#### Rail

Objective: Implement 100% of the Statewide Rail Transportation System to facilitate economic development and mitigate highway congestion by June 30, 2013.

PI: Number of rail projects funded, Standard = 2, Actual = 2

**Activity ID:** 182

**Activity Name:**  
Louisiana Offshore Terminal Authority

**Department:** 07 Department of Transportation and Development

**Agency:** 275 Public Works, Hurricane Protection, Intermodal

**Program:** 2000 Water Resources and Intermodal

**State Outcome Goal:** 3 Transportation

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Louisiana Offshore Oil Port will be in compliance with the Deepwater Port Act 100% of the time.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent time in compliance.	0	0	0	100	100

**Narrative:**

The importance of the role that the Louisiana Department of Transportation plays in the economic development of our state can be easily overlooked. It only takes one man-made or natural disaster to understand the fundamental impact that free flowing transportation has on a local, regional and even a national economy. LOOP (Louisiana Offshore Oil Port) is Louisiana's super port and America's only deepwater port, LOOP handles 13% of our nation's foreign oil. Relative to DOTD, LOTA (Louisiana Offshore Terminal Authority) is empowered to regulate all phases of LOOP's daily operation to ascertain compliance of all state laws and regulations as large volumes of crude oil are safely transported to inland points. In addition to the Transportation State goal, LOOP supports the following State goals established by the Governor: Economic Development, Public Safety, Natural Resources and Transparent and Accountable.

**Explain How This Activity Advances State Outcome Goal:**

In the performance of safely transporting large volumes of crude oil to inland points as well as other official duties related to the Louisiana Offshore Terminal, the Executive Director is required to travel. Included in the travel mandates are routine travel for meetings scheduled with state, local and federal agencies to discuss incidents, expansions and other projects. There are necessary expenses that incur while traveling away from the LOTA office and the Executive Director's domicile residence. All travel expenses incurred in this capacity shall be deemed necessary and will be justified reasonable. The calculated request is based on a combination of past costs and estimated future travel. The LOTA Operating Services request is calculated on an estimated future need basis that will allow implementing any necessary and appropriate measures to ensure that the "Authority" can continue to function effectively within the DOTD spectrum. Included in the scope of expenses are costs to maintain current computer systems as well as the possibility of upgrades as technology advances. LOTA's supplies are deemed necessary to ensure the quality of a smooth operation of the "Authority" on a daily basis. (La. R.S. 34:3101) Paper goods and clerical and filing materials make up a large portion of the estimated need. In the event of an unforeseen environmental mishap, LOTA shall have the authority to employ engineers or other professional employees and agents as many be necessary to prevent hazards to human safety and health, to property and to the environment as well as minimize adverse effects on marine environment. LOTA continually works with industry with regard to

homeland security, safety, and hurricane-preparedness plans. Continuous monitoring and reporting timelines and guidelines keep the "Authority" in compliance with the Deepwater Port Act.

**Evidence:**

LOOP is America's first and only deepwater port operating under U. S. and Louisiana licenses. LOOP provides tanker offloading and temporary storage services for crude oil transported on some of the largest tankers in the world. Most tankers offloading at LOOP are too large for U.S. inland ports.

**Activity Type:** Existing

**Objective:**

Improve aviation safety related infrastructure for public airports to ensure 93% meet or exceed Pavement Condition Index (PCI) standards.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21665	Key	Percentage of airports with PCI above 70	90	92	90	93	95
21666	Supporting	Total number of airports	61	61	61	61	61
14247	Supporting	Total number of airports with PCI above 70	58	57	56	58	58

**Narrative:**

The Pavement Condition Index (PCI) is a management tool that measures the overall health of an airport's surfaces. It is derived at by establishing a baseline using an evaluation technique which counts the cracks and deformities in the pavement. A formula is applied to track longterm degradation or improvements. It is one tool the Aviation Section uses to develop the prioritized list of over 300 aviation projects per year that are requested by the State's 69 publicly owned airports. The Section is funded through the Aviation Trust Fund which derives its funds from a 4% aviation fuel tax. Under the authority of LRS Title 2 and Title 70 the primary functions are overseeing and providing State funds for the required match (typically 95-5) to Federal Aviation Administration projects averaging a total cost of over \$88 million annually. A small number of special "State only" projects are accomplished each year. Special programs within the Priority Program include 1) Obstruction Removal Safety which is eligible for FAA reimbursement, facilitates the removal of trees and land acquisition to prohibit obstructions 2) Statewide Sealcoat Program is a follow-on to the PCI Study. Provides longevity to existing surfaces thus reducing repair cost and increasing safety 3) Discretionary Program (authorized by Title 2 and Title 70) provides grants to airports for small projects not appropriate for the Priority Program or are of an emergency safety nature 4) The Planning Program affords continuously modernizing by supporting the development of Airport Master Plans and Airport Layout Plans as required by the FAA for funding. Advanced project planning is the catalyst for securing FAA funding for shovel ready projects 5) Airport Maintenance Reimbursement Program reduces the frequency and expense of repairing airport systems. The program offers \$600K as a 50% match to public airports' maintenance cost 6) FAA Future Obligations Program is necessary to capture end of year federal funds which become available and to match federal funds as FAA grants are increased beyond that originally estimated. The Section also certifies all privately owned airports, heliports, and seaplane bases and is responsible for the recurring inspections of the publicly owned General Aviation airports. Program is also responsible for new certifications and recurring inspections of over 800 airports, heliports,

and seaplane bases.

### Explain How This Activity Advances State Outcome Goal:

This activity advances all the State Outcome Goals. From the improvements to the State's Transportation systems, not just "roadways", to the progress in Economic Development, to Health with life-saving hospital helicopter sites, to Hurricane evacuation, rescue, and recovery, to Transparent and Accountable Government. Transportation is conspicuously enhanced by the more than 100 projects completed each year at the State's airports. These projects not only make for more efficient aviation in and out of the State, they reduce congestion on the highways, ensure safety, and promote Economic Development. Even the State's Education Goals are moved forward by the Aviation Section's Aviation Intern Program with the State colleges, the public school Aviation Art Contest, the support to the State's Airframe and Propulsion Aviation Mechanic Schools, and seminars conducted by the Section for professional continuing education, technical training, and workforce development. Many of the State's general aviation airports serve to accommodate the use of the State's Natural Resources by providing access to the "sportsman's paradise". Public Safety is secured through the Sections own Airport Inspection Program and Accident Investigation responsibility. Furthermore, the Section sponsors the Civil Air Patrol which is the State's official search and rescue agency. Transparent and Accountable Government is found in the archetypical Aviation Priority Program. Founded in law and published administrative procedures, projects are scored through a rigorous process, made public, afforded scrutiny by all the airports, approved by the legislature, and executed with redundant oversight by the FAA and the State. The long-term Aviation Priority Program has been heralded by the Legislative Transportation Committees as an example for others to follow.

### Evidence:

The overall success of the Aviation Program is best measured by the near 100% satisfactory rating from customer surveys. The airport leadership has even awarded the Louisiana Airport Managers and Associates Presidents Award to the Section for its outstanding service to the aviation community. The quarterly analysis and reporting on the Performance Indicator has consistently shown the goals to be exceeded. There has not been a single accident reported with a cause due to the condition of the airport's pavement. The orderly process for the Aviation Priority Program, the State's guaranteed match, and the management tools used in decision making are recognized by the FAA as sound and in turn have fostered the State receiving over \$20 million in additional FAA Discretionary funds.

**Activity ID:** 201  
**Activity Name:**  
Operations & Maintenance  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 4000 Operations  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "7".

**Activity Type:** Existing

**Objective:**

To improve safety by ensuring that 100% of deficient non-interstate line miles are striped by the end of each fiscal year through June 30, 2013.(New objective beginning in FY 09).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22394	Key	Percentage of deficient non-interstate line miles striped	112	0	0	100	100
22395	Supporting	Total non-interstate line miles that are deficient	13924	0	0	9000	10000
22396	Supporting	Total non-interstate line miles that are striped	15595	0	0	9000	10000

**Narrative:**

Operations and Maintenance provide manpower, materials, and equipment to maintain and operate a safe and functional state transportation infrastructure. The infrastructure includes 16,683 centerline miles of highway, 7,934 bridges, 106 movable bridges, 3,026 traffic signals, 3 tunnels, 16 rest areas, 2 navigation locks, 10 ferry locations, 745 buildings, 1,000,000 signs, 3.6 million acres of grass and vegetation control, equipment, pavement markings, dams, Intelligent Transportation System (ITS) equipment, drainage structures, and drainage ditches. The services that are provided include but not limited to pavement striping, bridge inspection, asphalt surface maintenance, concrete surface maintenance, aggregate surface maintenance, shoulder maintenance, roadside and drainage maintenance, bridge and structure maintenance, signal modifications, maintenance and repair, sign maintenance, Intelligent transportation system (ITS) management, roadside maintenance (vegetation, litter pickup, mowing, etc.), and emergency management (contra-flow, transportation of at risk population, debris removal, damage assessment, and repair of transportation infrastructure).DOTD contracts all or a portion of the following maintenance activities: guardrail repair, attenuator repair, mowing and litter, rest area security, rest area maintenance, sweeping, tree removal, drainage projects, pavement markings, ditch cleaning, handrail repair, loop repair, bridge deck drain cleaning, interstate striping, surface treatment (chip seal and crack sealing), minor overlay, pavement patching, and bridge preservation. The funding of these maintenance activities is approximately \$40 million per year.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides for better, safer, less congested roadways by using the latest technology and standards while inspecting, managing, and maintaining.  
Economic Development – provides safer and easier access throughout the state by creating a transportation system that is efficient. Provides customer service to businesses interested in moving to Louisiana by working with them on

safe access to the highway system.

Public Safety – provides safer roads for travelers and reduces highway crashes by providing safer roadways, incorporating state-of-the-art safety features, monitoring highway access, and maintaining safety features (striping, guardrails, attenuators, etc.). Use message boards, the media and the DOTD website to alert motorists of traffic incidents and delays.

Natural Resources – consideration of natural resources during maintenance by working with the environmental section and DEQ in obtaining permits for certain work.

Transparent and Accountable Government – monitors all operation activities in order to ensure quality performance. Performance indicators are set to determine performance.

**Evidence:**

DOTD implemented the Intelligent Transportation System (ITS) plan, reorganized all Districts for improved efficiency, developed Level of Service criteria, and the preventative maintenance program helped slow deterioration curve for roads and bridges. A comprehensive emergency management program was implemented within DOTD which supports the state's emergency operations and DOTD's assigned responsibilities. The overall average time it takes to study, design, and install new and/or modified traffic signals is now less than 180 days. Safety was improved by developing and implementing a pavement management program to assure 90% of all interstate roadways meet or exceed performance expectations, and by ensuring that 100% of deficient non-interstate line miles were re-striped last year

Program & Project Delivery

**Department:** 07 Department of Transportation and Development

**Agency:** 276 Engineering and Operations

**Program:** 4000 Operations

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**

Any reduction in staff will result in an increase in professional services which will likely increase the Operating Budget.

**Activity Type:** Existing

**Objective:**

To improve safety by developing and implementing a pavement marking program to assure that 90% of all Interstate roadways meet or exceed performance specifications by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21750	Key	Percentage of interstates that meet or exceed performance specifications	81	99	77	75	75
21751	Supporting	Total miles of Interstate roadways	900	900	900	900	900
21752	Supporting	Total miles of interstate roadways that pavement markings meet or exceed performance requirements	729	891	699	675	675

**Narrative:**

Program and Project Delivery provides for the design and inspection of public works projects and highway and bridge preservation, reconstruction and construction projects. Included are environmental assessments and context sensitive design, using quality construction materials, methods and specifications, mitigating traffic congestion with modified construction work schedules, using roadway safety features, and providing customer service. Also included are highway access permit reviews and approvals, construction materials sampling and testing, and drainage studies. Prioritization and design concepts are discussed with the local communities prior to moving forward. Input is solicited from the public.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides for better, safer, less congested roadways by applying the latest design standards

Economic Development – provides safer and easier access throughout the state by creating a transportation system that is efficient. Provides customer service to businesses interested in moving to Louisiana by working with them on safe access to the highway system.

Public Safety – provides safer roads for travelers and reduces highway crashes by providing safer roadways, incorporating state-of-the-art safety features in projects, monitoring highway access, and informing the public of ongoing construction. Use message boards, the media and the DOTD website to alert motorists of upcoming and ongoing construction projects. Include the latest design standards for construction work zone safety.

Natural Resources – consideration of natural resources during design and construction by conducting environmental

assessments and using context sensitive design

Transparent and Accountable Government – monitors contractor activity to ensure that quality projects are provided and that the specifications are adhered to. Sets performance expectations and specifications for contractors to meet on construction projects. Performance indicators are set to determine if on-time, on-budget criteria are met.

**Evidence:**

Met 100% deadlines for surplus projects in FY08

**Program:** 1000 Engineering  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "3".

**Activity Type:** Existing

**Objective:**

Effectively maintain and improve the State Highway System so that the system stays in its current or better condition each FY.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
14265	Key	Percentage of Interstate Highway System miles in fair or higher condition (ride-ability)	93.3	92.93	94.94	97	97
14267	Key	Percent of National Highway System miles in fair or higher condition(ride-ability)	90.58	92.36	91.71	95	95
21705	Key	Percent of Highways of Statewide Significance miles in fair or higher condition (ride-ability)	93.79	94.79	95.5	80	80
21706	Key	Percent of Regional Highway System miles in fair or higher condition (ride-ability)	82.15	83.75	83.53	80	80
21707	Key	Percentage of Louisiana bridges that are classified as structurally deficient or functionally obsolete	26.2	26.6	27	26	25

**Narrative:**

Maintenance and improvement of the highway system is the primary function of DOTD. This activity includes the design, construction and maintenance of existing and new highway infrastructure. Maintaining the highway system includes protection of the highway system through compliance with legal size and weight limits and effective enforcement of state and federal laws. This Activity also supports the Governor's goal of Economic Development.

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state Transportation outcome goal by delivering safer bridges and smoother roads. The State of Louisiana needs to have an efficient and reliable transportation network for the movement of freight and people. The safe reliable and efficient operation of the state highway network is a crucial component in our overall transportation network. Structurally sound bridges are a key component in the efficient movement of freight through this state. Increasing the mileage of our system of smooth pavements reduce maintenance costs for motorists and provides a better transportation system overall.

Effective enforcement of weight and size laws is another key element in protecting and maintaining the highway system. Oversize loads can damage bridges and create safety hazards to the public. Overweight vehicles can severely damage pavements and bridge structures. Effective enforcement provides a deterrent to violators and prevents the damage that might otherwise occur to the system. Enforcement also provides a mechanism to recoup some portion of the damage caused through collection of violation fines.

A major source of funds for this activity comes from the federal Transportation Trust fund through the Federal Highway Administration. Effective weight enforcement is a requirement for qualifying to receive federal highway funds. Effectiveness in this area also supports LA's outcome goal of Public Safety.

**Evidence:**

Performance data on scorecard there have been some increases and some decreases in the objective.

Program & Project Delivery  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 1000 Engineering  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "3".

**Activity Type:** Existing

**Objective:**

Deliver 25% active projects without addenda or change orders due to design errors each FY (new objective FY 11).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent projects delivered without addenda or change orders	0	0	0	25	25
New	Supporting	Total number of projects	0	0	0	176	176
New	Supporting	Number of projects delivered without addenda or change orders	0	0	0	158	158

**Narrative:**

This activity is the delivery of quality construction plans, engineering specifications and cost estimates for highway construction. The major source of funds for this activity comes from the federal Transportation Trust fund through the Federal Highway Administration.

FED FUNDS:\$553.70- 71.9%

STATE FUNDS:\$148.10- 19.2%

TIME FUNDS:\$11.60- 1.5%

BONDS: \$25.70 - 3.3%

TOLLS / LOCAL:\$18.602.4%

TOTAL:\$770.50 100.0%

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state Transportation outcome goal by delivering quality construction plans for highway infrastructure. Improving quality in plans reduces construction time as well as lowering costs. Quality plans result in reduced risk for contractors and DOTD. Accurate estimates improve utilization of resources and provides for more effective project planning. Improved quality reduces overhead and administrative costs for DOTD and allows for better optimization of resources. Higher efficiency and lower costs translates into more construction funds that can be applied to improving the overall system. These improvements also support LA's outcome goals: Economic Development, Public Safety, and Transparent and Accountable Government.

**Evidence:**

The LADOTD has received additional Federal Funds (obligation authority) over the past 20 plus years at the end of

each Federal Fiscal year. This year alone the amount obligation authority was over \$20 million. This is due to this agencies ability to deliver projects, on time, without the need for addenda and within the engineer's estimate range of +/- 10%.

**Activity ID:** 191  
**Activity Name:**  
 Support Services  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 1000 Engineering  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**

The LADOTD has received additional Federal Funds (obligation authority) over the past 20 plus years at the end of each Federal Fiscal year. This year alone the amount was over \$20 million. This is due to this agencies ability to deliver projects when scheduled.

**Activity Type:** Existing

**Objective:**

Increase the percentage of projects delivered on time by 5% each fiscal year through June 30, 2013 (new objective for FY 11).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent of projects delivered on time	0	0	0	68	68
New	Supporting	Total number of projects in the Highway Priority Program	0	0	0	176	176
New	Supporting	Number of projects delivered	0	0	0	158	158

**Narrative:**

This activity is focused on the timely delivery of projects for highway construction. Completion of project delivery requires a number of internal as well as external activities to be completed. Examples of activities include: final design of roads and bridges, acquisition of right of way, environmental clearance and utility relocation agreements. Frequently, permits from federal agencies such as the US Army Corp of Engineers and US Coast Guard are needed to be in compliance with federal laws and to qualify for federal funds. Agreements must also be obtained from railroad companies when there is a railroad within the projects limits. Each one of these activities can affect the delivery of projects if not completed within the scheduled timeframe.

**Explain How This Activity Advances State Outcome Goal:**

This activity addresses the state Transportation outcome goal by ensuring timely delivery of design projects so that funds can be utilized for highway improvements as soon as they are available. Projects which are delivered on time will lead to more efficient use of resources. More efficient use of resources can result in additional funds being available for improving the overall system. This activity also supports LA's outcome goals: Economic Development and Public Safety.

**Activity Name:**

Program & Project Delivery

**Department:** 07 Department of Transportation and Development

**Agency:** 276 Engineering and Operations

**Program:** 3000 Planning and Programming

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**

Federal law requires each state to have a long-range, multimodal transportation plan. Federally-funded projects must be consistent with the state transportation plan. Implementation of the plan is closely tied to, and largely dependent on, capital resources. Attempting to scale this activity would be scaling the capital budget, not the operating budget. Much of the implementation activity is already handled through contract. Any reduction in staff will result in an increase in professional services which will likely increase the Operating Budget.

**Activity Type:** Existing

**Objective:**

Implement 10% of the Louisiana Statewide Transportation and Infrastructure Plan each fiscal year through June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22388	Key	Percent of elements in the Louisiana Statewide Transportation Plan implemented (i.e., completed or fully funded) in current year	10	0	0	10	10
22389	Supporting	Total number of elements in the Louisiana Statewide Transportation System	148	0	0	100	100
22390	Supporting	Number of elements implemented (i.e., completed or fully funded) in the current year	15	0	0	15	15

**Narrative:**

In 2003, the DOTD completed a three-year effort to update the state's long-range transportation plan. The planning process was guided by the statutorily-created Louisiana Investment in Infrastructure for Economic Prosperity (LIIEP) Commission. The Louisiana Statewide Transportation Plan includes the policies, programs, and projects that are needed to strengthen the state's economy and improve the quality of life for Louisiana citizens. It addresses the movement of people and freight across all modes of transportation. In 2008, DOTD completed a review of the Plan, updating costs and recommendations, and incorporating the public works functions under DOTD's purview. The Louisiana Statewide Transportation and Infrastructure Plan: Review and Status Report does not replace the 2003 Plan, rather it serves as a supplement to it. Administration involves oversight and necessary action to ensure that the policy and strategic direction set forth in the Plan are carried out.

**Explain How This Activity Advances State Outcome Goal:**

The Louisiana Statewide Transportation and Infrastructure Plan provides the policy framework necessary to improve the condition, safety, efficiency, reliability, and appearance of the state's transportation system, thus supporting LA's

outcome goal of Transportation. The policies, programs, and projects in the Plan also support the State's outcome goal of Economic Development by supporting the wealth-building industries and employment that we already have; strengthening our foundation for economic growth; taking advantage of opportunities in international trade; enhancing the quality of life for Louisiana citizens; and sending the message that our state is progressive.

Implementation of this Plan not only addresses the state outcome goal for transportation, but also supports the goal for economic development.

**Evidence:**

The Plan may be accessed via DOTD's website: <http://www.dotd.la.gov/study/home.aspx>. The goals and objectives used to guide the development of the Plan address the state outcome goal for transportation and support the state outcome goal for economic development. The Plan is the product of extensive technical analyses, exhaustive consensus-building, and a highly structured decision-making process.

**Scalable:** True

**Scalable Description:**

Any reduction in staff will result in an increase in professional services which will likely increase the Operating Budget.

**Activity Type:** Existing

**Objective:**

Implement a comprehensive emergency management program within DOTD which supports the state's emergency operations and DOTD's assigned responsibilities by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22391	Key	Percentage of Projects implemented for each fiscal year	90	0	0	90	90
22392	Supporting	Total number of projects to be implemented	9	0	0	8	8
22393	Supporting	Number of projects implemented	9	0	0	7	7

**Narrative:**

Support Services provides support for Operations which has 3628 employees and an average operating budget of \$360 million. Operations consists of the 9 Districts, 5 Statewide maintenance units, and Crescent City Connection Division. These support services include training, purchasing, budget administration, accounting, payroll, stockroom, information technology, human resources, and inventory. A critical function of this activity is training and human resources which helps to ensure a knowledgeable and capable workforce in order to provide a safe and functional transportation infrastructure.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides support and a knowledgeable and capable workforce in order to provide better, safer, less congested roadways

Economic Development – provides support to Operations in order to provide safer and easier access throughout the state by creating a transportation system that is efficient.

Public Safety – provides support to Operations in order to provide safer roads for travelers and reduces highway crashes by providing safer roadways, incorporating state-of-the-art safety features, monitoring highway access, and maintaining safety features (guardrails, pavement marking, etc). Use message boards, the media and the DOTD website to alert motorists of traffic incidents and delays.

Transparent and Accountable Government – monitors all operation activities in order to ensure quality performance. Performance indicators are set to determine performance of all units.

**Evidence:**

95.8% of employees completed required training as identified in STP, leadership and individual development plans

**Activity Name:**  
 Support Services  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 3000 Planning and Programming  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**

Current data is needed to assess the pavement condition of the highway network and to identify and prioritize projects for funding. Further, federal regulations require periodic collection and reporting of this data. Reducing the frequency of the collection will not allow proper monitoring of the network in support of pavement preservation objectives or effective project selection. In addition, Federal regulations would preclude such action.

**Activity Type:** Existing

**Objective:**

Monitor and report on a quarterly basis the pavement condition in support of DOTD pavement preservation objectives each FY.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent pavement condition reported quarterly	100	100	100	100	100

**Narrative:**

Through contract, the DOTD biennially collects pavement condition data for all state highways and a random sample of non-state roads. Recent federal regulatory changes now require that data be collected annually for that portion of the network designated as the National Highway System. The data is used by the DOTD in monitoring the condition of the state highway system, in preparing the highway needs analysis, in identifying and prioritizing projects for funding, and in financial analyses to estimate the annual capital budgets needed to achieve specific objectives within any given period. In addition, the DOTD reports this data to the federal government for use in national highway needs assessments, various analyses requested by Congress, and national statistics.

**Explain How This Activity Advances State Outcome Goal:**

Monitoring and reporting pavement condition is essential in developing strategies and guiding investment decisions to achieve the state outcome goal, and in measuring progress toward goal achievement. The data is used by the DOTD in monitoring the condition of the state highway system, in preparing the highway needs analysis, in identifying and prioritizing projects for funding, and in financial analyses to estimate the annual capital budgets needed to achieve specific objectives within any given period.

**Evidence:**

The DOTD has been monitoring and reporting pavement condition data for decades. The consistency and accuracy has improved through advancements in technology. Recently, the Department was able to demonstrate the impacts of State Surplus funding on the condition of the state highway system and the long-term impacts if that funding level were sustained.

**Agency:** 276 Engineering and Operations

**Program:** 4000 Operations

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**

Any reduction in staff will result in an increase in professional services which will likely increase the Operating Budget.

**Activity Type:** Existing

**Objective:**

To improve safety by developing and implementing a pavement marking program to assure that 90% of all Interstate roadways meet or exceed performance specifications by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21750	Key	Percentage of interstates that meet or exceed performance specifications	81	99	77	75	75
21751	Supporting	Total miles of Interstate roadways	900	900	900	900	900
21752	Supporting	Total miles of interstate roadways that pavement markings meet or exceed performance requirements	729	891	699	675	675

**Narrative:**

Program and Project Delivery provides for the design and inspection of public works projects and highway and bridge preservation, reconstruction and construction projects. Included are environmental assessments and context sensitive design, using quality construction materials, methods and specifications, mitigating traffic congestion with modified construction work schedules, using roadway safety features, and providing customer service. Also included are highway access permit reviews and approvals, construction materials sampling and testing, and drainage studies. Prioritization and design concepts are discussed with the local communities prior to moving forward. Input is solicited from the public.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides for better, safer, less congested roadways by applying the latest design standards  
Economic Development – provides safer and easier access throughout the state by creating a transportation system that is efficient. Provides customer service to businesses interested in moving to Louisiana by working with them on safe access to the highway system.

Public Safety – provides safer roads for travelers and reduces highway crashes by providing safer roadways,

incorporating state-of-the-art safety features in projects, monitoring highway access, and informing the public of ongoing construction. Use message boards, the media and the DOTD website to alert motorists of upcoming and ongoing construction projects. Include the latest design standards for construction work zone safety.

Natural Resources – consideration of natural resources during design and construction by conducting environmental assessments and using context sensitive design

Transparent and Accountable Government – monitors contractor activity to ensure that quality projects are provided and that the specifications are adhered to. Sets performance expectations and specifications for contractors to meet on construction projects. Performance indicators are set to determine if on-time, on-budget criteria are met.

**Evidence:**

Met 100% deadlines for surplus projects in FY08

Revised and/or complied with the following guidelines and policies for improved safety and efficiency:

22394	Key	Percentage of deficient non-interstate line miles striped	112	0	0	100	100
22395	Supporting	Total non-interstate line miles that are deficient	13924	0	0	9000	10000
22396	Supporting	Total non-interstate line miles that are striped	15595	0	0	9000	10000

**Narrative:**

Operations and Maintenance provide manpower, materials, and equipment to maintain and operate a safe and functional state transportation infrastructure. The infrastructure includes 16,683 centerline miles of highway, 7,934 bridges, 106 movable bridges, 3,026 traffic signals, 3 tunnels, 16 rest areas, 2 navigation locks, 10 ferry locations, 745 buildings, 1,000,000 signs, 3.6 million acres of grass and vegetation control, equipment, pavement markings, dams, Intelligent Transportation System (ITS) equipment, drainage structures, and drainage ditches. The services that are provided include but not limited to pavement striping, bridge inspection, asphalt surface maintenance, concrete surface maintenance, aggregate surface maintenance, shoulder maintenance, roadside and drainage maintenance, bridge and structure maintenance, signal modifications, maintenance and repair, sign maintenance, Intelligent transportation system (ITS) management, roadside maintenance (vegetation, litter pickup, mowing, etc.), and emergency management (contra-flow, transportation of at risk population, debris removal, damage assessment, and repair of transportation infrastructure).DOTD contracts all or a portion of the following maintenance activities: guardrail repair, attenuator repair, mowing and litter, rest area security, rest area maintenance, sweeping, tree removal, drainage projects, pavement markings, ditch cleaning, handrail repair, loop repair, bridge deck drain cleaning, interstate striping, surface treatment (chip seal and crack sealing), minor overlay, pavement patching, and bridge preservation. The funding of these maintenance activities is approximately \$40 million per year.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides for better, safer, less congested roadways by using the latest technology and standards while inspecting, managing, and maintaining.  
Economic Development – provides safer and easier access throughout the state by creating a transportation system that is efficient. Provides customer service to businesses interested in moving to Louisiana by working with them on

safe access to the highway system.

Public Safety – provides safer roads for travelers and reduces highway crashes by providing safer roadways, incorporating state-of-the-art safety features, monitoring highway access, and maintaining safety features (striping, guardrails, attenuators, etc.). Use message boards, the media and the DOTD website to alert motorists of traffic incidents and delays.

Natural Resources – consideration of natural resources during maintenance by working with the environmental section and DEQ in obtaining permits for certain work.

Transparent and Accountable Government – monitors all operation activities in order to ensure quality performance. Performance indicators are set to determine performance.

**Evidence:**

DOTD implemented the Intelligent Transportation System (ITS) plan, reorganized all Districts for improved efficiency, developed Level of Service criteria, and the preventative maintenance program helped slow deterioration curve for roads and bridges. A comprehensive emergency management program was implemented within DOTD which supports the state's emergency operations and DOTD's assigned responsibilities. The overall average time it takes to study, design, and install new and/or modified traffic signals is now less than 180 days. Safety was improved by developing and implementing a pavement management program to assure 90% of all interstate roadways meet or exceed performance expectations, and by ensuring that 100% of deficient non-interstate line miles were re-striped last year

Revised and/or complied with the following guidelines and policies to provide safety and efficiency:

**Activity ID:** 186

**Activity Name:**  
Aviation

**Department:** 07 Department of Transportation and Development

**Agency:** 275 Public Works, Hurricane Protection, Intermodal

**Program:** 3000 Aviation

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "5".

**Activity Type:** Existing

**Objective:**

Improve aviation safety related infrastructure for public airports to ensure 93% meet or exceed Pavement Condition Index (PCI) standards.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21665	Key	Percentage of airports with PCI above 70	90	92	90	93	95
21666	Supporting	Total number of airports	61	61	61	61	61
14247	Supporting	Total number of airports with PCI above 70	58	57	56	58	58

**Narrative:**

The Pavement Condition Index (PCI) is a management tool that measures the overall health of an airport's surfaces. It is derived at by establishing a baseline using an evaluation technique which counts the cracks and deformities in the pavement. A formula is applied to track longterm degradation or improvements. It is one tool the Aviation Section uses to develop the prioritized list of over 300 aviation projects per year that are requested by the State's 69 publicly owned airports. The Section is funded through the Aviation Trust Fund which derives its funds from a 4% aviation fuel tax. Under the authority of LRS Title 2 and Title 70 the primary functions are overseeing and providing State funds for the required match (typically 95-5) to Federal Aviation Administration projects averaging a total cost of over \$88 million annually. A small number of special "State only" projects are accomplished each year. Special programs within the Priority Program include 1) Obstruction Removal Safety which is eligible for FAA reimbursement, facilitates the removal of trees and land acquisition to prohibit obstructions 2) Statewide Sealcoat Program is a follow-on to the PCI Study. Provides longevity to existing surfaces thus reducing repair cost and increasing safety 3) Discretionary Program (authorized by Title 2 and Title 70) provides grants to airports for small projects not appropriate for the Priority Program or are of an emergency safety nature 4) The Planning Program affords continuously modernizing by supporting the development of Airport Master Plans and Airport Layout Plans as required by the FAA for funding. Advanced project planning is the catalyst for securing FAA funding for shovel ready projects 5) Airport Maintenance Reimbursement Program reduces the frequency and expense of repairing airport systems. The program offers \$600K as a 50% match to public airports' maintenance cost 6) FAA Future Obligations Program is necessary to capture end of year federal funds which become available and to match federal funds as FAA grants are increased beyond that originally estimated. The Section also certifies all privately owned airports, heliports, and seaplane bases and is responsible for the recurring inspections of the publicly owned General Aviation airports. Program is also responsible for new certifications and recurring inspections of over 800 airports, heliports,

and seaplane bases.

### Explain How This Activity Advances State Outcome Goal:

This activity advances all the State Outcome Goals. From the improvements to the State's Transportation systems, not just "roadways", to the progress in Economic Development, to Health with life-saving hospital helicopter sites, to Hurricane evacuation, rescue, and recovery, to Transparent and Accountable Government. Transportation is conspicuously enhanced by the more than 100 projects completed each year at the State's airports. These projects not only make for more efficient aviation in and out of the State, they reduce congestion on the highways, ensure safety, and promote Economic Development. Even the State's Education Goals are moved forward by the Aviation Section's Aviation Intern Program with the State colleges, the public school Aviation Art Contest, the support to the State's Airframe and Propulsion Aviation Mechanic Schools, and seminars conducted by the Section for professional continuing education, technical training, and workforce development. Many of the State's general aviation airports serve to accommodate the use of the State's Natural Resources by providing access to the "sportsman's paradise". Public Safety is secured through the Sections own Airport Inspection Program and Accident Investigation responsibility. Furthermore, the Section sponsors the Civil Air Patrol which is the State's official search and rescue agency. Transparent and Accountable Government is found in the archetypical Aviation Priority Program. Founded in law and published administrative procedures, projects are scored through a rigorous process, made public, afforded scrutiny by all the airports, approved by the legislature, and executed with redundant oversight by the FAA and the State. The long-term Aviation Priority Program has been heralded by the Legislative Transportation Committees as an example for others to follow.

### Evidence:

The overall success of the Aviation Program is best measured by the near 100% satisfactory rating from customer surveys. The airport leadership has even awarded the Louisiana Airport Managers and Associates Presidents Award to the Section for its outstanding service to the aviation community. The quarterly analysis and reporting on the Performance Indicator has consistently shown the goals to be exceeded. There has not been a single accident reported with a cause due to the condition of the airport's pavement. The orderly process for the Aviation Priority Program, the State's guaranteed match, and the management tools used in decision making are recognized by the FAA as sound and in turn have fostered the State receiving over \$20 million in additional FAA Discretionary funds.

**Activity ID:** 188  
**Activity Name:** Transit  
**Department:** 07 Department of Transportation and Development  
**Agency:** 275 Public Works, Hurricane Protection, Intermodal  
**Program:** 4000 Public Transportation  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**

An increase of \$7.3 million in state funding is critical for meeting HB 1 objective of expanding public transportation services for the rural areas of the state by increasing the number of participating parishes to 50 by June 30, 2013. This additional state funding will provide 25% of the matching funds for operating assistance in all parishes with a public transportation system.

**Activity Type:** Existing

**Objective:**

To expand public transportation services that provides low cost public transportation for the rural areas of the state by increasing the number of participating parishes to fifty by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21699	Key	Total number of participating Parishes - Urban and Rural	39	40	39	40	40
21700	Supporting	Number of participating Parishes from previous year	37	40	40	38	38
21701	Supporting	Number of additional participating parishes with matching share	2	0	0	1	1

**Narrative:**

The Mission of the Public Transportation Program is to improve public transit in all areas of the state so that Louisiana's citizens may enjoy an adequate level of personal mobility regardless of geographical location, physical limitation or economic status. It is the goal of the program to provide Louisiana with economical, efficient and effective public transit systems in all parishes. This goal includes developing public transportation programs to maximize the effective use of available resources, promoting and providing effective public transportation services, and providing training and technical assistance to all transit providers -- statewide. The following activities of the Public Transportation Program are federally funded:

Metropolitan Planning Program and State Planning/Research Program – Provides funding to eight Metropolitan Planning Organizations for transit planning which includes coordinating transit services statewide, conducting transit studies, and developing strategies for improving public transportation opportunities.

Elderly and Persons with Disabilities Program – Provides capital assistance grants to non-profit transit agencies to purchase specially equipped vehicles to meet the special needs of the elderly and disabled.

Rural Public Transportation Program – Provides operating, capital and planning assistance to public entities for public transportation services in rural areas.

Rural Training Assistance Program – Provides support training and technical assistance activities for transit systems.

Capital Investments Grants – Provides capital assistance grants to rural transit agencies to purchase transit vehicles for rural public transportation statewide.

Job Access/Reverse Commute Program – Provides operating assistance to support transit services for welfare recipients and low-income persons as well as reverse commute activities for general public persons to access employment-related activities.

New Freedom Program – Provides operating and capital assistance to address transportation needs of persons with disabilities that go beyond those required by the American with Disabilities Act.

LA Swift Intercity Bus Service – Provides intercity bus service between Baton Rouge and New Orleans for commuting to/from work, persons seeking jobs and recovery efforts.

Rural Transit Capital Investment (American Recovery and Reinvestment Act) – Provides capital assistance to rural transit agencies statewide.

#### **Explain How This Activity Advances State Outcome Goal:**

A seamless Multi-Modal Transportation system facilitates a safer, more efficient, and more reliable means of moving people and goods from the point of origin to the destination. Public Transportation plays a vital role in how citizens access jobs, education, medical services and other necessary and desired destinations. Public Transportation services also have a net positive effect on air and water quality. If Public Transportation services were not available, many riders would use their personal vehicle or hire a taxi, which would increase the number of vehicle miles traveled on our roads and highways and significantly increase costs for highway/road maintenance.

#### **Evidence:**

Public Transportation contributes to socialization in transit dependant homes and has the lowest fatality rate per passenger mile than any surface mode. Automobiles, vans, SUVs, and pickup trucks have a fatality rate between 0.74 and 0.77 deaths per 100 million passenger miles. In contrast, transit vehicles have a fatality rate of 0.03. Public Transportation activities are federally funded and provide operating, planning and capital assistance to 33 Rural Parishes, one Intercity Bus System, eight Metropolitan Planning Organizations, ten Job Access/Reverse Commute recipients, three New Freedom recipients, and 92 Elderly and Disabled Transit Systems. Approximately, 2,000,000 passenger trips are provided annually with these funds.

**Program:** 2000 Water Resources and Intermodal

**State Outcome Goal:** 3 Transportation

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Louisiana Offshore Oil Port will be in compliance with the Deepwater Port Act 100% of the time.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent time in compliance.	0	0	0	100	100

**Narrative:**

The importance of the role that the Louisiana Department of Transportation plays in the economic development of our state can be easily overlooked. It only takes one man-made or natural disaster to understand the fundamental impact that free flowing transportation has on a local, regional and even a national economy. LOOP (Louisiana Offshore Oil Port) is Louisiana's super port and America's only deepwater port, LOOP handles 13% of our nation's foreign oil. Relative to DOTD, LOTA (Louisiana Offshore Terminal Authority) is empowered to regulate all phases of LOOP's daily operation to ascertain compliance of all state laws and regulations as large volumes of crude oil are safely transported to inland points. In addition to the Transportation State goal, LOOP supports the following State goals established by the Governor: Economic Development, Public Safety, Natural Resources and Transparent and Accountable.

**Explain How This Activity Advances State Outcome Goal:**

In the performance of safely transporting large volumes of crude oil to inland points as well as other official duties related to the Louisiana Offshore Terminal, the Executive Director is required to travel. Included in the travel mandates are routine travel for meetings scheduled with state, local and federal agencies to discuss incidents, expansions and other projects. There are necessary expenses that incur while traveling away from the LOTA office and the Executive Director's domicile residence. All travel expenses incurred in this capacity shall be deemed necessary and will be justified reasonable. The calculated request is based on a combination of past costs and estimated future travel. The LOTA Operating Services request is calculated on an estimated future need basis that will allow implementing any necessary and appropriate measures to ensure that the "Authority" can continue to function effectively within the DOTD spectrum. Included in the scope of expenses are costs to maintain current computer systems as well as the possibility of upgrades as technology advances. LOTA's supplies are deemed necessary to ensure the quality of a smooth operation of the "Authority" on a daily basis. (La. R.S. 34:3101) Paper goods and clerical and filing materials make up a large portion of the estimated need. In the event of an unforeseen environmental mishap, LOTA shall have the authority to employ engineers or other professional employees and agents as many be necessary to prevent hazards to human safety and health, to property and to the environment as well as minimize adverse effects on marine environment. LOTA continually works with industry with regard to

homeland security, safety, and hurricane-preparedness plans. Continuous monitoring and reporting timelines and guidelines keep the "Authority" in compliance with the Deepwater Port Act.

**Evidence:**

LOOP is America's first and only deepwater port operating under U. S. and Louisiana licenses. LOOP provides tanker offloading and temporary storage services for crude oil transported on some of the largest tankers in the world. Most tankers offloading at LOOP are too large for U.S. inland ports.

21660	Supporting	State's share of construction expenditures	37648764	23716885	19856000	25000000	25000000

**Narrative:**

The mission of the Water Resources and Intermodal Transportation Program is multimodal in nature. It provides oversight and support in a number of different areas, including: (1) Port Priority Program, harbor, flood control, dam, levee and reservoir projects; (2) Planning and coordinating marine navigation projects; (3) Developing and constructing rail transportation projects.

The following functions are included in this activity: The Port Construction and Development Priority Program, the Marine Transportation System Project, Rail Projects, Flood Protection Projects, Floodplain Management Program (National Flood Insurance Program), Dam Safety Program, Levee Safety Program, and the Reservoir Development Program.

The Port Priority Program is the only program within the State that specifically targets public port infrastructure for development and improvement. The Port Priority Program considers job creation/retention in its benefit calculation and also considers many other factors in the prioritization process (i.e. design, revenue to the port, past management of the port, adequacy of existing port infrastructure to support the project). The Port Priority Program is a transportation-based program that facilitates intermodal connectivity of the marine transportation system with rail and road systems. It is a core function of the DOTD.

**Explain How This Activity Advances State Outcome Goal:**

The Port Priority, Marine and Rail programs are all initiatives to improve intermodal connectivity, efficiency, and capacity of the freight transportation system. With an improved freight intermodal transportation system, more goods

(including significant quantities of hazardous materials) will be moved through Louisiana ports via marine and rail transportation systems, which will reduce highway congestion and lower the cost of highway maintenance. These programs also support the Governor's Economic Development goal by decreasing the cost of transporting goods, which increases the state competitiveness in the global marketplace.

If the functions are not scaled down, the following will remain with the Department. The Flood Control, Floodplain Management, Dam Safety, Levee Safety, and the Reservoir programs are all initiatives to increase the safety of Louisiana's citizens. Approximately 60 percent of Louisiana falls within a floodplain, which includes a substantial number of roadways. The reduction or prevention of flooding makes roadways safer and more reliable.

#### Evidence:

These programs met performance expectations for fiscal year 08/09 and are on target for 09/10.

#### Port

Objective: To conduct the state's maritime infrastructure development activities to ensure that Louisiana maintains its top position in maritime commerce, as measured by total foreign and domestic cargo tonnage, by investing in port and harbor infrastructure.

PI: State's return on investment, Standard =, Actual = 6.16

#### Marine

Objective: Develop a Statewide Marine Transportation System (MTS) Program for Louisiana's navigable waterways to facilitate economic development and mitigate highway congestion by June 30, 2013.

PI: Number of navigation projects initiated in Louisiana, Standard = 4, Actual 4

#### Rail

Objective: Implement 100% of the Statewide Rail Transportation System to facilitate economic development and mitigate highway congestion by June 30, 2013.

PI: Number of rail projects funded, Standard = 2, Actual = 2

22393	Supporting	Number of projects implemented	9	0	0	7	7

**Narrative:**

Support Services provides support for Operations which has 3628 employees and an average operating budget of \$360 million. Operations consists of the 9 Districts, 5 Statewide maintenance units, and Crescent City Connection Division. These support services include training, purchasing, budget administration, accounting, payroll, stockroom, information technology, human resources, and inventory. A critical function of this activity is training and human resources which helps to ensure a knowledgeable and capable workforce in order to provide a safe and functional transportation infrastructure.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides support and a knowledgeable and capable workforce in order to provide better, safer, less congested roadways

Economic Development – provides support to Operations in order to provide safer and easier access throughout the state by creating a transportation system that is efficient.

Public Safety – provides support to Operations in order to provide safer roads for travelers and reduces highway crashes by providing safer roadways, incorporating state-of-the-art safety features, monitoring highway access, and maintaining safety features (guardrails, pavement marking, etc). Use message boards, the media and the DOTD website to alert motorists of traffic incidents and delays.

Transparent and Accountable Government – monitors all operation activities in order to ensure quality performance. Performance indicators are set to determine performance of all units.

**Evidence:**

95.8% of employees completed required training as identified in STP, leadership and individual development plans

**Activity ID:** 196  
**Activity Name:**  
 Support Services  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 3000 Planning and Programming  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**

Current data is needed to assess the pavement condition of the highway network and to identify and prioritize projects for funding. Further, federal regulations require periodic collection and reporting of this data. Reducing the frequency of the collection will not allow proper monitoring of the network in support of pavement preservation objectives or effective project selection. In addition, Federal regulations would preclude such action.

**Activity Type:** Existing

**Objective:**

Monitor and report on a quarterly basis the pavement condition in support of DOTD pavement preservation objectives each FY.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent pavement condition reported quarterly	100	100	100	100	100

**Narrative:**

Through contract, the DOTD biennially collects pavement condition data for all state highways and a random sample of non-state roads. Recent federal regulatory changes now require that data be collected annually for that portion of the network designated as the National Highway System. The data is used by the DOTD in monitoring the condition of the state highway system, in preparing the highway needs analysis, in identifying and prioritizing projects for funding, and in financial analyses to estimate the annual capital budgets needed to achieve specific objectives within any given period. In addition, the DOTD reports this data to the federal government for use in national highway needs assessments, various analyses requested by Congress, and national statistics.

**Explain How This Activity Advances State Outcome Goal:**

Monitoring and reporting pavement condition is essential in developing strategies and guiding investment decisions to achieve the state outcome goal, and in measuring progress toward goal achievement. The data is used by the DOTD in monitoring the condition of the state highway system, in preparing the highway needs analysis, in identifying and prioritizing projects for funding, and in financial analyses to estimate the annual capital budgets needed to achieve specific objectives within any given period.

**Evidence:**

The DOTD has been monitoring and reporting pavement condition data for decades. The consistency and accuracy has improved through advancements in technology. Recently, the Department was able to demonstrate the impacts of State Surplus funding on the condition of the state highway system and the long-term impacts if that funding level were sustained.

**Activity Name:**  
Program & Project Delivery  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 3000 Planning and Programming  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**

Federal law requires each state to have a long-range, multimodal transportation plan. Federally-funded projects must be consistent with the state transportation plan. Implementation of the plan is closely tied to, and largely dependent on, capital resources. Attempting to scale this activity would be scaling the capital budget, not the operating budget. Much of the implementation activity is already handled through contract. Any reduction in staff will result in an increase in professional services which will likely increase the Operating Budget.

**Activity Type:** Existing

**Objective:**

Implement 10% of the Louisiana Statewide Transportation and Infrastructure Plan each fiscal year through June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22388	Key	Percent of elements in the Louisiana Statewide Transportation Plan implemented (i.e., completed or fully funded) in current year	10	0	0	10	10
22389	Supporting	Total number of elements in the Louisiana Statewide Transportation System	148	0	0	100	100
22390	Supporting	Number of elements implemented (i.e., completed or fully funded) in the current year	15	0	0	15	15

**Narrative:**

In 2003, the DOTD completed a three-year effort to update the state's long-range transportation plan. The planning process was guided by the statutorily-created Louisiana Investment in Infrastructure for Economic Prosperity (LIIEP) Commission. The Louisiana Statewide Transportation Plan includes the policies, programs, and projects that are needed to strengthen the state's economy and improve the quality of life for Louisiana citizens. It addresses the movement of people and freight across all modes of transportation. In 2008, DOTD completed a review of the Plan, updating costs and recommendations, and incorporating the public works functions under DOTD's purview. The Louisiana Statewide Transportation and Infrastructure Plan: Review and Status Report does not replace the 2003 Plan, rather it serves as a supplement to it. Administration involves oversight and necessary action to ensure that the policy and strategic direction set forth in the Plan are carried out.

**Explain How This Activity Advances State Outcome Goal:**

The Louisiana Statewide Transportation and Infrastructure Plan provides the policy framework necessary to improve the condition, safety, efficiency, reliability, and appearance of the state's transportation system, thus supporting LA's

outcome goal of Transportation. The policies, programs, and projects in the Plan also support the State's outcome goal of Economic Development by supporting the wealth-building industries and employment that we already have; strengthening our foundation for economic growth; taking advantage of opportunities in international trade; enhancing the quality of life for Louisiana citizens; and sending the message that our state is progressive.

Implementation of this Plan not only addresses the state outcome goal for transportation, but also supports the goal for economic development.

**Evidence:**

The Plan may be accessed via DOTD's website: <http://www.dotd.la.gov/study/home.aspx>. The goals and objectives used to guide the development of the Plan address the state outcome goal for transportation and support the state outcome goal for economic development. The Plan is the product of extensive technical analyses, exhaustive consensus-building, and a highly structured decision-making process.

**Activity ID:** 191  
**Activity Name:**  
Support Services  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 1000 Engineering  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**

The LADOTD has received additional Federal Funds (obligation authority) over the past 20 plus years at the end of each Federal Fiscal year. This year alone the amount was over \$20 million. This is due to this agencies ability to deliver projects when scheduled.

**Activity Type:** Existing

**Objective:**

Increase the percentage of projects delivered on time by 5% each fiscal year through June 30, 2013 (new objective for FY 11).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent of projects delivered on time	0	0	0	68	68
New	Supporting	Total number of projects in the Highway Priority Program	0	0	0	176	176
New	Supporting	Number of projects delivered	0	0	0	158	158

**Narrative:**

This activity is focused on the timely delivery of projects for highway construction. Completion of project delivery requires a number of internal as well as external activities to be completed. Examples of activities include: final design of roads and bridges, acquisition of right of way, environmental clearance and utility relocation agreements. Frequently, permits from federal agencies such as the US Army Corp of Engineers and US Coast Guard are needed to be in compliance with federal laws and to qualify for federal funds. Agreements must also be obtained from railroad companies when there is a railroad within the projects limits. Each one of these activities can affect the delivery of projects if not completed within the scheduled timeframe.

**Explain How This Activity Advances State Outcome Goal:**

This activity addresses the state Transportation outcome goal by ensuring timely delivery of design projects so that funds can be utilized for highway improvements as soon as they are available. Projects which are delivered on time will lead to more efficient use of resources. More efficient use of resources can result in additional funds being available for improving the overall system. This activity also supports LA's outcome goals: Economic Development and Public Safety.

**Evidence:**

Program & Project Delivery  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 1000 Engineering  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "3".

**Activity Type:** Existing

**Objective:**

Deliver 25% active projects without addenda or change orders due to design errors each FY (new objective FY 11).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent projects delivered without addenda or change orders	0	0	0	25	25
New	Supporting	Total number of projects	0	0	0	176	176
New	Supporting	Number of projects delivered without addenda or change orders	0	0	0	158	158

**Narrative:**

This activity is the delivery of quality construction plans, engineering specifications and cost estimates for highway construction. The major source of funds for this activity comes from the federal Transportation Trust fund through the Federal Highway Administration.

FED FUNDS:\$553.70- 71.9%

STATE FUNDS:\$148.10- 19.2%

TIME FUNDS:\$11.60- 1.5%

BONDS: \$25.70 - 3.3%

TOLLS / LOCAL:\$18.602.4%

TOTAL:\$770.50 100.0%

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state Transportation outcome goal by delivering quality construction plans for highway infrastructure. Improving quality in plans reduces construction time as well as lowering costs. Quality plans result in reduced risk for contractors and DOTD. Accurate estimates improve utilization of resources and provides for more effective project planning. Improved quality reduces overhead and administrative costs for DOTD and allows for better optimization of resources. Higher efficiency and lower costs translates into more construction funds that can be applied to improving the overall system. These improvements also support LA's outcome goals: Economic Development, Public Safety, and Transparent and Accountable Government.

**Evidence:**

The LADOTD has received additional Federal Funds (obligation authority) over the past 20 plus years at the end of

each Federal Fiscal year. This year alone the amount obligation authority was over \$20 million. This is due to this agencies ability to deliver projects, on time, without the need for addenda and within the engineer's estimate range of +/- 10%.

**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "3".

**Activity Type:** Existing

**Objective:**

Effectively maintain and improve the State Highway System so that the system stays in its current or better condition each FY.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
14265	Key	Percentage of Interstate Highway System miles in fair or higher condition (ride-ability)	93.3	92.93	94.94	97	97
14267	Key	Percent of National Highway System miles in fair or higher condition(ride-ability)	90.58	92.36	91.71	95	95
21705	Key	Percent of Highways of Statewide Significance miles in fair or higher condition (ride-ability)	93.79	94.79	95.5	80	80
21706	Key	Percent of Regional Highway System miles in fair or higher condition (ride-ability)	82.15	83.75	83.53	80	80
21707	Key	Percentage of Louisiana bridges that are classified as structurally deficient or functionally obsolete	26.2	26.6	27	26	25

**Narrative:**

Maintenance and improvement of the highway system is the primary function of DOTD. This activity includes the design, construction and maintenance of existing and new highway infrastructure. Maintaining the highway system includes protection of the highway system through compliance with legal size and weight limits and effective enforcement of state and federal laws. This Activity also supports the Governor's goal of Economic Development.

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state Transportation outcome goal by delivering safer bridges and smoother roads. The State of Louisiana needs to have an efficient and reliable transportation network for the movement of freight and people. The safe reliable and efficient operation of the state highway network is a crucial component in our overall transportation network. Structurally sound bridges are a key component in the efficient movement of freight through this state. Increasing the mileage of our system of smooth pavements reduce maintenance costs for motorists and provides a better transportation system overall.

Effective enforcement of weight and size laws is another key element in protecting and maintaining the highway system. Oversize loads can damage bridges and create safety hazards to the public. Overweight vehicles can severely damage pavements and bridge structures. Effective enforcement provides a deterrent to violators and prevents the damage that might otherwise occur to the system. Enforcement also provides a mechanism to recoup some portion of the damage caused through collection of violation fines.

A major source of funds for this activity comes from the federal Transportation Trust fund through the Federal Highway Administration. Effective weight enforcement is a requirement for qualifying to receive federal highway funds. Effectiveness in this area also supports LA's outcome goal of Public Safety.

**Evidence:**

Performance data on scorecard there have been some increases and some decreases in the objective.

**Activity Type:** Existing

**Objective:**

Increase participation in the Federal emergency management Agency (FEMA) Community Rating System (CRS) so that 82% of flood insurance policy holders receive insurance rate reductions by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
14258	Key	Percentage of policyholders receiving insurance reduction	79.95	74.82	79.95	80	80
21635	Supporting	Flood insurance policy holders	494349	421126	494349	500000	500000
21636	Supporting	Flood insurance policy holders with rate reduction	395216	315123	395216	400000	400000

**Narrative:**

This office supports the Assistant Secretary for the Office of Public Works and Intermodal Transportation, who provides administrative oversight for three distinct programs: Water Resources and Public Works, Aviation, and Public Transportation. Additionally, the Assistant Secretary for the Office of Public Works and Intermodal Transportation oversees the administration and implementation of the following activities: USACE Civil Works functions, Statewide Flood Control projects, Port Priority projects, NRCS Watershed Development, Floodplain Management and National Flood Insurance functions with Community Rating System, Reservoir Development, Dam Safety, Levee Safety, Marine Transportation projects, Rail Transportation projects and Engineering and Technical Support. This office is also responsible for overseeing the activities of the Louisiana Offshore Superport and for representing the State's interests on the Sabine River Compact Commission, Red River Compact Commission and the Red River Waterway Commission.

This activity also supports Economic Development: I want Louisiana to retain, grow, and attract jobs with good pay, benefits, and advancement opportunities, in a diversified economy, with personal corporate income growth and strong and stable tax base, which protecting health and safety and wisely utilizing natural resources.

**Explain How This Activity Advances State Outcome Goal:**

This activity facilitates leadership for achieving all of the objectives codified in House Bill 1 and provides counsel and recommendations to the Secretary, DOTD, and other Assistant Secretaries regarding the mission, goals, and activities assigned to the Office of Public Works and Intermodal Transportation.

**Evidence:**

The DOTD Public Works Section's function is to provide Funding and Oversight/Inspection of construction and repair projects on the state's ports and navigable waterways.

- 2800 miles of navigable waterways
- 2 deep draft waterways: Lower Mississippi River and Calcasieu River
- 27 locks
- 44 of 64 parishes have navigable waterways
- 470 dams
- 39 shallow & deep draft port authorities
- Offshore Oil Terminal Authority

**Activity Name:**  
 Ferries  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 4000 Operations  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
 SEE ATTACHMENT "6".

**Activity Type:** Existing

**Objective:**

Maintain ferries to ensure downtime during scheduled operating hours does not exceed 5% each fiscal year (New activity FY 11. Existing and Proposed data being collected).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent ferry downtime during scheduled operating hours	0	0	0	5	5
New	Supporting	Total number of hours of operational downtime	0	0	0	0	0
New	Supporting	Total number of hours during scheduled operating periods	0	0	0	0	0

**Narrative:**

Operations and Maintenance of the DOTD Ferry operations provides manpower, materials, and equipment to maintain and operate seven ferry locations statewide (New Roads, Plaquemine, White Castle, Reserve, Melville, Duty, and Cameron). There are approximately 91 employees, 8 ferry boats, 3 tugs/push boats, 3 ferry barges, and 9 landing barges. The seven ferry locations are the New Roads/St. Francisville, Plaquemine/Sunshine, White Castel/Carville, Reserve/Edgard, Melville, Duty, and Cameron/Holly Beach ferry landings. The ferries transport approximately 1,027,809 vehicles per year. Security for late night hours is provided. Tolls are collected for all vehicles boarding on the Westbank. All ferries are maintained and operated in accordance with US Coast Guard regulations, including periodic drydocking of ferries.

**Explain How This Activity Advances State Outcome Goal:**

Transportation – provides for better, safer, less congested roadways by providing alternative transportation and reducing the number of vehicles utilizing the alternate bridges or reducing the detour mileage.  
 Economic Development – provides safer, easier and more efficient movement across the rivers in order to increase the possibility of economic development.  
 Public Safety – provides an alternate method for crossing the rivers thus reducing the detour miles traveled.  
 Transparent and Accountable Government – monitors all operation activities in order to ensure quality performance.  
 Performance indicators are set to determine performance.

**Evidence:**

The DOTD ferries operated with less than a 5% downtime during the past year (excluding the downtime caused by Hurricanes Gustav and Ike).

<b>Statutory Dedication:</b>	CR1	Crime Victims Reparation Fund A250-82
------------------------------	-----	---------------------------------------

**Activity ID:** 644

**Activity Name:**

Administration of the Crime Victims Reparations Program

**Department:** 01 Executive Department

**Agency:** 129 Louisiana Commission on Law Enforcement

**Program:** 2000 State

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

LCLE will be unable to achieve goals and objectives relative to the State Statutory Grant Requirements

**Activity Type:** Existing

**Objective:**

The crime victims reparations program compensates victims and survivors of violent crime from statutory dedicated funds. Eligibility is defined by statute and current Crime Victims Reparations Board policy. Funds are generated from additional court costs imposed by the courts.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
289	Key	Number of reparations claims processed	2121	2123	1855	1600	1600
290	Key	Number of crime victims compensated by the preparation program	899	899	922	850	850
291	Supporting	Average time to process claims	53	54	34	45	45
292	Supporting	Dollar amount of compensation awarded	2245956	2245799	2349714	1800000	1800000

**Narrative:**

The Crime Victims Reparations Program provides monetary compensation to innocent victims of crime and their families for economic losses involving personal injury and to their dependants in cases of death. The funds for the program are generated from monies paid as costs levied on criminal court cases and supplemented by federal compensation grants. Since 1983, the program has awarded over \$27,836,000 to more than 12,000 crime victims and their families statewide.

**Explain How This Activity Advances State Outcome Goal:**

Claims awarded through this activity will advance State Outcome Goal 5-Public Safety by providing financial assistance to approximately 950 to victims of crimes and their families in the next year for medical and economic losses involving personal injury, to their dependents in cases of death, and for catastrophic property loss. With limited resources, the program collaborates with local sheriff's departments who assist the program staff by investigating and verifying all claim applications. Timely decisions on applications will be considered at monthly board meetings to facilitate the speedy payment of reparation claims to the victim or their families, and reduced in cases by collateral resources such insurance payment, workmen's compensation, or other sources of benefits.

There is always the anticipation that more victims could seek compensation; that mass violence continues to always a threat and would require greater reparation outlays to victims.

**Evidence:**

Claims awarded through this activity advance State Outcome Goal 5-Public Safety by providing monetary compensation to victims of crimes and their families for economic losses involving personal injury and dependents in cases of death. Since 1983, the Crime Victims Reparations program has awarded over 27 million dollars to more than 12,000 crime victims and their families. In the last fiscal year, 2,123 claims for reparations were processed for 900 crime victims resulting in benefit payments of approximately \$ 2,2 million dollars for medical benefits, lost wages, counseling, and funeral expenses.

**Activity ID:** 54

**Activity Name:**

SCY- Director's Office

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10B0 Swanson Correctional Center for Youth

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To ensure public safety by coordinating all aspects of facility operations, including security, therapeutic and programmatic services for youth, food services, facility maintenance, case management, human resources, and compliance with applicable Federal, State, and local laws/regulations.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20563	Key	Percentage of dorms actively participating in dorm management system (LaMOD)	50	41.6	41.6	50	50
20568	Supporting	Number of dorms actively participating in dorm management system	6	5	5	6	6

**Narrative:**

The Director's Office coordinates the provision of therapeutic services to adjudicated youth, including substance abuse treatment, sex offender treatment, and the Louisiana Model of Therapeutic Treatment (LAMOD). Additionally, the Director's Office ensures that the facility complies with the Federal National School Lunch Program (NSLP), Fire Marshall Regulations, Health Department regulations, and other applicable regulations/statutes.

**Explain How This Activity Advances State Outcome Goal:**

By coordinating all aspects of facility operations, the Director's Office ensures the safety of the public, and the provision of quality programmatic and therapeutic services to youth. Furthermore, adherence to the LAMOD model ensures that youth are receiving individualized services in order to become productive, law-abiding citizens, which meets the State Outcome Goal of having Safe and Thriving Children and Families.

**Evidence:**

The successful coordination of facility operations will be evidenced by the increase of the

number of youth who successfully reintegrate into their communities upon release from secure custody and a reduction of the recidivism rate.

**Activity ID:** 58

**Activity Name:**  
SCY-Education

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10B0 Swanson Correctional Center for Youth

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide quality academic and vocational education opportunities for secure care youth by working to increase the percentage of youth making academic and vocational gains.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Average increase in academic grade level	0	0	0	0	2
22435	Key	Percentage of youth earning vo-tech certificates	27	67	0	45	55
22258	Key	Percentage of eligible youth receiving GEDs	7	4	0	10	12

**Narrative:**

The Education Activity provides educational services to youth in an alternative school setting which incorporates a balanced educational program based on instructional need which facilitates a “group therapeutic approach.” An Individual Learning Plan (ILP) is developed for each youth to address individual education needs. Special Education services are provided to youth according to their Individual Education Plan (IEP). Youth may earn Carnegie Units/credits toward a high school diploma. Vocational programs provide the necessary skills to provide youth with basic knowledge in preparation for workforce development.

**Explain How This Activity Advances State Outcome Goal:**

Public Safety will be advanced by the provision of quality academic and vocational education opportunities to youth in secure custody. This is integral in the reintegration process for youth and helps to facilitate transition back into their communities. The goal is to build a workforce with the education and skills necessary to meet the needs of business in a knowledge-based economy through flexible systems and responsive programs.

**Evidence:**

The processes associated with the education component will be evidenced by the percentage of youth making academic gains according to the Test of Adult Basic Education (TABE), percentage of youth receiving GEDs, percentage of youth receiving

terminal diplomas, and percentage of youth receiving vocational certificates.

SCY- Youth Care

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10B0 Swanson Correctional Center for Youth

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide high quality programmatic, therapeutic, health, dental, mental health, recreational, and food services to youth who have been adjudicated by the courts.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21948	Key	Percentage of youth receiving services identified in their IIPs	100	99	0	90	95
21949	Supporting	Number of IIPs	563	220	177	550	600

**Narrative:**

The provision of Youth Care services to adjudicated youth at the Swanson Center for Youth ensures that youth are receiving effective and individualized services so that they will become productive, law-abiding citizens. When a youth arrives in secure custody, an Individualized Intervention Plan (IIP) is developed for him by a multi-disciplinary team. The IIP is based on a risk/needs assessment and a psychological evaluation and is designed to ensure that the youth receives needed services. The IIP is periodically reviewed and refined in order to ensure that the youth makes continuous progress.

**Explain How This Activity Advances State Outcome Goal:**

The Youth Care services program advances the safety of the public by assisting youth in redirecting their lives towards responsible citizenship. Furthermore, by adhering to an Individualized Intervention Plan, the youth acquires skills to allow him to become a productive, law-abiding citizen, which also advances the goal of Safe and Thriving Children and Families.

**Evidence:**

The Youth Care activity results will be evidenced by an increase in successful implementation of the number of youth receiving treatment and sustaining progress according to their Individual Intervention Plan (IIP).

**Activity ID:** 74

**Activity Name:**

JCY- Education

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10C0 Jetson Correctional Center for Youth

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide quality academic and vocational education opportunities for secure care youth by working to increase the percentage of youth making academic and vocational gains.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Average increase in academic grade level	0	0	0	0	2
22260	Key	Percentage of youth receiving vo-tech certificates	34	34	0	50	55
22261	Key	Percentage of youth receiving GEDs	4	10	0	5	8

**Narrative:**

The Education Activity provides educational services to youth in an alternative school setting which incorporates a balanced educational program based on instructional need which facilitates a "group therapeutic approach." An Individual Learning Plan (ILP) is developed for each youth to address individual education needs. Special Education services are provided to youth according to their Individual Education Plan (IEP). Youth may earn Carnegie Units/credits toward a high school diploma. Vocational programs provide the necessary skills to provide youth with basic knowledge in preparation for workforce development.

**Explain How This Activity Advances State Outcome Goal:**

Public Safety will be advanced by the provision of quality academic and vocational education opportunities to youth in secure custody. This is integral in the reintegration process for youth and helps to facilitate transition back into their communities. The goal is to build a workforce with the education and skills necessary to meet the needs of business in a knowledge-based economy through flexible systems and responsive programs.

**Evidence:**

The processes associated with the education component will be evidenced by the percentage of youth making academic gains according to the Test of Adult Basic Education (TABE), percentage of youth receiving GEDs, percentage of youth receiving

terminal diplomas, and percentage of youth receiving vocational certificates.

JCY- Youth Care

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10C0 Jetson Correctional Center for Youth

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide high quality programmatic, therapeutic, health, dental, mental health, recreational, and food services to youth who have been adjudicated by the courts.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21978	Key	Percentage of youth receiving services as identified in their IIPs	50	113	0	60	70
21965	Supporting	Number of IIPs	68	446	230	70	80

**Narrative:**

The provision of Youth Care services to adjudicated youth at the Swanson Center for Youth ensures that youth are receiving effective and individualized services so that they will become productive, law-abiding citizens. When a youth arrives in secure custody, an Individualized Intervention Plan (IIP) is developed for him by a multi-disciplinary team. The IIP is based on a risk/needs assessment and a psychological evaluation and is designed to ensure that the youth receives needed services. The IIP is periodically reviewed and refined in order to ensure that the youth makes continuous progress.

**Explain How This Activity Advances State Outcome Goal:**

The Youth Care services program advances the safety of the public by assisting youth in redirecting their lives towards responsible citizenship. Furthermore, by adhering to an Individualized Intervention Plan, the youth acquires skills to allow him to become a productive, law-abiding citizen, which also advances the goal of Safe and Thriving Children and Families.

**Evidence:**

The Youth Care activity results will be evidenced by an increase in successful implementation of the number of youth receiving treatment and sustaining progress according to their Individual Intervention Plan (IIP).

**Activity ID:** 61

**Activity Name:**

Community Supervision Services

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 8000 Field Services

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide probation and parole supervision, residential and non-residential treatment services for adjudicated youth and for status offender youth and their families. Youth placed under supervision by the courts receive services from providers located in areas within close proximity to their homes.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21987	Key	Number of youth receiving services as indentified in the Individualized Intervention Plan.	771	856	1651	650	650

**Narrative:**

The Field Services Program provides probation and parole supervision and both residential and non-residential treatment services for adjudicated youth and for status offender youth and their families. These services are designed to address the needs of youth assigned to supervision while ensuring public safety. A risk assessment model is used to determine levels of custody, supervision, reassignment and release recommendations. Youth are maintained in the least restrictive setting possible to best meet their needs, while at the same time adhering to public safety. While we strive to maintain all youth in their home, we understand this is not possible for all youth. For those youth that continue to present problems in their home and community after all available services have been tried yet appear to be unsuccessful, removal from is the last option. Following a Judges disposition of placing the youth in care, the youth is assessed to determine the contract provider that can best meet his needs while in care. Needs that have been identified for the youth through a psychological evaluation is outlined on the Individualized Service Plan and provided to the youth while under supervision. Additionally, services the parent may be in need of are also provided to them while the youth is in care. The DYS has offices in Alexandria, Baton Rouge, Hammond, Lafayette, Lake Charles, Monroe, Natchitoches, New Orleans, Shreveport, Tallulah and Thibodaux. Youth placed under supervision by the courts receive services from providers located in the areas within close proximity to their homes. Such services may include in-home counseling, tracker/mentor, group counseling, etc. The ultimate goal is provide services that best meet the needs of the youth and their family.

**Explain How This Activity Advances State Outcome Goal:**

The states outcome of Public Safety is advanced as the needs of the child and his family is provided through contract providers to meet their needs. It is incumbent upon the agency to insure youth are placed in an environment where their safety, permanency and well-being are maintained. First and foremost, a child shall be kept safe whether in their home or placed outside of their home. Reunification to the family is addressed through permanency with a threshold of reuniting the youth to their family within a 12 month period. Well-being insures the

youth's medical, educational and mental health needs are met in a timely manner.

**Evidence:**

Effective Community Supervision Services are evidenced by Service Coordination implementation statewide. One probation officer works with the youth and family while he is under supervision or in care. This approach builds cohesiveness with the youth, family and probation office.

			Prior FY	2 Yrs Ago	3 Yrs Ago		
21982	Key	Percentage of regions adhering to service coordination model	100	63	0	100	100

**Narrative:**

Field Services provides probation and parole supervision, residential and non-residential treatment services for adjudicated youth, status offenders and their families while protecting public safety.

**Explain How This Activity Advances State Outcome Goal:**

Field Services Administration addresses Public Safety by providing probation and parole officers who monitor youth activities and ensure compliance with treatment plan and court orders. Field Services addresses the outcome goals of Youth Education by providing educational services to youth through day treatment programs.

**Evidence:**

Effective Field Services Administration is evidenced by use of the SAVRY Assessment tool. Field Services began using the SAVRY in four pilot regions in June, 2009. The SAVRY is an evidence based assessment tool that can predict the risk for violence in the population we serve. The SAVRY will enable OJJ to accurately and consistently assess the risk and needs of our youth. Based upon the data received, we will be able to make more informed decisions regarding treatment plans, services and appropriate placements.

It will also assist the courts as they make decisions regarding community services versus secure services. The SAVRY structures the gathering of information so that important factors will not be missed and, thus will be emphasized when formulating a final judgment about a youth's level of risk and case management plans. The SAVRY is composed of 24 items in three risk domains, historical risk factors, social contextual risk factors, and individual/clinical factors and six protective factor items that are rated as either present or absent. Field Services is also utilizing Service Coordination, which provides for one probation and parole officer to work with a youth and his family throughout his stay in OJJ custody and/or supervision. This assists with buy-in from the families and helps to build a relationship of trust and solidify the understanding that the probation/parole officer, the youth and family are a team, with the same goals and objectives.

OYD Administration

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10A0 Administration

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To effectively design, implement, and administer a state-level system of care, including custody, supervision, and community services for at risk and adjudicated youth on behalf of public safety.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20556	Key	To reduce the 18-month follow-up recidivism rate by 23% by 2010	10.8	15.37	22.1	20	20
21943	Supporting	To increase family participation by 40% by 2011	3092	2754	3040	3303	3303

**Narrative:**

The Administration Program will design, implement, and administer a state-level system of care, custody, and supervision that serves the needs of youth and their families and assists courts of proper jurisdiction; act on behalf of public safety by preventing and/or deterring delinquent behavior by youth; protect public safety by providing safe, secure, humane, and rehabilitative institutional programs for violent youth; provide a diversified system of community services for youth and their families, including probation, aftercare, residential and nonresidential interventions; and coordinate with local and regional governmental agencies and courts to develop intervention programs. The Administration Program standardizes as much as possible in order to increase economy and efficiency in areas of responsibility; provides beneficial administration, policy development, leadership, and develops and implements staffing standards/formulas for juvenile services. The goals of the Administration Program are to lead efforts to reduce recidivism among juvenile offenders adjudicated to the custody or supervision of the state; and, to ensure high quality service through effective administration and management of a continuum of care. This includes responsible management of secure institutions, proper selection and monitoring of community based programs, shelter care facilities, residential, and nonresidential community treatment programs, as well as the effective administration of juvenile probation and parole services.

**Explain How This Activity Advances State Outcome Goal:**

The Administration Program addresses the outcome goal of Public Safety by administering three, 24 hour, secure facilities for males, providing probation and parole services, and community based services. Probation officers monitor youth to ensure youth compliance with court recommendations and individual treatment plan. Administration addresses safe and thriving children and families by assessing youth needs and risks and developing individual treatment plans. Administration addresses the outcome goal of Youth Education by providing educational services to youth in secure custody and under supervision through day treatment services. Youth in secure custody attend

school or prepare for their GED. Youth that have obtained their GED may attend vocational training. OJJ incorporates priorities to ensure a balanced educational program to best meet the individual needs of all students. These include teachers who are certified in Elementary Education as many of our youth are below grade level and need the instructional leader who can address the students at their functioning levels; Teachers who have dual certification areas in Secondary Education: For our high school youth, it is important to have teachers who can provide instruction and instructional support in content subject areas; and, Paraprofessionals who have met the requirement for highly qualified.

**Evidence:**

Nationally recognized performance-based standards for juvenile service programs and institutions, juvenile regional offices, and juvenile community residential and nonresidential centers and day-treatment programs will be met by the administration program to ensure compliance by assessing the following: the CQIS section (Continuous Quality Improvement Services), will ensure compliance with the American Correctional Association (ACA) accreditation standards; perform Quality Assurance Reviews of secure facilities as well as regional offices and Quality Assurance Reviews of OJJ databases; ensure compliance of the agency's Office of Risk Management/Safety Program; ensure continuous reviewing, revising, and developing agency policy; maintain OJJ's Data Warehouse – a system to extract/analyze data determining trends, etc. within the agency; maintain Investigative Services which conducts investigations of abuse, crimes committed on the grounds of OJJ facilities and other internal matters as deemed necessary; and ensure monitoring of CJCA's Performance-based Standards (PbS).

**Objective:**  
To provide comprehensive administrative support services to the Office of Juvenile Justice to include budgeting, procurement, contract, human resources, information technology and accounting services.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of appropriation units having repeat audit findings from the Legislative Auditor.	0	0	0	0	0
New	Supporting	Percentage of CQIS QA reviews having repeat audit findings.	0	0	0	0	0

**Narrative:**  
The Office of Management and Finance (OMF) centralizes and standardizes all support functions of the Office of Juvenile Justice (OJJ) as much as possible to increase economy and efficiency in areas of budget and financial management; contract development; human resources management; information technology development, deployment and equipment maintenance; procurement of supplies and equipment. The OMF provides OJJ managers with the information and knowledge they need to support operational decisions and to understand administrative implications of decisions before they are made. The OMF functions to insure that the OJJ carries out its transactions in accordance with applicable legislation, regulations and executive orders; spending limits are observed and transactions are authorized.

**Explain How This Activity Advances State Outcome Goal:**

The OMF advances the goal of Public Safety by insuring accurate information is provided and controls are in place for all aspects of youth in secure custody. It further ensures all administrative areas are in compliance with federal, state and local regulations that seek to protect the public interest and the well being of youth adjudicated to state custody. The OMF further advances the goal of Transparent, Accountable and Effective Government by enabling managers to monitor their administrative decisions for any potential negative implications and the means to react or adapt as needed. The OMF gives OJJ managers the information that either forms the basis for or is used for management control and accountability purposes by ensuring the availability of timely, relevant and reliable information. The functions of the OMF assure that the OJJ effectively manages resources to carry out its operations with regard to economy, efficiency and effectiveness. The OJJ provides a system of controls for assets, liabilities, revenues and expenditures. These controls help to protect against fraud, negligence, violation of financial rules or principles and losses of assets or public money.

**Evidence:**

The OMF has assisted the OJJ in managing risks to the office which is evidence by fewer audit findings, reduced non-compliance issues and assistance with the achievement of administrative American Corrections Association accreditation.

**Activity ID:** 62

**Activity Name:**  
Contract Services - Residential

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 9000 Contract Services

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide adjudicated youth with a safe environment in which rehabilitation, restorative justice and re-integration may be obtained by placement in a residential environment which serves the needs of youth and families, resulting in lower recidivism rates and successful re-entry to the community.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6529	Key	Percentage of contracted residential programs that participate in nationally recognized performance based standards	100	100	100	100	100
1610	Supporting	Number of residential contract programs	42	49	47	45	45

**Narrative:**

The residential contract services program provides a community-based system of care that provides a humane environment and addresses the needs of youth committed to custody and/or supervision. Particular attention is given to the appropriate placement of youth, which may result in residential placement for a period of time. Residential facilities provide a community-based structured behavioral treatment program for adjudicated youth. Services in residential placement settings include, but are not limited to Development of an Individualized Intervention/Treatment Plan, Individual/Group/Family Counseling, Educational services – traditional or special, Independent/Personal/Career/Life Skills, Parenting skills, Substance Abuse Counseling, Recreation and Leisure, Restorative Justice Program, Social Skills and Medical/Health care services.

**Explain How This Activity Advances State Outcome Goal:**

The goal of the residential services contracts activity is to promote public safety and ensure thriving children and families, while placing youth in the least restrictive environment. However, many youth require more intensive treatment and/or supervision to achieve these goals. The courts may recommend placement in a residential treatment facility offering a more structured setting than the home environment can offer. Residential placement is decided by the courts and is reserved for offenders, youth with behavioral, mental health and/or substance abuse problems, whereby the issues cannot be resolved in the home or community day treatment setting.

**Evidence:**

Successful residential services contracts will be evidenced by 100% of youth receiving treatment at a residential program successfully completing their individualized treatment program, which is developed for each youth's specific

needs. The program will see increased percentages of youth and families who report benefiting from the program as evidenced by annual satisfaction surveys; youth who demonstrate an increased skill/grade level as evidenced by pre-post testing and youth served who do not re-enter the Juvenile Justice System for 18 months after completion of the program.

**Activity Name:**  
BCCY- Director's Office

**Department:** 08C Youth Services

**Agency:** 403 Office of Youth Development

**Program:** 10D0 Bridge City Correctional Center for Youth

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**  
This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**  
To ensure public safety by coordinating all aspects of facility operations, including security, therapeutic and programmatic services for youth, food services, facility maintenance, case management, human resources, and compliance with applicable Federal, State, and local laws/regulations.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20580	Key	Percentage of dorms actively participating in dorm management system (LaMOD)	100	100	100	100	100
20585	Supporting	Number of dorms actively participating in dorm management system	10	7	7	10	10

**Narrative:**  
The Director’s Office coordinates the provision of therapeutic services to adjudicated youth, including substance abuse treatment, sex offender treatment, and the Louisiana Model of Therapeutic Treatment (LAMOD). Additionally, the Director’s Office ensures that the facility complies with the Federal National School Lunch Program (NSLP), Fire Marshall Regulations, Health Department regulations, and other applicable regulations/statutes.

**Explain How This Activity Advances State Outcome Goal:**  
By coordinating all aspects of facility operations, the Director’s Office ensures the safety of the public, and the provision of quality programmatic and therapeutic services to youth. Furthermore, adherence to the LAMOD model ensures that youth are receiving individualized services in order to become productive, law-abiding citizens, which meets the State Outcome Goal of having Safe and Thriving Children and Families.

**Evidence:**  
The successful coordination of facility operations will be evidenced by the increase of the number of youth who successfully reintegrate into their communities upon release from secure custody and a reduction of the recidivism rate.

**Agency:** 403 Office of Youth Development  
**Program:** 10D0 Bridge City Correctional Center for Youth  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide quality academic and vocational education opportunities for secure care youth by working to increase the percentage of youth making academic and vocational gains.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Average increase in academic grade level.	0	0	0	0	2
22439	Key	Percentage of youth receiving vo-tech certificates	18	0	0	45	55
22440	Key	Percentage of youth receiving GEDs	1	7	0	5	8

**Narrative:**

The Education Activity provides educational services to youth in an alternative school setting which incorporates a balanced educational program based on instructional need which facilitates a "group therapeutic approach." An Individual Learning Plan (ILP) is developed for each youth to address individual education needs. Special Education services are provided to youth according to their Individual Education Plan (IEP). Youth may earn Carnegie Units/credits toward a high school diploma. Vocational programs provide the necessary skills to provide youth with basic knowledge in preparation for workforce development.

**Explain How This Activity Advances State Outcome Goal:**

Public Safety will be advanced by the provision of quality academic and vocational education opportunities to youth in secure custody. This is integral in the reintegration process for youth and helps to facilitate transition back into their communities. The goal is to build a workforce with the education and skills necessary to meet the needs of business in a knowledge-based economy through flexible systems and responsive programs.

**Evidence:**

The processes associated with the education component will be evidenced by the percentage of youth making academic gains according to the Test of Adult Basic Education (TABE), percentage of youth receiving GEDs, percentage of youth receiving

terminal diplomas, and percentage of youth receiving vocational certificates.

**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

This activity can be expanded if necessary.

**Activity Type:** Existing

**Objective:**

To provide high quality programmatic, therapeutic, health, dental, mental health, recreational, and food services to youth who have been adjudicated by the courts.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22437	Key	Percentage of youth receiving services as identified in their IIPs	89	0	0	80	95
21977	Supporting	Number of IIPs	83	96	116	70	85

**Narrative:**

The provision of Youth Care services to adjudicated youth at the Swanson Center for Youth ensures that youth are receiving effective and individualized services so that they will become productive, law-abiding citizens. When a youth arrives in secure custody, an Individualized Intervention Plan (IIP) is developed for him by a multi-disciplinary team. The IIP is based on a risk/needs assessment and a psychological evaluation and is designed to ensure that the youth receives needed services. The IIP is periodically reviewed and refined in order to ensure that the youth makes continuous progress.

**Explain How This Activity Advances State Outcome Goal:**

The Youth Care services program advances the safety of the public by assisting youth in redirecting their lives towards responsible citizenship. Furthermore, by adhering to an Individualized Intervention Plan, the youth acquires skills to allow him to become a productive, law-abiding citizen, which also advances the goal of Safe and Thriving Children and Families.

**Evidence:**

The Youth Care activity results will be evidenced by an increase in successful implementation of the number of youth receiving treatment and sustaining progress according to their Individual Intervention Plan (IIP).

**Activity Name:**

Agency Administration

**Department:** 01 Executive Department

**Agency:** 116 Louisiana Public Defender Board

**Program:** 1000 Louisiana Public Defender Board

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To oversee the fair and responsible disbursement of the Louisiana Public Defender Fund, to supervise and improve the delivery of public defense services, to meet/exceed all state mandates per our enabling legislation and to provide for the general operating expenses of the agency

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
1	Key	Provision of counsel to indigent defendants in all criminal cases that carry the possibility of incarceration during times of crisis.	100	100	100	100	100

**Narrative:**

Act 307 sets the administrative duties expected and the LA RS 15:150 sets the staff which is necessary for the program.

**Explain How This Activity Advances State Outcome Goal:**

This activity supports public safety as the main goals of this agency is ensure just, fair and high quality representation of indigent defenders accused of crimes.

**Evidence:**

LPDB recognizes that every dollar it uses for administration is a dollar less that is available to disburse to the field for the delivery of public defense services. With the dual task of serving clients and supporting practitioners, LPDB makes every effort to be the most frugal agency it can, without compromising the scope or quality of our agency mission.

LPDB has trimmed its agency support to 6% of its total budget request. LPDB takes in no locally-generated revenue, though we have the obligation to supervise and support those funds. With the addition of locally generated income, the percentage of the total funds dedicated to public defense, our administration costs dip below 3%. By necessity, we are an incredibly lean agency. Other state public defender agencies across the country with similar oversight mandates regularly exceed more than double our request. For example, the Kentucky Department of Public

Advocacy (the state public defender agency) uses approximately 12% of their total budget for administration. Kentucky has similar population, rural demographic and geographic area as Louisiana. However, they have only 1/3 of the caseload that public defenders handle in Louisiana. Their state agency has a staff of 30. The Louisiana Public Defender Board, recognizing the financial constraints upon our state and the needs of indigent clients and public defenders in the field, is requesting administration costs that expand our capacity from 14 to 16 staff. With more funds we would be able to provide more oversight and accelerate the pace of reform, but we have prioritized procuring a case management system and funding data/financial audit programs to inform future requests. This is the most cost-effective way for LPDB to implement the widely supported legislative mandates of the Public Defender Act of 2007.

**Activity Name:**

Field Operations - Office of State Parks

**Department:** 06 Department of Culture Recreation and Tourism

**Agency:** 264 Office of State Parks

**Program:** 1000 Parks and Recreation

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

If funding for this offer is reduced, closures and partial closures of parks and historic sites will occur based upon a matrix of factors including visitation, cost per visitor, and return on investment.

This offer proposes addition of two new sites with 17 new positions: Palmetto Island State Park in Vermillion Parish and Forts Randolph & Buhlow State Historic Site in Rapides Parish. Construction of these sites will be completed in November, 2009 but they will be placed in caretaker status and not opened because funding for operations was not included in the agency's budget this fiscal year. This funding is sought for next fiscal year.

**Activity Type:** Existing

**Objective:**

To increase the number of visitors served by the park system to at least 2,500,000 by the end of fiscal year 2012-2013, and to reach 220,000 individuals through program participation in interpretive programs and events offered annually by the park system by the end of fiscal year 2012-2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard

1285	Supporting	Number of Interpretive Programs and Events Offered Annually	21261	22747	21239	21550	23000

**Narrative:**

The Office of State Parks (OSP) operates 21 recreation areas that attracted over 2 million visitors annually. From the piney rolling hills of north Louisiana, to the swamps of the Atchafalaya Basin, OSP protects and preserves 42,526 acres for recreational enjoyment, and as natural sanctuaries. These 21 sites feature overnight accommodations including group camps, 220 modern vacation cabins, and 1,644 RV and camping sites. OSP sites operate more than 165 miles of hiking, biking, equestrian and canoe trails, offering visitors an opportunity to explore Louisiana in a safe and unique manner. Interpretive Rangers at recreation sites conducted 2,879 programs for 78,031 people in FY 08-09. This offer provides for the expansion of this program by opening Palmetto Island SP.

OSP preserves, protects and interprets 16 State Historic Sites. From Civil War-era forts, battlefields and plantations, to pre-historic mound sites and 19th century farmsteads, these sites have considerable intrinsic historical and educational value. Additionally, these sites play an increasingly important role in the state's cultural economy since

they serve as key links to a wide variety of public and private institutions interested in building the state's heritage tourism industry. Interpretive staff presented 18,382 programs to 144,855 visitors including approximately 50,000 school children. This offer provides for the expansion of this program by opening Forts Randolph & Buhlow SHS.

Louisiana Outdoors Outreach Program (LOOP) provides educational, recreational and related outdoor programs to underserved and at-risk youth. A comprehensive curriculum addresses clients' grade level expectations and psychosocial needs through partnerships with Title I schools and agencies. A typical program takes groups through a series of organized, adventure-based activities. This begins with a series of in-class workshops, followed up with excursions into outdoor environments. There are 3 areas of emphasis: environmental education, outdoor skills, and psychosocial skills. After introducing this program in New Orleans, the program has since expanded to address the needs of underserved and at-risk youth in the Baton Rouge area, and has plans to expand into the Lafayette region and beyond.

#### **Explain How This Activity Advances State Outcome Goal:**

The Office of State Parks (OSP) preserves and protects LA's natural and cultural resources of exceptional scenic and cultural value affording citizens unique experiences of the resources that make our state a "Sportsman's Paradise." During this time of diminishing resources, OSP has gone to great lengths to seek partnerships with outside agencies to accomplish our mission. Current partners include all other DCRT agencies, the U.S. Army Corps of Engineers, the National Park Service, LPB, the Barataria-Terrebonne National Estuary Program, Tulane University, Nicholls State University, LSU, the University of Mississippi, the LA Department of Wildlife and Fisheries, and many others. As a result of these, and other partnerships, OSP has been able to make available for research LA's flora and fauna, as well as her cultural resources, thus building a diversified interest and understanding as to what makes LA unique and worthy of international attention. OSP takes a leading role educating our citizens as to the importance of maintaining these resources for future generations. In FY 08-09 OSP undertook a major operational "green" initiative, committing to, and promoting to the public, environmentally friendly practices at all of our sites.

OSP is working to improve the health & educational opportunities for LA citizens by providing quality, safe recreational facilities which promote healthy lifestyles. A study by the Pennington Biomedical research team in a report published in "The Advocate" gave LA children's health a "D" for the second year in a row. As a result, OSP is an active participant in the Children in Nature initiative. The Children in Nature initiative is a multi-state initiative, originating with California State Parks, to increase the number and variety of opportunities for children to experience and benefit from interacting with the natural world.

#### **Evidence:**

More than 2-million visitors enjoyed the 21 parks and 16 historic sites resulting in direct primary spending of more than \$41 million. According to a 2005 study conducted by the Louisiana Research Team, out of state visitors to OSP sites expended almost \$12 million in LA and produced an economic impact of more than \$24 million. Every dollar spent by OSP resulted in a \$3.23 impact on the local and state economies. Since FY 05-06 visitation at the state parks has increased from 1,596,305 to 2,078,920 or by 482,615 or 30.23%

Through a 75-year history, OSP has preserved, protected and portrayed sites of statewide importance including 42,526 acres for recreational enjoyment and as natural sanctuaries. This offer provides for continuation of this important role of preserver and educator of LA's natural and cultural resources through the expansion and operation of the newly completed Palmetto Island SP and Forts Randolph & Buhlow SHS.

Plantations, colonial sites, pre-historic mound sites and other intrinsic cultural gems that have considerable educational value are preserved, and interpreted by OSP. Several State Historic Sites are linked to the Civil War, and are of nation wide significance. The nation will engage in the sesquicentennial starting in 2011, and LA's Civil War sites will be front and center of this very important milestone, stimulating additional visitation across the state. The significance of many of these sites has already been recognized by an international audience. For example, the Poverty Point SHS has been nominated as a potential World Heritage Site, as determined by UNESCO/ICOMOS, for its size and significance. These sites also play a very important role in LA's cultural economy since they serve as key links to a wide variety of public and private institutions interested in building the state's heritage tourism industry.

Annually, over 50,000 school children visit state parks and participate in programs either as part of organized school day events or as educational field trips. These activities are coordinated directly with local schools in the communities served by OSP. Each site is expected to develop "Teacher Packets" which describe how the local site can best serve the school by incorporating what is being taught in the classroom, including information about the site, pre and post field trip lesson plans, Grade Level Expectations (GLE), and scheduling field trips.

**Activity ID:** 591

**Activity Name:**

State Historic Preservation Office

**Department:** 06 Department of Culture Recreation and Tourism

**Agency:** 265 Office of Cultural Development

**Program:** 1000 Cultural Development

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Local Main Street communities consistently state that building design technical services are the most beneficial services provided to them by Louisiana Main Street in terms of the economic and physical revitalization of their commercial districts. The requested T.O. position, which was cut for FY 09, is vital to providing the technical expertise for building design services and to overseeing the very successful façade grant program, which is an incentive used to put vacant buildings back into commerce creating new businesses and jobs.

**Activity Type:** Existing

**Objective:**

Administer statewide programs to create jobs in Main Street communities, preserve historic properties around the state, and maximize the percentage of proposed Section 106 projects reviewed.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
1287	Key	Number of historic properties preserved	428	235	169	203	203
10310	Key	Percentage of proposed projects reviewed	100	100	100	75	75
22342	Key	Number of new jobs created through the Main Street Program	571	0	0	600	600

**Narrative:**

The State Historic Preservation Office (SHPO) promotes economic and workforce development while preserving the state's unique cultural heritage. Programs through SHPO include:

The Main Street Program provides funding and technical assistance for the redevelopment and revitalization of commercial corridors in rural and inner city communities;

The Rehabilitation Tax Credit Program guides developers and private property owners through the complex structure to access federal and state tax credit program for the rehabilitation and return to commerce of abandoned, blighted historic properties;

The Section 106 Review program is a required service for any private, public or commercial development that has any federal agency involvement or funding;

The National Register Program, which determines which properties have historic significance, is an essential component in determining eligibility for projects wanting to access federal/state tax credits, approval through Section 106, or other funding available through federal sources;

The Heritage Education Program provides multi-subject area curriculum based educational resources to school teachers statewide;

The Regional Archaeologist Program (in partnership with five Louisiana universities) provides technical assistance and resources to the public who are interested in preserving or developing projects which may impact archaeological sites in the state. Curation of historic artifacts from state supported projects is also a part of this program.

The services of the SHPO leverage federal and state resources for community-based economic development statewide. Additionally, projects supported through the work of the SHPO create jobs and better educational opportunities for Louisiana citizens. Tourism in the state also benefits from the preservation and promotion of these unique and irreplaceable cultural resources.

#### **Explain How This Activity Advances State Outcome Goal:**

The SHPO has consistently shown an immense ability to build economic development in Louisiana. SHPO programs have a proven track record of creating jobs as a result of the federally mandated programs they implement. Many of these programs act as a vehicle to drive redevelopment in our small towns and urban cities. The Section 106 Review process often requires consultants from many parts of the nation to access archaeology maps and reports, as well as historic preservation standing structure files. This process alone brings \$14 million dollars to our state annually supporting highway projects, pipeline installations and large redevelopment projects. This process also helps to build lasting job opportunities across our state. The tax credit program has also been a proven tool in revitalizing undervalued historic neighborhoods and commercial corridors. Since its inception in 1986, the Rehabilitation Tax Credit Program has leveraged more than \$1.4 billion in private investment in our state. Last year, more than 10,000 jobs were created as a result of this program. These jobs included both a skilled and unskilled workforce.

#### **Evidence:**

The State Historic Preservation Office offer promotes economic development. Last year, the Federal and State Rehabilitation Tax Credit program successfully leveraged approximately \$392.3 million in private investment in historic properties, creating 10,323 jobs. Since 1984, the Main Street program has helped to create 1,897 new businesses, 8,072 new jobs, \$236 million in building rehabs and new construction, \$333.5 million in private investment and \$84 million in public improvements, resulting in a reinvestment ratio for this program of \$1: \$140. The Main to Main program, a promotional activity of the Main Street Program, leveraged approximately \$9 million last year to provide economic support to 29 communities. The SHPO reviews 100% of the over 13,000 development projects requiring Section 106 review in an efficient and timely manner, providing effective service to clients and agencies involved in economic development. During the last five years, the amount of money spent annually in state documenting and assessing Louisiana's cultural resources affected by these development projects has more than quadrupled from \$3 million to over \$14 million. The SHPO also serves Louisiana's citizens through outreach activities that reach over 95,000 people each year through teaching kits, websites, booklets, Archaeology Month activities, and the Region and Station Archaeology program. The SHPO partners with 5 state agencies, 8 federal agencies, over 40 private firms, and 5 universities to identify, assess, preserve and protect Louisiana's cultural resources. The programs and services within the SHPO serve as a driver for the state's cultural tourism market.

**Activity ID:** 561

**Activity Name:**

Black Bear Golf Course and Audubon Golf Trail

**Department:** 06 Department of Culture Recreation and Tourism

**Agency:** 267 Office of Tourism

**Program:** 2000 Marketing

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Creation and implementation of a pilot program that would open Black Bear Golf Course and Resort and the facilities at nearby Office of State Parks properties for usage by non-profit groups and associations that offer services and related activities to at-risk and underserved youth. Emphasis would be placed on groups and associations that work with state agencies that have shared missions, such as the Office of State Park's Louisiana Outdoors Outreach Program (LOOP). Budget to include purchase of equipment and golf fees. Initiative to take place within 6 months with evaluation in 12 months. Anticipated budget \$27,000.

Management of a Black Bear Stay and Play Lodge on the course property. The physical building is scheduled to be completed in spring 2011. This project will increase the number of statewide hotel/motel room supply, support employment in the underserved community, and promote the Louisiana golf industry. Anticipated annual operating budget is \$200,000.

**Activity Type:** Existing

**Objective:**

By 2013, to increase the annual number of rounds of golf played on Audubon Golf Trail courses to 400,000.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20693	Key	Annual number of rounds played yearly on Audubon Golf Trail courses	293707	310358	283502	325000	325000

**Narrative:**

The trail's benefits are multi-faceted, as a local tourism and economic driver in course communities and a contributor to the overall quality of life for Louisiana residents. Courses are located in New Orleans, Alexandria, Lafayette, Shreveport, Lake Charles, Patterson and Marksville; near Baton Rouge, Monroe and Hammond; and on the banks of Toledo Bend Reservoir.

Audubon Golf Trail courses make a \$446 million impact to the state's economy in urban and rural areas, providing not only direct and indirect jobs and spinoff private sector development in their regions but also recreation, education and natural/scenic preservation endeavors for locals. Member courses also consistently receive favorable reviews in national golf magazines, touting them for both great golf plus an abundance of nearby fun and educational tourism attractions and great restaurants and overnight providers. AGT reinforces outdoor sportsman's paradise.

Golf is a high return on investment activity for visitor spending and attracts high end spending. Golf courses help market and brand the state as an attractive location to invest and operate a business and enhance the community.

**Explain How This Activity Advances State Outcome Goal:**

AGT/Black Bear has a measurable and diversified work force. The trail creates a better quality of life that is positioned for growth by providing public access to upper- tier facilities at a reasonable cost. This effort provides an opportunity to leverage other state resources and increase awareness, such as parks and byways and helps build a diversified portfolio of businesses across multiple industry segments. These businesses offer a wide range of job opportunities, professional experience, and community growth through the use of financial, cultural and natural resources. AGT markets and brands the state to strategically place Louisiana as a premiere tourist destination. Creates infrastructure, such as roads, facilities, green space, and recreation. AGT has been used as a best practice model in other golf trail developments, which maintains competitive edge over other states.

**Evidence:**

Most of the AGT courses are owned and operated independently, with a notable exception being the Black Bear course and resort in the town of Delhi. AGT operations directly creates and sustains jobs locally at participating courses and Black Bear employs operational and administrative staff plus the staff at the leased space restaurant. These jobs are created in a local community that is one of the poorest parts of the state. Across the country, golf has enjoyed increasing popularity, whether it is the primary motivation for a trip or is connected to other recreational time spent with friends and family or business colleagues. Based on the 2008 Travel & Destination Study prepared by U. S. Travel, golfers personally spent an average of \$2,763 on their most recent golf vacation, 54% more than the typical affluent traveler. In addition, golfers are significantly more likely than affluent travelers to participate in culinary activities on vacation. Researchers with the U.S. Travel Association have repeatedly cited the tourism industry as a critical component in Louisiana's continuing economic recovery from the 2005 hurricanes. U.S. Travel says a 7 percent increase in total travel industry expenditures in Louisiana between 2007 and 2008 reflects in part ongoing hurricane recovery efforts.

**Narrative:**

The mission of the Office of the Secretary is to position Louisiana to lead through action in defining a New South through Culture, Recreation & Tourism, and through strategic and integrated approaches to the management of the Office of State Parks, the Office of Tourism, the Office of State Museum, the Office of Cultural Development, and the Office of State Library.

The Office of the Secretary guides the Department in achieving the following results: building Louisiana’s travel and tourism industry to create and retain jobs, as well as generate revenue for the state’s tax base; diversifying Louisiana’s economy by leveraging culture to create and retain jobs, drive commercial investment and grow personal income; improving educational and workforce development opportunities through access to information, public programming and unique cultural assets; delivering transparent, accountable and cost efficient government services to our citizens while being innovative and customer driven; preserving Louisiana as a sportsman’s paradise by protecting and expanding our natural, cultural and historic resources for public use and enjoyment; and leveraging community service as a strategy to develop job skills, strengthen communities and build a culture of citizenship and responsibility in Louisiana.

The Office of the Secretary provides a foundation to ensure all CRT agencies perform above and beyond department goals, results, and performance standards, to ensure its work is both transparent and effective. The evolution of CRT into a high performing, accountable, and transparent organization that acts to create a quality workforce, values customers’ expectations, effectively manages its resources and leverages external partnerships increases the economic impact of the state’s tourism industry and develops its cultural economy.

CRT has created an organization that is transparent, accountable and efficient; its workforce is entrepreneurial and accountable. Results achieved from this foundation include, but are not limited to the following: the Department has raised the bar for creating tourism economic benefits for the state; it has created the cultural economy initiative and grown that industry’s workforce; it has contributed greatly to emergency and disaster management and assistance;

and it has developed communities through main streets and cultural districts that leverage growth opportunities for local communities.

#### **Explain How This Activity Advances State Outcome Goal:**

The Office of the Secretary and its agencies have created a high performing and accountable workforce. This is accomplished by the development of a workforce that realizes its importance to the organization's success and to the people we serve. Improved internal communications, appropriate training, clear delivery of the organization's long-term results and goals, and encouraging feedback creates a staff that takes ownership of the products and services offered by the organization. This is achieved through assessing the public benefit of our organization's work, assessing roles and responsibilities of agencies and employees, and utilizing all opportunities to improve service to the public, as well as improve efficient service provision.

The Office of the Secretary achieves this environment through leading and overseeing successful reorganizations of programs and services across the Department. Substantial reorganizations have occurred in the Office of Tourism, Cultural Development, and State Museum. A smaller reorganization occurred in the Office of State Library.

In addition, the Office of the Secretary employs progressive techniques to empower employees across the organization to develop more efficient and effective ways to serve the public. A "Quick Wins" model has been employed to make procedures and processes more efficient, thereby saving time and money. Agencies and programs across the Department have employed Quick Wins strategies to streamline operations.

The Office of the Secretary also pioneered the Budgeting for Outcomes model in Louisiana. This model enables the Department to prioritize its programs and services, cut smart, reorganize, and invest wisely. The process has enabled CRT to cut what is less effective, and invest in those activities that create the greatest return on investment for the people of the state.

#### **Evidence:**

The Office of the Secretary ensures that all CRT agencies perform above and beyond department goals and performance standards to ensure its work is both transparent and effective. The evolution of CRT into a high performing, accountable, and transparent organization that acts to create a quality workforce, values customers' expectations, effectively manages its resources and leverages external partnerships increases the economic impact of the state's tourism industry and develops its cultural economy. These industries employ 15% of Louisiana's work force, so it is crucial that CRT lead the state's efforts to grow and sustain these industries and workforces.

The Office of the Secretary has guided the Department in achieving its goals by: pioneering the Budgeting for Outcomes model in state government; enacting smart cuts, reorganizations and outsourcing that saved taxpayers \$16 million; enacting the Rebirth Accountability Advisory Panel that reviewed all departmental programs and services and graded CRT an A+ on its recovery work; and ensuring a quality workforce through such initiatives as the CRT Leadership Academy which trains emerging leaders for the Department's future.

Further, CRT commissioned a study of its impact on Louisiana's economy and the state fisc. A statewide university consortium reviewed all programs and services-those traditionally seen as economic drivers, and those that are not. The research team concluded that for every dollar taken in by CRT, the organization returns \$6 to the state fisc. This is a significant return on investment for Louisiana and for state government.

------------------------------	-----	------------------------------

**Activity ID:** 717

**Activity Name:**

Louisiana Commission for the Deaf

**Department:** 10 Department of Social Services

**Agency:** 374 Rehabilitation Services

**Program:** 3000 Specialized Rehabilitation Services

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

The Telecommunications for the Deaf fund is currently \$6.8 M. The SFY 2010 budget is \$2.8 M. An additional \$2.2 M is needed to eliminate the waiting list leaving a balance of \$1.8 M. It is estimated \$3.6 M is needed annually to run the program. Annual revenue is approximately \$1 M per year which will be insufficient funding for SFY 2012. Without this program individuals currently served would not have the specialized technologies and services needed to use the telephone; hear or understand information from their physician; or hear ordinary conversations; and experience barriers in their routine activities of daily living. It would also impact the state's ability to comply with federal accessibility mandates. As part of the DSS Streamlining document, this program has been recommended for consideration of transfer to DHH.

**Activity Type:** Existing

**Objective:**

To increase by 600, the number of consumers benefiting from the provision of specialized equipment and services which lead to accessibility of public and private services by June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3359	Key	Number of consumers benefiting from outreach activities	6980	4084	4412	6290	6590
8305	Key	Percentage of consumers rating services as good or excellent on Customer Satisfaction Survey	97	96	94	94	97
New	Key	Number of consumers able to access public and private services as a result of services received	10048	7112	7225	9615	10215

**Narrative:**

The Louisiana Commission for the Deaf (LCD) promotes, coordinates, and facilitates accessibility of Louisiana's public and private services to individuals who are Deaf, deaf-blind, hard of hearing or have speech impairment. Programs include the Hearing Aid Program, Telecommunication Equipment Distribution Program, Interpreting/Transliterating Services, Support Service Provider Program, Deaf-Blind Emergency Preparedness & Deaf-Blind Emergency Response. Individuals who are deaf and blind have continued need of Support Service Providers (SSP) to provide door to door travel assistance, and, through use of the SSP's basic signing skills,

assistance to enable handling of business and personal matters. Additionally, they are in need of and are being provided with skilled interpreters and specialized equipment to enable communication for equal access to public and private services in and around their community. Persons who are deaf and blind are in need of and are provided with telecommunication equipment enabling communication with persons who are hearing as well as those who are deaf, or deaf and blind. Consumers who are deaf-blind are also provided with other equipment such as the personal tactile signaler which vibrates in patterns to inform them of a telephone call or that the doorbell is ringing. Deaf Blind persons are also provided with emergency preparedness training, a back pack for use during evacuations, and a specialized I.D. badge at designated shelters, as preparation for a natural disaster or civil emergency. Persons who are deaf are provided with interpreting services and telecommunication equipment such as TTY's, signaling equipment which enables a lamp to flash to inform them of a telephone call, or that they have a visitor at the door to their home, etc.

#### **Explain How This Activity Advances State Outcome Goal:**

The services provided by LCD advance the state outcome goal of "Better Health" by maximizing community resources to meet the needs of individuals with disabilities. Services provided by LCD help to enable consumers to optimize their skills and abilities for increased independence at home and in the community. Facilitation of communication skills empowers consumers with disabilities, enabling them to make better choices and to handle business, medical, and personal matters more independently, thereby increasing their access to community based services and reducing their need for more costly and less restrictive living environments. Additionally, the increased independence fosters pride of accomplishment, encouraging consumers to take personal responsibility for their business, medical and personal matters, while enabling them to use cost effective measures in handling these matters.

#### **Evidence:**

During Fiscal year 2009:

3,878 consumers were provided with interpreting/transliterating services  
 3,068 consumers received telecommunication devices  
 6,980 consumers benefited from outreach activities in the community  
 404 persons received assistive hearing devices (hearing aids),  
 237 person who are deaf-blind received emergency preparedness training and back packs for evacuation.

Despite a national shortage of interpreters, ten interpreters became certified through Louisiana Commission for the Deaf during FY 09. Additionally, to address this shortage and increase service provision to consumers, interpreting services via Video Remote Interpreting is provided to consumers through contracted services. An increasing number of consumers are being served through telecommunication equipment distribution, interpreting services, and other services, yet consumers remain satisfied with services, per a 97% satisfaction rate obtained from the FY 2009 Consumer Satisfaction Survey.

**Activity ID:** 724

**Activity Name:**

Vocational Rehabilitation Administrative

**Department:** 10 Department of Social Services

**Agency:** 374 Rehabilitation Services

**Program:** 1000 Administration and Support

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Vocational Rehabilitation (VR), only national program whose sole mission is employment of persons with disabilities. Reductions impact service provision & employment for persons served; resulting in loss of potential employees for business; person/family income; state revenue and tax dollars income; increased dependency on state assistance. Services prioritized during periods of limited funding; recent budget reductions resulted in program serving only 2 of 5 disability groups. Categories 3-5 which currently has 821 individuals on the waiting list are not being served. Additional reductions may result in closing all categories, cancellation of existing cost service plans, office closures, staff layoffs, closure of community providers business, loss of revenues to colleges/ universities. VR program is 21.3% state and 78.7% federal (\$1.00 state funds & \$3.64 federal), is vital to meeting workforce needs. LWC & VR transfer discussions continue which is part of DSS Streamlining Report.

**Activity Type:** Existing

**Objective:**

To provide effective administration of LRS programs to assist individuals with disabilities to become successfully employed and advance independence and self-sufficiency through SFY 2015.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3317	Key	Number of individuals served statewide	28867	29205	26423	26209	23000
8281	Supporting	Annual average cost per consumer served	2006	2114	2170	2708	2006

**Narrative:**

This activity provides administrative support for the effective and efficient operation of the Vocational Rehabilitation (VR) Program and other specialized programs for the delivery of services to individuals with disabilities. The VR Program is a mandated workforce investment partner and is charged with the mission to "successfully rehabilitate" Louisiana's individuals with disabilities by placement into gainful employment. This activity provides broad oversight of the VR Program and includes responsibilities related to governance, management, technical assistance and policy interpretation. The administrative activity conceptualizes and communicates the vision, guiding the organization towards achieving goals and results. Resources are provided to staff across the state including but not limited to office space for administrative and executive staff, information technology supports, and security.

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state outcome goal of "Safe and Thriving Children and Families" and "Transparent, Accountable, and Effective Government." Program administration effectively manages resources (including qualified personnel and funding) in a manner that promotes the goals of making government more transparent, accountable and efficient. Strategic planning is conducted to define visions, mission, outcome goals and strategies to a results-oriented delivery of services. The administration and support is vital to the Vocational Rehabilitation (VR) program

and specialized programs which provide needed services to individuals with significant disabilities, one of the most vulnerable populations in Louisiana. VR Administration provides the vision and leadership as well as the appropriation of human resources, and budget and fiscal administration of the VR Program.

**Evidence:**

As a result of LRS' commitment to the provision of quality services, the agency received no findings from the most recent audit completed for the year ending June 30, 2008 by the Louisiana Legislative Auditor's Office. The provision of these services assists individuals to become tax paying citizens and have a major economic impact on the state of Louisiana. In SFY 2009, 2,401 individuals with disabilities were successfully employed as a result of services provided through the VR Program. In SFY 2009 an individuals annual average earns at acceptance was \$4,004 in comparison to \$17,264 at closure. Eighty-three percent of vocational rehabilitation consumers rated services as "good or excellent" on the most recent consumer satisfaction survey conducted by the Louisiana Rehabilitation Council. Data indicates the VR program is making significant strides toward assisting to meet the employment needs of business and industry through an available pool of individuals with disabilities who are trained and qualified. In SFY 08, 3,734 (48%) of LRS' VR training plans written were to provide training in Louisiana's top three occupational demand fields and 1,213 (43%) individuals were successfully employed in Louisiana's high-demand occupational fields based on the LWC Occupational Forecasting Information. A 2004 Cost Benefit Analysis revealed that for every \$1 invested in consumers with disabilities receiving services through the VR Program \$9 is returned to Louisiana in the form of increased taxes and reduced public assistance payments.

14007	Key	Average percentge level of statewide agency compliance with agency documentation requirements	95.8	95.5	95	90	90

**Narrative:**

This activity provides programmatic and technical assistance to ensure compliance with federal regulations. In addition, this activity provides comprehensive rehabilitation services that go beyond those found in routine job training programs and are designed to provide the skills, resources, and expectations needed for individuals with disabilities to compete in the interview process, get the job, keep the job, and develop a lifetime career. The program provides opportunities for individuals with disabilities to become part of a quality workforce to provide business and industry with qualified applicants for employment. LRS utilizes Vocational Rehabilitation Counselors (RC's) who are specifically trained to work with persons who have disabilities, serve as resources to businesses, and other community services to provide a quality workforce that is aligned with the needs of Louisiana's businesses. The

Rehabilitation Counselors meet in a face-to-face environment with the individual with a disability to document the disability and begin the eligibility determination process. After determination of eligibility and order of service priority (individuals with the most significant disabilities receive highest priority for services), the counselor conducts a comprehensive assessment to assist the consumer in identifying a vocational goal and the services that are needed to reach the employment goal. The result is the collaborative development of an Individualized Plan for Employment (IPE) that reflects the employment goal, services, service providers, and costs. Comprehensive rehabilitation services frequently include career counseling and guidance, work evaluations and assessments, job readiness services, assessment for and provision of assistive technology, motor vehicle modifications, training, supported employment, interpreter services, job development and placement, and other such services to obtain and/or maintain gainful employment. The case of an individual with a disability is successfully closed after services have been provided and the individual has maintained employment for 90 days.

#### **Explain How This Activity Advances State Outcome Goal:**

The VR Program assists in diversifying economic growth by developing individual plans of employment aligned with the current and future needs in Louisiana's economy. This is achieved by collaborating with Louisiana Workforce Commission to develop training plans for the identified top demand occupations. The provision of these services advances the three inter-related elements (jobs, wages, and people) tied to successful economic development efforts by providing services to individuals with disabilities to get them employed, increase their wage earning potential, and increase the per capita income of Louisiana families. The VR Program also provides opportunities for entrepreneurship and small business ownership for individuals with disabilities, tax incentives for employers, and reimbursement of wages paid through on the job training. This program is funded by 78.7% federal funds and 21.3% state general funds.

#### **Evidence:**

VR services enable individuals with disabilities who receive public assistance to enter the workforce, therefore reducing and/or eliminating their need for public assistance. This is further evidenced by a 2004 Cost Benefit Analysis conducted by Louisiana State University, Health and Science Center, Human Development Center, which revealed that for every \$1 invested in consumers with disabilities receiving services through the VR Program \$9 is returned to Louisiana in the form of increased taxes and reduced public assistance.

**Activity Type:** Existing

**Objective:**

To increase by 600, the number of consumers benefiting from the provision of specialized equipment and services which lead to accessibility of public and private services by June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3359	Key	Number of consumers benefiting from outreach activities.	6980	4084	4412	6290	6590
8305	Key	Percentage of consumers rating services as good or excellent on Customer Satisfaction Survey	97	96	94	94	97
New	Key	Number of consumers able to access public and private services as a result of services received	10048	7112	7225	9615	10215

**Narrative:**

The Louisiana Commission for the Deaf (LCD) promotes, coordinates, and facilitates accessibility of Louisiana's public and private services to individuals who are Deaf, deaf-blind, hard of hearing or have speech impairment. Programs include the Hearing Aid Program, Telecommunication Equipment Distribution Program, Interpreting/Transliterating Services, Support Service Provider Program, Deaf-Blind Emergency Preparedness & Deaf-Blind Emergency Response. Individuals who are deaf and blind have continued need of Support Service Providers (SSP) to provide door to door travel assistance, and, through use of the SSP's basic signing skills, assistance to enable handling of business and personal matters. Additionally, they are in need of and are being provided with skilled interpreters and specialized equipment to enable communication for equal access to public and private services in and around their community. Persons who are deaf and blind are in need of and are provided with telecommunication equipment enabling communication with persons who are hearing as well as those who are

deaf, or deaf and blind. Consumers who are deaf-blind are also provided with other equipment such as the personal tactile signaler which vibrates in patterns to inform them of a telephone call or that the doorbell is ringing. Deaf Blind persons are also provided with emergency preparedness training, a back pack for use during evacuations, and a specialized I.D. badge at designated shelters, as preparation for a natural disaster or civil emergency. Persons who are deaf are provided with interpreting services and telecommunication equipment such as TTY's, signaling equipment which enables a lamp to flash to inform them of a telephone call, or that they have a visitor at the door to their home, etc.

#### **Explain How This Activity Advances State Outcome Goal:**

The services provided by LCD advance the state outcome goal of "Better Health" by maximizing community resources to meet the needs of individuals with disabilities. Services provided by LCD help to enable consumers to optimize their skills and abilities for increased independence at home and in the community. Facilitation of communication skills empowers consumers with disabilities, enabling them to make better choices and to handle business, medical, and personal matters more independently, thereby increasing their access to community based services and reducing their need for more costly and less restrictive living environments. Additionally, the increased independence fosters pride of accomplishment, encouraging consumers to take personal responsibility for their business, medical and personal matters, while enabling them to use cost effective measures in handling these matters.

#### **Evidence:**

During Fiscal year 2009:

3,878 consumers were provided with interpreting/transliterating services  
 3,068 consumers received telecommunication devices  
 6,980 consumers benefited from outreach activities in the community  
 404 persons received assistive hearing devices (hearing aids),  
 237 person who are deaf-blind received emergency preparedness training and back packs for evacuation.

Despite a national shortage of interpreters, ten interpreters became certified through Louisiana Commission for the Deaf during FY 09. Additionally, to address this shortage and increase service provision to consumers, interpreting services via Video Remote Interpreting is provided to consumers through contracted services. An increasing number of consumers are being served through telecommunication equipment distribution, interpreting services, and other services, yet consumers remain satisfied with services, per a 97% satisfaction rate obtained from the FY 2009 Consumer Satisfaction Survey.

**Activity ID:** 753

**Activity Name:**

Randolph Sheppard Business Enterprise Program

**Department:** 10 Department of Social Services

**Agency:** 374 Rehabilitation Services

**Program:** 2000 Vocational Rehabilitation Services

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

The Randolph-Sheppard program has a significant positive economic impact on the state. Without this program, there would be an immediate loss of 500 plus jobs, 15.4 million loss in annual sales, 6 million loss in food purchases, new equipment and services needed to run the program and an average loss of \$28,865 taxable income from blind managers. The Vocational Rehabilitation Program, (which is inclusive of the Randolph Sheppard Business Enterprise Program), a mandated partner in the Workforce Investment Act, is instrumental in meeting the workforce needs of the State of Louisiana. Preliminary discussions have begun and will continue with LWC to transfer the Vocational Rehabilitation Program which would result in more effective coordination of workforce initiatives relating to employment of individuals with disabilities. This transfer is part of the Streamlining Report completed by DSS.

**Activity Type:** Existing

**Objective:**

To assist licensed entrepreneurs who are blind to successfully manage and maintain viable food service enterprises and increase the number of managers earning \$25,000 annually by June 30, 2012.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3312	Key	Number of Randolph Sheppard vending facilities	84	86	88	84	81
New	Key	Average annual wage of Randolph Sheppard vending facility managers	28865	23388	18899	23388	25000
New	Key	Number of RandolphSheppard vending facility managers whose annual earnings increased to \$25,000 or above	0	0	0	0	5

**Narrative:**

The Randolph-Sheppard Enterprise Program of the Vocational Rehabilitation Program provides entrepreneurial opportunities for consumers who are legally blind to manage their own food service business by giving them preference for such operations on federal, state, and even some municipal property. Blind entrepreneurs currently manage 82 facilities throughout Louisiana ranging in scope from vending machine only to pre-packaged snack bars, fresh food facilities, and full service cafeterias. Licensed managers and facilities are supported by a Randolph Sheppard Management Analyst (RSMA), who provides business consulting services to Licensed Managers and coordinates facility maintenance and repair services. This affords individuals who are blind, and licensed by LRS, the opportunity to become productive taxpaying members of society.

The Randolph Sheppard Program began in 1936 as a federally mandated program, and is now mirrored in 49 of 50 states through "mini Randolph-Sheppard laws." Through the Louisiana program, 70 individuals who are legally blind work as independent managers running 82 locations throughout the state. The RSMAs oversee these facilities,

which are located in various federal (12), state and municipal (71), and private (3) buildings.

### Explain How This Activity Advances State Outcome Goal:

Services provided by the Randolph Sheppard Program advance the State Outcome Goal of Safe and Thriving Children and Families and contributes to the Economic Growth as well. These services are provided to individuals with disabilities to get them employed, increase their wage earning potential and increase the per capita income of Louisiana families. Through providing support for our blind managers to run their own individual food service businesses, economic outcomes are provided for the state by affording an opportunity for individuals who are blind to run their own business. This is especially significant as research from the National Federation of the Blind indicates that as many as 75% of working aged individuals who are blind are either unemployed or under-employed. In addition to locations in public buildings, the Randolph-Sheppard program has three locations in private businesses, which promotes public private partnerships. The Randolph-Sheppard program currently has vending machines at the State's welcome centers. This is done in partnership with the Louisiana Department of Culture, Recreation, and Tourism, and/or the Louisiana Department of Transportation and Development, and promotes partnership among state agencies, as well as hospitality to our visitors. The Randolph Sheppard Business Enterprise Program is funded by two funding sources: (A)The Blind Vendors Trust Fund which is provided for by R.S. 46:2641. Income for the trust fund is derived from proceeds from vending machines which are not assigned to a blind manager, and can only be utilized for the following purposes (1) maintenance and replacement of equipment, (2) purchase of new equipment, (3) management services, (4) assuring a fair minimum return to operators of vending facilities, and (5) retirement or pension funds, health insurance contributions, and provision for paid sick leave and vacation time for licensed managers.

### Evidence:

Research by the National Federation of the Blind indicates there is between 70 and 75% under-employment or unemployment among working aged individuals who are blind.

Income of our managers who are blind is a performance measure for the success of our program on a national level. Nationally, in 2007, there were 3,031 Randolph-Sheppard locations, and managers earned a total income of 116,264,669. Average manager income was \$46,753. In Louisiana, manager income has been identified as one of the top priorities on which we have been working in order to create higher paying managerial opportunities so that we can meet and/or exceed the national average in manager income. By aggressively making changes in our business practice in just the past two years, average income for managers in Louisiana has increased nearly \$10,000. In SFY 2008 the average annual wage was \$23,388 as compared to the average annual wage of \$28,865 in SFY 2009. Last year, our 84 locations generated over \$15.4 million in gross sales, and our managers who are blind provided employment opportunities for 433 individuals. Randolph Sheppard administration monitors the locations for compliance with health and sanitation codes, as well as provides technical assistance to ensure the success of these business and quality customer service. In addition, the mandated Committee of Blind Managers make recommendations on how to improve the program and has over 100 combined years of management experience in the Randolph-Sheppard program.

**Activity ID:** 709

**Activity Name:**

Administration and Support

**Department:** 10 Department of Social Services

**Agency:** 360 Office of Children and Family Services

**Program:** 1000 Administrative and Executive Support

**State Outcome Goal:** 6 Safe and Thriving Children and Families

**Scalable:** True

**Scalable Description:**

Management and Finance support the programs within the Office of Children and Families. If there are program eliminations, these support functions may be reduced based on the size and complexity of the programs eliminated.

**Activity Type:** Existing

**Objective:**

Coordination of department efforts by providing operational management oversight to all DSS programs. Adm & Support promotes efficient, professional and timely responses to employees, partners and consumers. Advise the department in legal matters & advances the elimination of fraud, waste and abuse

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of waste, fraud & abuse case investigations completed by Fraud & Recovery investigators	680	937	696	500	500
New	Key	Increase in the number of clients, providers and stakeholders utilizing web portal for self service	0	0	0	0	10000
New	Key	Decrease the number of repeat audit findings	9	9	7	0	0

**Narrative:**

Administrative and Executive Support provides effective and efficient management of the administrative resources necessary to assure the Department's capacity to develop safe and thriving children and families. It provides coordination of department efforts through leadership, communications, administrative support and oversight to all DSS programs; promotes efficient, professional and timely responses to employees, partners and consumers; and advances the elimination of fraud, waste and abuse. It will ensure seamless service delivery resulting in program integration, resource maximization and reduction in administrative costs. The focus of Adm. & Exec. Support will be on the redesign of business operations through global streamlining activities across all programs to produce savings and greater efficiency. This encompasses:

1) Review service delivery models - Training; Policies/Procedures; Office consolidations and operational efficiencies; 2) Analysis of all procurement/contracts to reduce duplication of services; ensure purchasing power is leveraged; and to ensure services are aligned with core mission & activities; 3) Inter-department alignment - Review of DSS organizational structures to ensure organizational efficiencies; Consolidation of policy/planning functions; Consolidation of the Bureaus of Civil Rights and General Counsel by eliminating two positions which generates a savings of \$153K and the consolidation of EEOC work within Human Resources; 4) Leveraging resources - Maximize Federal resources; Focus on core purpose/functions; Elimination of programs not aligned with core purposes and Performance and data driven program management and funding; 5) Consolidation of OM&F - Greater

accountability, clearer lines of authority and expeditious decision making; Limited resources targeted to those truly in need; Reinvestment of recovered funds into services; Increased accountability for use of public funds; Reduction in audit findings; Reduces likelihood of disallowances; Maximizes the use of staff.

**Explain How This Activity Advances State Outcome Goal:**

Administrative and Executive Support primarily advances state outcome goal Safe and Thriving Families as well as Transparent, Accountable, and Effective Government; Better Health; Hurricane Protection & Emergency Preparedness and Diversified Economic Growth. The department's core mission is to be "A Strong Business Enterprise that Ensures Safe and Thriving Families and Individuals". DSS leadership has engaged in global streamlining efforts across all programs and offices to implement more effective business processes, leverage existing resources, manage for outcomes and flatten management layers. Savings are reinvested in programs for children and families. DSS modernization will increase individual access to case information allow them to manage their case information, be informed of department decisions and case status. DSS' improved website reporting ensures access to critical information such as licensing deficiencies. Further, this and access information through multiple delivery points 24/7. DSS leadership is restructuring and realigning department programs to refocus the department on its core competencies. This includes streamlining recommendations such as the move to Louisiana Rehabilitation Services functions to the Louisiana Workforce Commission (LWC) and the Department of Health and Hospitals. DSS is reforming licensing regulations for both child residential and child care providers to ensure Louisiana children develop into safe and thriving individuals. DSS is reforming the service delivery model to individuals and families to assist them in becoming self-sufficient through partnerships with the LWC to ensure able-bodied individuals receiving public assistance and engaged in seeking sustainable employment and become productive citizens. DSS is realigning TANF initiatives through regional Requests for Proposals.

**Evidence:**

DSS Administrative and Executive Support is engaged in a continuous quality improvement, maximization of resources, staff development, succession planning and operational evaluation. In the fall of 2008 DSS underwent an extensive internal audit that resulted in the December 2008 report recommending organizational and operational changes. It provided an in-depth evaluation of program office functions utilizing information provided by the legislative auditor, staff and stakeholders. In FY 2010 DSS consolidated OM&F functions within the Office of the Secretary resulting in the elimination of 20 positions and an annual savings of \$896,560. DSS is developing a Business Redesign which will save the approximately 300 positions and \$28M in state and federal funds. DSS is implementing automated Child Care Time and Attendance which will result in an estimated savings of \$10M per year in federal funds lost to fraudulent provider claims. DSS leadership is coordinating the implementation of a coordinated system of care for child welfare and delinquent children that will leverage federal Medicaid dollars with potential savings of \$13M in state funds annually. DSS' Modernization plan was developed with a customer centered focus allowing clients to enroll in services and access information through multiple delivery points 24/7. DSS leadership proposes restructuring and realignment of department programs to refocus the department on its core competencies. This includes recommendations to move Louisiana Rehabilitation Services functions to the Louisiana Workforce Commission (LWC) and the Department of Health and Hospitals. DSS is reforming licensing regulations for both child residential and child care providers to ensure Louisiana children develop into safe and thriving individuals. DSS is reforming the service delivery model to individuals and families to assist them in becoming self-sufficient through partnerships with the LWC to ensure able-bodied individuals receiving public assistance and engaged in seeking sustainable employment and become productive citizens. DSS is realigning TANF initiatives through regional Requests for Proposals to ensure that evidence based programs are funded to in light of declining revenues.

**Activity ID:** 773

**Activity Name:**

Vocational Rehabilitation Administrative

**Department:** 10 Department of Social Services  
**Agency:** 360 Office of Children and Family Services  
**Program:** 3000 Community and Family Services  
**State Outcome Goal:** 6 Safe and Thriving Children and Families  
**Scalable:** True

**Scalable Description:**

Vocational Rehabilitation (VR), only national program whose sole mission is employment of persons with disabilities. Reductions impact service provision & employment for persons served; resulting in loss of potential employees for business; person/family income; state revenue and tax dollars income; increased dependency on state assistance. Services prioritized during periods of limited funding; recent budget reductions resulted in program serving only 2 of 5 disability groups. Categories 3-5 which currently has 821 individuals on the waiting list are not being served. Additional reductions may result in closing all categories, cancellation of existing cost service plans, office closures, staff layoffs, closure of community providers business, loss of revenues to colleges/ universities. VR program is 21.3% state and 78.7% federal (\$1.00 state funds & \$3.64 federal), is vital to meeting workforce needs. LWC & VR transfer discussions continue which is part of DSS Streamlining Report.

**Activity Type:** Existing

**Objective:**

To provide effective administration of LRS programs to assist individuals with disabilities to become successfully employed and advance independence and self-sufficiency through SFY 2015.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3317	Key	Number of individuals served statewide	28867	29205	26423	26209	23000
8281	Supporting	Annual average cost per consumer served.	2006	2114	2170	2708	2006

**Narrative:**

This activity provides administrative support for the effective and efficient operation of the Vocational Rehabilitation (VR) Program and other specialized programs for the delivery of services to individuals with disabilities. The VR Program is a mandated workforce investment partner and is charged with the mission to "successfully rehabilitate" Louisiana's individuals with disabilities by placement into gainful employment. This activity provides broad oversight of the VR Program and includes responsibilities related to governance, management, technical assistance and policy interpretation. The administrative activity conceptualizes and communicates the vision, guiding the organization towards achieving goals and results. Resources are provided to staff across the state including but not limited to office space for administrative and executive staff, information technology supports, and security.

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state outcome goal of "Safe and Thriving Children and Families" and "Transparent, Accountable, and Effective Government." Program administration effectively manages resources (including qualified personnel and funding) in a manner that promotes the goals of making government more transparent, accountable and efficient. Strategic planning is conducted to define visions, mission, outcome goals and strategies to a results-oriented delivery of services. The administration and support is vital to the Vocational Rehabilitation (VR) program

and specialized programs which provide needed services to individuals with significant disabilities, one of the most vulnerable populations in Louisiana. VR Administration provides the vision and leadership as well as the appropriation of human resources, and budget and fiscal administration of the VR Program.

**Evidence:**

As a result of LRS' commitment to the provision of quality services, the agency received no findings from the most recent audit completed for the year ending June 30, 2008 by the Louisiana Legislative Auditor's Office. The provision of these services assists individuals to become tax paying citizens and have a major economic impact on the state of Louisiana. In SFY 2009, 2,401 individuals with disabilities were successfully employed as a result of services provided through the VR Program. In SFY 2009 an individuals annual average earns at acceptance was \$4,004 in comparison to \$17,264 at closure. Eighty-three percent of vocational rehabilitation consumers rated services as "good or excellent" on the most recent consumer satisfaction survey conducted by the Louisiana Rehabilitation Council. Data indicates the VR program is making significant strides toward assisting to meet the employment needs of business and industry through an available pool of individuals with disabilities who are trained and qualified. In SFY 08, 3,734 (48%) of LRS' VR training plans written were to provide training in Louisiana's top three occupational demand fields and 1,213 (43%) individuals were successfully employed in Louisiana's high-demand occupational fields based on the LWC Occupational Forecasting Information. A 2004 Cost Benefit Analysis revealed that for every \$1 invested in consumers with disabilities receiving services through the VR Program \$9 is returned to Louisiana in the form of increased taxes and reduced public assistance payments.

**Activity Name:**

Institutional Support

**Department:** 19A Higher Education

**Agency:** 671 Board of Regents

**Program:** 1000 Board of Regents

**State Outcome Goal:** 1B Higher Ed. Non-Formula

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Per article 8 section 5 of the LA constitution, the Board of Regents was created to plan, coordinate, and have budgetary responsibility for all public postsecondary education system.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
11851	Key	Number of students enrolled(as of 14th class day) in public institutions	200000	200000	198016	212000	220000
11856	Key	Number of minority students enrolled (as of the 14th class day) in public postsecondary education.	71400	70160	70000	75000	75000
11890	Supporting	Percent change in the number of students enrolled(as of the 14th class day) in public postsecondary education.	5.9	6.4	2.4	8.5	8.5

**Narrative:**

The Board of Regents activities fall under the NACUBO (National Association of College and University Business Officers)function of Institutional Support. NACUBO defines Institutional Support as including expenditures for central executive-level activities concerned with long-range planning for the entire institution, such as the governing board.

**Explain How This Activity Advances State Outcome Goal:**

This activity has the goal to increase opportunities for student access and success. Another goal is to ensure quality and accountability for higher education. The Board of Regents has the mission to plan, coordinate and have budgetary responsibility for all public postsecondary education as constitutionally prescribed in a manner that is effective and efficient.

**Evidence:**

Youth education;Diversified Economic Growth;Safe and thriving children and families;better health; extensive research indicates a strong correlation between a citizen's education and the citizen's health, economic well-being and postitive contributions to the state and society.

**Activity ID:** 945

**Activity Name:**

Institutional Support

**Department:** 19A Higher Education

**Agency:** 671 Board of Regents

**Program:** 1000 Board of Regents

**State Outcome Goal:** 1B Higher Ed. Non-Formula

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Per article 8 section 5 of the LA constitution, the Board of Regents was created to plan, coordinate, and have budgetary responsibility for all public postsecondary education system.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
11851	Key	Number of students enrolled(as of 14th class day) in public institutions	200000	200000	198016	212000	220000
11856	Key	Number of minority students enrolled (as of the 14th class day) in public postsecondary education.	71400	70160	70000	75000	75000
11890	Supporting	Percent change in the number of students enrolled(as of the 14th class day) in public postsecondary education.	5.9	6.4	2.4	8.5	8.5

**Narrative:**

The Board of Regents activities fall under the NACUBO (National Association of College and University Business Officers)function of Institutional Support. NACUBO defines Institutional Support as including expenditures for central executive-level activities concerned with long-range planning for the entire institution, such as the governing board.

**Explain How This Activity Advances State Outcome Goal:**

This activity has the goal to increase opportunities for student access and success. Another goal is to ensure quality and accountability for higher education. The Board of Regents has the mission to plan, coordinate and have budgetary responsibility for all public postsecondary education as constitutionally prescribed in a manner that is effective and efficient.

**Evidence:**

Youth education;Diversified Economic Growth;Safe and thriving children and families;better health; extensive research indicates a strong correlation between a citizen's education and the citizen's health, economic well-being and postitive contributions to the state and society.

**Activity ID:** 459

**Activity Name:**

Administration of funds to support policy decision making & equitable allocation of funds for schools

**Department:** 19B Special Schools and Commissions

**Agency:** 666 Board of Elementary & Secondary Education

**Program:** 1000 Administration

**State Outcome Goal:** 1 Education

**Scalable:** True

**Scalable Description:**

A reduction of funds would result in the inability to maintain existing constitutionally mandated services.

**Activity Type:** Existing

**Objective:**

The Board will provide leadership in setting an education agenda for the continuous improvement of public education as measured by student and school achievement. Additionally, BESE will strive to improve financing of public education as measured by the efficient use human and financial resources.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
8445	Key	Percent of policies set for key education initiatives	90	90	90	90	90
8446	Key	Number of education initiatives	9	9	9	9	9
8459	Key	Equitable Distribution of MFP dollars as measured by the correlation based on the per pupil MFP state share levels 1, 2, and 3 and the local wealth factor.	-0.92	-0.92	-0.92	-0.95	-0.95

**Narrative:**

The Louisiana State Board of Elementary and Secondary Education, created by Article VII, §3 of the Louisiana Constitution, is Louisiana's highest policy-making and planning state agency in the area of K-12 education. The Board will provide leadership and enact policies necessary to implement new and continuing education initiatives that result in improved academic achievement and effectively communicate those policies. Administrative funds will also be used to support the Board in developing methods to ensure equitable allocation of funds for schools under its jurisdiction. BESE staff will support the Board's policymaking role by providing professional staffing functions for all Standing and Executive Committees of the Board and for all Advisory Councils appointed by the Board. Staff will provide research and other services to assist the Board in formulating educational policies, and will maintain regulating Bulletins and Rules.

**Explain How This Activity Advances State Outcome Goal:**

Administrative funds will be used to assist the Board in making informed policy decisions that will result in improved academic achievement and educational opportunities for all students in Louisiana. The Board has set an ambitious education agenda focused on five short-term priorities. These priorities are: early childhood education, failed

schools, high-school redesign, leadership, and literacy and numeracy. This focused effort will help to: ensure all students are literate and mathematically competent; eliminate the achievement gaps between races and classes; substantially reduce the number of students dropping out of school; and equip students with the knowledge and skills that will build a foundation for self-sufficiency.

**Evidence:**

Evidence of the Board's continuous efforts to improve academic achievement for all students in Louisiana and to improve financing of public education is supported by the following:

- 1) In the 2008 edition of Quality Counts it is noted that Louisiana's strategies to improve the quality of education in our state are considered to be high caliber – in some cases the highest caliber – when compared to other states in the nation. This 2008 ranking is primarily based on data from the 2006-2007 school year and earlier.
- 2) Louisiana's Standards, Assessments, and Accountability Program is ranked number two in the United States, according to the report released by Education Week, the nation's foremost K-12 education magazine. The state's effort to improve Teacher Quality ranks number five. Overall, the public education policy strategy in Louisiana ranks 21st in the nation.
- 3) From FY 07 – FY 09 the Board set at least 90% of the policies necessary to implement new and continuing education initiatives. During that time frame 9 education initiatives were implemented and effectively communicated. In addition, for the last three years, an average of 83 % of first-time students in grade 4 and an average of 78 % in grade 8 were eligible for promotion based on LEAP testing.
- 4) The Minimum Foundation Program (MFP) is the primary source of state funds to local districts. BESE annually works with the Governor, Legislature, State Superintendent, and local districts to adopt a formula that equitably allocates funds to parish and city school systems. The relationship between local wealth and state MFP funding continues to be strongly inverse. This signifies that the formula goal of offsetting fiscal disparities is working. The trend in MFP funding indicates that as a districts's ability to generate revenue increases, the state share contribution decreases.

**Activity ID:** 119

**Activity Name:**

LOUISIANA TECHNOLOGY INNOVATIONS

**Department:** 01 Executive Department

**Agency:** 107 Division of Administration

**Program:** 1000 Executive Administration

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

The purpose of the Louisiana Technology Innovation Fund (LTIF) was to provide a non-traditional source of funding for highly innovative technology initiatives. The total funds available determined how many applications that otherwise met the criteria could be funded (the amount needed varied). The LTIF has not been used recently and OIT has previously recommended that the fund be eliminated. We recommend that legislation be introduced to liquidate this.

**Activity Type:** Existing

**Objective:**

Not applicable - This org has not been active for years. We continue to recommend complete elimination of this activity.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago

Office of School and Community Support - Support Services

**Department:** 19D Department of Education

**Agency:** 681 Subgrantee Assistance

**Program:** 6000 School and Community Support

**State Outcome Goal:** 1 Education

**Scalable:** True

**Scalable Description:**

There are limited state funds, and with some interventions like driver education programming, no state funds available to support state level involvement in improving adherence to legislative requirements. Without additional funds, an organizational infrastructure which supports a comprehensive learning supports system to address the barriers to learning and teaching will not be fully developed. Additional funding will allow for the expansion of a state-level learning supports resource team that is necessary to begin modeling the infrastructure of the coalesced efforts that regions, districts, and schools should adopt to implement a comprehensive learning supports system. Additional funding will also allow for expansion of school bus transportation and driver education support staff and related expenses in the oversight of these activities.

**Activity Type:** Existing

**Objective:**

Through administration of the 21st Century Community Learning Centers Program, to have a 5% increase in the number of providers that earns a rating of satisfactory or above in the annual program evaluation process.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage increase in the number of 21st Century Community Learning Center providers that earns a performance rating of Satisfactory or above.	0	0	0	5	5
New	Key	Percentage increase in the number of TANF After-school for All providers that earns a performance rating of Satisfactory or above	0	0	0	5	5
13930	Key	Number of students served by the afterschool education activity (TANF)	9068	10807	8968	6000	6000

15844	Key	Number of students participating (21st CCLC)	36644	13611	8633	13000	13000

**Narrative:**

The mission of the Office of School and Community Support (OSCS) is to ensure the provision of high quality support and services to all communities and schools participating in the various programs administered by the Office. The office is responsible for the administration of three divisions: (1) Division of Nutrition Assistance, (2) Division of Dropout Prevention/Adult & Family Services, and (3) Division of Student Learning and Support.

The focus of the Division of Student Learning and Support (SLS) is to assist districts in crafting a comprehensive system of student learning supports, thereby, enhancing districts' ability to significantly raise academic achievement for Louisiana's students and create world-class school environments that are safe and healthy. SLS also provides operational activities for student transportation, driver education, and emergency planning with other state agencies. A Comprehensive Learning Supports System consists of various interventions which have been grouped into six programmatic arenas that serve as our blueprint. These six learning support content arenas capture the essence of the multifaceted way schools must address barriers. The six content arenas encompass interventions for enhancing regular classroom strategies to enable learning, supporting transitions, increasing family and school connections, facilitating student and family access to effective services and special assistance as needed, responding to, and, where feasible, prevent crises, and increasing community involvement and support.

The oversight of the school bus transportation program provides transportation officials in local education agencies (LEAs) with a foundation for continued improvement in the execution of safe and effective pupil transportation programs that adhere to current state and federal regulations. In addition, the state's school bus and school bus driver resources are prepared to be utilized in Hurricane Preparedness as a backup resource in citizen evacuations. The goal of the driver education program is to train traffic citizens who will be safe, efficient and skilled users of the highway transportation system. To achieve this goal we must provide the best instructional system utilizing existing resources and modern technology.

Operations in this office also assist in managing emergency preparedness with Pandemic Flu planning.

**Explain How This Activity Advances State Outcome Goal:**

The State's Education Outcome Goal is to increase academic achievement for all students, resulting in fewer children dropping out of school, and an educated workforce. This activity addresses all four key factors contributing to the education of Louisiana's youth. There are many barriers that interfere with ensuring that all students have an equal opportunity to succeed at school. All these barriers contribute to large numbers of disconnected students who need learning supports to address barriers to learning and teaching and help them re-engage in the learning environment. Offering opportunities through this office that seek to provide a school environment that offers minimal distractions and provides knowledge, skills, and abilities that equip our young people to make safe, educated decisions that allow them opportunity to be effective citizens in a global market.

These programs will also support State Outcome Goals for 3-Transportation, 4- Hurricane Recovery and Emergency Preparedness, 5-Public Safety, and 6-Safe and Thriving Children and Families.

**Evidence:**

According to the tenets of the Whole Child Initiative through ASCD, there is evidence that students learn best when their academic, emotional, physical, and social needs are met. Educating the whole child, one who is healthy, safe, engaged, supported, and challenged, is a pre-requisite to creating a world class educational system. In reaching our goal of enabling all students to have an equal opportunity for success at school, the work of Drs. Howard Adelman and Linda Taylor through the UCLA School Mental Health Project, indicate the need for developing a comprehensive, multifaceted, and cohesive system of learning supports. Learning supports are the resources, strategies, and practices that provide physical, social, emotional, and intellectual supports to directly address barriers to learning and teaching and re-engage disconnected students. There are many barriers that interfere with ensuring all students have an equal opportunity to succeed at school. A comprehensive learning supports system is essential to ensuring higher academic achievement, closing the achievement gap, and preparing students to be effective citizens in a global market.

According to the National Highway Traffic Safety Administration (NHTSA), school bus transportation is one of the safest methods of transportation in the US. Students are nearly eight times safer riding in a school bus than in a car. The State Board of Education's policy on school bus transportation indicates that the application of federal and state minimum safety standards for school buses has been determined to improve the safety of passengers riding school buses within the state. According to NHTSA evidence suggests crashes are the leading cause of death among American teens, accounting for more than one-third of all deaths of 16- to 18-year-olds. Research shows which

behaviors contribute to teen-related crashes. Inexperience and immaturity combined with speed, drinking and driving, not wearing seat belts, distracted driving (cell phone use, loud music, other teen passengers, etc.), drowsy driving, nighttime driving, and other drug use aggravate this problem. NHTSA suggests a three-tiered strategy to prevent motor-vehicle-related deaths and injuries for teens: increasing seat belt use, implementing graduated driver licensing, and reducing teens' access to alcohol.

**Narrative:**

The mission of the Office of School and Community Support (OSCS) is to ensure the provision of high quality support and services to all communities and schools participating in the various programs administered by the Office. The office is responsible for the administration of three divisions: (1) Division of Nutrition Assistance, (2) Division of Dropout Prevention/Adult & Family Services, and (3) Division of Student Learning and Support.

The focus of the Division of Student Learning and Support (SLS) is to assist districts in crafting a comprehensive system of student learning supports, thereby, enhancing districts' ability to significantly raise academic achievement for Louisiana's students and create world-class school environments that are safe and healthy. SLS also provides operational activities for student transportation, driver education, and emergency planning with other state agencies. A Comprehensive Learning Supports System consists of various interventions which have been grouped into six programmatic arenas that serve as our blueprint. These six learning support content arenas capture the essence of the multifaceted way schools must address barriers. The six content arenas encompass interventions for enhancing regular classroom strategies to enable learning, supporting transitions, increasing family and school connections, facilitating student and family access to effective services and special assistance as needed, responding to, and, where feasible, prevent crises, and increasing community involvement and support.

The oversight of the school bus transportation program provides transportation officials in local education agencies (LEAs) with a foundation for continued improvement in the execution of safe and effective pupil transportation programs that adhere to current state and federal regulations. In addition, the state's school bus and school bus driver resources are prepared to be utilized in Hurricane Preparedness as a backup resource in citizen evacuations. The goal of the driver education program is to train traffic citizens who will be safe, efficient and skilled users of the highway transportation system. To achieve this goal we must provide the best instructional system utilizing existing resources and modern technology.

Operations in this office also assist in managing emergency preparedness with Pandemic Flu planning.

**Explain How This Activity Advances State Outcome Goal:**

The State's Education Outcome Goal is to increase academic achievement for all students, resulting in fewer children dropping out of school, and an educated workforce. This activity addresses all four key factors contributing to the education of Louisiana's youth. There are many barriers that interfere with ensuring that all students have an equal opportunity to succeed at school. All these barriers contribute to large numbers of disconnected students who need learning supports to address barriers to learning and teaching and help them re-engage in the learning environment. Offering opportunities through this office that seek to provide a school environment that offers minimal distractions and provides knowledge, skills, and abilities that equip our young people to make safe, educated decisions that allow them opportunity to be effective citizens in a global market.

These programs will also support State Outcome Goals for 3-Transportation, 4- Hurricane Recovery and Emergency Preparedness, 5-Public Safety, and 6-Safe and Thriving Children and Families.

**Evidence:**

According to the tenets of the Whole Child Initiative through ASCD, there is evidence that students learn best when their academic, emotional, physical, and social needs are met. Educating the whole child, one who is healthy, safe, engaged, supported, and challenged, is a pre-requisite to creating a world class educational system. In reaching our goal of enabling all students to have an equal opportunity for success at school, the work of Drs. Howard Adelman and Linda Taylor through the UCLA School Mental Health Project, indicate the need for developing a comprehensive, multifaceted, and cohesive system of learning supports. Learning supports are the resources, strategies, and practices that provide physical, social, emotional, and intellectual supports to directly address barriers to learning and teaching and re-engage disconnected students. There are many barriers that interfere with ensuring all students have an equal opportunity to succeed at school. A comprehensive learning supports system is essential to ensuring higher academic achievement, closing the achievement gap, and preparing students to be effective citizens in a global market.

According to the National Highway Traffic Safety Administration (NHTSA), school bus transportation is one of the safest methods of transportation in the US. Students are nearly eight times safer riding in a school bus than in a car. The State Board of Education's policy on school bus transportation indicates that the application of federal and state minimum safety standards for school buses has been determined to improve the safety of passengers riding school buses within the state. According to NHTSA evidence suggests crashes are the leading cause of death among American teens, accounting for more than one-third of all deaths of 16- to 18-year-olds. Research shows which

behaviors contribute to teen-related crashes. Inexperience and immaturity combined with speed, drinking and driving, not wearing seat belts, distracted driving (cell phone use, loud music, other teen passengers, etc.), drowsy driving, nighttime driving, and other drug use aggravate this problem. NHTSA suggests a three-tiered strategy to prevent motor-vehicle-related deaths and injuries for teens: increasing seat belt use, implementing graduated driver licensing, and reducing teens' access to alcohol.

**Narrative:**

The Executive Office was consolidated in 1998 for cost effectiveness and efficiency. this office serves the Department and all local education agencies(LEAs) through six separate and distinct activities:

(1) The Communications section activities include the toll-free helpline, public awareness and community relations projects, media relations and legislative services. (2) The personnel office has the responsibility to ensure compliance with all legal requirements for all of the classified and unclassified State employees in the Department of Education and the Special School District and to develop and implement all necessary human resource policy and procedures. (3) The legal unit advises the Department on an array of legal issues which include educational, federal program and audit compliance and personnel. (4) The Internal Audit unit is a legally mandated function for all departments in Louisiana. For education, this unit not only provides the needed internal audit function but reviews the audit findings for the local education agencies. (5) The Planning and Analysis section provides the entire education community the needed information to institute, track, and evaluate advances in education. (6) The Recovery School District for Louisiana (RSDLA) is responsible for all of the required administration for schools included in the recovery program outside of New Orleans.

**Explain How This Activity Advances State Outcome Goal:**

The Louisiana Department of Education's vision is to develop a world-class education system that fosters lifelong learning and that places a high value on education. The specific goal for this offer is for education in Louisiana to increase academic achievement for all students, reduce the number of children dropping out of school and prepare an educated workforce. Connecting the vision and the specific goal is the Department of Education's stated mission that applies directly to the Executive Office to provide leadership that identifies the education needs of our constituents and provide the services that meet these needs.

**Evidence:**

The performance indicators cited above address the statewide success of the students in Louisiana and also exhibit efficiencies and effectiveness in the operation of the Executive Office. Both levels of success are necessary to achieve the stated education goals for this state. The successes of the other programmatic efforts of the Department provide the strongest evidence that the Executive Office is providing strong innovative leadership in education and fair, consistent management that is the necessary underpinning for effectuating the programmatic efforts.

**Activity ID:** 930  
**Activity Name:** Student Scholarships for Education Excellence Funding  
**Department:** 19D Department of Education  
**Agency:** 682 Recovery School District  
**Program:** 1000 Recovery School District  
**State Outcome Goal:** 1 Education  
**Scalable:** True

**Scalable Description:**

In the first quarter of the 2009-10 school year, 1,184 students are participating in the Student Scholarships for Education Excellence program. If additional funding were made available from the Legislature, it would almost certainly ensure that additional students would be able to enroll in the program.

**Activity Type:** Existing

**Objective:**

To provide low-income students in chronically low-performing schools in Orleans Parish with funding to allow them to attend non-public schools or higher-performing public schools. The program will seek to increase the number of scholarship participants by 20% in 2010-11.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
0	Key	Increase the number of scholarship participants	0	0	0	0	20

**Narrative:**

The Student Scholarships for Educational Excellence Act was adopted in 2008 as a way to provide low-income students attending failing public schools in Orleans Parish with scholarships that would allow them to attend nonpublic schools or non-failing public schools in neighboring jurisdictions. In the first quarter of the 2009-10 school year, 1,184 students in grades K-4 are participating in the Scholarship program.

To be eligible for a scholarship, students must reside within the geographic boundaries of Orleans Parish and must be a member of a family with a total income that does not exceed two hundred fifty percent of the current federal poverty guidelines, as established by the federal office of management and the budget. Additionally, the student must be either 1) entering kindergarten, 2) enrolled in a failing public school in Orleans Parish in a program-eligible grade, or 3) a returning scholarship student from the previous school year and remain otherwise eligible.

The Legislature appropriated \$10 million for the Scholarship program in 2008. Each scholarship awarded for each eligible student who is accepted at a nonpublic school is equal to ninety percent of the state and local per-pupil amount provided in Orleans Parish Public Schools or the maximum amount of tuition plus incidental or supplementary fees that are charged to non-scholarship students enrolled in the school. For scholarship students who choose to attend participating schools that do not charge tuition, the amount of the scholarship is equal to ninety percent of the per pupil amount the covered district receives from combined state and local sources or the participating school's actual cost of educating a student plus any costs incurred in administering the required tests. Additional funding is provided for special needs students.

Participation in the Scholarship program is voluntary for schools. However, schools that choose to participate must operate with an Open Admissions Policy for scholarship students. The school must also test scholarship students in

the state's assessment system.

In 2009-10, the Scholarship Program funds students in grades K-4. As it is the intent of the legislature to fund a new grade level each year, the funds requested in this offer will allow students currently enrolled in the Scholarship program (who meet eligibility requirements) to continue in the program during the next fiscal year and will allow new kindergarten students to enroll.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the state goal by providing low-income students who attend chronically underperforming schools with higher quality public and nonpublic school options.

**Evidence:**

While Louisiana's Scholarship program has not been in place long enough to have data to support its effectiveness, the rate of participation by low-income parents is a strong indicator that this program is meeting a critical need. In 2008-09, 624 students received scholarships to 31 participating schools. In the first quarter of the 2009-10 school year, 1,184 students are receiving scholarships. The growth in the number of students participating in the scholarship program is evidence that parents are looking for new and better education options for their children. In attempting to determine the type of positive impact that a strong scholarship program can have, one example exists in Washington, D.C. In January 2004, Congress passed the District of Columbia School Choice Incentive Act of 2003, the first federally funded school voucher program in the United States. Now known as the D.C. Opportunity Scholarship Program, this initiative provides scholarships of up to \$7,500 to more than 1,900 low-income students in the District. A recent U.S. Department of Education (DOE) evaluation of the program found that the Opportunity Scholarship Program is having a positive impact on students and families alike.

The DOE evaluation reviews the first two years of the D.C. Opportunity Scholarship Program, examining approximately 19 months of instruction. The results indicate that students who participated in the Opportunity Scholarship Program achieved higher reading scores than students who did not. The study also indicated that certain subgroups of students experienced significant positive gains in reading achievement. These results are encouraging because they offer compelling evidence of two years of positive achievement gains for D.C. voucher program participants.

The D.C. Opportunity Scholarship program also has had a significant impact on parental satisfaction and feelings of safety. According to the DOE evaluation, parents participating in the D.C. Opportunity Scholarship program were significantly less likely to report that their child's school was dangerous when compared to parents who were not offered a scholarship. Furthermore, voucher parents were also significantly more likely to report that they were satisfied with their child's school.

**Activity ID:** 305

**Activity Name:**

Outpatient Services

**Department:** 09 Department of Health and Hospitals

**Agency:** 351 Office for Addictive Disorders

**Program:** 2000 Prevention and Treatment

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

We currently serve 32,600 clients in this activity at a cost of \$1318 per person served. To determine the impact of a funding decrease or increase, the proposed amount will be divided by the stated cost per person served.

**Activity Type:** Existing

**Objective:**

OAD's goal is to improve the health and safety of citizens by increasing abstinence from alcohol, drugs and compulsive gambling. Treatment for addictive disorders can reduce crime, workforce problems, child abuse, school drop-out rates, STD's & other diseases, and related traffic accidents.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of clients with arrest free status at the end of treatment	0	0	0	95	95
New	Key	Percentage of clients with employment/student status at the end of treatment	0	0	0	37	37
New	Key	Percentage of clients who are abstinent at the end of treatment	0	0	0	50	50

**Narrative:**

All outpatient services are delivered in community based non-residential settings and provide care for clients with alcohol, drug and compulsive gambling problems. These services allow individuals to remain in their communities and receive cost-effective care. Services include - but are not limited to – the following: screening/assessment, education, counseling (individual, group and family), pharmacological therapy, and relapse prevention. Outpatient services utilize practices that are evidence-based, outcome-oriented, and tailored to an individual's treatment needs and level of severity. There are two levels of outpatient care. One level involves "intensive outpatient services," which are provided at least three days a week in regularly scheduled sessions totaling a minimum of nine contact hours per week. The second level of care involves "outpatient services," which can range from one to eight hours per week. In order to determine what level or intensity of services an individual needs (i.e. outpatient or intensive outpatient services), the Office for Addictive Disorders utilizes the American Society of Addiction Medicines Patient Placement Criteria (ASAM PPC). Use of ASAM allows clinicians to appropriately and consistently match services and levels of care to the unique needs of the individual. By employing this "best practice," the agency maximizes efficiency and increases effectiveness.

## Explain How This Activity Advances State Outcome Goal:

Outpatient treatment advances the state goal of "Better Health." Increased abstinence reduces the transmission of HIV/AIDs, syphilis, and hepatitis, and it reduces the incidence of diseases such as cirrhosis, cancer, and heart disease. Increased abstinence reduces birth defects and infant mortality rates. Community based outpatient services allow individuals to receive treatment consistent with their needs while living and functioning in their communities. Outpatient treatment encourages personal health care responsibility, reduces the potential for relapse, and reduces the need for more expensive inpatient treatment. Outpatient services utilize evidence-based practices to maximize treatment outcomes and cost-effectiveness. Outpatient treatment also has an impact on the following state goals:

- 1) Public Safety. Outpatient treatment reduces drug and alcohol related crimes by encouraging personal responsibility and healthy behaviors. Outpatient treatment reduces the incidence of drug and alcohol related traffic injuries and fatalities through intervention and court-mandated treatment for persons convicted of DWI's.
- 2) Education. Through early intervention and prevention efforts, outpatient treatment decreases school drop-out rates and increases academic performance.
- 3) Safe and Thriving Children and Families. Outpatient treatment promotes competent parenting by increasing abstinence and personal responsibility. Sober parents are better able to care for their children.
- 4) Diversified Economic Growth. Outpatient treatment enhances economic growth by increasing the numbers of employable citizens who can produce quality work in a safe manner.

### Evidence:

- 1) Better Health. Each year, there are over 300,000 drug ER visits in the US (CDC, 2008). Increased abstinence slows the spread of HIV/AIDs, syphilis, and hepatitis, and it reduces the incidence of cirrhosis, cancer & heart disease. Alcohol/drugs are the leading preventable cause of birth defects (CDC, 2002). Ettner et al. (2006) found that for each dollar invested in treatment, there was a \$7 health care and criminal justice cost savings.
- 2) Public Safety. Every dollar invested in treatment can produce a \$4 - \$7 cost reduction in drug-related crime (NIDA, 2006). In Louisiana, 77.4% of adults in DOC facilities are charged with drug-related crimes (Scott, 2002). In 2008, 11,773 persons in the US were killed in alcohol related crashes (NHTA, 2008). Because of alcohol treatment/education, the DWI related vehicular fatalities in the US decreased 10% between 2007 and 2008. Similar gains can be expected for Louisiana. In 2007 in Louisiana, there were nearly 10,000 DWI arrests and 40,000 car crashes that resulted in almost 600 deaths, of which about 200 were related to alcohol.
- 3) Education. Addiction is a major predictor of educational failure (Battin-Pearson, 2000). Through early intervention and prevention efforts, school drop-out rates decline and academic performance increases. By reducing addiction, more students graduate and the size of employable workforce increases.
- 4) Safe and Thriving Children and Families: Addiction exists in 40% to 80% of families where children are victims of abuse (Child Welfare League of America, 2009). Almost 2/3 of all people in drug treatment were abused as children (NIDA, 1998). By reducing addictions, the financial burden on agencies such as OAD, OCS, Public Health, OCDD, OMH, police & court services, and FINS is reduced now and in the future.
- 5) Diversified Economic Growth: A Columbia University study (2009) estimated that \$891 million in federal payroll & fringe benefits are due to absenteeism caused by addiction. Reduced addiction in the labor force increases work quality and productivity while reducing injuries.
- 6) Reduced Societal Costs. According to the Columbia study, each dollar invested in drug treatment results in a \$12 reduction in criminal justice and health care costs. Louisiana currently spends more of each dollar on addiction consequences than treatment: 36 cents to criminal justice, 27 cents to health care, 26 cents to education, 4 cents to child & family assistance, and 5 cents to mental health.

**Activity ID:** 306  
**Activity Name:**  
 24 Hour Residential Services  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 351 Office for Addictive Disorders  
**Program:** 2000 Prevention and Treatment  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

We currently serve 17,197 clients in this activity at a cost of \$2646 per person served. To determine the impact of a funding decrease or increase, the proposed amount will be divided by the stated cost per person served. The cost per person served by MOF is as follows: SGF 1058, Federal 1058, IAT 450 and Tobacco Tax 80.

**Activity Type:** Existing

**Objective:**

OAD's goal is to improve the health and safety of citizens by increasing abstinence from alcohol, drugs and compulsive gambling. Treatment for addictive disorders can reduce crime, workforce problems, child abuse, school drop-out rates, STD's & other diseases, and related traffic accidents.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of clients who are abstinent at the end of treatment	0	0	0	65	65
New	Key	Percentage of successful completions	0	0	0	75	75

**Narrative:**

Inpatient treatment, which is part of a continuum of care, provides services to persons experiencing moderate to severe addiction and assists them in the process of recovery. This level of care is necessary for individuals who have severe addictions, high relapse potential, are at risk for a range of withdrawal symptoms, and who lack a supportive recovery environment. It is a necessary step for many individuals in achieving abstinence and recovery, when outpatient services have not met their intensive needs. Inpatient treatment includes detoxification and counseling (individual, group, and family) for alcohol abuse, drug abuse, and compulsive gambling. To ensure that all individuals receive comprehensive care, pharmacological therapies are also available as needed. All essential inpatient services are available 24 hours a day in a free-standing residential setting. Treatment services utilize clinical tools and practices that are evidence-based and outcome-oriented.

In order to determine what level or intensity of services an individual needs (i.e. outpatient, intensive outpatient or inpatient), the Office for Addictive Disorders utilizes the American Society of Addiction Medicines Patient Placement Criteria (ASAM PPC). Use of ASAM allows clinicians to appropriately and consistently match services and levels of care to the unique needs of the individual. By employing this "best practice," the agency maximizes efficiency and increases effectiveness.

**Explain How This Activity Advances State Outcome Goal:**

Inpatient treatment advances the state goal of "Better Health." By reducing substance use disorders, the transmission of diseases such as HIV/AIDs, syphilis, and hepatitis, and diseases such as cirrhosis, cancer, and heart disease are reduced. A reduction in addictions reduces birth defects and the infant mortality rate. Inpatient

treatment provides a stable environment and the support needed to overcome the barriers to recovery and abstinence. Clients learn personal health responsibility, which facilitates successful re-entry into society. The evidence-based services provided during inpatient treatment are tailored to the individual's needs and maximize treatment outcomes and cost-effectiveness. Upon successful completion of an inpatient program, individuals "step down" to outpatient services to maintain recovery. Inpatient treatment also has an impact on other state outcome goals in the following ways:

- 1)Public Safety. Inpatient treatment reduces drug related crimes and recidivism by encouraging personal responsibility and healthy pro-social behaviors. Inpatient treatment reduces the incidence of alcohol related traffic injuries and fatalities through intervention and court-mandated treatment for persons convicted of DWI's.
- 2) Education. While in inpatient treatment, adolescents continue their education in preparation for return to school (or other vocational training). This educational preparation, in conjunction with increased abstinence, has the potential to decrease the school drop-out rate.
- 3) Safe and Thriving Children and Families. Inpatient treatment promotes competent parenting by increasing abstinence and personal responsibility. Sober parents are better able to care for their children.
- 4) Diversified Economic Growth. Inpatient treatment enhances economic growth by increasing the numbers of employable citizens who can produce quality work in a safe manner.

#### **Evidence:**

- 1)Better Health. Each year, there are over 300,000 drug related ER visits in the US (CDC, 2008). Increased abstinence slows the spread of HIV/AIDs, syphilis, and hepatitis, and it reduces cirrhosis, cancer & heart disease rates. Alcohol/drugs are the leading preventable cause of birth defects (CDC, 2002). Ettner et al. (2006) found that for each dollar invested in treatment, there was a \$7 health care and criminal justice cost savings.
- 2)Public Safety. Every dollar invested in treatment can produce a \$4 - \$7 cost reduction in drug-related crime (NIDA, 2006). In Louisiana, 77.4% of adults in DOC facilities are charged with drug-related crimes (Scott, 2002). In 2008, 11,773 persons in the US were killed in alcohol related crashes (NHTA, 2008). Because of alcohol treatment/education, the DWI related vehicular fatalities in the US decreased 10% between 2007 and 2008. Similar gains can be expected for Louisiana. In 2007 in Louisiana, there were nearly 10,000 DWI arrests and 40,000 car crashes that resulted in almost 600 deaths, of which about 200 were related to alcohol.
- 3)Education: Addiction is a major predictor of educational failure (Battin-Pearson, 2000). Through early intervention and prevention efforts, school drop-out rates decline and academic performance increases. By reducing addiction, more students graduate and the size of employable workforce increases.
- 4)Safe and Thriving Children and Families: Addiction exists in 40% to 80% of families where children are victims of abuse (Child Welfare League of America, 2009). Almost 2/3 of all people in drug treatment were abused as children (NIDA, 1998). By reducing addictions, the financial burden on agencies such as OAD, OCS, Public Health, OCDD, OMH, police & court services, and FINS is reduced now and in the future.
- 5)Diversified Economic Growth: A Columbia University study (2009) estimated that \$891 million in federal payroll & fringe benefits are due to absenteeism caused by SUDs. Reduced addictions in the labor force increases work quality and productivity while reducing injuries.
- 6)Reduced Societal Costs: According to the Columbia study, each dollar invested in drug treatment results in a \$12 reduction in criminal justice and health care costs. Louisiana currently spends more of each dollar on addiction consequences than treatment: 36 cents goes to criminal justice, 27 cents to health care, 26 cents to education, 4 cents to child & family assistance, and 5 cents to mental health.

**Activity ID:** 308  
**Activity Name:**  
Administration  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 351 Office for Addictive Disorders  
**Program:** 1000 Administration  
**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government  
**Scalable:** True

**Scalable Description:**

Administration is scalable to the degree of the increase or reduction in the Prevention and Treatment Activities. If a Activity is decreased, it may or may not result in a need to decrease administration. If a Activity is eliminated, it will result in a need to decrease administration. The same is true if and activity is increased.

**Activity Type:** Existing

**Objective:**

To enhance the efficiency and effectiveness of prevention and treatment by establishing policy, best practices, collaborative partnerships, and technical assistance to districts. The goal is to maintain at least 80% of key performance indicators across a continuum of care.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10349	Key	Percentage of Key indicators met or exceeded by agency	82	88	87.5	80	80

**Narrative:**

The administration's organizational structure utilizes a functional team concept that provides for the identification and implementation of evidence based practices, the monitoring of quality outcomes, the provision of technical assistance and workforce development. This structure supports the statewide movement toward the creation of Local Governing Authorities by providing direction and oversight at a state level while allowing for the flexibility in strategic planning and allocation of resources needed at the local level to meet the specific needs of their communities and advance the provision of integrated Behavioral Health Services under an Office of Behavioral Health. Consolidation efforts are moving forward with a report due to the Secretary by January 31, 2010 and a final report due to the Joint Health & Welfare Committee by March 2010. As the consolidation moves forward, the Office for Addictive Disorders and the Office of Mental Health will continue to look for opportunities to improve effectiveness and increase efficiencies.

Administrative functions include the provision of: 1) An electronic health record that contains clinical decision supports to ensure appropriate cost effective patient placement which tracks outcomes at the provider level and at an individual level; 2) Establishes policy to govern evidenced based practices; 3) Monitors progress for fidelity in the implementation of evidenced based practices and outcomes and 4) Provides training and technical assistance to ensure a competent, qualified workforce.

Administrative functional teams include but are not limited to: 1) Policy, Planning & Partnerships, to review and update policy standards, and form and maintain collaborative partnerships with local, state, and federal organizations; 2) Workforce Development, Training, and Technical Assistance, to train the workforce in the implementation and fidelity of best practices and provide technical assistance to providers, regions, and districts; 3) Research, Evaluation, and Grant Writing; 4) Quality Improvement and Monitoring; 5) Special Initiatives, to include immediate project implementation and planning for sustainability; and 6) Operational Framework, to include human resources, fiscal management, and contracting. In addition, OAD administration monitors programs and collects data

to drive outcome-based performance.

### Explain How This Activity Advances State Outcome Goal:

Office for Addictive Disorders administration advances the state outcome goal for Transparent, Accountable, and Effective Government. Administration ensures the transparency, accountability, and effectiveness of OAD activities, funding, and outcomes through consistent monitoring, data collection and reporting processes. Although all federal grant funds allow up to 15% for administrative costs and contractual agreements within Department of Health and Hospitals allow up to 12.5% for administrative costs, the Office for Addictive Disorders administration is efficient and cost-effective, with operating costs at 3.4%; Administration ensures the effectiveness of its activities by utilizing performance indicators that have been identified as best practices at the national level and adopted by the Substance Abuse and Mental Health Services Administration. Administration not only advances the state outcome goal for Transparent, Accountable, and Effective Government, but also has a positive impact on Better Health, Public Safety, Education, Safe and Thriving Children and Families, and Diversified Economic Growth by maintaining the effectiveness of its prevention, inpatient, and outpatient treatment activities.

### Evidence:

Our administrative structure is consistent with similar single state agencies, and our administrative costs of 3.4% are below the federal grant allowance of up to 15% for administrative costs and they are below the contractual agreements within the Department of Health and Hospitals that allow up to 12.5%.

New	Key	Percentage of patrol vehicles receiving recommended 5000 mile oil changes	0	0	0	0	90
New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.
- Concealed Handguns processes permit applications.

- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

#### **Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sherriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

#### **Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.

- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.

- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.

- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.

- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.

- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.

- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**Activity ID:** 485  
**Activity Name:**  
Patrol  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 1000 Traffic Enforcement  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Current funding will maintain present Troop strength of 706. With the changes outlined in this offer along with other offers expected to be funded (LHSC), Patrol is targeting a 5% reduction in traffic fatalities in FY 2011 as follows:

- 13,849,372 miles patrolled
- 395,697 citations
- 21,148 arrests
- 225,513 motorist assists

Patrol responsibilities include accident response, motorist assists, and crime responses. A reduction will limit our ability to reduce traffic fatalities. An increase in funding will increase proactive activities and reduce fatalities.

LHSC final report of the "Targets of Opportunity: State Demonstration Program For Reducing Impaired Driving" states every life saved is equivalent to \$3 million in tax payer costs. Over the past 3 years, as the number of patrol troopers increased, the number of fatality crashes decreased. A reduction in the number of patrol troopers could increase the number of fatal crashes.

**Activity Type:** Existing

**Objective:**

To provide the citizens and visitors of Louisiana with the safest highways possible, by reducing the number of traffic fatalities by 6% over the next three years.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
13772	Key	Percentage of State Police Manpower Allocation Study coverage level implemented	75	66	58	70	80
20796	Key	Number of fatalities per 100 million miles	2	2	2	2	2

**Narrative:**

The Louisiana State Police Patrol enforces traffic and criminal laws, investigates crashes, performs drug interdiction, aids motorists, provides accurate communication of information to the public and other agencies, conducts crime prevention programs, promotes highway safety, and leads and assists local and state law enforcement agencies.

A 17% increase in the number of Troopers over the course of the prior three years has resulted in 53% more public assists, 20% more contacts with the public, and most importantly, the number of fatal crashes within the Patrol's investigation jurisdiction has decreased by 7%.

With improvements in research and data analysis capabilities and continued status quo funding, the Patrol activity

will continue attempting to reduce the fatality rate over the next 3 years through:

- Modifying the time and location of all the allocation of officers to focus on high risk situations.
- Increasing coordination with education and media components, including Highway Safety and LA DOTD, to magnify the impact that each would have separately.
- Leveraging existing Troopers to expand public education efforts on safe driving behaviors.
- Moving duties currently performed by sworn officers to lower-cost civilian positions which will require a TO increase in civilian support personnel which has taken the brunt of past personnel reductions.

#### **Explain How This Activity Advances State Outcome Goal:**

I want people and families, including children, to feel safe at home, school, work, and while traveling; I want less crime, including less drug abuse, and smarter, proactive policing.

State Patrol plays a critical part in advancing Public Safety goal by increasing the safety of our highways, enforcing our criminal laws, interdicting drugs, and reducing crime through assistance of local law enforcement and educating the public.

- Detailed statistical data of active patrol crash locations directs the deployment of various assets of the Patrol activity such as Motorcycle Patrol and Task Forces to concentrate enforcement in these target areas.
- Strategically located roadside safety checkpoints.
- Youth education about the consequences of negative behavior such as driving while intoxicated, drug use, and reckless driving.
- Utilizing various community forums, troopers educate the general public on safe driving habits and crime prevention tips which are approaches that have been proven to work.

While the State Patrol cannot control the number of fatalities, the Troops can have a strong and positive influence on the safe driving habits of the people of Louisiana that do reduce the number and severity of crashes.

#### **Evidence:**

State Police Manpower Allocation Study revealed that 937 troopers is the amount of personnel needed to effectively patrol the State. At the inception of the State Police Manpower Allocation Study in 2007, there were 543 Troopers dedicated to patrol. Currently the Patrol Activity has 706 Troopers patrolling Louisiana's highways, still over 200 officers less than the recommended level. As the numbers increased, public assists increased by 53% and most importantly, the number of fatal crashes on highways patrolled by the State Patrol has decreased.

Research conducted by the Louisiana Highway Safety Commission substantiates the impact that Troopers have in saving lives. The Commission's final report of the "Targets of Opportunity: State Demonstration Program For Reducing Impaired Driving" found that an increase of 100 Standardized Field Sobriety Tests will save 3 additional lives. They also found that an increase of 1000 hours of Saturation Patrol will save 4 additional lives. In 16 selected parishes for the program that utilized increased enforcement, alcohol-related fatalities decreased 14.8%.

#### **Targeting and Coordinating Enforcement:**

Multiple studies support the value of the Patrol's strategies to target their limited Patrol manpower. The Patrol's strategies, which are designed to reduce traffic fatalities and crime, rely on increased data analysis and new research to:

- Identify and target high crime locations or persons and implement target patrols to effectively deter and attack the cause of the crime, rather than react once a crime has occurred
- Leverage crash data, vehicle density, and other input to implement selective enforcement programs that have been demonstrated to impact speeding, intoxicated driving, and seat belt use, which save lives.
- Coordinate education and marketing efforts to amplify the impact of selective enforcement programs, achieving even greater reductions in the number of traffic deaths.

See:

"Gun Violence Programs: Directed Police Patrols," by the National Institute of Justice, 2008, asserts that based on two pilot projects that directed patrols reduced gun crime, homicide, aggravated assault with a gun and armed robbery,

**Activity ID:** 488

**Activity Name:**

Transportation and Environmental Safety Section

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 1000 Traffic Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Through enforcement, TESS strives to reduce the fatal crashes from the previous year by targeting factors that create unsafe roadway conditions such as inoperable and faulty equipment, dangerous and impaired drivers, and hazardous material carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of violations cited during a FY	0	0	0	0	100000
New	Key	Percentage increase in number of violations from previous fiscal year	0	0	0	0	1

**Narrative:**

Transportation and Environmental Safety Section (TESS) is comprised of Weights and Standards, Towing and Recovery, Right to Know, and Hazmat.

The DPS Weights and Standards Police assure the safety of the motoring public and protect the highway infrastructure by enforcing state and federal commercial vehicle weight and size requirements. DPS Weights and Standards Police consists of POST certified officers who are the sole enforcement authority of Portable Scale operations and collaborate with DOTD fixed scale operations providing accurate and timely communication of related information.

LSP is the statutorily mandated authority to respond and investigate all hazardous material incidents to determine possible causes and enforce any violations of the Louisiana Hazardous Materials Regulations. Hazmat is responsible for coordinating a Statewide Response System for mitigating these incidents, inspecting chemical plants, conducting roadside inspections of commercial motor vehicles involved in transporting hazardous materials, conducting safety education to the chemical industry, and assisting all local and state agencies on hazardous material-related incidents.

Federal law mandates Louisiana to collect the previous year's chemical inventory from chemical manufacturing plants and other facilities located in the state. This data is then distributed to local governments in whose boundaries these facilities are located to ensure the safety of the public as well as responding officers and firefighters in case of chemical spills or releases. The Hazardous Materials Hotline is maintained 24/7 by the LSP to receive reports of releases and spills from chemical plants or on waterways, airways, roadways and railroads. These reports are then

distributed to local and state agencies which may be responding to mitigate these incidents. The Right-to-Know unit also reviews chemical incidents reported to the Hotline for possible violations including late notifications, failing to report chemical spills within the state, and giving misleading or false information when reporting an incident to the Hotline.

The primary responsibility of Towing and Recovery is to perform regular inspections of all licensed towing and storage facilities in Louisiana to ensure compliance with applicable regulations. All activities performed by Towing and Recovery are the exclusive responsibility of LSP.

**Explain How This Activity Advances State Outcome Goal:**

The TESS activity plays a critical role in advancing the Transportation and Public Safety Goals.

**Transportation:** Overweight vehicles accelerate the deterioration of our highway infrastructure leading to weakened roads and damaged road substructures which are data driven factors in serious injury and fatal crash incidents. By reducing the number of overweight trucks, the life expectancy of the state's roads are increased, thus reducing maintenance and repair costs. By conducting a Size and Weight Inspection in conjunction with a Motor Carrier Safety Inspection an officer can additionally take overweight vehicles which have safety equipment violations, such as defective brakes off the road. This activity promotes safe travel for commercial vehicles thereby reducing the number of crashes directly related to poor or weakened road surfaces creating safety for the motoring public.

**Public Safety:** Through proactive emergency planning, communication, and enforcement of regulations involving the release of hazardous materials provides public safety and security. The licensing process of all manufactures, sellers or handlers of explosives will provide an organized administrative process with continuity so that only persons suitable will be issued a license. Hazmat has experienced extraordinary regulatory changes in 2008 that resulted in significant increases in fees and revenue which generated \$287,000.

The Right-To-Know unit will maintain a 24 hour hotline that records emergency response information for chemical releases to ensure citizens of Louisiana are informed of critical information regarding hazardous materials.

Tow trucks operating in unsafe conditions, or operated by drivers in an unsafe manner can be contributing factors in fatality and serious injury crashes. By mitigating unsafe vehicle and driver conditions through education and enforcement initiatives, a safer environment is achieved on Louisiana's highways.

**Evidence:**

The DPS Weights and Standards Police method of determining effectiveness of the enforcement plan is measured by the number of vehicles weighed, and the number of violations issued. Of the 12,521 vehicles weighed during FY 08/09, 4,456 vehicles or 35 percent were cited for being overweight with 976 vehicles, or 8 percent being overweight more than 10,000 pounds. With the lack of weight enforcement efforts, the Highway Reconstruction Fund would lose approximately 1.5 million dollars generated by overweight penalties.

Numerous studies were performed at Louisiana Technical University and the Governor's Oversize and Excess Weight Vehicle Task Force to determine the impact of raising the legal gross vehicle weight from 80,000 lb. to 100,000 lb. on vehicles hauling sugar cane, rice, timber, and cotton. It was determined that any increase in the gross vehicle weight over current limits would substantially increase the cost of overlays and decrease the length of time before an overlay is required in which current revenues for road improvement were insufficient to provide for the damages that oversize and excess weight trucks would cause.

In addition, of the overweight violations, 4,567 brake violations, 2,023 tire weight-rating violations and 13,290 other safety violations were detected during the course of these inspections.

The primary funding source for the Towing Recovery comes from the Louisiana Towing and Storage fund through fines. During FY 2008-2009, fines from enforcement generated \$83,430.00 in revenue.

11876	Supporting	Percentage of school districts presenting D.A.R.E.	89	90	89	91	91

**Narrative:**

Drug Abuse Resistance Education (DARE) is a substance abuse prevention program designed to equip school children with skills for resisting peer pressure to experiment with tobacco, drugs, and alcohol. This program uses uniformed officers to teach a formal curriculum to students in a classroom setting. Law enforcement officers must complete 80 hours of training from the DARE training Center to become certified. The DARE training center, located at the Calcasieu Parish Sheriff's office, is responsible for training all DARE officials within the state. A staff of one administrator and two assistants coordinates the delivery, implementation, mentoring, and monitoring of all DARE officers. The center also ensures that all DARE officers are in compliance with program guidelines, mandatory inservice training hours and written agreements between local school boards and local enforcement agencies are up to date. A 13 member DARE Advisory Board assists in the development, promotion, monitoring and evaluation of the DARE program. The LACLE awards grants to sheriff's offices and police departments upon recommendation of the DARE Advisory Board in accordance with the national DARE training model. DARE funds are also made available for one-time grants for new/innovative projects in drug abuse prevention and treatment to agencies that demonstrate the need for such a project in a 12-month period. The Drug Abuse and Education Fund (D.A.E.T) funds a maximum of two special projects each year, contingent upon available collections occurring in the prior fiscal year.

**Explain How This Activity Advances State Outcome Goal:**

Grants awarded through this activity advance State Goal 5-Public Safety by supporting one hundred seventy three (173) D.A.R.E. Officers in 81 Louisiana law enforcement agencies. These DARE officers will provide 2,127 CORE curriculum classes in 764 schools to 50,974 children in the 5th and 6th grades statewide. Of these 81 agencies, D.A.R.E. Officers in 65 agencies will also provide 6,598 visitation classes to 135,303 children in 533 schools. Sixteen (16) law enforcement agencies will provide 784 junior high curriculum classes to 19,720 children in 192 schools. 94% of all Louisiana school districts participate in DARE. Dare funds will also provide for two one-time grants for innovative projects in drug abuse prevention and treatment to criminal justice agencies that have demonstrated the ability to obtain measurable results in a short time frame. These grants will advance State Outcome Goal 5-Public Safety by delivering the financial support to agencies that target drugs and drug dealers, which, in turn, help ensure that our communities are safe and prosperous for its citizens. To ensure that the DARE program remains a timely and effective counter drug strategy, the DARE curriculum will continue to be independently evaluated to refine and update its program goals and objectives.

#### **Evidence:**

During the past fiscal year, 174 Louisiana D.A.R.E. Officers in 82 law enforcement agencies provided 2,161 CORE Curriculum classes in 795 schools and to 650,070 children in the 5th and 6th grades statewide. Of these 82 agencies, D.A.R.E. Officers in 65 agencies provided 5,523 Visitation Classes to 131,711 children in 671 schools. Sixteen (16) Law Enforcement agencies provided 395 Junior High Curriculum classes to 18,870 children in 205 schools. The percentage of School Districts that participate in D.A.R.E. is 97.8%. DARE funds are also made available for one-time grants for new/innovative projects in drug abuse prevention and treatment to agencies that demonstrate the need for such a project in a 12-month period. A maximum of two special projects are funded annually, contingent upon collections occurring in the prior fiscal year. Grants awarded through this activity advance State Outcome Goal 5-Public Safety by funding local efforts to protect our children from drugs and drug dealers and provide a safe, prosperous community for its citizens. Using tested approaches to educating our children, the Louisiana DARE Curriculum Study has been evaluated each of the last nine academic years to test the effectiveness of the curriculum. The results of the evaluation have been using to modify the study questions on three occasions and revising the D.A.R.E. Core Curricula twice.

**Activity ID:** 25

**Activity Name:**

Louisiana FastStart

**Department:** 05 Department of Economic Development

**Agency:** 251 Office of the Secretary

**Program:** 1000 Administration

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide workforce solutions for business expansion and recruitment projects in a manner that assists in Louisiana's business recruitment and expansion efforts, resulting in increased jobs for Louisiana

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	New employment associated with FastStart projects	1867	0	0	0	2000

**Narrative:**

The Louisiana FastStart program provides a turnkey workforce solution for business expansion and recruitment projects. Louisiana FastStart assists in Louisiana's business recruitment and expansion efforts by fully and definitively addressing a top company concern - the availability of trained/qualified employees. In fact, the program has transformed workforce from a concern to a strategic advantage for Louisiana. Louisiana FastStart is currently in a pilot phase, with eleven active projects. The program is anticipated to become fully operational by January 2010. Once fully implemented, the program could deliver customized training services to over 100 companies per year.

Louisiana FastStart directly assists companies seeking to relocate and/or expand in the following ways: identifying and screening high-potential employees for their operation, developing customized training materials utilizing the latest computer-based technologies and video production techniques, and delivering employee training in a manner specifically tailored for the company. The initiative was designed based on best practices in place elsewhere (in particular, Georgia's Quick Start program) and is implemented largely through partnerships with the Louisiana Community and Technical College, the Louisiana Workforce Commission, the Board of Regents, and private providers. The program is relatively unique among workforce incentive programs in that it directly develops and delivers workforce services to companies; it is not a workforce grant program. This allows the Louisiana FastStart team to develop and build leading edge capabilities that are particularly valuable to companies seeking to start a new operation or expand. Louisiana FastStart serves as a positive Louisiana differentiator when the state is competing for business investment.

The program instills confidence in business decision-makers that they will be able to successfully ramp-up their new or expanding operation with a highly skilled and trained workforce that is available and in place to meet their

operations schedule. By addressing this top concern and instilling confidence in business decision-makers, Louisiana is able to attract new investment and new jobs that otherwise may have been directed elsewhere were it not for Louisiana FastStart. By impacting company decision-making, Louisiana FastStart helps deliver new jobs in a variety of industry sectors, driving diversified economic growth.

#### **Explain How This Activity Advances State Outcome Goal:**

As indicated in the RFR for Diversified Economic Growth, a primary factor impacting the creation of new jobs and earnings for Louisiana residents is the "availability of a quality workforce that is aligned with the needs of the current and future Louisiana economy... Most business executive decisions regarding the location of a business enterprise involve workforce considerations as top criteria."

Louisiana FastStart has already delivered substantial results, even in its early pilot stages. As a core component of Louisiana's business development toolbox, Louisiana FastStart has assisted LED in generating a number of significant project wins for the state. Through 9/21/09, the major LED-assisted project wins over calendar years 2008 and 2009YTD are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up

Louisiana FastStart is currently engaged with eleven pilot projects (a subset of the total project wins above) that are projected to deliver 6,605 new direct jobs, 9,831 new indirect jobs, 16,436 total new jobs, 4,544 retained jobs, \$1.1 billion in capital investment, and \$39 million per year in new state tax revenues once the projects are fully ramped-up.

These results are generated with a positive return-on-investment based on state tax revenues. When LED enters into an agreement with a company for Louisiana FastStart or other discretionary incentive programs, it conducts a comprehensive return-on-investment evaluation that takes into account the projected future state tax revenues associated with the project relative to the costs to the state (including the cost of delivering Louisiana FastStart and other incentives). These evaluations ensure that Louisiana FastStart is managed and delivered in a way that provides a positive return-on-investment.

#### **Evidence:**

Louisiana FastStart is modeled after the successful Georgia Quick Start program. In building Louisiana FastStart, LED recruited some of the nation's top corporate trainers, six of whom came from Georgia where they developed customized training solutions for hundreds of companies, such as Cessna, AT&T, GEICO, Toyota- Denso, Wal-Mart.com, Wrigley's, Ford Motor Company, Suzuki, General Mills, Honda, Kia, Yamaha, General Motors, Toyo Tire and Pirelli Tire. Based on surveys of top site-selection consultants, Expansion Management magazine rated Georgia Quick Start either No. 1 or No. 2 in the country for workforce training programs in each of the past six years.

Collectively the Louisiana FastStart team has worked with over 1,000 companies during the last 10 years. They have significant experience in recruitment of major companies; the senior team has a cumulative manufacturing/corporate experience of 227 years; the senior team has a cumulative training design/development/and delivery experience of 168 years; the video team has a cumulative 55 years of experience; creative services has a cumulative 28 years of experience.

Company testimonials indicate the early success of Louisiana FastStart:

#### **Barrister Global Services Network**

"We told the state, 'We need your help if we're going to bring more jobs to Louisiana, but we need a way around the problems that bog us down.' The answer was FastStart. It's incredible to get through the red tape. All of that is gone with FastStart."

Debra Bowers, President

#### **V-Vehicle Company**

"We're banking on that program. We're coming to an area we don't know and a work force we're unfamiliar with, so

FastStart became a decisive factor.”  
 Horst Metz, Vice President of Assembly Operations

"I can't emphasize enough the importance of tailoring the (work force training program) for us. It was the conviction that Louisiana could provide this work force that sealed the deal... Because of incentives like the Louisiana FastStart program, we could identify and train the people that will ultimately determine a large part of our success."  
 Frank Varasano, Chief Executive Officer

Gardner Denver Thomas  
 “The people at [Louisiana] FastStart really have given us a great boost in the arm and have allowed us to get where we are today. We have... 67 people in there working today that weren't working there three months ago. That's a great accomplishment.”  
 Barry Pennypacker, President and CEO

**Activity ID:** 45  
**Activity Name:**  
Executive and Support Functions  
**Department:** 05 Department of Economic Development  
**Agency:** 252 Office of Business Development  
**Program:** 1000 Business Development Program  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide a wide range of leadership and support services to assist entrepreneurs and small businesses grow, to assist communities in improving their competitiveness, to communicate the positive momentum occurring in Louisiana, and to work with prospects to secure investment and job growth

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20928	Key	Percent of stakeholders satisfied with business development assistance	100	87	95.6	85	85
20790	Key	Percent of LED staff reporting job satisfaction	80.6	81.4	85.3	85	85

**Narrative:**

The Office of Business Development - Executive and Support activity includes a wide range of leadership and support services that are essential for LED to assist entrepreneurs and small businesses in their efforts to grow, to assist communities in improving their capacity to compete with communities in other states, to communicate and market the positive momentum occurring in Louisiana, and to work with prospects to secure their investment and job growth in Louisiana. It also provides expertise in the development and optimization of global opportunities for trade and inbound investments, leads efforts to cultivate top regional economic development assets, leads initiatives that protect and grow the state's military and federal presence, and leads efforts to integrate business intelligence functions into the state's business development activities. Without the Executive and Support activity, LED would be unable to deliver positive economic outcomes such as new jobs, capital investment, and economic diversification for the state.

This activity also contains \$10 million for the Rapid Response fund as directed by statute - RS 51:2361 and any budget year rollovers for the Mega Project Development Fund. It also includes annual debt service payments and annual performance-based grants associated with incentives for several previously announced business development projects.

The activity also includes operating funding for three wet labs (Shreveport, Baton Rouge, New Orleans) focused on entrepreneurship in bio-sciences. It includes funding focused on site specific expenses – in some competitive prospect situations, LED needs to invest in a level of site preparation activities (e.g., wetlands mitigation) to remain competitive with other states that may be able to offer a development-ready site. It includes personnel and expenses associated with operating the Accent Building, a state-owned facility in Monroe, LA that is being leveraged with

business development projects. Finally, it contains a number of expenses associated with the Marketing Fund (established under statute) and marketing of the Federal Renewal Communities program.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Business Development - Executive and Support activity provides leadership and support services that enable LED to deliver against its mission. LED Mission: Lead economic development for the State of Louisiana.

In addition, the activity enables LED to make progress against its vision for the State of Louisiana. LED Vision: Reposition Louisiana as the next great American state for business investment, quality of life, and economic opportunity.

LED's mission and vision are directly aligned with the state outcome goal for diversified economic growth. Outcome Goal Statement: I want Louisiana to retain, grow, and attract good jobs in a diversified, growing economy, while wisely utilizing cultural and natural resources.

Through 9/21/09, LED has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). The Executive and Support activity plays a key role in delivering these project wins.

Additionally, LED has assisted thousands of other in-state businesses, including entrepreneurs and small businesses, through its many incentive and small business-focused programs. Without a well-functioning Executive and Support functions, these entrepreneurs and businesses would not be supported with quality service levels.

In summary, the Office of Business Development – Executive and Support activity plays a critical direct and indirect role in delivering new Louisiana jobs for the state.

**Evidence:**

LED has recently received national recognition for its business development activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's efforts are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns.

EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are

moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's business development activities, as well as other state efforts.

**Activity ID:** 917  
**Activity Name:**  
Office of School and Community Support - Support Services  
**Department:** 19D Department of Education  
**Agency:** 681 Subgrantee Assistance  
**Program:** 6000 School and Community Support  
**State Outcome Goal:** 1 Education  
**Scalable:** True

**Scalable Description:**

There are limited state funds, and with some interventions like driver education programming, no state funds available to support state level involvement in improving adherence to legislative requirements. Without additional funds, an organizational infrastructure which supports a comprehensive learning supports system to address the barriers to learning and teaching will not be fully developed. Additional funding will allow for the expansion of a state-level learning supports resource team that is necessary to begin modeling the infrastructure of the coalesced efforts that regions, districts, and schools should adopt to implement a comprehensive learning supports system. Additional funding will also allow for expansion of school bus transportation and driver education support staff and related expenses in the oversight of these activities.

**Activity Type:** Existing

**Objective:**

Through administration of the 21st Century Community Learning Centers Program, to have a 5% increase in the number of providers that earns a rating of satisfactory or above in the annual program evaluation process.

**Performance Indicators:**

15844	Key	Number of students participating (21st CCLC)	36644	13611	8633	13000	13000

**Narrative:**

The mission of the Office of School and Community Support (OSCS) is to ensure the provision of high quality support and services to all communities and schools participating in the various programs administered by the Office.

The office is responsible for the administration of three divisions: (1) Division of Nutrition Assistance, (2) Division of Dropout Prevention/Adult & Family Services, and (3) Division of Student Learning and Support.

The focus of the Division of Student Learning and Support (SLS) is to assist districts in crafting a comprehensive system of student learning supports, thereby, enhancing districts' ability to significantly raise academic achievement for Louisiana's students and create world-class school environments that are safe and healthy. SLS also provides operational activities for student transportation, driver education, and emergency planning with other state agencies. A Comprehensive Learning Supports System consists of various interventions which have been grouped into six programmatic arenas that serve as our blueprint. These six learning support content arenas capture the essence of the multifaceted way schools must address barriers. The six content arenas encompass interventions for enhancing regular classroom strategies to enable learning, supporting transitions, increasing family and school connections, facilitating student and family access to effective services and special assistance as needed, responding to, and, where feasible, prevent crises, and increasing community involvement and support.

The oversight of the school bus transportation program provides transportation officials in local education agencies (LEAs) with a foundation for continued improvement in the execution of safe and effective pupil transportation programs that adhere to current state and federal regulations. In addition, the state's school bus and school bus driver resources are prepared to be utilized in Hurricane Preparedness as a backup resource in citizen evacuations. The goal of the driver education program is to train traffic citizens who will be safe, efficient and skilled users of the highway transportation system. To achieve this goal we must provide the best instructional system utilizing existing resources and modern technology.

Operations in this office also assist in managing emergency preparedness with Pandemic Flu planning.

#### **Explain How This Activity Advances State Outcome Goal:**

The State's Education Outcome Goal is to increase academic achievement for all students, resulting in fewer children dropping out of school, and an educated workforce. This activity addresses all four key factors contributing to the education of Louisiana's youth. There are many barriers that interfere with ensuring that all students have an equal opportunity to succeed at school. All these barriers contribute to large numbers of disconnected students who need learning supports to address barriers to learning and teaching and help them re-engage in the learning environment. Offering opportunities through this office that seek to provide a school environment that offers minimal distractions and provides knowledge, skills, and abilities that equip our young people to make safe, educated decisions that allow them opportunity to be effective citizens in a global market.

These programs will also support State Outcome Goals for 3-Transportation, 4- Hurricane Recovery and Emergency Preparedness, 5-Public Safety, and 6-Safe and Thriving Children and Families.

#### **Evidence:**

According to the tenets of the Whole Child Initiative through ASCD, there is evidence that students learn best when their academic, emotional, physical, and social needs are met. Educating the whole child, one who is healthy, safe, engaged, supported, and challenged, is a pre-requisite to creating a world class educational system. In reaching our goal of enabling all students to have an equal opportunity for success at school, the work of Drs. Howard Adelman and Linda Taylor through the UCLA School Mental Health Project, indicate the need for developing a comprehensive, multifaceted, and cohesive system of learning supports. Learning supports are the resources, strategies, and practices that provide physical, social, emotional, and intellectual supports to directly address barriers to learning and teaching and re-engage disconnected students. There are many barriers that interfere with ensuring all students have an equal opportunity to succeed at school. A comprehensive learning supports system is essential to ensuring higher academic achievement, closing the achievement gap, and preparing students to be effective citizens in a global market.

According to the National Highway Traffic Safety Administration (NHTSA), school bus transportation is one of the safest methods of transportation in the US. Students are nearly eight times safer riding in a school bus than in a car. The State Board of Education's policy on school bus transportation indicates that the application of federal and state minimum safety standards for school buses has been determined to improve the safety of passengers riding school buses within the state. According to NHTSA evidence suggests crashes are the leading cause of death among American teens, accounting for more than one-third of all deaths of 16- to 18-year-olds. Research shows which behaviors contribute to teen-related crashes. Inexperience and immaturity combined with speed, drinking and driving, not wearing seat belts, distracted driving (cell phone use, loud music, other teen passengers, etc.), drowsy driving, nighttime driving, and other drug use aggravate this problem. NHTSA suggests a three-tiered strategy to prevent motor-vehicle-related deaths and injuries for teens: increasing seat belt use, implementing graduated driver

licensing, and reducing teens' access to alcohol.

**Activity ID:** 29

**Activity Name:**

Small Business and Community Services

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

The SEBD program is requested at a 20% level increase (\$160,000) over FY10 assisting 85 new clients. The Small Business Development Centers are requested at a 20% level increase (\$200,000) assisting 580 new clients.

\$200K is included for a new Ready Communities Initiative. LED's Community Development Initiative began in 2007. This initiative consists of three phases to support Louisiana communities best prepare to compete in a global economy for economic development investment and resulting job opportunities. Phase I in 2007 consisted of a state wide survey of public and private community leaders. Phase II which was announced in 2008 was the web based delivery of solutions to address these opportunities - the Louisiana Community Network (LCN). Phase III is assisting 12 Louisiana communities implement four modules from the LCN. Funding was provided by an EDA grant that expires in fiscal year 2010. \$200K will allow 12 additional communities to participate.

**Activity Type:** Existing

**Objective:**

Support the creation and growth of small businesses, including those with the potential to generate a significant, long-term economic impact. Strengthen Louisiana communities' business development efforts and foster the development of key regional economic development assets

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of newly certified sites	0	0	0	10	15
14400	Supporting	Three-year default rate on small business bond guarantees	0	0	0	15	5
15580	Supporting	Private financing generated by Small Business Development Centers per state dollar invested	46	66	55	50	50

**Narrative:**

The Small Business and Community Services (previously Community Outreach Services) activity works to reposition Louisiana as one of the best places in the country in which to start and grow a small business and to create a more vibrant entrepreneurial culture in Louisiana. It also provides assistance to local communities to increase their competitiveness and, thereby increase the effectiveness of local and regional business development efforts in creating more jobs and diversifying Louisiana's economy.

Two critical programs associated with the Small Business and Community Services activity include the Small and Emerging Business Development (SEBD) program and Small Business Development Centers (SBDC). A 20% increase in funding for the SEBD program and SBDCs will enable the State to positively impact a larger number of

entrepreneurs and small businesses next fiscal year, leading to increased small business success rates and increased numbers of new jobs associated with growing small businesses. These two programs provide direct, one-on-one assistance to entrepreneurs and small businesses that are seeking to grow and prosper. This assistance enables these companies to build new capabilities and leverage these new capabilities to capitalize on growth opportunities.

Expanded funding is also being sought to support the continuation of LED's community competitiveness initiatives. In 2008, LED launched the Louisiana Community Network (LCN), a web-based suite of education modules focused on increasing local economic development capacity. As a component of this effort, LED launched its Ready Communities initiative in 2009 to directly work with communities to better prepare themselves to compete with out-of-state communities when working to attract business development prospects. Funding for the Ready Communities initiative was provided by an EDA grant that expires in fiscal year 2010. \$200K will allow 12 additional communities to participate in the program in fiscal year 2011. Assisting Louisiana's communities to build and maintain their competitive position is a top priority of LED and is a critical component to the state's ability to deliver diversified economic growth.

#### **Explain How This Activity Advances State Outcome Goal:**

As indicated in the RFR for Diversified Economic Growth, "cultivating entrepreneurship and small business can provide Louisiana an opportunity to benefit..." from the job growth delivered by successful small business ventures. "A small business with relatively few direct jobs can, over time, evolve into a Fortune 500 headquarters with thousands of high-paying corporate jobs."

Small Business and Community Services (SBCS) provides technical assistance and other programs for small businesses and entrepreneurs through activities such as: the small and emerging business development program, funding to small business development centers, training, matching grants, and bond guarantees. These services help entrepreneurs and small businesses in their efforts to start and grow. In doing so, they boost company survival rates, improve access to capital, and facilitate companies' efforts to move to "the next level" in terms of performance, revenues, and employment.

Additionally, SBCS operates the Louisiana Community Network (LCN), a web-based suite of education modules focused on increasing local economic development capacity. The tool helps municipalities, parishes, and regions prepare for success by providing resources to develop a strong economic development plan; to understand options for adequate, stable funding; to develop an assertive, professional staff; and to build coordinated engagement from the public and private sectors. A newly launched certified sites program with matching grants encourages the identification of development-ready sites around the state – a factor contributing towards diversified economic growth.

Many of SBCS' efforts are conducted in close coordination with local and regional partners. For instance, the regional matching grants program leverages funding from privately-funded economic development partner organizations to ensure strong, professional, regionally-based economic development efforts to complement LED's state-level efforts.

#### **Evidence:**

Small Business and Community Services (SBCS) delivers a wide variety of positive outcomes directly impacting the state's diversified economic growth. For instance, for every dollar that the state has provided to small business development centers, companies assisted by the centers have attracted an average of ~\$65 in private capital (based on the last four fiscal years). Over these same four years, the centers have counseled on average 4,000 businesses and 7,700 individuals per year. These companies, supported with private capital, generate new job opportunities across multiple different industry segments.

As another example, small businesses that are certified through the SBCS' small and emerging business development program have a survival rate that is 20 percent higher (average over the last four fiscal years) than the general population of small businesses.

The Louisiana Community Network (LCN) has been implemented based on national best practices and is believed to

consist of the most comprehensive set of community-focused economic development tools in the nation. C2ER, the Council for Community and Economic Research (national organization representing community research professionals), gave a Recognition of Excellence award to LED for "A Comprehensive Strategy for Community Development in Louisiana" involving its work with LCN.

LCN has been met with great enthusiasm from local communities across the state. The program involves direct coordination between LED and local municipalities that want to prepare themselves to effectively compete with out-of-state communities for good jobs, business development projects, and capital investment. Included below is an example of the positive response LED has received regarding LCN:

"The state has demonstrated its commitment to enhancing economic development at the local level. Our partners at LED have aggressively promoted community development and invested heavily in a system that will help Louisiana's communities become more competitive."

Tom Ed McHugh, executive director of Louisiana Municipal Association

**Activity ID:** 39

**Activity Name:**  
Business Expansion and Retention Group

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Facilitate the growth of in-state companies through a coordinated set of discussions, meetings, and analyses targeting ~500 economic-driver companies annually. Deliver solutions to issues impacting company growth, and pursue expansion and retention opportunities as they are identified.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of proactive business retention and expansion visits with economic-driver firms in the state	264	0	0	500	500

**Narrative:**

The Business Expansion and Retention Group (BERG) reaches out to businesses across the state, in coordination with regional and local economic development partners, to understand their challenges, assist with retention or expansion projects, and identify opportunities to make Louisiana a better place in which to do business. Through BERG, LED has established a systematic approach for proactively communicating with Louisiana's existing businesses. BERG has developed and is implementing an action plan for reaching out regularly to top economic-driver companies in the state and fast growth companies including companies identified by small business development centers in the efforts. This allows the State to identify business expansion and retention opportunities at early stages in companies' decision-making process. This also allows the State to more effectively market the benefits of operating in Louisiana and to preemptively develop solutions for companies (e.g., workforce training, assistance with infrastructure issues) before they begin considering out-of-state options for their projects.

BERG, through one-on-one discussions with in-state company executives and the analyses of data collected through these discussions, identifies common issues that are impacting the growth of companies within particular industry segments and develops potential recommendations to overcome these issues. This enables LED to prioritize its efforts to improve the State's overall business climate.

BERG works in close coordination with regional and local economic development partner organizations, tapping into well-established regional/local relationships with companies across the state and leveraging regional/local resources. The program utilizes a common information-technology platform across LED and partner organizations, enabling more efficient communications among the State, regional and local groups, and the private sector. Tools leveraged for the program include a software database that allows analysis of data collected through discussions with companies across the state. Additionally, a Geographic Information System (GIS) is utilized to map the companies

visited by the program along with an inventory of the companies' products and services, enabling the pursuit of co-location and expansion opportunities (i.e., the location of a supplier near a Louisiana-based customer).

**Explain How This Activity Advances State Outcome Goal:**

The vast majority of Louisiana's new job growth -- and 100 percent of job losses -- comes from businesses already located in Louisiana. As indicated in the RFR for Diversified Economic Growth, a primary factor impacting the creation of new jobs and earnings for Louisiana residents is aggressive business development, including a focus on the expansion and retention of existing businesses. According to the RFR, "business development efforts specifically focused on Louisiana companies can generate significant impact because they are focused on opportunities where Louisiana is reasonably positioned to compete (a company already operating in Louisiana typically has experience succeeding in the state). By proactively uncovering investment decisions early in the decision-making process, the state can develop and deliver Louisiana-based solutions that result in new investment and new jobs in Louisiana instead of other locations potentially being considered." BERG directly addresses this critical component of aggressive business development activity.

After approximately eight months operating, BERG had conducted approximately 300 visits with businesses across the state. 174 visits were led by LED with ninety percent of these discussions being with economic driver firms (i.e., firms that export goods or services). 121 visits had been conducted through partner economic development organizations.

Through these visits, a number of retention and expansion projects are uncovered and pursued. These projects represent discreet opportunities to work with Louisiana companies to either retain their Louisiana employment base in a difficult global economy or expand their operations through either new investment or consolidation of operations into Louisiana. BERG has also established a cross-agency rapid response team that enables the State to efficiently and effectively resolve company issues identified through BERG's activities.

**Evidence:**

BERG has already delivered a number of early successes including:

**Gardner Denver Thomas**

The retention of 70 jobs and relocation of ~200 new jobs to Monroe (Ouachita Parish) from Wisconsin. BERG coordinated the state response to the opportunity.

**Saint Gobain**

The retention of 300 jobs and the modernization of the facility in Simsboro (Lincoln Parish). BERG visited the company and assisted in developing a plan to modernize the facility.

**BASF**

The creation of ~ 10 new jobs, retention of existing operations employing ~1,000 people, and \$80 million in new capital investment at the Geismar (Ascension Parish) facility. The opportunity was uncovered and pursued by BERG.

Additionally, over 20 new retention or expansion projects have been identified through BERG's efforts that are pending totaling over 3,000 retained jobs and over 500 new jobs with project decision dates prior to July 1, 2010.

Numerous articles have been published regarding the benefits of active business retention and expansion programs, including an article referenced in the RFR for Diversified Economic Growth. Many experts comment that retention and expansion programs are often the most cost-effective way to uncover opportunities to grow and retain jobs, particularly knowing that the vast majority of job growth stems from companies already operating in a given area. Recent articles in International Economic Development Council's Quarterly (Winter 2009) and Small Business Administration studies (June 2008) have stressed the importance of growing existing businesses as a top economic development strategy. Numerous case studies on the importance of business retention are available from the national business retention professionals association - Business Retention and Expansion International (BREI).

**Activity ID:** 25  
**Activity Name:** Louisiana FastStart  
**Department:** 05 Department of Economic Development  
**Agency:** 251 Office of the Secretary  
**Program:** 1000 Administration  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide workforce solutions for business expansion and recruitment projects in a manner that assists in Louisiana's business recruitment and expansion efforts, resulting in increased jobs for Louisiana

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	New employment associated with FastStart projects	1867	0	0	0	2000

**Narrative:**

The Louisiana FastStart program provides a turnkey workforce solution for business expansion and recruitment projects. Louisiana FastStart assists in Louisiana's business recruitment and expansion efforts by fully and definitively addressing a top company concern - the availability of trained/qualified employees. In fact, the program has transformed workforce from a concern to a strategic advantage for Louisiana. Louisiana FastStart is currently in a pilot phase, with eleven active projects. The program is anticipated to become fully operational by January 2010. Once fully implemented, the program could deliver customized training services to over 100 companies per year.

Louisiana FastStart directly assists companies seeking to relocate and/or expand in the following ways: identifying and screening high-potential employees for their operation, developing customized training materials utilizing the latest computer-based technologies and video production techniques, and delivering employee training in a manner specifically tailored for the company. The initiative was designed based on best practices in place elsewhere (in particular, Georgia's Quick Start program) and is implemented largely through partnerships with the Louisiana Community and Technical College, the Louisiana Workforce Commission, the Board of Regents, and private providers. The program is relatively unique among workforce incentive programs in that it directly develops and delivers workforce services to companies; it is not a workforce grant program. This allows the Louisiana FastStart team to develop and build leading edge capabilities that are particularly valuable to companies seeking to start a new operation or expand. Louisiana FastStart serves as a positive Louisiana differentiator when the state is competing for business investment.

The program instills confidence in business decision-makers that they will be able to successfully ramp-up their new or expanding operation with a highly skilled and trained workforce that is available and in place to meet their operations schedule. By addressing this top concern and instilling confidence in business decision-makers, Louisiana is able to attract new investment and new jobs that otherwise may have been directed elsewhere were it not for Louisiana FastStart. By impacting company decision-making, Louisiana FastStart helps deliver new jobs in a variety of industry sectors, driving diversified economic growth.

### **Explain How This Activity Advances State Outcome Goal:**

As indicated in the RFR for Diversified Economic Growth, a primary factor impacting the creation of new jobs and earnings for Louisiana residents is the "availability of a quality workforce that is aligned with the needs of the current and future Louisiana economy... Most business executive decisions regarding the location of a business enterprise involve workforce considerations as top criteria."

Louisiana FastStart has already delivered substantial results, even in its early pilot stages. As a core component of Louisiana's business development toolbox, Louisiana FastStart has assisted LED in generating a number of significant project wins for the state. Through 9/21/09, the major LED-assisted project wins over calendar years 2008 and 2009YTD are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up

Louisiana FastStart is currently engaged with eleven pilot projects (a subset of the total project wins above) that are projected to deliver 6,605 new direct jobs, 9,831 new indirect jobs, 16,436 total new jobs, 4,544 retained jobs, \$1.1 billion in capital investment, and \$39 million per year in new state tax revenues once the projects are fully ramped-up.

These results are generated with a positive return-on-investment based on state tax revenues. When LED enters into an agreement with a company for Louisiana FastStart or other discretionary incentive programs, it conducts a comprehensive return-on-investment evaluation that takes into account the projected future state tax revenues associated with the project relative to the costs to the state (including the cost of delivering Louisiana FastStart and other incentives). These evaluations ensure that Louisiana FastStart is managed and delivered in a way that provides a positive return-on-investment.

#### **Evidence:**

Louisiana FastStart is modeled after the successful Georgia Quick Start program. In building Louisiana FastStart, LED recruited some of the nation's top corporate trainers, six of whom came from Georgia where they developed customized training solutions for hundreds of companies, such as Cessna, AT&T, GEICO, Toyota- Denso, Wal-Mart.com, Wrigley's, Ford Motor Company, Suzuki, General Mills, Honda, Kia, Yamaha, General Motors, Toyo Tire and Pirelli Tire. Based on surveys of top site-selection consultants, Expansion Management magazine rated Georgia Quick Start either No. 1 or No. 2 in the country for workforce training programs in each of the past six years.

Collectively the Louisiana FastStart team has worked with over 1,000 companies during the last 10 years. They have significant experience in recruitment of major companies; the senior team has a cumulative manufacturing/corporate experience of 227 years; the senior team has a cumulative training design/development/and delivery experience of 168 years; the video team has a cumulative 55 years of experience; creative services has a cumulative 28 years of experience.

Company testimonials indicate the early success of Louisiana FastStart:

#### **Barrister Global Services Network**

"We told the state, 'We need your help if we're going to bring more jobs to Louisiana, but we need a way around the problems that bog us down.' The answer was FastStart. It's incredible to get through the red tape. All of that is gone with FastStart."

Debra Bowers, President

#### **V-Vehicle Company**

"We're banking on that program. We're coming to an area we don't know and a work force we're unfamiliar with, so FastStart became a decisive factor."

Horst Metz, Vice President of Assembly Operations

"I can't emphasize enough the importance of tailoring the (work force training program) for us. It was the conviction

that Louisiana could provide this work force that sealed the deal... Because of incentives like the Louisiana FastStart program, we could identify and train the people that will ultimately determine a large part of our success."

Frank Varasano, Chief Executive Officer

Gardner Denver Thomas

"The people at [Louisiana] FastStart really have given us a great boost in the arm and have allowed us to get where we are today. We have... 67 people in there working today that weren't working there three months ago. That's a great accomplishment."

Barry Pennypacker, President and CEO

**Agency:** 252 Office of Business Development  
**Program:** 1000 Business Development Program  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide a wide range of leadership and support services to assist entrepreneurs and small businesses grow, to assist communities in improving their competitiveness, to communicate the positive momentum occurring in Louisiana, and to work with prospects to secure investment and job growth

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20928	Key	Percent of stakeholders satisfied with business development assistance	100	87	95.6	85	85
20790	Key	Percent of LED staff reporting job satisfaction	80.6	81.4	85.3	85	85

**Narrative:**

The Office of Business Development - Executive and Support activity includes a wide range of leadership and support services that are essential for LED to assist entrepreneurs and small businesses in their efforts to grow, to assist communities in improving their capacity to compete with communities in other states, to communicate and market the positive momentum occurring in Louisiana, and to work with prospects to secure their investment and job growth in Louisiana. It also provides expertise in the development and optimization of global opportunities for trade and inbound investments, leads efforts to cultivate top regional economic development assets, leads initiatives that protect and grow the state's military and federal presence, and leads efforts to integrate business intelligence functions into the state's business development activities. Without the Executive and Support activity, LED would be unable to deliver positive economic outcomes such as new jobs, capital investment, and economic diversification for the state.

This activity also contains \$10 million for the Rapid Response fund as directed by statute - RS 51:2361 and any budget year rollovers for the Mega Project Development Fund. It also includes annual debt service payments and annual performance-based grants associated with incentives for several previously announced business development projects.

The activity also includes operating funding for three wet labs (Shreveport, Baton Rouge, New Orleans) focused on entrepreneurship in bio-sciences. It includes funding focused on site specific expenses – in some competitive prospect situations, LED needs to invest in a level of site preparation activities (e.g., wetlands mitigation) to remain competitive with other states that may be able to offer a development-ready site. It includes personnel and expenses associated with operating the Accent Building, a state-owned facility in Monroe, LA that is being leveraged with

business development projects. Finally, it contains a number of expenses associated with the Marketing Fund (established under statute) and marketing of the Federal Renewal Communities program.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Business Development - Executive and Support activity provides leadership and support services that enable LED to deliver against its mission. LED Mission: Lead economic development for the State of Louisiana.

In addition, the activity enables LED to make progress against its vision for the State of Louisiana. LED Vision: Reposition Louisiana as the next great American state for business investment, quality of life, and economic opportunity.

LED's mission and vision are directly aligned with the state outcome goal for diversified economic growth. Outcome Goal Statement: I want Louisiana to retain, grow, and attract good jobs in a diversified, growing economy, while wisely utilizing cultural and natural resources.

Through 9/21/09, LED has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). The Executive and Support activity plays a key role in delivering these project wins.

Additionally, LED has assisted thousands of other in-state businesses, including entrepreneurs and small businesses, through its many incentive and small business-focused programs. Without a well-functioning Executive and Support functions, these entrepreneurs and businesses would not be supported with quality service levels.

In summary, the Office of Business Development – Executive and Support activity plays a critical direct and indirect role in delivering new Louisiana jobs for the state.

**Evidence:**

LED has recently received national recognition for its business development activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's efforts are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns.

EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are

moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's business development activities, as well as other state efforts.

20807	Key	Number of significant improvements made for business and government interactions (e.g. permitting, business incentives, filings)	3	0	2	3	3

**Narrative:**

The State Economic Competitiveness (SEC) group pursues opportunities to strengthen Louisiana's fundamental attractiveness for businesses. SEC is composed of four full-time staff members with strong analytical capabilities and a broad range of experience related to economic development policy. In addition, the SEC budget includes funds to leverage targeted third-party expertise in key policy areas. SEC is the only group in state government with a primary focus on improving Louisiana's overall business climate through public policy initiatives, targeted investments, and governmental process improvements. SEC initiatives are closely aligned with several key factors leading to diversified economic growth that were identified in the RFR for Diversified Economic Growth, including:

- Improving Louisiana's business climate (both perceived and actual) by addressing tax and regulatory issues, legal environment, operating cost drivers, and other key issues (e.g., ethics law, R&D)
- Increasing the quality of Louisiana's workforce by seeking to align educational systems with workforce needs
- Improving Louisiana's brand in the eyes of business leaders and site selection consultants by leading targeted

initiatives to improve Louisiana's position on various national rankings

- Developing cost-effective incentives (e.g., general, industry-specific, R&D) and continually improving upon existing incentives to secure business investment and job creation
- Addressing other key factors that drive business decisions (e.g., transportation infrastructure, research and development activity, quality of life)

Over the next year and beyond, SEC will pursue opportunities to improve Louisiana's tax competitiveness, develop recommendations to align Louisiana's higher education outcomes with workforce needs, benchmark key business costs (e.g., utilities, labor), finalize a comprehensive plan to support small business and entrepreneurship in the state, and ease the regulatory burden for business (e.g., small business red tape, tort reform). SEC team members seek continuous improvements by comprehensively analyzing the state's business climate and proposing innovative, best practice approaches to address business concerns. Recommendations are based on assessments of the competitiveness of current or proposed policies, the costs to implement any changes, and feedback from various stakeholders.

#### **Explain How This Activity Advances State Outcome Goal:**

The SEC group drives diversified economic growth by directly addressing six of the seven purchasing strategies (i.e., 1, 3, 4, 5, 6, and 7) identified by the Economic Development Results Team.

The SEC group is playing a leadership role in statewide efforts to align training and educational programs with current and future workforce needs as LED's primary interface with the Postsecondary Education Review Commission (PERC). The SEC group will work to ensure that ongoing comprehensive workforce reform is actually strengthened by PERC recommendations despite a tight budget situation.

While coordinating with several third-party experts, the SEC group is developing recommendations aimed at cultivating new, high-potential growth industries. The SEC group is leading LED's Blue Ocean high-growth target industry strategy to identify additional target industries. The goal of this work is to reverse Louisiana's trend of population outmigration by increasing the number of high-quality, stable job opportunities for those who have traditionally sought these opportunities elsewhere.

The SEC group will also pursue opportunities to improve Louisiana's brand (both real and perceived) from the perspective of business leaders and site selection consultants. The SEC group has undertaken a comprehensive analysis of state rankings that seeks to drive significant improvements in Louisiana's national ranking performance such that Louisiana is increasingly at the top of the "short list" for business decision makers and site selection professionals.

Finally, the SEC group is identifying and developing recommendations to enhance existing economic development assets in each region of the state. There are several existing assets (e.g., Pennington Biomedical Research Center, Barksdale Air Force Base) that have the potential to drive significant economic development activity if these assets are cultivated with targeted investments and marketed effectively.

#### **Evidence:**

SEC staffing was completed less than a year ago; however, approximately 28 competitiveness improvements have been identified and the team has started to implement 15 of these initiatives. The SEC group's recommendations are based on best practices identified by independent third-party experts. As part of an effort to measure its effectiveness, the SEC group will continually monitor Louisiana's performance across several state rankings of business climate and economic development. Several business publications have recognized improvement in Louisiana's economic climate, including:

- Louisiana was named "Co-State of the Year" with Tennessee in Southern Business & Development's annual SB&D 100 rankings
- Louisiana jumped five spots from 49th to 44th in Forbes magazine ranking of the Best States for Business (released in September 2009). Louisiana's growth prospects also moved up from 17th to 8th in the nation.
- Louisiana moved up from 40th to 27th in Pollina's Corporate Real Estate's rankings of pro-business states
- In August 2009, the American Legislative Exchange Council (ALEC) ranked Louisiana's economic outlook 18th out of 50 states, up from 21st last year. ALEC also ranked Louisiana 1st in the category of "Recently Legislated Tax

Changes.”

The criteria identified by the Economic Development Results Team are directly addressed throughout several SEC initiatives. SEC projects, particularly the first three listed below, seek to diversify the state’s economy into high-growth sectors to complement Louisiana’s existing industry base. The long-term goal of this work is to 1) increase employment opportunities in Louisiana, 2) stem the tide of net outmigration in Louisiana, and 3) to increase per capita income for Louisiana residents. Several SEC projects are directly correlated with purchasing strategies listed by the Economic Development Results Team, as outlined in the previous section.

**Activity ID:** 28

**Activity Name:**

Louisiana Economic Development Corporation

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 2000 Business Incentives Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Establish and maintain a 90% satisfaction level with LED services for all participants of incentive products administered by LED through the Louisiana Economic Development Corporation Board.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21077	Key	Percent of incentive applicants to the LEDC Board satisfied with LED assistance	100	100	100	75	90

**Narrative:**

The Louisiana State Legislature passed legislation which created the Louisiana Economic Development Corporation (LEDC). The LEDC Board is comprised of 11 members who are appointed by the Governor. The Board is managed by LED with the Secretary serving as President of the corporation

LEDC's mission is to serve as a catalyst for capital access for start-up and existing businesses, to enable new businesses to form and existing businesses to expand, and to provide for the sustained economic growth of the State and an improved quality of life for its citizens. LEDC encourages business investment and job creation by providing financial support through an array of incentive programs.

Actively utilized programs include: Louisiana Small Business Loan Program (SBLP) provides assistance to qualified small businesses in the form of loan guarantees and loan participations in conjunction with banks and other commercial lending institutions. This program is a critical component of LED's overall small business and entrepreneurship efforts.

Economic Development Award Program (EDAP) provides financing for publicly-owned infrastructure for industrial or business development projects that promote economic development.

Economic Development Loan Program (EDLOP) created as a supplement program to EDAP to provide direct loans to businesses to fund privately owned property and improvements including the purchase of building sites and the purchase, construction, renovation, rebuilding and improvement of buildings, surrounding property and machinery and equipment purchases for businesses locating in the state or existing businesses within the state. Both EDAP and EDLOP programs are focused on competitive situations which help the state win projects with new jobs and investments.

Louisiana Venture Capital Co-Investment Program provides for a co-investment with a certified venture capital fund in a specific La business of up to 1/4 of an investment round, but not greater than \$500,000. La Venture Capital Match Program provides for a match investment for qualified La venture capital funds.

BIDCO Investment and Co-Investment Programs provide a match or co-investment in certified BIDCOs. BIDCOs are for profit, state-chartered, non-depository alternative financing sources for small businesses licensed by the La Office of Financial Institutions. BIDCOs provide equity and subordinated debt financing to new and growing companies, as well as turnaround assistance.

**Explain How This Activity Advances State Outcome Goal:**

As previously expressed, LEDC serves as a catalyst for capital access for Louisiana start-up and existing businesses. LEDC successfully advances stated outcome goals by supporting entrepreneurship and small businesses in our state. Louisiana Small Business Loan Program (SBLP), Micro Loan Program, Contract Loan Program and Capital Access Program provide financial assistance to qualified small businesses owners in the form of loan guarantees and loan participations in conjunction with banks and other commercial lending institutions. These programs mitigate the risk of loss to banks and facilitate loans to small business owners that may not have been made by the bankers if not for the LEDC involvement.

Economic Development Award Program (EDAP) provides financing for publicly-owned infrastructure for industrial or business development projects that promote economic development. Economic Development Loan Program (EDLOP) was created as a supplement program to EDAP to provide direct loans to Louisiana businesses. LEDC delivers on the outcome goals by ensuring that jobs are created through these programs.

The LEDC equity investment programs including the Louisiana Venture Capital Co-Investment Program, Louisiana Venture Capital Match Program, Louisiana Minority Venture Capital Match Program, Louisiana Seed Capital Program, BIDCO Investment and Co-Investment Programs, and Specialty BIDCO Investment Program are geared toward assisting with the capitalization of venture capital funds that make equity investments in Louisiana companies that are developing new technologies and industries, expanding traditional industries, commercializing state university based research, and generating and retaining jobs within the state.

**Evidence:**

In Fiscal Year 2008-2009 LEDC funded twelve SBLP projects totaling \$9.3 million which generated \$2.9 million in private investment, 224 new jobs and 225 retained jobs. Small businesses were able to receive loans that they might not have otherwise received.

In FY 2008-09 six EDAP and two EDLOP projects were awarded for a total of \$10.1 million which generated 874 new jobs; retained 423 jobs; created a total annual payroll of \$83.4 million; and private investment of \$102.3 million in the state.

In Fiscal Year 2008-2009 the Workforce Development and Training Program funded two projects totaling \$439,914 which generated 94 new jobs and retained 197 jobs.

As of July 9, 2009, LEDC venture capital investments totaled \$51 million including \$4.5 million in two BIDCOs; \$37.1 million in ten venture capital matches; \$4.6 million in university foundation investments; and \$4.6 million in four venture capital co-investments. LEDC is committed to fund an additional \$3.6 million. Returns on LEDC investments totaled \$6.7 million.

**Activity ID:** 22

**Activity Name:**  
Executive and Administration

**Department:** 05 Department of Economic Development

**Agency:** 251 Office of the Secretary

**Program:** 1000 Administration

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide leadership, quality administrative services, and internal controls to enable LED to deliver against its mission.  
LED Mission: Lead economic development for the State of Louisiana.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21051	Key	Number of major economic development prospects added	212	187	417	180	200

**Narrative:**

The Office of the Secretary - Executive and Administration activity includes a wide range of leadership and administration services that are essential for LED to deliver against its mission. Without the Executive and Administration activity, LED would be unable to deliver positive economic outcomes such as an improved business climate, new jobs, and economic diversification for the state.

Critical administrative functions in Executive and Administration include: human resources, information technology, management and finance, fiscal services, purchasing, internal audit, and legal. In addition, it contains a variety of shared costs across the department such as risk management, security, and office equipment rentals.

These functions either directly or indirectly deliver positive economic outcomes for the state. For instance, the legal function develops cooperative endeavor agreements with companies choosing to invest in Louisiana vs. other locations. These agreements contain specific requirements for companies to create new jobs and payroll in the state of Louisiana. Through the legislative and congressional liaison function, LED is able to communicate to elected officials information related to Louisiana's current business climate and opportunities for making improvements.

LED's executive team directly participates in LED's efforts across the entire department. The executive team plays a critical role in identifying and communicating opportunities for improving the state's business climate, in communicating to business decision-makers the value-proposition that the state can provide to their business operations, in initiating efforts to support entrepreneurship and small business, in articulating strategic approaches for building and delivering a quality workforce, and in guiding state investments in economic development infrastructure.

**Explain How This Activity Advances State Outcome Goal:**

The Office of the Secretary - Executive and Administration activity provides leadership, quality administrative services, and internal controls to enable LED to deliver against its mission. LED Mission: Lead economic

development for the State of Louisiana.

In addition, the activity enables LED to make progress against its vision for the State of Louisiana. LED Vision: Reposition Louisiana as the next great American state for business investment, quality of life, and economic opportunity.

LED's mission and vision are directly aligned with the state outcome goal for diversified economic growth. Outcome Goal Statement: I want Louisiana to retain, grow, and attract good jobs in a diversified, growing economy, while wisely utilizing cultural and natural resources.

Through 9/21/09, LED has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). The Executive and Administration activity plays a key role in delivering these project wins. Additionally, LED has assisted thousands of other in-state businesses, including entrepreneurs and small businesses, through its many incentive and small business-focused programs. Without a well-functioning Executive and Administration functions, these entrepreneurs and businesses would not be supported with a service levels.

In summary, the Office of the Secretary – Executive and Administration activity plays a critical direct and indirect role in delivering new Louisiana jobs for the state.

**Evidence:**

LED has recently received national recognition for its activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's efforts are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns.

EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's activities, as well as other state efforts.

NOTE: The performance indicator definition for three years ago is substantially different from the definition used currently.

**Activity ID:** 38

**Activity Name:**  
Business Marketing and Recruitment

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Deliver new jobs for the State of Louisiana through marketing and business development efforts that improve decision-makers' perception of the state's business climate and convince decision-makers to invest and grow their business in the state.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20928	Key	Percent of stakeholders satisfied with business development assistance	100	85.7	95.6	85	85
New	Supporting	Percentage of readers of the Economic Development Quarterly (EQ) believe progress is being made with the business climate in Louisiana	100	0	0	80	80
15583	Key	Number of national ranking reports showing Louisiana with an improved state ranking over previous periods	16	4	8	3	3

**Narrative:**

The Business Marketing and Recruitment activity utilizes national-caliber marketing and business development capabilities to attract investment and jobs to Louisiana. The activity focuses on working with in-state, out-of-state, and international companies to convince them to invest and grow their businesses in Louisiana. By influencing these decisions, Business Marketing and Recruitment delivers new jobs and diversifies Louisiana's economy.

One of the greatest challenges facing economic development in the state is the relatively negative perception of Louisiana held by some business executives in the United States and around the world. Often these perceptions are based on outdated or completely inaccurate views of our state. To create a brighter economic future for Louisiana, LED conveys to business executives that Louisiana is positioning itself to become the next great American state for business investment, quality of life, and economic opportunity. This is accomplished through Business Marketing with fresh advertising strategies - including a national-caliber website and marketing collateral, earned media covering Louisiana's successes, and a quarterly economic development publication designed to communicate economic development progress in Louisiana.

Business Recruitment activities target individual business decision-makers to develop solutions that compel them to

invest and grow their business in Louisiana vs. another state or country. LED executes an aggressive business recruitment program to capture a disproportionate share of the relatively few large projects that locate in the United States each year, as well as to attract investment in new, high-growth industry sectors that can diversify the State's economy.

LED is currently engaging in a business development optimization project to further strengthen its business development capabilities and processes. This project will result in improved LED response times and service levels for business decision-makers. Additionally, LED is fully integrating its business intelligence function into its marketing and recruitment efforts. An example of this integration is the launch of LED's sites and buildings database in partnership with Entergy. This integration enables LED to convey Louisiana's value proposition in a highly convincing manner. LED's overall goal is to become one of the top two to three business marketing and recruitment organizations in the country.

**Explain How This Activity Advances State Outcome Goal:**

As indicated in the RFR for Diversified Economic Growth, a primary factor impacting the creation of new jobs and earnings for Louisiana residents is aggressive business development, including a focus on both marketing/branding and business recruitment. Additionally, the RFR indicates a preference for "offers that pursue business development efforts in a highly professional, sophisticated, proactive manner," "offers that demonstrate a strong likelihood of success," and "offers that deliver impact in a reasonable timeframe."

The Business Marketing and Recruitment activity delivers squarely against the factors and preferences described above.

Through 9/21/09, Business Marketing and Recruitment has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). Additionally, the wage levels associated with these new jobs are generally well-above average wage levels for the communities in which the businesses are locating or expanding.

To deliver these project wins, Business Marketing and Recruitment built awareness of Louisiana as an attractive location for business investment, developed prospect leads, worked with individual businesses to develop solutions against their decision-making criteria, and convinced these businesses that investing and growing in Louisiana was the right business decision. Without the Business Marketing and Recruitment activity, these new jobs, capital investment, and recurring state tax revenues would not have been delivered.

**Evidence:**

LED has recently received national recognition for its marketing and business development activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's marketing and business development activities are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns. EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's Business Marketing and Recruitment activity, as well as other state efforts.

Small Business and Community Services

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

The SEBD program is requested at a 20% level increase (\$160,000)over FY10 assisting 85 new clients. The Small Business Development Centers are requested at a 20% level increase (\$200,000)assisting 580 new clients.

\$200K is included for a new Ready Communities Initiative. LED's Community Development Initiative began in 2007. This initiative consists of three phases to support Louisiana communities best prepare to compete in a global economy for economic development investment and resulting job opportunities. Phase I in 2007 consisted of a state wide survey of public and private community leaders. Phase II which was announced in 2008 was the web based delivery of solutions to address these opportunities - the Louisiana Community Network (LCN). Phase III is assisting 12 Louisiana communities implement four modules from the LCN. Funding was provided by an EDA grant that expires in fiscal year 2010. \$200K will allow 12 additional communities to participate.

**Activity Type:** Existing

**Objective:**

Support the creation and growth of small businesses, including those with the potential to generate a significant, long-term economic impact. Strengthen Louisiana communities' business development efforts and foster the development of key regional economic development assets

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of newly certified sites	0	0	0	10	15
14400	Supporting	Three-year default rate on small business bond guarantees	0	0	0	15	5
15580	Supporting	Private financing generated by Small Business Development Centers per state dollar invested	46	66	55	50	50

**Narrative:**

The Small Business and Community Services (previously Community Outreach Services) activity works to reposition Louisiana as one of the best places in the country in which to start and grow a small business and to create a more vibrant entrepreneurial culture in Louisiana. It also provides assistance to local communities to increase their competitiveness and, thereby increase the effectiveness of local and regional business development efforts in creating more jobs and diversifying Louisiana's economy.

Two critical programs associated with the Small Business and Community Services activity include the Small and Emerging Business Development (SEBD) program and Small Business Development Centers (SBDC). A 20% increase in funding for the SEBD program and SBDCs will enable the State to positively impact a larger number of entrepreneurs and small businesses next fiscal year, leading to increased small business success rates and increased numbers of new jobs associated with growing small businesses. These two programs provide direct, one-on-one assistance to entrepreneurs and small businesses that are seeking to grow and prosper. This assistance enables these companies to build new capabilities and leverage these new capabilities to capitalize on growth opportunities.

Expanded funding is also being sought to support the continuation of LED's community competitiveness initiatives. In 2008, LED launched the Louisiana Community Network (LCN), a web-based suite of education modules focused on increasing local economic development capacity. As a component of this effort, LED launched its Ready Communities initiative in 2009 to directly work with communities to better prepare themselves to compete with out-of-state communities when working to attract business development prospects. Funding for the Ready Communities initiative was provided by an EDA grant that expires in fiscal year 2010. \$200K will allow 12 additional communities to participate in the program in fiscal year 2011. Assisting Louisiana's communities to build and maintain their competitive position is a top priority of LED and is a critical component to the state's ability to deliver diversified economic growth.

**Explain How This Activity Advances State Outcome Goal:**

As indicated in the RFR for Diversified Economic Growth, "cultivating entrepreneurship and small business can provide Louisiana an opportunity to benefit..." from the job growth delivered by successful small business ventures. "A small business with relatively few direct jobs can, over time, evolve into a Fortune 500 headquarters with thousands of high-paying corporate jobs."

Small Business and Community Services (SBCS) provides technical assistance and other programs for small businesses and entrepreneurs through activities such as: the small and emerging business development program, funding to small business development centers, training, matching grants, and bond guarantees. These services help entrepreneurs and small businesses in their efforts to start and grow. In doing so, they boost company survival rates, improve access to capital, and facilitate companies' efforts to move to "the next level" in terms of performance, revenues, and employment.

Additionally, SBCS operates the Louisiana Community Network (LCN), a web-based suite of education modules focused on increasing local economic development capacity. The tool helps municipalities, parishes, and regions prepare for success by providing resources to develop a strong economic development plan; to understand options for adequate, stable funding; to develop an assertive, professional staff; and to build coordinated engagement from the public and private sectors. A newly launched certified sites program with matching grants encourages the identification of development-ready sites around the state – a factor contributing towards diversified economic growth.

Many of SBCS' efforts are conducted in close coordination with local and regional partners. For instance, the regional matching grants program leverages funding from privately-funded economic development partner organizations to ensure strong, professional, regionally-based economic development efforts to complement LED's state-level efforts.

**Evidence:**

Small Business and Community Services (SBCS) delivers a wide variety of positive outcomes directly impacting the state's diversified economic growth. For instance, for every dollar that the state has provided to small business development centers, companies assisted by the centers have attracted an average of ~\$65 in private capital (based on the last four fiscal years). Over these same four years, the centers have counseled on average 4,000 businesses and 7,700 individuals per year. These companies, supported with private capital, generate new job opportunities across multiple different industry segments.

As another example, small businesses that are certified through the SBCS' small and emerging business

development program have a survival rate that is 20 percent higher (average over the last four fiscal years) than the general population of small businesses.

The Louisiana Community Network (LCN) has been implemented based on national best practices and is believed to consist of the most comprehensive set of community-focused economic development tools in the nation. C2ER, the Council for Community and Economic Research (national organization representing community research professionals), gave a Recognition of Excellence award to LED for "A Comprehensive Strategy for Community Development in Louisiana" involving its work with LCN.

LCN has been met with great enthusiasm from local communities across the state. The program involves direct coordination between LED and local municipalities that want to prepare themselves to effectively compete with out-of-state communities for good jobs, business development projects, and capital investment. Included below is an example of the positive response LED has received regarding LCN:

"The state has demonstrated its commitment to enhancing economic development at the local level. Our partners at LED have aggressively promoted community development and invested heavily in a system that will help Louisiana's communities become more competitive."

Tom Ed McHugh, executive director of Louisiana Municipal Association

**Activity ID:** 32

**Activity Name:**

Entertainment Industry Development

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To develop and grow an indigenous entertainment industry.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
1314	Key	Number of full-length productions shot in the state	60	40	33	0	50

**Narrative:**

The Office of Entertainment Industry Development's (OEID) mission is to develop and grow an indigenous entertainment industry. It is responsible for promoting new and existing economic development in four industry sectors: digital interactive media, motion picture, music, and live performance. The OEID promotes the state of Louisiana as a destination for this business activity. Primarily this is accomplished by administering four state mandated tax credit programs that promote continuing development of four target sectors. The entertainment office functions to administer and process tax credits from initial application step to actual issuing of credits. Additionally, OEID strategically identifies areas of infrastructure improvement within the four sectors (such as work force training, education, and specialized infrastructure) and implements solutions that mitigate these challenges to industry growth in the state. For example, OEID recognized an immediate need for skilled labor and was awarded a \$2 million grant from LEDC to administer a pilot program training workforce for entertainment jobs. Since 2002 OEID has attracted over \$3 billion of new investment in the state of Louisiana. Many states are competitive in this area and this activity helps ensure that we market the value of our programs compared to other states.

**Explain How This Activity Advances State Outcome Goal:**

The state seeks to advance economic growth in diverse sectors of the economy. The entertainment industries are a prime example of this mission. The arts and creative individuals are conducive to an environment young professionals seek because it indicates a better quality of life for them and their families. While Louisiana has a rich heritage of successful artists, our creative talent as a natural resource was forced to leave the state to seek career development and economic opportunity. That has changed with entertainment jobs located inside the state. The motion picture industry has been undergoing development for the longest period of time, so it will be used as a primary example to illustrate the economic span of entertainment economic development. Motion Picture industry's total economic impact was \$763 million in 2007. And \$6.64 of new spending was generated for every \$1 in 2007 tax

credits issued by the state.

Motion picture business is spread across the state particularly in Shreveport, New Orleans, Lafayette, and Baton Rouge. Between 2001 and 2007, employment in Louisiana's motion picture industry grew 33% annually. In 2007, Louisiana's motion picture industry supported creation of 6230 jobs and these jobs generated \$204M in wages. The industry creates both high-wage and high-skill job opportunities drawing from people with diverse levels of education. OEID recognizes a convergence among the four sectors it is developing and marketing. All four industry sectors rely upon a labor pool with an unusual mix of artistic creativity and technical expertise among college and trade school educated people. OEID pursues a diversification strategy to use business development in one sector (i.e. motion picture) to attract new growth in another sector (i.e. digital media).

**Evidence:**

New Investment:

- Over \$2.8 billion invested in the state in motion picture industry since 2002
- Over \$8.2 million invested in the state in digital interactive media industry since 2005
- Over \$400,000 invested in the state in sound recording industry since 2005
- Live Performance is the newest sector being targeted, so data is preliminary. New infrastructure and production such as construction of a new theatrical venue at the WWII museum featuring productions produced by native talent.

Economic Impact:

- Motion picture generates \$6.64 of economic impact for every \$1 in tax credits issued
- Sound recording generates \$6.78 of economic impact for every \$1 in tax credits issued
- Digital interactive media generates \$8.69 of economic impact for every \$1 in tax credits issued

Growth:

- Entertainment office personnel have processed 607 applications for tax credits
- From 2007 to 2008, applications for the motion picture program grew by 10% from 80 to 88 applications
- From 2007 to 2008, applications for the digital media program grew by 433% from 3 to 16 applications
- From 2007 to 2008, applications for the sound recording program grew by 88% from 8 to 15 applications

**Activity ID:** 38

**Activity Name:**

Business Marketing and Recruitment

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Deliver new jobs for the State of Louisiana through marketing and business development efforts that improve decision-makers' perception of the state's business climate and convince decision-makers to invest and grow their business in the state.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20928	Key	Percent of stakeholders satisfied with business development assistance	100	85.7	95.6	85	85
New	Supporting	Percentage of readers of the Economic Development Quarterly (EQ) believe progress is being made with the business climate in Louisiana	100	0	0	80	80
15583	Key	Number of national ranking reports showing Louisiana with an improved state ranking over previous periods	16	4	8	3	3

**Narrative:**

The Business Marketing and Recruitment activity utilizes national-caliber marketing and business development capabilities to attract investment and jobs to Louisiana. The activity focuses on working with in-state, out-of-state, and international companies to convince them to invest and grow their businesses in Louisiana. By influencing these decisions, Business Marketing and Recruitment delivers new jobs and diversifies Louisiana's economy.

One of the greatest challenges facing economic development in the state is the relatively negative perception of Louisiana held by some business executives in the United States and around the world. Often these perceptions are based on outdated or completely inaccurate views of our state. To create a brighter economic future for Louisiana, LED conveys to business executives that Louisiana is positioning itself to become the next great American state for business investment, quality of life, and economic opportunity. This is accomplished through Business Marketing with fresh advertising strategies - including a national-caliber website and marketing collateral, earned media covering Louisiana's successes, and a quarterly economic development publication designed to communicate

economic development progress in Louisiana.

Business Recruitment activities target individual business decision-makers to develop solutions that compel them to invest and grow their business in Louisiana vs. another state or country. LED executes an aggressive business recruitment program to capture a disproportionate share of the relatively few large projects that locate in the United States each year, as well as to attract investment in new, high-growth industry sectors that can diversify the State's economy.

LED is currently engaging in a business development optimization project to further strengthen its business development capabilities and processes. This project will result in improved LED response times and service levels for business decision-makers. Additionally, LED is fully integrating its business intelligence function into its marketing and recruitment efforts. An example of this integration is the launch of LED's sites and buildings database in partnership with Entergy. This integration enables LED to convey Louisiana's value proposition in a highly convincing manner. LED's overall goal is to become one of the top two to three business marketing and recruitment organizations in the country.

**Explain How This Activity Advances State Outcome Goal:**

As indicated in the RFR for Diversified Economic Growth, a primary factor impacting the creation of new jobs and earnings for Louisiana residents is aggressive business development, including a focus on both marketing/branding and business recruitment. Additionally, the RFR indicates a preference for "offers that pursue business development efforts in a highly professional, sophisticated, proactive manner," "offers that demonstrate a strong likelihood of success," and "offers that deliver impact in a reasonable timeframe."

The Business Marketing and Recruitment activity delivers squarely against the factors and preferences described above.

Through 9/21/09, Business Marketing and Recruitment has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). Additionally, the wage levels associated with these new jobs are generally well-above average wage levels for the communities in which the businesses are locating or expanding.

To deliver these project wins, Business Marketing and Recruitment built awareness of Louisiana as an attractive location for business investment, developed prospect leads, worked with individual businesses to develop solutions against their decision-making criteria, and convinced these businesses that investing and growing in Louisiana was the right business decision. Without the Business Marketing and Recruitment activity, these new jobs, capital investment, and recurring state tax revenues would not have been delivered.

**Evidence:**

LED has recently received national recognition for its marketing and business development activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's marketing and business development activities are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns. EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear

in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's Business Marketing and Recruitment activity, as well as other state efforts.

**Activity Name:**  
Executive and Support Functions  
**Department:** 05 Department of Economic Development  
**Agency:** 252 Office of Business Development  
**Program:** 1000 Business Development Program  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide a wide range of leadership and support services to assist entrepreneurs and small businesses grow, to assist communities in improving their competitiveness, to communicate the positive momentum occurring in Louisiana, and to work with prospects to secure investment and job growth

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20928	Key	Percent of stakeholders satisfied with business development assistance	100	87	95.6	85	85
20790	Key	Percent of LED staff reporting job satisfaction	80.6	81.4	85.3	85	85

**Narrative:**

The Office of Business Development - Executive and Support activity includes a wide range of leadership and support services that are essential for LED to assist entrepreneurs and small businesses in their efforts to grow, to assist communities in improving their capacity to compete with communities in other states, to communicate and market the positive momentum occurring in Louisiana, and to work with prospects to secure their investment and job growth in Louisiana. It also provides expertise in the development and optimization of global opportunities for trade and inbound investments, leads efforts to cultivate top regional economic development assets, leads initiatives that protect and grow the state's military and federal presence, and leads efforts to integrate business intelligence functions into the state's business development activities. Without the Executive and Support activity, LED would be unable to deliver positive economic outcomes such as new jobs, capital investment, and economic diversification for the state.

This activity also contains \$10 million for the Rapid Response fund as directed by statute - RS 51:2361 and any budget year rollovers for the Mega Project Development Fund. It also includes annual debt service payments and annual performance-based grants associated with incentives for several previously announced business development projects.

The activity also includes operating funding for three wet labs (Shreveport, Baton Rouge, New Orleans) focused on entrepreneurship in bio-sciences. It includes funding focused on site specific expenses – in some competitive prospect situations, LED needs to invest in a level of site preparation activities (e.g., wetlands mitigation) to remain competitive with other states that may be able to offer a development-ready site. It includes personnel and expenses associated with operating the Accent Building, a state-owned facility in Monroe, LA that is being leveraged with

business development projects. Finally, it contains a number of expenses associated with the Marketing Fund (established under statute) and marketing of the Federal Renewal Communities program.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Business Development - Executive and Support activity provides leadership and support services that enable LED to deliver against its mission. LED Mission: Lead economic development for the State of Louisiana.

In addition, the activity enables LED to make progress against its vision for the State of Louisiana. LED Vision: Reposition Louisiana as the next great American state for business investment, quality of life, and economic opportunity.

LED's mission and vision are directly aligned with the state outcome goal for diversified economic growth. Outcome Goal Statement: I want Louisiana to retain, grow, and attract good jobs in a diversified, growing economy, while wisely utilizing cultural and natural resources.

Through 9/21/09, LED has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). The Executive and Support activity plays a key role in delivering these project wins.

Additionally, LED has assisted thousands of other in-state businesses, including entrepreneurs and small businesses, through its many incentive and small business-focused programs. Without a well-functioning Executive and Support functions, these entrepreneurs and businesses would not be supported with quality service levels.

In summary, the Office of Business Development – Executive and Support activity plays a critical direct and indirect role in delivering new Louisiana jobs for the state.

**Evidence:**

LED has recently received national recognition for its business development activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's efforts are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns.

EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are

moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's business development activities, as well as other state efforts.

**Activity ID:** 45

**Activity Name:**

Executive and Support Functions

**Department:** 05 Department of Economic Development

**Agency:** 252 Office of Business Development

**Program:** 1000 Business Development Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Provide a wide range of leadership and support services to assist entrepreneurs and small businesses grow, to assist communities in improving their competitiveness, to communicate the positive momentum occurring in Louisiana, and to work with prospects to secure investment and job growth

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20928	Key	Percent of stakeholders satisfied with business development assistance	100	87	95.6	85	85
20790	Key	Percent of LED staff reporting job satisfaction	80.6	81.4	85.3	85	85

**Narrative:**

The Office of Business Development - Executive and Support activity includes a wide range of leadership and support services that are essential for LED to assist entrepreneurs and small businesses in their efforts to grow, to assist communities in improving their capacity to compete with communities in other states, to communicate and market the positive momentum occurring in Louisiana, and to work with prospects to secure their investment and job growth in Louisiana. It also provides expertise in the development and optimization of global opportunities for trade and inbound investments, leads efforts to cultivate top regional economic development assets, leads initiatives that protect and grow the state's military and federal presence, and leads efforts to integrate business intelligence functions into the state's business development activities. Without the Executive and Support activity, LED would be unable to deliver positive economic outcomes such as new jobs, capital investment, and economic diversification for the state.

This activity also contains \$10 million for the Rapid Response fund as directed by statute - RS 51:2361 and any budget year rollovers for the Mega Project Development Fund. It also includes annual debt service payments and annual performance-based grants associated with incentives for several previously announced business development projects.

The activity also includes operating funding for three wet labs (Shreveport, Baton Rouge, New Orleans) focused on entrepreneurship in bio-sciences. It includes funding focused on site specific expenses – in some competitive

prospect situations, LED needs to invest in a level of site preparation activities (e.g., wetlands mitigation) to remain competitive with other states that may be able to offer a development-ready site. It includes personnel and expenses associated with operating the Accent Building, a state-owned facility in Monroe, LA that is being leveraged with business development projects. Finally, it contains a number of expenses associated with the Marketing Fund (established under statute) and marketing of the Federal Renewal Communities program.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Business Development - Executive and Support activity provides leadership and support services that enable LED to deliver against its mission. LED Mission: Lead economic development for the State of Louisiana.

In addition, the activity enables LED to make progress against its vision for the State of Louisiana. LED Vision: Reposition Louisiana as the next great American state for business investment, quality of life, and economic opportunity.

LED's mission and vision are directly aligned with the state outcome goal for diversified economic growth. Outcome Goal Statement: I want Louisiana to retain, grow, and attract good jobs in a diversified, growing economy, while wisely utilizing cultural and natural resources.

Through 9/21/09, LED has delivered over 50 major LED-assisted project wins for the state over calendar years 2008 and 2009YTD. These project wins are projected to generate 13,140 new direct jobs, 22,174 new indirect jobs, 35,314 total new jobs, 14,280 retained jobs, \$4.5 billion in capital investment, and \$88 million per year in new state tax revenues once the projects are fully ramped-up. These projects provide a positive return-on-investment based on net new state tax revenues (i.e., state tax revenues generated by the projects exceed the state dollars invested in the project). The Executive and Support activity plays a key role in delivering these project wins.

Additionally, LED has assisted thousands of other in-state businesses, including entrepreneurs and small businesses, through its many incentive and small business-focused programs. Without a well-functioning Executive and Support functions, these entrepreneurs and businesses would not be supported with quality service levels.

In summary, the Office of Business Development – Executive and Support activity plays a critical direct and indirect role in delivering new Louisiana jobs for the state.

**Evidence:**

LED has recently received national recognition for its business development activities. Two examples follow:

Southern Business & Development magazine recently named Louisiana as its 2009 Co-state of the Year along with Tennessee. Louisiana and Tennessee beat out 15 other states in the South in the annual SB&D 100 rankings. Louisiana scored higher than all other Southern states for jobs and investment. For these rankings, Southern Business & Development counts the number of companies making public commitments of 200 jobs or more or \$30 million in investment or more. Louisiana's receipt of this award demonstrates that LED's efforts are yielding top-level results in relation to the performance of other southern states.

Additionally, LED recently earned the Southern Economic Development Council's Excellent Award in the Magazines and Advertorials category, for EQ, Louisiana Economic Quarterly; and two Merit Awards in the Publication Advertising: Campaigns category for its two national print campaigns.

EQ is a quarterly publication that provides insights about Louisiana's economy and highlights the state's economic progress. LED's two print campaigns appear in Fortune, Inc., Money, Fast Company, The Wall Street Journal, The New York Times, and other major business publications, and feature Louisiana business leaders and compelling statistics about the state's economic momentum.

These awards recognize the progress that LED is making in closing the gap between the perception and reality of Louisiana's business climate. With members from 17 states and the District of Columbia, SEDC is the oldest and largest regional economic development association in North America.

Separately, Louisiana has recently demonstrated positive population in-migration and relocation trends. Net

population migration is one of the three indicators of diversified economic growth as described in the RFR. For example, the 2009 Mayflower Customer Relocation Study revealed that Louisiana ranked 11th overall when comparing inbound relocations to outbound relocations over the past year. The report showed that people are moving to states that offer rewarding job opportunities, and that Louisiana is one of those states. The continuing population in-migration patterns are at least partly a result of the success of LED's business development activities, as well as other state efforts.

**Activity ID:** 49

**Activity Name:**

Enforcement

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 4000 Gaming Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

There has already been a 20% budgetary reduction which has significantly reduced performance levels reflected from FY 2008-2009 and projections for 20% reduction in FY 2009-2010.

- Increase in the Number of Days to complete a new Casino Gaming Background from 100 to 115
- Increase in the Number of Days to complete a new Video Gaming Type 1&2 application from 137 to 158

At a 5% Budget Reduction, the following are performance projections:

- Increase in the Number of Days to complete a new Casino Background from 115 to 121
- Increase in the Number of Days to complete a new Video Gaming Type 1&2 application from 158 to 166

Gaming Enforcement Program submitted a request for 21 civilian positions to replace 21 Troopers. With a recent loss of 9 Troopers, Gaming would like to retain 9 of the 21 Troopers with the remaining 12 being reassigned in LSP. The requested civilian positions will perform background investigations currently performed by troopers saving over \$1.5 million.

**Activity Type:** Existing

**Objective:**

To ensure the protection of citizens from corruption through the civil regulation of license issuance for gaming entities.

To protect the interests of the State and its citizens through the detection of administrative gaming violations by inspection and regulation of gaming entities.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of casino Gaming and Video Gaming Type 1 & 2 New applications received	2378	3210	2789	0	2200
New	Key	Percentage of casino and video gaming new applicants denied.	0	0	0	0	2
New	Key	Percentage of approved casino and video gaming permits revoked	0	0	0	0	1
20915	Key	Number of Video Gaming Violations issued	1046	48	304	0	238

**Narrative:**

The Enforcement Activity consists of Enforcement and Licensing. Louisiana has 13 operating riverboats, 4 racetracks, and the New Orleans land-base casino as well as approximately 3000 video gaming establishments.

- Licensing provides oversight of all application/background processes associated with all licensed gaming entities subject to the authority of the Louisiana Gaming Control Board inclusive of Video Draw Poker, Riverboats, Slot Machines at Horse Racetracks, and Land Based Casinos as well as the oversight of all applications/ background checks for licensure as a Manufacturer, Supplier, Distributor of Gaming Devices/Equipment, and entities licensed as Gaming and Non-Gaming Suppliers.

- The Enforcement duties performed are derived from statutorily mandated duties outlined by the Louisiana Legislature. Enforcement conducts proactive enforcement and investigation of violations to State Gaming Laws and Regulations. Compliance Inspections are conducted by Enforcement and are an imperative part of ensuring that the gaming industry provides safe, fair, and legal forms of entertainment for the people of the state and patrons, while assisting the industry in being able to conduct successful businesses.

**Explain How This Activity Advances State Outcome Goal:**

Through the efforts of the Gaming Enforcement Activity, the state and its citizens have been safeguarded from corrupt or unfair practices of those involved in the gaming industry. Enforcement duties are an integral part of insuring the protection of the citizens of the state from peril and hazard through the use of civil regulation. The licensing process insures that the companies and individuals involved in the gaming industry not only comply with state law, but also gaming rules and regulations. This process is necessary to insure that those who are found to be unsuitable to conduct gaming operations in the state are kept from being involved in the gaming industry resulting in a safer Louisiana.

The state's interest are met through enforcement duties by constant oversight of companies and individuals to insure that there is no corruption or illegal activity taking place in licensed establishments. The regulation of industry after the issuance of a license insures that a licensed entity not only stays in compliance with state law, but also local law. A licensed entity faces fines, suspension, or revocation of its license if it does not remain in compliance with rules and statutes set forth. Licensed entities are required to stay current in all aspects of state law and local law in order to keep a gaming license.

**Evidence:**

Licensing FY 2008-2009

- Received 4,663 Casino Gaming applications
- Denied 103 Casino Gaming applications
- Received 151 Video Gaming Type 1&2 applications
- Denied 18 Video Gaming Type 1&2

The denials are a direct result of the backgrounds conducted on the applicants.

Enforcement FY 2008-2009

- Conducted 5,304 inspections at the state's gaming establishments
- Issued 275 violations from inspections of gaming establishments
- Conducted 2,565 inspections in video gaming establishments
- Issued 925 violations from inspections of video gaming establishments.

The inspections conducted range from the inspection of the equipment used by the casinos to security provided for the patrons.

**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 4000 Gaming Enforcement  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

There has already been a 20% budgetary reduction which has significantly reduced performance levels reflected from FY 2008-2009 and projections for 20% reduction in FY 2009-2010.

- Reduce Number of Video Compliance Inspections from 1178 to 492
- Reduce Number of Riverboat Compliance Inspections from 3932 to 1760
- Reduce Number of Pari-Mutual Compliance Inspections from 903 to 320
- Reduce Number of Land-Based Compliance Inspections from 467 to 244

At a 5% Budget Reduction:

- Reduce Number of Video Gaming Compliance Inspections to 467 and of the 3000 Video Poker entities, 2033 would not be inspected.
- Reduce Number of Riverboat Compliance Inspections to 1672
- Reduce Number of Pari-Mutual Compliance Inspections to 304
- Reduce Number of Land-Based Compliance Inspections to 232
- Less deterrence to abiding by gaming laws and regulations
- Loss of revenue through increased fraud and corruption
- Decrease in the safety of Louisiana's citizens

**Activity Type:** Existing

**Objective:**

To ensure the integrity of the gaming system through review and approval of a licensee's internal controls; ensure proper accounting practices through an auditing program to account for all monies owed from gaming revenue; and continue regulation and control of authorized gaming entities, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of casino audit inspections resulting in violations.	0	0	0	0	4
New	Key	Number of compliance inspections completed by Technical personnel	473	409	260	0	184
New	Key	Number of slot system certifications completed by Techs	0	0	0	0	216
New	Supporting	Number of inspections conducted at Indian casinos	834	908	261	0	800
New	Supporting	Number of applications processed at Indian Casinos	1775	2257	1870	0	1700

**Narrative:**

The Operations Activity is critical to the ongoing control of gaming as mandated by the Louisiana Legislature. Operations are comprised of Technical Support, Audit, and Administration.

- Audits primary duty is to fulfill statutory responsibilities in the interest of the state while assisting industry in efforts to remain competitive. Audit must keep consistent knowledge of evolving technology and modify its audit programs and processes accordingly. Audit ensures accurate revenue reporting by all gaming licensees, monitors and reviews all gaming tax revenue remitted to the state, provides investigative assistance relative to the financial information submitted by gaming applicants, and conducts proactive investigations of gaming licensee's financial requirements as set forth in Louisiana law and rule.
- Technical Support monitors and ensures that all licensed gaming devices are accurately communicating with the required Central Computer System. Technical Support ensures the gaming industry's compliance with storage, transfers, and placement of gaming devices. Technical Support reviews new gaming technologies and devices for compliance with applicable Louisiana law and rule and provides investigative assistance in regards to technological data.
- Administration provides support relative to all administrative matters such as monitoring and development of all training, budget, personnel, property control, research and legislation relative to Louisiana gaming law and rule, operational/strategic planning, and statistical analysis. Administration reviews and approves the internal controls (internal policy and procedures) for each licensee, as well as approving tournaments, new games and equipment, and all emergency changes.
- Indian Gaming is charged with preventing organized crime and other criminal elements from infiltrating and corrupting games of chance on Indian land. Presently, three Indian casinos are in operation: Chitimacha in Charenton, Tunica-Biloxi in Marksville, and Coushatta in Kinder. Signed tribal compacts empower the Louisiana State Police Indian Gaming personnel to regulate the gaming industry on Indian reservations. Operations oversees the requirements to approve all types of games, rules of play, certification of all gaming employees, certification of all casino vendors, and enforcement of criminal statutes on the gaming floor.

**Explain How This Activity Advances State Outcome Goal:**

Operations contributes to Public Safety through regulatory oversight with the use of compliance inspections and all application/background procedures associated with all licensed gaming entities subject to the authority of the Louisiana Gaming Control Board. Compliance inspections are conducted in an effort to maintain a consistent and strict regulatory oversight within the gaming industry. Auditing the financial suitability of an applicant is vital in the overall suitability process. A stringent review and approval process of internal controls ensures citizens of the state receive fair play of all available games. The regulation and enforcement of criminal laws pertaining but not limited to gaming promotes the safety and welfare of the people of our state against corrupt and dishonest practices.

According to the Louisiana Legislative Auditor, during FY 2008-2009, Louisiana generated \$753,545,890 in revenues from Gaming operations. The Gaming Enforcement Program is proactive in its efforts to ensure the accuracy of revenue received through both Enforcement and Operations collaborative efforts.

**Evidence:**

The Gaming Enforcement Program has strived to improve the efficiency of its processes and the proficiency and knowledge of its investigators and support staff so that it may better serve the public.

Over the last couple of years, the division has analyzed its staffing levels and has undergone two separate re-alignments. The first re-alignment occurred in August of 2005 and the latest in April of 2008. These re-assignment have allowed the re-allocation of over 30 trooper positions to other areas in Louisiana State Police with greater demands.

To make sure licensees are operating within legal parameters, during FY 2008-2009 Operations carried out the following:

- 2,589 Video Poker Compliance Inspections
- 1046 Video Poker Violations
- 4662 Casino Compliance Inspections
- 261 Casino Violations
- Verified the proper communication of 22,046 Slot Machines

**Activity Name:**  
Support Services  
**Department:** 08B Public Safety Services  
**Agency:** 418 Office of Management and Finance  
**Program:** 2000 Management & Finance  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Continuation level supports the safety of citizens by sustaining law enforcement, crime prevention/reduction, safety compliance, interoperability for first responders, and other protective and regulatory services to the public. Accountable & effective services are provided to clients and public through technology, revenue & budget management, personnel & payroll management, and infrastructure maintenance. Any reduction in funding will adversely impact; Collection/distribution of over \$2.6 billion dollars in state revenues; Issuance of \$68M in Supplemental Payments to over 11,000 law enforcement recipients; Statewide radio support for over 45,000 critical first responders; Support of criminal databases, i.e. computerized criminal history verifications, automated fingerprint identification system, sex offender registry, crime lab CODIS/DNA system, and law enforcement messaging for State/Local agencies; Support of driver credentials/compliance and vehicle registration.

**Activity Type:** Existing

**Objective:**

To maximize the state's return on investment in this activity through advanced technology, outsourcing, implementation of best practices, and continuous professional development through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Man-hours saved through privatization and collaboration	0	0	0	0	10400

New	Key	Percentage of deposits classified (recorded in the general ledger) within 2 weeks of receipt	0	0	0	0	90
New	Key	Percentage of preventative maintenance plan completed	0	0	0	0	100

**Narrative:**

This support activity provides the following services to achieve a transparent, accountable and effective support function:

- Information Technology is transforming the way public safety services are provided to the citizens of Louisiana. Provisioning, promoting, and accelerating the use of technology to improve efficiency and effectiveness of services, to open the channels of communication and services between the department, other agencies and the clients we serve. This facility provides varying levels of network support and IT assets to other agencies such as DOA, Internal Revenue, Social Services, LSU, and OTM.
- Revenue and Budget Management provides management and accounting for over \$2.6 billion in revenue collections as well as to facilitate the procurement and payment of all necessary materials and supplies to

accomplish our public safety goals. Development, preparation, and monitoring of department budgets, fiscal note preparation and fiscal projections for all agencies within Public Safety Services.

- Human Resources is responsible for ensuring compliance with Civil Service and State Police Commissions rules and regulations and DPS policies and procedures with regard to employee classification, induction, and pay, benefits, training, performance management, recruiting and retention.
- Facility Services maintains all DPS infrastructure, coordinates facility repairs, and performs preventative maintenance.

In order to meet the demand for reliable and state of the art technology that meets the federal and state mandates, an increase of \$9.9M is requested. The new technology will improve operations to various PSS agencies. All of these new requests are replacements for critical end-of-life equipment, consolidation efforts or to meet the established Tier II Data Center Standards.

#### **Explain How This Activity Advances State Outcome Goal:**

The support activity includes the efficient and timely reporting of information to state control agencies, making information accessible to the public in support of transparency and accountability throughout Public Safety Services. The support activity will provide:

- Technology services that can be utilized to convey relevant and accurate information in regards to public safety in a timely and transparent manner; while safe-guarding critical and confidential information. Providing accessible and up-to-date information to the public via websites.
- Revenue and budget management services that safeguard the state's revenue assets to include the accurate, reliable, and timely presentation of data in order to provide for comprehensive public reporting at the state government level.
- Human resource services by actively recruiting highly qualified employees. Employees are constantly undergoing continuous professional development, coaching and mentoring. To retain a productive workforce and to ensure all employees are treated with fairness and equity, a performance measurement system is in place. Accountability of the state's payroll investment is assured by human resource professionals.
- Facility maintenance services that responsibly manage and care for DPS infrastructure.

#### **Evidence:**

DPS Information Technology provides primary and secondary support for other major state agencies, and in emergency situations, is called upon to provide supplemental services. In addition, state, federal and local law enforcement agencies rely heavily on the accuracy of information provided through numerous critical databases maintained by DPS.

For example, during FY 2008-09 IT provided the support of the systems which issued 1,047,497 drivers licenses processed, 2,879,606 vehicle transactions, 423,282 Automated Fingerprint Identification System (AFIS) bookings, 831 Mobile Data Terminals (MDT) supported, 37,242 Crash Reports entered, 9,603 registered sex offenders, 14,571 video gaming devices monitored, 12,052 hazardous material reporting, 13,233 fire marshal inspections, 17,020 plans reviewed, 48,394 Motor Carrier Safety (MCSAP) inspections, 5,423,967 CCH Criminal History Inquiries, 295,086,532 Law Enforcement Messaging Systems (LEMS) Transactions, 136,875,000 wireless voice and data transmissions on the Radio Communications network.

As a result of historical accuracies in financial reporting, the Department of Public Safety, Public Safety Services has been selected as the pilot agency of the statewide ERP system (LAGov).

Human Resources received a 99% compliance audit from Civil Service for personnel actions processed. In addition, HR received an outstanding rating for their compliance with the LACareers online application system, which provides the ability to continuously recruit qualified applicants.

Compliance with annual Office of Risk Management safety audit.

Compliance with the following governing entities:

- Louisiana Revised Statutes
- Governmental Accounting Standards Board (GASB)

- Statement on Auditing Standards (SAS)
- Office of Statewide Reporting and Policy (OSRAP)
- La. Cash Management Policy
- Stafford Act administered by Federal Emergency Management Agency (FEMA)
- U.S. Department of Justice
- U.S. Department of Transportation
- U.S. Homeland Defense
- LA Performance Based Budgeting

Professional Associations for Best Practices and Continuing Professional Education (CPE'S):

- Association of Government Accountants (AGA)
- National Institute of Governmental Purchasing (NIGP)
- Government Finance Officer's Association (GFOA)
- International Personnel Management Association (IPMA)
- State Human Resources Management Association (SHRMA)
- Institute of Internal Auditors (IIA)
- Association of Public

Management and Finance Administration

**Department:** 08B Public Safety Services

**Agency:** 418 Office of Management and Finance

**Program:** 2000 Management & Finance

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

At continuation level of funding, management will provide accurate and accountable collection, disbursement and reporting of major state revenues, maintain critical technology driven systems, ensure proper employee compensation, assure compliance with policy and procedures, federal law, state laws and all regulatory components of state government. OMF has a major role in emergency operations via logistics, approval and accountability for all expenses, compensation of employees and support of public safety agencies and local law enforcement needs. Essential staff are responsible for accuracy of reimbursements submitted to FEMA for PSS, LA Sheriffs and Fire Departments. Reduction in funding will adversely impact; Mgmt's ability to meet deadlines for budget prep, employee pay, revenue deposits, vendor payments & response time of IT and communications personnel to critical applications; Mgmt's response to inquiries from state governing entities; Safeguarding of state's assets.

**Activity Type:** Existing

**Objective:**

Department management is responsible for ensuring achievement of stated objectives by analyzing efficiency of operations, reliability of financial reporting, compliance with laws and regulations, by accountability of assets and deterring and detecting fraud through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of compliance with legislative auditor recommendations	0	0	0	0	100
New	Key	Percentage of annual audit plan achieved	0	0	0	0	94

**Narrative:**

Management and Finance Administration is the chief operations officer for all agencies within Public Safety Services. Administrators promote responsible management & use of state/federal resources and focus on delivering results aligned with the state's priorities through measures defined in the department's strategic plan. Administrators conduct audits and consulting services to assist agency managers in carrying out assigned responsibilities and compliance with laws, rules and regulations. On a daily basis we are responsible for ensuring compliance of all laws and regulations with regard to information technology, revenue and budget management, purchasing, facility management, human resources, contract/lease management, internal audit, property control, risk management and multiple other business functions.

The responsibility encompasses over \$350M and approximately 2,900 employees and demands accurate, reliable and accountable information, collection and disbursement of revenues and support of agencies performing direct public service.

Guide department management in the effective discharge of their responsibilities by measuring compliance with the department's and state policies and procedures, and state and federal statutes. Provide Public Safety Services with

analyses, appraisals, recommendations, and information concerning the activities audited.

**Explain How This Activity Advances State Outcome Goal:**

This activity is directly responsible for maintaining critical systems that promote public safety through the agencies it serves.

**Activity ID:** 50

**Activity Name:**  
Investigations

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 2000 Criminal Investigation

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

A reduction in the current budget would negatively affect the number of cases opened and closed, arrests, and other agency assists. Detectives provide expertise/assistance to other law enforcement agencies that do not have the experience or resources necessary to investigate cases which are complex and multi-jurisdictional.

A 5% reduction of the budget would ultimately lead to a reduction in man-power by 20-25% therefore leading to a decline of enforcement throughout the state. In 2008, the criminal program opened over 2,000 cases. With a reduction in man-power, the number of cases opened would likely decline to approximately 1,600. The effect of those 400 cases not able to be opened would lead to an increase in criminal activity in many parts of the state.

Over 1,000 requests for assistance from other agencies would be denied due to the lack of resources available to the Criminal Program.

**Activity Type:** Existing

**Objective:**

To prevent and detect crime, apprehend criminals, and perform any other related duties by increasing the number of criminal investigations by 5% by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20804	Key	Number of criminal investigations initiated	2015	1506	1162	1220	1232

**Narrative:**

The Louisiana State Police Criminal Investigation (LSP) activity is the only statewide law enforcement agency equipped to handle large scale, multi-jurisdictional criminal investigations. LSP investigates police shootings, corruption, politically sensitive cases, supports local agencies and jurisdictions with investigative assistance, violent crimes, and child predator investigations. LSP also enforces all local, state, and federal statutes that prohibit the possession, use, and distribution of narcotics, dangerous drugs, and prohibited substances. LSP concentrates on large-scale narcotics operations, with an emphasis on individuals/organizations implicated in interstate and international drug trafficking, and organized prescription fraud by practitioners. A great number of investigations result in the seizure of assets/proceeds from criminal activity. These funds are tracked and utilized to further/enhance criminal investigations.

**Explain How This Activity Advances State Outcome Goal:**

This program directly advances the Public Safety Goal. It aids local law enforcement with investigative resources not available at the local level, which enables the apprehension of criminals and the reduction of potential future crimes. LSP acts as a facilitator in criminal investigations that extend past the jurisdictional boundaries of local law enforcement. LSP targets areas in the state with a propensity for violence and/or drug abuse with saturated patrols

and enforcement efforts. LSP focuses on the apprehension of violent crime fugitives, drug diversion violations, and child predators.

**Evidence:**

In 2008-2009, this activity exceeded its performance indicators of 1,200 criminal investigations initiated by opening 2,015 criminal cases. This activity also exceeded its performance indicator of 1,100 criminal investigations closed by closing 1,661 criminal investigations. The investigations resulted in over 1,000 arrests, over \$2,000,000.00 in assets being seized, and over \$10,000,000.00 in illegal controlled dangerous substances and property recovered. Over 30 training sessions/crime prevention classes have been presented throughout the state where approximately 2,000 individuals of all ages have attended. In addition, this program has obtained 100% compliance for investigators on the Information Reporting System.

**Activity ID:** 42

**Activity Name:**  
Support Services

**Department:** 08B Public Safety Services

**Agency:** 418 Office of Management and Finance

**Program:** 2000 Management & Finance

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

Continuation level supports the safety of citizens by sustaining law enforcement, crime prevention/reduction, safety compliance, interoperability for first responders, and other protective and regulatory services to the public. Accountable & effective services are provided to clients and public through technology, revenue & budget management, personnel & payroll management, and infrastructure maintenance. Any reduction in funding will adversely impact; Collection/distribution of over \$2.6 billion dollars in state revenues; Issuance of \$68M in Supplemental Payments to over 11,000 law enforcement recipients; Statewide radio support for over 45,000 critical first responders; Support of criminal databases, i.e. computerized criminal history verifications, automated fingerprint identification system, sex offender registry, crime lab CODIS/DNA system, and law enforcement messaging for State/Local agencies; Support of driver credentials/compliance and vehicle registration.

**Activity Type:** Existing

**Objective:**

To maximize the state's return on investment in this activity through advanced technology, outsourcing, implementation of best practices, and continuous professional development through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Man-hours saved through privatization and collaboration	0	0	0	0	10400
New	Key	Percentage of time the department's computer network is available	0	0	0	0	99
New	Key	Percentage of deposits classified (recorded in the general ledger) within 2 weeks of receipt	0	0	0	0	90
New	Key	Percentage of preventative maintenance plan completed	0	0	0	0	100

**Narrative:**

This support activity provides the following services to achieve a transparent, accountable and effective support function:

- Information Technology is transforming the way public safety services are provided to the citizens of Louisiana. Provisioning, promoting, and accelerating the use of technology to improve efficiency and effectiveness of services, to open the channels of communication and services between the department, other agencies and the clients we serve. This facility provides varying levels of network support and IT assets to other agencies such as DOA, Internal Revenue, Social Services, LSU, and OTM.
- Revenue and Budget Management provides management and accounting for over \$2.6 billion in revenue collections as well as to facilitate the procurement and payment of all necessary materials and supplies to

accomplish our public safety goals. Development, preparation, and monitoring of department budgets, fiscal note preparation and fiscal projections for all agencies within Public Safety Services.

- Human Resources is responsible for ensuring compliance with Civil Service and State Police Commissions rules and regulations and DPS policies and procedures with regard to employee classification, induction, and pay, benefits, training, performance management, recruiting and retention.
- Facility Services maintains all DPS infrastructure, coordinates facility repairs, and performs preventative maintenance.

In order to meet the demand for reliable and state of the art technology that meets the federal and state mandates, an increase of \$9.9M is requested. The new technology will improve operations to various PSS agencies. All of these new requests are replacements for critical end-of-life equipment, consolidation efforts or to meet the established Tier II Data Center Standards.

#### **Explain How This Activity Advances State Outcome Goal:**

The support activity includes the efficient and timely reporting of information to state control agencies, making information accessible to the public in support of transparency and accountability throughout Public Safety Services. The support activity will provide:

- Technology services that can be utilized to convey relevant and accurate information in regards to public safety in a timely and transparent manner; while safe-guarding critical and confidential information. Providing accessible and up-to-date information to the public via websites.
- Revenue and budget management services that safeguard the state's revenue assets to include the accurate, reliable, and timely presentation of data in order to provide for comprehensive public reporting at the state government level.
- Human resource services by actively recruiting highly qualified employees. Employees are constantly undergoing continuous professional development, coaching and mentoring. To retain a productive workforce and to ensure all employees are treated with fairness and equity, a performance measurement system is in place. Accountability of the state's payroll investment is assured by human resource professionals.
- Facility maintenance services that responsibly manage and care for DPS infrastructure.

#### **Evidence:**

DPS Information Technology provides primary and secondary support for other major state agencies, and in emergency situations, is called upon to provide supplemental services. In addition, state, federal and local law enforcement agencies rely heavily on the accuracy of information provided through numerous critical databases maintained by DPS.

For example, during FY 2008-09 IT provided the support of the systems which issued 1,047,497 drivers licenses processed, 2,879,606 vehicle transactions, 423,282 Automated Fingerprint Identification System (AFIS) bookings, 831 Mobile Data Terminals (MDT) supported, 37,242 Crash Reports entered, 9,603 registered sex offenders, 14,571 video gaming devices monitored, 12,052 hazardous material reporting, 13,233 fire marshal inspections, 17,020 plans reviewed, 48,394 Motor Carrier Safety (MCSAP) inspections, 5,423,967 CCH Criminal History Inquiries, 295,086,532 Law Enforcement Messaging Systems (LEMS) Transactions, 136,875,000 wireless voice and data transmissions on the Radio Communications network.

As a result of historical accuracies in financial reporting, the Department of Public Safety, Public Safety Services has been selected as the pilot agency of the statewide ERP system (LAGov).

Human Resources received a 99% compliance audit from Civil Service for personnel actions processed. In addition, HR received an outstanding rating for their compliance with the LACareers online application system, which provides the ability to continuously recruit qualified applicants.

Compliance with annual Office of Risk Management safety audit.

Compliance with the following governing entities:

- Louisiana Revised Statutes
- Governmental Accounting Standards Board (GASB)

- Statement on Auditing Standards (SAS)
- Office of Statewide Reporting and Policy (OSRAP)
- La. Cash Management Policy
- Stafford Act administered by Federal Emergency Management Agency (FEMA)
- U.S. Department of Justice
- U.S. Department of Transportation
- U.S. Homeland Defense
- LA Performance Based Budgeting

Professional Associations for Best Practices and Continuing Professional Education (CPE'S):

- Association of Government Accountants (AGA)
- National Institute of Governmental Purchasing (NIGP)
- Government Finance Officer's Association (GFOA)
- International Personnel Management Association (IPMA)
- State Human Resources Management Association (SHRMA)
- Institute of Internal Auditors (IIA)
- Association of Public

**Activity ID:** 53  
**Activity Name:**  
Operations  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 4000 Gaming Enforcement  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

There has already been a 20% budgetary reduction which has significantly reduced performance levels reflected from FY 2008-2009 and projections for 20% reduction in FY 2009-2010.

- Reduce Number of Video Compliance Inspections from 1178 to 492
- Reduce Number of Riverboat Compliance Inspections from 3932 to 1760
- Reduce Number of Pari-Mutual Compliance Inspections from 903 to 320
- Reduce Number of Land-Based Compliance Inspections from 467 to 244

At a 5% Budget Reduction:

- Reduce Number of Video Gaming Compliance Inspections to 467 and of the 3000 Video Poker entities, 2033 would not be inspected.
- Reduce Number of Riverboat Compliance Inspections to 1672
- Reduce Number of Pari-Mutual Compliance Inspections to 304
- Reduce Number of Land-Based Compliance Inspections to 232
- Less deterrence to abiding by gaming laws and regulations
- Loss of revenue through increased fraud and corruption
- Decrease in the safety of Louisiana's citizens

**Activity Type:** Existing

**Objective:**

To ensure the integrity of the gaming system through review and approval of a licensee's internal controls; ensure proper accounting practices through an auditing program to account for all monies owed from gaming revenue; and continue regulation and control of authorized gaming entities, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of casino audit inspections resulting in violations.	0	0	0	0	4

New	Supporting	Number of applications processed at Indian Casinos	1775	2257	1870	0	1700

**Narrative:**

The Operations Activity is critical to the ongoing control of gaming as mandated by the Louisiana Legislature. Operations are comprised of Technical Support, Audit, and Administration.

- Audits primary duty is to fulfill statutory responsibilities in the interest of the state while assisting industry in efforts to remain competitive. Audit must keep consistent knowledge of evolving technology and modify its audit programs and processes accordingly. Audit ensures accurate revenue reporting by all gaming licensees, monitors and reviews all gaming tax revenue remitted to the state, provides investigative assistance relative to the financial information submitted by gaming applicants, and conducts proactive investigations of gaming licensee's financial requirements as set forth in Louisiana law and rule.
- Technical Support monitors and ensures that all licensed gaming devices are accurately communicating with the required Central Computer System. Technical Support ensures the gaming industry's compliance with storage, transfers, and placement of gaming devices. Technical Support reviews new gaming technologies and devices for compliance with applicable Louisiana law and rule and provides investigative assistance in regards to technological data.
- Administration provides support relative to all administrative matters such as monitoring and development of all training, budget, personnel, property control, research and legislation relative to Louisiana gaming law and rule, operational/strategic planning, and statistical analysis. Administration reviews and approves the internal controls (internal policy and procedures) for each licensee, as well as approving tournaments, new games and equipment, and all emergency changes.
- Indian Gaming is charged with preventing organized crime and other criminal elements from infiltrating and corrupting games of chance on Indian land. Presently, three Indian casinos are in operation: Chitimacha in Charenton, Tunica-Biloxi in Marksville, and Coushatta in Kinder. Signed tribal compacts empower the Louisiana State Police Indian Gaming personnel to regulate the gaming industry on Indian reservations. Operations oversees the requirements to approve all types of games, rules of play, certification of all gaming employees, certification of all casino vendors, and enforcement of criminal statutes on the gaming floor.

**Explain How This Activity Advances State Outcome Goal:**

Operations contributes to Public Safety through regulatory oversight with the use of compliance inspections and all application/background procedures associated with all licensed gaming entities subject to the authority of the Louisiana Gaming Control Board. Compliance inspections are conducted in an effort to maintain a consistent and strict regulatory oversight within the gaming industry. Auditing the financial suitability of an applicant is vital in the overall suitability process. A stringent review and approval process of internal controls ensures citizens of the state receive fair play of all available games. The regulation and enforcement of criminal laws pertaining but not limited to gaming promotes the safety and welfare of the people of our state against corrupt and dishonest practices.

According to the Louisiana Legislative Auditor, during FY 2008-2009, Louisiana generated \$753,545,890 in revenues from Gaming operations. The Gaming Enforcement Program is proactive in its efforts to ensure the accuracy of revenue received through both Enforcement and Operations collaborative efforts.

**Evidence:**

The Gaming Enforcement Program has strived to improve the efficiency of its processes and the proficiency and knowledge of its investigators and support staff so that it may better serve the public.

Over the last couple of years, the division has analyzed its staffing levels and has undergone two separate re-alignments. The first re-alignment occurred in August of 2005 and the latest in April of 2008. These re-assignment have allowed the re-allocation of over 30 trooper positions to other areas in Louisiana State Police with greater demands.

To make sure licensees are operating within legal parameters, during FY 2008-2009 Operations carried out the following:

- 2,589 Video Poker Compliance Inspections
- 1046 Video Poker Violations
- 4662 Casino Compliance Inspections
- 261 Casino Violations
- Verified the proper communication of 22,046 Slot Machines

**Activity ID:** 49

**Activity Name:**

Enforcement

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 4000 Gaming Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

There has already been a 20% budgetary reduction which has significantly reduced performance levels reflected from FY 2008-2009 and projections for 20% reduction in FY 2009-2010.

- Increase in the Number of Days to complete a new Casino Gaming Background from 100 to 115
- Increase in the Number of Days to complete a new Video Gaming Type 1&2 application from 137 to 158

At a 5% Budget Reduction, the following are performance projections:

- Increase in the Number of Days to complete a new Casino Background from 115 to 121
- Increase in the Number of Days to complete a new Video Gaming Type 1&2 application from 158 to 166

Gaming Enforcement Program submitted a request for 21 civilian positions to replace 21 Troopers. With a recent loss of 9 Troopers, Gaming would like to retain 9 of the 21 Troopers with the remaining 12 being reassigned in LSP. The requested civilian positions will perform background investigations currently performed by troopers saving over \$1.5 million.

**Activity Type:** Existing

**Objective:**

To ensure the protection of citizens from corruption through the civil regulation of license issuance for gaming entities.

To protect the interests of the State and its citizens through the detection of administrative gaming violations by inspection and regulation of gaming entities.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of casino Gaming and Video Gaming Type 1 & 2 New applications received	2378	3210	2789	0	2200
New	Key	Percentage of casino and video gaming new applicants denied.	0	0	0	0	2
New	Key	Percentage of approved casino and video gaming permits revoked	0	0	0	0	1
20915	Key	Number of Video Gaming Violations issued	1046	48	304	0	238

**Narrative:**

The Enforcement Activity consists of Enforcement and Licensing. Louisiana has 13 operating riverboats, 4 racetracks, and the New Orleans land-base casino as well as approximately 3000 video gaming establishments.

- Licensing provides oversight of all application/background processes associated with all licensed gaming entities subject to the authority of the Louisiana Gaming Control Board inclusive of Video Draw Poker, Riverboats, Slot Machines at Horse Racetracks, and Land Based Casinos as well as the oversight of all applications/ background checks for licensure as a Manufacturer, Supplier, Distributor of Gaming Devices/Equipment, and entities licensed as Gaming and Non-Gaming Suppliers.

- The Enforcement duties performed are derived from statutorily mandated duties outlined by the Louisiana Legislature. Enforcement conducts proactive enforcement and investigation of violations to State Gaming Laws and Regulations. Compliance Inspections are conducted by Enforcement and are an imperative part of ensuring that the gaming industry provides safe, fair, and legal forms of entertainment for the people of the state and patrons, while assisting the industry in being able to conduct successful businesses.

#### **Explain How This Activity Advances State Outcome Goal:**

Through the efforts of the Gaming Enforcement Activity, the state and its citizens have been safeguarded from corrupt or unfair practices of those involved in the gaming industry. Enforcement duties are an integral part of insuring the protection of the citizens of the state from peril and hazard through the use of civil regulation. The licensing process insures that the companies and individuals involved in the gaming industry not only comply with state law, but also gaming rules and regulations. This process is necessary to insure that those who are found to be unsuitable to conduct gaming operations in the state are kept from being involved in the gaming industry resulting in a safer Louisiana.

The state's interest are met through enforcement duties by constant oversight of companies and individuals to insure that there is no corruption or illegal activity taking place in licensed establishments. The regulation of industry after the issuance of a license insures that a licensed entity not only stays in compliance with state law, but also local law. A licensed entity faces fines, suspension, or revocation of its license if it does not remain in compliance with rules and statutes set forth. Licensed entities are required to stay current in all aspects of state law and local law in order to keep a gaming license.

#### **Evidence:**

Licensing FY 2008-2009

- Received 4,663 Casino Gaming applications
- Denied 103 Casino Gaming applications
- Received 151 Video Gaming Type 1&2 applications
- Denied 18 Video Gaming Type 1&2

The denials are a direct result of the backgrounds conducted on the applicants.

Enforcement FY 2008-2009

- Conducted 5,304 inspections at the state's gaming establishments
- Issued 275 violations from inspections of gaming establishments
- Conducted 2,565 inspections in video gaming establishments
- Issued 925 violations from inspections of video gaming establishments.

The inspections conducted range from the inspection of the equipment used by the casinos to security provided for the patrons.

**Activity ID:** 50  
**Activity Name:** Investigations  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 2000 Criminal Investigation  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

A reduction in the current budget would negatively affect the number of cases opened and closed, arrests, and other agency assists. Detectives provide expertise/assistance to other law enforcement agencies that do not have the experience or resources necessary to investigate cases which are complex and multi-jurisdictional.

A 5% reduction of the budget would ultimately lead to a reduction in man-power by 20-25% therefore leading to a decline of enforcement throughout the state. In 2008, the criminal program opened over 2,000 cases. With a reduction in man-power, the number of cases opened would likely decline to approximately 1,600. The effect of those 400 cases not able to be opened would lead to an increase in criminal activity in many parts of the state.

Over 1,000 requests for assistance from other agencies would be denied due to the lack of resources available to the Criminal Program.

**Activity Type:** Existing

**Objective:**

To prevent and detect crime, apprehend criminals, and perform any other related duties by increasing the number of criminal investigations by 5% by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20804	Key	Number of criminal investigations initiated	2015	1506	1162	1220	1232

**Narrative:**

The Louisiana State Police Criminal Investigation (LSP) activity is the only statewide law enforcement agency equipped to handle large scale, multi-jurisdictional criminal investigations. LSP investigates police shootings, corruption, politically sensitive cases, supports local agencies and jurisdictions with investigative assistance, violent crimes, and child predator investigations. LSP also enforces all local, state, and federal statutes that prohibit the possession, use, and distribution of narcotics, dangerous drugs, and prohibited substances. LSP concentrates on large-scale narcotics operations, with an emphasis on individuals/organizations implicated in interstate and international drug trafficking, and organized prescription fraud by practitioners. A great number of investigations result in the seizure of assets/proceeds from criminal activity. These funds are tracked and utilized to further/enhance criminal investigations.

**Explain How This Activity Advances State Outcome Goal:**

This program directly advances the Public Safety Goal. It aids local law enforcement with investigative resources not available at the local level, which enables the apprehension of criminals and the reduction of potential future crimes. LSP acts as a facilitator in criminal investigations that extend past the jurisdictional boundaries of local law enforcement. LSP targets areas in the state with a propensity for violence and/or drug abuse with saturated patrols

and enforcement efforts. LSP focuses on the apprehension of violent crime fugitives, drug diversion violations, and child predators.

**Evidence:**

In 2008-2009, this activity exceeded its performance indicators of 1,200 criminal investigations initiated by opening 2,015 criminal cases. This activity also exceeded its performance indicator of 1,100 criminal investigations closed by closing 1,661 criminal investigations. The investigations resulted in over 1,000 arrests, over \$2,000,000.00 in assets being seized, and over \$10,000,000.00 in illegal controlled dangerous substances and property recovered. Over 30 training sessions/crime prevention classes have been presented throughout the state where approximately 2,000 individuals of all ages have attended. In addition, this program has obtained 100% compliance for investigators on the Information Reporting System.

**Activity ID:** 222

**Activity Name:**

Administrative / Regulation of Gaming

**Department:** 08B Public Safety Services

**Agency:** 423 Louisiana Gaming Control Board

**Program:** 1000 Louisiana Gaming Control Board

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

Failure to fund this activity at continuation level will result in non-conformance with mandatory laws, diminished public confidence, violations of the state constitution regarding due process, and ultimate cessation of gaming activities in Louisiana causing substantial losses in state and local revenues. The requested increase will fund the projected increase in building rent for the current office for the LGCB.

**Activity Type:** Existing

**Objective:**

To increase public confidence through the regulation of Video, Riverboat, Land-Base, and Slot Machine Gaming at Pari-Mutuel Live Racing Facilities which ensures the integrity of gaming activities and promotes economic development through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of administrative actions of the Board	650	789	789	685	695
New	Key	Number of applications, licenses and permits denied, suspended and/or revoked	294	0	0	0	300
New	Key	Percentage of applications, licenses and permits denied, suspended and/or revoked	0.03	0	0	0	0.03
New	Supporting	Percentage of administrative actions processed within 30 days	0	0	0	0	90

**Narrative:**

The Gaming Control Board protects the public and promotes economic development through administrative action. Administrative actions of the Board includes issuance of licenses or permits; revocation, suspension, finding of unsuitability, or conditioning licenses or permits; imposition of a civil penalty; any documented action or decision by the Board including the issuance of approvals and orders. This action assists gaming interests in providing a stable, constant, efficient, and effective regulatory environment.

Gaming is a cash intensive business that is susceptible to corrupt influences if not highly regulated. Recognizing this, the Louisiana legislature enacted laws that govern the gaming industry through thorough regulatory oversight of all persons, locations, practices, associations, and activities related to the operation of gaming in Louisiana. Accordingly, the legislature created the Gaming Control Board and empowered it to have all regulatory authority, control, and jurisdiction, including investigation, licensing, and enforcement, and all power incidental or necessary to such regulatory authority, control, and jurisdiction over all aspects of gaming activities and operations as authorized pursuant to the provisions of the Louisiana Riverboat Economic Development and Gaming Control Act, the Louisiana

Economic Development and Gaming Corporation Act, and the Video Draw Poker Devices Control Law. Further, the board has limited regulatory, enforcement, and supervisory authority over gaming on Indian lands in Louisiana. This regulatory authority is carried out through administrative action taken by the Board.

**Explain How This Activity Advances State Outcome Goal:**

The Louisiana Legislature declared that the development of a controlled gaming industry to promote economic development of the state requires the thorough regulatory oversight of all persons, locations, practices, associations, and activities related to the operation of gaming activities. The Legislature created the Gaming Control Board and empowered it to have all regulatory authority, control, and jurisdiction, including investigation, licensing, and enforcement over all aspects of gaming activities and operations as authorized pursuant to the provisions of law.

Public safety is ensured through stringent regulatory oversight and enforcement actions of the Board. Rigorous screening of persons and entities prevents unsuitable and unsavory persons and corporations from entering the gaming market. Board regulation of gaming controls, procedures, practices, and methods provides additional protection to the public. Review and approval of these matters further ensures the integrity of games offered for play through Board oversight and authority. This action protects the public from illegal activity and promotes public confidence in gaming regulation.

Economic benefits are gained by enhanced public confidence which is attained through a thorough regulatory environment as found in Louisiana. The gaming industry desires structured, stable, and efficient regulation. Gaming companies who are thoroughly regulated are viewed more favorably by investors. This provides economic stimulus and incentive to grow the gaming industry in Louisiana. Failure of the Board to timely process administrative actions would have a detrimental effect on regulated entities resulting in possible loss of revenue to Louisiana.

Through efficient administrative actions of the Board, gaming is highly regulated in Louisiana which ensures public safety and promotes economic development.

**Evidence:**

The Louisiana Gaming Control Board was created in 1996. Since that time, the Board has provided consistent regulatory oversight that has been applied in a fair and effective manner. This regulatory philosophy not only promotes public confidence, but is balanced in a manner that has enabled the industry to invest in Louisiana providing for continued economic development and growth. Considering the nationwide ongoing economic recession, the Louisiana gaming market has fared exceptionally well. This is best demonstrated in the direct revenue to the state of \$737,642,055 in FY 07/08 which was an increase of \$11,275,778 from FY 06/07.

Through the administrative action of the Board, new licensees were able to commence operation thus generating additional gaming revenue and providing employment to citizens. This timely Board action enabled persons to work and pay income taxes. Board action also allowed new games to commence, machines to be connected for play, reconfigurations of gaming space which enhanced gaming operations, and issuance of a variety of other approvals requested by gaming operators. Timely processing of future administrative action by the Board will enable gaming entities to be more competitive thus further enhancing state gaming revenue.

Board action also afforded persons and entities due process on administrative action taken against them. The timely processing and hearing of these matters provided a fair and just resolution to the action.

**Narrative:**

The Deputy Secretary serves as the Governor's appointed authority over of the Department of Public Safety Services and is the Superintendent of Louisiana State Police. The Office of Superintendent is comprised of the Deputy Secretary, Executive Administration, and the Chief of Staff. The Office of Superintendent gives direction and leadership to achieve the Louisiana State Police's Philosophy and Mission as well the Strategic Goals and Objectives.

The Office of Superintendent provides oversight to Louisiana State Police. This activity directs, coordinates, and evaluates the effectiveness of programs, and policy and procedure. The Office of Superintendent is responsible for managing administrative operations through the coordination of planning and budget by establishing funding priorities. The Office of the Superintendent affords staff support and guidance to all areas of Louisiana State Police.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Superintendent is committed to the utmost professionalism in delivering all-encompassing services of the Louisiana State Police commissioned and civilian personnel to ensure public safety and security. The Office of Superintendent continually strives to develop skills for both civilian and commissioned personnel and to efficiently and effectively manage our resources as we carry out our public responsibilities adapting to the diverse and changing needs of the communities we serve. The Office of Superintendent ensures the safety and security of the people of Louisiana through enforcement, communication, collaborative efforts, education, and providing other essential public safety services.

**Evidence:**

"Courtesy, Loyalty, Service," the motto of Louisiana State Police, has given the direction and inspiration to this agency through the expectations of professional, ethical and accountable civilian and commissioned personnel.

- Office of Superintendent thoroughly evaluates the effectiveness of programs to develop better performance

measures and reduce any burdens on the public.

- Office of Superintendent advocates collaborative efforts with other state agencies as well as other law enforcement entities.

- Office of Superintendent provides administrative oversight and support.

- Office of Superintendent is proactive in legislation and rules changes.

- Office of Superintendent knows the importance of educating Louisiana's youth and encourages programs addressing healthy choices and behaviors.

**Narrative:**

Operational Development is an activity within the Operational Support Program and provides staff functions for the Superintendent and his command staff. Operational Development consists of the Research, Planning, and Public Affairs. The Planning Unit is responsible for producing the Strategic Plan, Operational Plan, monitoring the department's performance indicators, the budget and the management of numerous federal grants. The Research Unit is responsible for the development of policy and procedure, serving as the department's liaison with the legislature to facilitate legislative initiatives; conducting research studies to develop innovative initiatives and internal policies to improve the effectiveness and quality of the service provided to the public. The Public Affairs Unit is responsible for all media relations, educational programs concerning the public safety, recruiting, and providing support for events and programs of interest to the superintendent.

**Explain How This Activity Advances State Outcome Goal:**

All units within Operational Development will contribute to the goal of Public Safety by providing the operational support necessary to the effective operations of the Office of State Police as a whole. The Public Affairs unit will conduct various educational programs targeted at training children including "Stranger Danger," a child safety program aimed at pre-school and elementary grade children and "Behind The Faces", a motivational video production aimed at Jr. High and High School students to guide them in good decision making regarding drugs, alcohol, suicide, bullying and peer pressure. Public Affairs also coordinates a bicycle safety program and a program called "Sudden Impact", a reality based educational program which combines classroom instruction on driver's safety and alcohol awareness.

The Planning Unit will develop, monitor, and administer federal and state grant applications and awards that are specifically aimed at reducing highway fatalities and crime reduction. These grant programs will include crash reduction grants, apprehension enhancements grants, and bicycle safety grants. Additionally, research will be conducted to identify the needs of the department to effectively implement these programs as well as assist in identifying new innovative technologies available to law enforcement personnel that will aid in the ability to reduce crashes and deter crime.

#### **Evidence:**

Operational Development manages grants and contracts related to highway safety, criminal apprehension, law enforcement instruction, and new technologies for our personnel and facilities. These funds have been utilized for the enforcement of traffic laws, seatbelt and child restraint laws, and D.W.I. violations. In the past, this funding has served as a primary source of the department's funding for safety education and public information. Additionally, grant funding has been utilized to purchase updated technology including in-car video cameras and radar and lidar units.

- The Planning Unit also assisted in the application process for grants totaling over \$6.8 million for the Crime Lab, DNA Lab, Investigative Support Services, the Training Academy, Narcotics, Detectives, and Homeland Security functions.

- In FY 2008-09, the Public Affairs Unit conducted 800 safety presentations to approximately 150,000 citizens, prepared 750 news releases to over 31,000 entities, and conducted over 2,600 interviews. Through Operation Lifesaver, Public Affairs conducted 37 train safety programs.

Public Information Officers also attended 42 child safety-seat events and installed over 900 child seats for members of the public.

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.
- Concealed Handguns processes permit applications.

- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

#### **Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sherriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

#### **Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.

- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.

- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.

- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.

- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.

- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.

- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**Activity ID:** 460  
**Activity Name:** Interoperability  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** A000 Auxiliary Account  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Any reduction in funding will adversely impact:

- Statewide LWIN radio communications network support for over 45,000 critical first responders.
- Support of the communication infrastructure network that allows law enforcement and other First Responders to retrieve critical information from databases such as NCIC, Driver License, mug shots, and Criminal History verifications (CCH), law enforcement messaging, and Vehicle Registrations that are used via mobile data computers, PDA unit and IV and D and high performance data (HPD).
- Ability to meet existing federal and state mandates/regulations/policies.
- Maintaining the critical radio communications infrastructure of over \$110M.

In order to meet the demand for complete statewide communication interoperability and technology that meets both federal and state mandates an increase of \$3.7M.

**Activity Type:** Existing

**Objective:**

Maximize the state's return on investment, while using advanced technology, implementation of best practices, and continuous professional development to provide a unified statewide interoperable communications network between LSP, federal, state, and local governments through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of agencies migrated to the new P-25 LWIN system	0	0	0	0	75
New	Key	Percentage of time the statewide radio communications network is available	0	0	0	0	95
New	Key	Percentage of radio communications infrastructure preventative maintenance plan completed.	0	0	0	0	100
New	Key	Percentage of statewide coverage area on the LWIN Network	0	0	0	0	86
New	Key	Percentage of time the statewide radio communications network is available	0	0	0	0	95

**Narrative:**

Interoperability provides the following services to achieve Public Safety, a transparent, accountable and effective

support function:

- Information Technology and Radio Communications is transforming the way public safety services are provided to the citizens of Louisiana statewide. Provisioning, promoting, and accelerating the use of communication technology to improve efficiency and effectiveness of services, in addition to opening the channels of communication and services between the federal, state and local agencies.
- Interoperability is the ability of LSP and other First Responders to communicate multi jurisdictionally through various networks to exchange real time voice, data, and imagery information. Evidence began with Sept 11, 2001 events and was reinforced during Hurricanes Katrina and Rita because communications was hampered. A statewide 800 MHz analog system proved unsuccessful in communication efforts as well as numerous local government communications systems being damaged by Hurricane related events therefore having no communication with law enforcement or first responders.

#### **Explain How This Activity Advances State Outcome Goal:**

Interoperability includes the efficient and timely reporting of information to state control agencies, making information accessible to the public in support of transparency and accountability throughout Public Safety Services providing:

- Technology services that can be utilized to convey relevant and accurate information in regards to public safety in a timely and transparent manner; while safe-guarding critical and confidential information. Providing accessible and up-to-date information to the public via websites.
- Facility maintenance services that responsibly manage and care for the Statewide LWIN Communications infrastructure network.
- LSP Interoperability is on the forefront of Public Safety. Police, fire, medical, and other personnel at the scene and across jurisdictions often cannot talk to all parties because their radios are incompatible. LSP interoperability knows that if information is not communicated instantly and effortlessly lives can be lost.
- LSP Interoperability has a continuous effort through collaboration with law enforcement agencies and the media for Amber Alerts to safely locate an abducted child within the 2-3 hour critical time period.
- By enhancing interoperability, LSP will reduce duplication efforts in other agencies.

#### **Evidence:**

The cost of not having public safety wireless interoperability is counted in human lives. For example, during the World Trade Center Bombing of September 11, 2001, many fire fighters lost their lives because they did not get the evacuation order that the police officers received. This has been widely documented from "Why We Can't Talk" to presentations before Congress. In addition the natural disasters that Louisiana has suffered since Katrina in 2005 is further proof of the needs for interoperability and communications for public safety.

DPS Information Technology and Radio Communications group provides primary and secondary support for other major state agencies, and in emergency situations, is called upon to provide supplemental services. In addition, state, federal and local law enforcement agencies rely heavily on the accuracy of information and communications provided through numerous critical databases and the LWIN Radio network maintained by DPS.

For example, during FY 2008-09 Information Services and Radio Communications provided the support of the radio communications systems which:

- Issued 136,875,000 wireless voice and data transmissions on the LWIN network.
- Provided statewide radio communications network support for over 45,000 critical state, federal, and local first responders.
- 87 Tower Sites in Full Operation
- 31 new Tower Sites in development.
- 5 Operational remote trailers
- 288 Subscriber Agencies
- 4,622 Talkgroups

Also, 423,282 Automated Fingerprint Identification System (AFIS) bookings, 831 Mobile Data Terminals (MDT) supported, 37,242 Crash Reports entered, 9,603 registered sex offenders, 14,571 video gaming devices monitored, 12,052 hazardous material reporting, , 48,394 Motor Carrier Safety (MCSAP) inspections, 5,423,967 CCH Criminal History Inquiries, 295,086,532 Law Enforcement Messaging Systems (LEMS) Transactions, 136,875,000 wireless voice and data transmissions on the Radio Communications network.

Compliance with the following:

- Louisiana Revised Statutes
- Stafford Act administered by Federal Emergency Management Agency (FEMA)
- U.S. Homeland Defense
- Federal communications commission (FCC)

Organizations:

- Association of Public Safety Communication Officers (APCO)
- Council of Information Systems Directors (CISD)
- Government Office of Home Land Security GOHSEP
- Louisiana sheriff association LSA
- The Region 18 (Louisiana) 700 MHz

**Activity ID:** 450  
**Activity Name:**  
Insurance Fraud  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 2000 Criminal Investigation  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To identify, apprehend, and prepare cases for prosecution of individuals who have committed insurance fraud and auto theft, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of investigations initiated	0	0	0	0	160
New	Key	Number of investigations closed	0	0	0	0	145
New	Key	Percentage of investigations resulting in arrests	0	0	0	0	54

**Narrative:**

Insurance Fraud is operated with statutorily dedicated funds. Insurance Fraud maintains a data base of reported and investigated occurrences of insurance fraud which assists the investigation and prosecution of fraud. The program also assists in the detection of cloned and switched vehicle identification number on vehicles. Insurance fraud and auto theft cases are monitored to ensure the department is in compliance with both federal and state regulations.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the Public Safety and Economic Development goals.

**Public Safety**

Insurance Fraud provides funding for operational expenses for its investigators to conduct thorough criminal investigations relating to insurance fraud. This process aids in our goal of being a more proactive law enforcement agency to help deter and prevent insurance fraud throughout the State of Louisiana. Insurance Fraud provides manpower to participate in local task forces to combat auto theft and insurance fraud throughout the state. These task forces remove the obstruction of jurisdictional boundaries that local agencies may encounter when criminal activity exceeds their authorized jurisdiction.

**Economic Development**

This process provides investigators with the necessary tools to help reduce the amount of insurance fraud and auto theft and thereby may assist insurance providers to lower insurance rates in Louisiana. Reducing the insurance rates helps foster a stronger business climate and increases the wealth of citizens.

**Evidence:**

In 2008, Insurance Fraud received 442 referrals of suspected fraud. Of the 442 submitted referrals, Insurance Fraud opened 166 criminal cases, closed 152 cases, and made 155 arrests. In 2008, Insurance Fraud was responsible for 68 convictions and 4 pre-trial interventions. Insurance Fraud was also responsible for individuals receiving 92 years and 10 months of probation time, \$27,778.00 in fines, \$809,629.72 in restitution, 81 years and 6 months of jail time, and 40 hours of community service. In the first and second quarters of 2009, the activity received 219 referrals, opened 103 cases, closed 103 cases and made 69 arrests.

**Agency:** 419 Office of State Police  
**Program:** 2000 Criminal Investigation  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To increase other agency assists by providing operational/technical support and intelligence to help solve crimes and apprehend criminals through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21287	Key	Number of other agency assists	5146	4914	4889	4886	4906
New	Key	Percentage of completed Criminal Requests for Information (RFI) from other agencies.	0	0	0	0	100

**Narrative:**

The State Police Investigative Support Section (ISS) provides operational and criminal intelligence assistance to the investigative elements of the Louisiana State Police and other requesting federal, state, local, and international law enforcement agencies. The section is composed of the Analytical Support Unit (LA-SAFE), the Criminal Intelligence Unit (CIU) and the Technical Support Unit (TSU).

The Louisiana State Analytical and Fusion Exchange, i.e., the Louisiana Fusion Center, promotes collaboration in an all-crimes/all-hazards environment, supporting federal, state, local and private sectors by working together to provide timely information for use in promoting public safety and national security against terrorist and criminal threats. LA-SAFE will support the state during major disasters and emergencies by gathering, analyzing and disseminating information to assist relevant agencies. The principle role of LA-SAFE is to compile, analyze, and disseminate criminal/terrorist information and intelligence and other information (including, but not limited to, threat, public safety, law enforcement, public health, social services, and public works) to support efforts to anticipate, identify, prevent, and/or monitor criminal/terrorist activity. LA-SAFE is recognized by the Department of Homeland Security and the Governor's Office as the primary fusion center for the State of Louisiana.

The purpose of the Criminal Intelligence Unit is to provide the department with the information necessary to make informed judgments and take necessary actions to counter the activities of criminal organizations, individuals and conditions which promote criminal activities. Information gathering is a fundamental and essential element in the all encompassing duties of any law enforcement agency. Information is used to prevent crime, pursue and apprehend offenders, and obtain evidence necessary for conviction

The Technical Support Unit (TSU) is responsible for providing technical investigative support to the Department as well as other state and local law enforcement agencies in Louisiana. The TSU conducts proactive and reactive investigations in which computers, telecommunications equipment, or other advanced technology is used to facilitate a criminal act or are the targets of an attack.

**Explain How This Activity Advances State Outcome Goal:**

ISS promotes collaboration in an all-crimes/hazards environment, supporting the Louisiana State Police, federal, state, local and private sectors by working together to provide timely information for use in promoting public safety and national security against terrorist and criminal threats. ISS supports the state during major disasters and emergencies by gathering, investigating, analyzing and disseminating information to assist relevant agencies.

**Evidence:**

For the first three quarters of 2009, ISS provided support in 4,183 criminal incidents, and has actively investigated 370 criminal cases. Additionally, ISS has provided 1,894 agency assists. This statistical data illustrates ISS' capacity to accomplish its goals and contribute to the overall Criminal Program's achievement of the program's performance indicators. Additionally, the data information reinforces ISS' ability to contribute to the department's public safety services by increasing the number of criminal investigations and other agency assists.

**Activity ID:** 389  
**Activity Name:**  
 Lab Services  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 3000 Operational Support  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Last FY, the Crime Lab began an initiative to reduce the number of backlog cases, resulting in 20,013 completed requests. The Crime Lab was able to complete all the requests received, in addition to reducing 1,323 of the backlogged requests. Currently there are 7,194 backlogged requests.

A 5% reduction (equal to 1,000 requests) would result in our inability to reduce backlog and may increase the amount of backlog requests.

**DNA UNIT**

- Reduce the number of samples that could be analyzed
- Reduce the number of cases that could be outsourced
- Eliminate an analyst resulting in an increase in turnaround time therefore increasing the workload of other analysts and increasing the number of backlogs

**QUALITY ASSURANCE UNIT**

- Adversely affect our ability to maintain accreditation, including probation, suspension, or revocation

**CRIMINALISTICS UNIT**

- Impede the lab's ability to replace older and outdated instrumentation to improve our toxicology service to meet current needs.

**Activity Type:** Existing

**Objective:**

The Crime Lab will provide at least 20,000 lab requests analyzed yearly while decreasing overall turn-around-time for analyses, decreasing existing backlog, and more specifically decreasing turn-around-time for DNA forensic cases to 60 days for 85% of the DNA requests by 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6621	Key	Percentage of ASCLD essential criteria	100	100	98	100	100
6627	Key	Total number of lab requests analyzed (reported)	20013	15316	16086	20000	20000
20812	Supporting	Number of CODIS samples uploaded to the State DNA indexing system	69354	64686	24600	43000	41000
15554	Supporting	Number of CODIS (arrestee and convicted offender) samples accessioned	61422	89160	81951	78000	75000

**Narrative:**

The Crime Lab has a continuing commitment to ensure the superior work and provide the highest level of forensic

science services to all of the agencies we serve through complete, accurate, and consistent analyses by dedicated and highly trained employees. The Crime Lab is accredited through the American Society of Crime Lab Directors. Louisiana State Police Crime Lab provides leadership, training, forensic services, and assistance to state and local agencies.

A prime focus of lab priorities is currently being directed at reducing the backlog of violent crimes such as murder, rape and other crimes against persons. The goals of the lab's forensic services are:

- To provide accurate and timely analysis of evidence in the areas of toxicology, chemical analysis of evidence with controlled substances
- The examination of firearms and tool marks, latent prints, DNA, trace evidence, biology, and crime scene analysis and assistance
- To reduce backlog of cases older than 30 days in all areas, decrease case turnaround time to 60 days for at least 85% of services requested
- To maintain excellence in the quality of the forensic science services provided to our customers
- To provide optimal levels of forensic service to the State of Louisiana
- To upload and process CODIS samples to the National DNA Indexing System
- To facilitate improvement in all aspects of the lab's work
- To provide early identification and correction of problems and potential problems through corrective and preventive action

**Explain How This Activity Advances State Outcome Goal:**

Forensic scientists at the lab provide assistance in the statistical data collection of evidence at crime scenes along with performing scientific examinations of evidence. Analyses performed at the lab are often the definitive factor in proving the guilt or innocence of persons charged with criminal acts. Being the largest lab of its kind in the state, the Louisiana State Police Crime Lab has been utilized by many agencies, both law enforcement and judicial, for timely and successful prosecution of criminal investigations resulting in the safety of citizens and property.

**Evidence:**

The Combined DNA Index System (CODIS) database has specifically assisted in multiple cases throughout the State of Louisiana. The Crime Lab is the only forensic toxicology lab in the State of Louisiana. Work completed at the Crime Lab has directly resulted in the arrest and conviction of numerous offenders in both high and low profile cases throughout Louisiana. LSP is the only in-state laboratory certified to conduct drug analyses on blood/urine samples in DWI investigations.

Examples of cases include a 2007 double-murder from Franklinton that was solved this year. As of September 17, 2009, Baton Rouge Police Department has investigated 65 murders and has submitted evidence to the Crime Lab for 60 of these cases.

**Agency:** 419 Office of State Police  
**Program:** 3000 Operational Support  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To provide protection for the Governor, the Governor's family, the Lt. Governor and any other dignitaries and leaders designated by the Governor, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of protection for the Governor, the Governor's family, the Lt. Governor and any other dignitaries designated by the Governor.	100	100	100	100	100

**Narrative:**

Protective Services is responsible for the safety and security of the Governor and the Governor's immediate family. Louisiana State Police Troopers and Protective Services provide security details to the Lieutenant Governor and other dignitaries and leaders at the Governor's request. Protective Services assists in protecting the President of the United States in collaboration with the Secret Service and further provides protection and logistics for visiting governors and leaders from other states and countries.

Louisiana State Police Troopers and Public Safety Officers are assigned to the Governor's Mansion 24 hours a day, year-round and are responsible for the physical protection of the mansion and its grounds. Protective Services also has a detail assigned to the Louisiana State Capitol overseeing the day-to-day physical security operations at the Governor's office in the Louisiana State Capitol.

**Explain How This Activity Advances State Outcome Goal:**

Through collaborative efforts and successful communication Protective Services ensures protection and safety of the Governor, his family and any other state elected officials or visiting dignitaries designated by the Governor.

**Evidence:**

Evidence of promised results are measured each and every day when the Governor, the Governor's immediate family, other persons authorized by the Governor, as well as the Governor's office and mansion, are safe and secure.

21938	Key	Number of Non-Vehicle Patrol Hours	15516	19594	13025	14272	15500
10555	Supporting	Number of contacts, arrests, citations	6567	4477	5264	0	4750

**Narrative:**

The Department of Public Safety Police is comprised of Physical Security and the Louisiana State Capitol Detail.

- Physical Security provides safety and security for the Department of Public Safety Headquarters and the Joint Emergency Services Training Center. Physical Security houses and supervises approximately 185 inmates who are at the state facilities 24/7. Physical Security has operated for more than twenty years supervising inmates at the State Police Headquarters.

- The Louisiana State Capitol Detail is comprised of a communications center, patrol officers, and building security officers who are tasked with protecting the property and all employees and visitors in the Capitol Complex. Officers detect and apprehend criminals and strive to communicate with local, state and federal law enforcement agencies to proactively combat crime. Capitol Detail provides aggressive patrols and community policing tactics to ensure a safe environment for the employees, citizens, and visitors of the Capitol Complex

**Explain How This Activity Advances State Outcome Goal:**

DPS Police is mandated to maintain peace and order within the State Capitol Complex by regular patrols, education and other actions to ensure the general safety of the public. Through accurate and timely communication along with the protection of citizens, visitors, and property, DPS Police proactively contribute to Public Safety. The officers conduct Personal Safety Seminars that educate the employees at the Louisiana State Capitol Complex on preventing crime, awareness of their environment, and responding to emergency situations, which are all fundamental components in personal safety and security.

**Evidence:**

Evidence

- The Capitol Detail has operated for over ten years with no major violent crimes such as murders, rapes, and batteries with serious bodily injuries being committed in the Capitol Complex.
- From 2006 to 2009, Capitol Detail arrested 599 persons including 226 fugitives from other jurisdictions. An additional 122 people were arrested for DWI.
- Over the past three years, DPS Police officers issued 6,465 citations and 1,468 warning violations for traffic offenses in an effort to reduce crashes and promote public safety.
- Collaboration with Department of Corrections through the use of inmate labor, saving the department thousands of dollars per year while providing training and work experience to the inmates.

**Activity Name:**  
Patrol  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 1000 Traffic Enforcement  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Current funding will maintain present Troop strength of 706. With the changes outlined in this offer along with other offers expected to be funded (LHSC), Patrol is targeting a 5% reduction in traffic fatalities in FY 2011 as follows:

- 13,849,372 miles patrolled
- 395,697 citations
- 21,148 arrests
- 225,513 motorist assists

Patrol responsibilities include accident response, motorist assists, and crime responses. A reduction will limit our ability to reduce traffic fatalities. An increase in funding will increase proactive activities and reduce fatalities.

LHSC final report of the "Targets of Opportunity: State Demonstration Program For Reducing Impaired Driving" states every life saved is equivalent to \$3 million in tax payer costs. Over the past 3 years, as the number of patrol troopers increased, the number of fatality crashes decreased. A reduction in the number of patrol troopers could increase the number of fatal crashes.

**Activity Type:** Existing

**Objective:**

To provide the citizens and visitors of Louisiana with the safest highways possible, by reducing the number of traffic fatalities by 6% over the next three years.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
13772	Key	Percentage of State Police Manpower Allocation Study coverage level implemented	75	66	58	70	80
20796	Key	Number of fatalities per 100 million miles	2	2	2	2	2

**Narrative:**

The Louisiana State Police Patrol enforces traffic and criminal laws, investigates crashes, performs drug interdiction, aids motorists, provides accurate communication of information to the public and other agencies, conducts crime prevention programs, promotes highway safety, and leads and assists local and state law enforcement agencies.

A 17% increase in the number of Troopers over the course of the prior three years has resulted in 53% more public assists, 20% more contacts with the public, and most importantly, the number of fatal crashes within the Patrol's investigation jurisdiction has decreased by 7%.

With improvements in research and data analysis capabilities and continued status quo funding, the Patrol activity

will continue attempting to reduce the fatality rate over the next 3 years through:

- Modifying the time and location of all the allocation of officers to focus on high risk situations.
- Increasing coordination with education and media components, including Highway Safety and LA DOTD, to magnify the impact that each would have separately.
- Leveraging existing Troopers to expand public education efforts on safe driving behaviors.
- Moving duties currently performed by sworn officers to lower-cost civilian positions which will require a TO increase in civilian support personnel which has taken the brunt of past personnel reductions.

#### **Explain How This Activity Advances State Outcome Goal:**

I want people and families, including children, to feel safe at home, school, work, and while traveling; I want less crime, including less drug abuse, and smarter, proactive policing.

State Patrol plays a critical part in advancing Public Safety goal by increasing the safety of our highways, enforcing our criminal laws, interdicting drugs, and reducing crime through assistance of local law enforcement and educating the public.

- Detailed statistical data of active patrol crash locations directs the deployment of various assets of the Patrol activity such as Motorcycle Patrol and Task Forces to concentrate enforcement in these target areas.
- Strategically located roadside safety checkpoints.
- Youth education about the consequences of negative behavior such as driving while intoxicated, drug use, and reckless driving.
- Utilizing various community forums, troopers educate the general public on safe driving habits and crime prevention tips which are approaches that have been proven to work.

While the State Patrol cannot control the number of fatalities, the Troops can have a strong and positive influence on the safe driving habits of the people of Louisiana that do reduce the number and severity of crashes.

#### **Evidence:**

State Police Manpower Allocation Study revealed that 937 troopers is the amount of personnel needed to effectively patrol the State. At the inception of the State Police Manpower Allocation Study in 2007, there were 543 Troopers dedicated to patrol. Currently the Patrol Activity has 706 Troopers patrolling Louisiana's highways, still over 200 officers less than the recommended level. As the numbers increased, public assists increased by 53% and most importantly, the number of fatal crashes on highways patrolled by the State Patrol has decreased.

Research conducted by the Louisiana Highway Safety Commission substantiates the impact that Troopers have in saving lives. The Commission's final report of the "Targets of Opportunity: State Demonstration Program For Reducing Impaired Driving" found that an increase of 100 Standardized Field Sobriety Tests will save 3 additional lives. They also found that an increase of 1000 hours of Saturation Patrol will save 4 additional lives. In 16 selected parishes for the program that utilized increased enforcement, alcohol-related fatalities decreased 14.8%.

#### **Targeting and Coordinating Enforcement:**

Multiple studies support the value of the Patrol's strategies to target their limited Patrol manpower. The Patrol's strategies, which are designed to reduce traffic fatalities and crime, rely on increased data analysis and new research to:

- Identify and target high crime locations or persons and implement target patrols to effectively deter and attack the cause of the crime, rather than react once a crime has occurred
- Leverage crash data, vehicle density, and other input to implement selective enforcement programs that have been demonstrated to impact speeding, intoxicated driving, and seat belt use, which save lives.
- Coordinate education and marketing efforts to amplify the impact of selective enforcement programs, achieving even greater reductions in the number of traffic deaths.

See:

"Gun Violence Programs: Directed Police Patrols," by the National Institute of Justice, 2008, asserts that based on two pilot projects that directed patrols reduced gun crime, homicide, aggravated assault with a gun and armed robbery,

**Activity ID:** 488  
**Activity Name:** Transportation and Environmental Safety Section  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 1000 Traffic Enforcement  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Through enforcement, TESS strives to reduce the fatal crashes from the previous year by targeting factors that create unsafe roadway conditions such as inoperable and faulty equipment, dangerous and impaired drivers, and hazardous material carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of violations cited during a FY	0	0	0	0	100000
New	Key	Percentage increase in number of violations from previous fiscal year	0	0	0	0	1

**Narrative:**

Transportation and Environmental Safety Section (TESS) is comprised of Weights and Standards, Towing and Recovery, Right to Know, and Hazmat.

The DPS Weights and Standards Police assure the safety of the motoring public and protect the highway infrastructure by enforcing state and federal commercial vehicle weight and size requirements. DPS Weights and Standards Police consists of POST certified officers who are the sole enforcement authority of Portable Scale operations and collaborate with DOTD fixed scale operations providing accurate and timely communication of related information.

LSP is the statutorily mandated authority to respond and investigate all hazardous material incidents to determine possible causes and enforce any violations of the Louisiana Hazardous Materials Regulations. Hazmat is responsible for coordinating a Statewide Response System for mitigating these incidents, inspecting chemical plants, conducting roadside inspections of commercial motor vehicles involved in transporting hazardous materials, conducting safety education to the chemical industry, and assisting all local and state agencies on hazardous material-related incidents.

Federal law mandates Louisiana to collect the previous year's chemical inventory from chemical manufacturing plants and other facilities located in the state. This data is then distributed to local governments in whose boundaries these facilities are located to ensure the safety of the public as well as responding officers and firefighters in case of chemical spills or releases. The Hazardous Materials Hotline is maintained 24/7 by the LSP to receive reports of releases and spills from chemical plants or on waterways, airways, roadways and railroads. These reports are then

distributed to local and state agencies which may be responding to mitigate these incidents. The Right-to-Know unit also reviews chemical incidents reported to the Hotline for possible violations including late notifications, failing to report chemical spills within the state, and giving misleading or false information when reporting an incident to the Hotline.

The primary responsibility of Towing and Recovery is to perform regular inspections of all licensed towing and storage facilities in Louisiana to ensure compliance with applicable regulations. All activities performed by Towing and Recovery are the exclusive responsibility of LSP.

**Explain How This Activity Advances State Outcome Goal:**

The TESS activity plays a critical role in advancing the Transportation and Public Safety Goals.

**Transportation:** Overweight vehicles accelerate the deterioration of our highway infrastructure leading to weakened roads and damaged road substructures which are data driven factors in serious injury and fatal crash incidents. By reducing the number of overweight trucks, the life expectancy of the state's roads are increased, thus reducing maintenance and repair costs. By conducting a Size and Weight Inspection in conjunction with a Motor Carrier Safety Inspection an officer can additionally take overweight vehicles which have safety equipment violations, such as defective brakes off the road. This activity promotes safe travel for commercial vehicles thereby reducing the number of crashes directly related to poor or weakened road surfaces creating safety for the motoring public.

**Public Safety:** Through proactive emergency planning, communication, and enforcement of regulations involving the release of hazardous materials provides public safety and security. The licensing process of all manufactures, sellers or handlers of explosives will provide an organized administrative process with continuity so that only persons suitable will be issued a license. Hazmat has experienced extraordinary regulatory changes in 2008 that resulted in significant increases in fees and revenue which generated \$287,000.

The Right-To-Know unit will maintain a 24 hour hotline that records emergency response information for chemical releases to ensure citizens of Louisiana are informed of critical information regarding hazardous materials.

Tow trucks operating in unsafe conditions, or operated by drivers in an unsafe manner can be contributing factors in fatality and serious injury crashes. By mitigating unsafe vehicle and driver conditions through education and enforcement initiatives, a safer environment is achieved on Louisiana's highways.

**Evidence:**

The DPS Weights and Standards Police method of determining effectiveness of the enforcement plan is measured by the number of vehicles weighed, and the number of violations issued. Of the 12,521 vehicles weighed during FY 08/09, 4,456 vehicles or 35 percent were cited for being overweight with 976 vehicles, or 8 percent being overweight more than 10,000 pounds. With the lack of weight enforcement efforts, the Highway Reconstruction Fund would lose approximately 1.5 million dollars generated by overweight penalties.

Numerous studies were performed at Louisiana Technical University and the Governor's Oversize and Excess Weight Vehicle Task Force to determine the impact of raising the legal gross vehicle weight from 80,000 lb. to 100,000 lb. on vehicles hauling sugar cane, rice, timber, and cotton. It was determined that any increase in the gross vehicle weight over current limits would substantially increase the cost of overlays and decrease the length of time before an overlay is required in which current revenues for road improvement were insufficient to provide for the damages that oversize and excess weight trucks would cause.

In addition, of the overweight violations, 4,567 brake violations, 2,023 tire weight-rating violations and 13,290 other safety violations were detected during the course of these inspections.

The primary funding source for the Towing Recovery comes from the Louisiana Towing and Storage fund through fines. During FY 2008-2009, fines from enforcement generated \$83,430.00 in revenue.

**Narrative:**

MCSAP is a coordinated and uniform program of inspection and enforcement activities relative to interstate and intrastate commercial motoring. No other agency within state or local government has the responsibility or authority to enforce the Motor Carrier Safety and Hazardous Material Rules and Regulations.

MCSAP reduces the number and severity of commercial motor vehicle crashes occurring in Louisiana by immediately placing unsafe drivers and defective vehicles out of service. MCSAP seeks to accomplish this purpose through the five national program elements of the Motor Carrier Safety Assistance Program: roadside inspections of commercial motor vehicles, traffic enforcement, compliance reviews/audits, public outreach and training, and data collection and analysis.

In addition, MCSAP manages the Louisiana Truck Center for the purpose of serving as one central location for motor carrier companies and operators to obtain all permits and payment of any fees/ charges allowing them to engage in the commercial motor carrier trade in Louisiana.

The Unified Carrier Registration Program, established by the Unified Carrier Registration Act, requires all individuals and companies that operate commercial motor vehicles in interstate, intrastate, or international commerce to register their business and pay an annual fee based on the size of the fleet. MCSAP has the sole responsibility of enforcing the Unified Carrier Registration Agreement in accordance with federal regulations.

MCSAP conducts and reviews safety audits in accordance with federal regulations to ensure that basic safety monitoring controls are in place for all new commercial motor carriers. Specifically, these safety audits review a new

entrant's safety management systems and a sample of required records to assess compliance with federal regulations.

#### Explain How This Activity Advances State Outcome Goal:

Commercial motor vehicles operating in unsafe conditions, or operated by drivers in an unsafe manner are known contributing factors in fatalities and serious injury crash statistics. By mitigating unsafe vehicle and driver conditions through proactive communication, education, and enforcement initiatives, a safer environment is achieved on Louisiana's highways contributing to the safety of motorists in Louisiana.

The primary funding source for the MCSAP comes from Federal Motor Carrier Safety Administration grant awards which require a 20% State match on all funding. MCSAP generated \$6,098,664.46 in revenue for Louisiana last Fiscal Year through fees and violations.

#### Evidence:

MCSAP gauges the effectiveness of their efforts by statically tracking and analyzing enforcement activity. Of the 46,786 roadside inspections conducted during State Fiscal Year 2008-2009, 68,095 vehicle violations were cited, in which 17,095 (25%) were identified as out of service violations. During the same time period, 36,145 driver violations were cited, in which 4,258 (12%) were identified as out of service violations.

**Activity ID:** 18

**Activity Name:**

Breeders Award - La State Racing Commission

**Department:** 01 Executive Department

**Agency:** 254 Louisiana State Racing Commission

**Program:** 1000 Louisiana State Racing Commission

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Reduction in revenue will seriously reduce payments for statutory breeder awards and cause a critical shortage of new horses entering the racing industry in Louisiana for future years. Without a strong breeders award program the number of new foals bred in Louisiana will materially decline and cause financial hardship in the Louisiana racing industry for generations. The Louisiana State Racing Commission (LSRC) has been paying out by statutes approximately one third of its annual budgeted expenses for thoroughbred and quarter horse breeder awards to help promote successful horse breeding in Louisiana. Breeding of quality race horses is necessary to maintain the active stock for the annual statutory live race days for racetracks operating in Louisiana. Large fields of horses (9 plus) are more popular with the public and tend to increase pari-mutuel wagering which results in more self generated revenue for the state and local communities through pari-mutuel taxes.

**Activity Type:** Existing

**Objective:**

Through the Breeder Awards Activity to continue to issue 100% of the breeder awards within 60 days of a race.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
1061	Key	Percent of breeder awards issued within 60 days of race	85.72	61	99	100	100
1062	Key	Annual amount of breeder awards paid.	2056666	2191100	2229679	2056666	2056666

**Narrative:**

The LSRC pays statutory breeder awards to support the horse breeding and racing industry in Louisiana to provide racing stock in Louisiana and to increase the value of Louisiana horses through better quality in the breed. Payments are made in the amount of 3/10 th of 1% of the total annual amount wagered approximately \$929,000) to thoroughbred breeders and \$800, 000 annually to the quarter horse breeders. These breeder awards are paid for Louisiana bred winning horses and for Louisiana stallions based on formulas from the state breeding organizations. The LSRC also pays out 14% of the self generated revenues from off track wagering to the Louisiana breeding organizations to promote breeding of winning Louisiana horses.

**Explain How This Activity Advances State Outcome Goal:**

Breeder awards encourage breeding better quality and number of horses for operation of the thoroughbred and quarter horse racing industry in Louisiana which creates a large number of jobs from racing operations and supporting services. Only winning horses and stallions are eligible for breeder awards. Quality Louisiana bred

horses are necessary to provide enough horses to make the races more competitive and popular with the wagering public throughout the country. The improving population of quality, Louisiana bred horses supports the increasing number of races limited to Louisiana bred horses to promote the Louisiana revenue for participants remaining to be paid out in Louisiana.

**Evidence:**

Thoroughbred (TH) and quarter horse (QH) breeding have increased significantly in Louisiana because of the breeder awards and the large purses for winning horses available from slots at racetracks and video poker devices at off track wagering outlets in Louisiana. Out of state QH mares boarded in LA to obtain Accredited LA Bred QH foals (several months boarding) increased to 671 in 2008 compared to 149 in 2000 (350% increase). Breeder awards are only paid to Louisiana horses winning races in Louisiana and popular Louisiana stallions according to statutory procedures by the Breeder Organizations. Because of the increase in breeding Louisiana has some of the largest fields competing in the live daily races. Act No. 242 in the 2009 regular session increased the number of live race days in Louisiana from 80 annual days per racetrack to 130 and the Act also specifies 84 days for thoroughbred and 46 days for quarter horses from the total 130 days.

		campaign as a result of participation in the youth leadership camp					
New	Key	Thorough the Office of Indian Affairs, by 2013, 75% of tribes will develop long term programs and policies to address drug, alcohol and domestic violence in tribal communities	0	0	0	50	50

**Narrative:**

The Governor's office of Indian Affairs assists The Louisiana American Indians in receiving education, realizing self-determination, improving the quality of life and developing a mutual relationship between the state and tribes. The Office also assists the Louisiana tribe in accessing resources and services.

The executive director is appointed to several boards and commissions representing the Governor's Office and the Native Americans in Louisiana.

**Explain How This Activity Advances State Outcome Goal:**

GOAL 4: Many of the Louisiana Indian tribes were affected by the recent hurricanes. This Activity allows the tribes to develop, maintain and update an Emergency Preparedness Plan for their tribe including procedures for evacuation, communication, and shelters for tribal members as well as securing documents, artifacts, important records of tribe. Plans will also include recovery procedures and information for tribal members. Trainings for tribes will be a cooperative effort between the Governor's Office of Indian Affairs, Governor's Office of Homeland Security and Emergency Preparedness and other state or federal agency partners.

GOAL 1: The annual American Indian Youth Leadership Camp sponsored by the Louisiana Indian Education Association is a weekend experience to identify and develop leadership potential in the youth participants (ages 14-18) using both traditional Native American methods of leadership development as well as modern ones. The camp's focus will shift to helping the youth to be involved as youth leaders within their tribal communities. This will be accomplished by greater involvement of the tribal leaders so assurance of youth being involved in tribal activities, events, and programs. Follow-up weekend leadership experiences will also be developed for the Native youth in specific regions or tribes.

GOAL 6: Alcohol and Drug abuse and domestic violence is an issue in the Native American Community, but many tribes don't have access to resources to address this issues. The Office of Indian Affairs will work in partnership state and federal agencies that have a mandate to work with Native Americans in developing programs that address these issues. Resources for funding, training and implementing programs will be offered to tribes so that 75% of tribes by 2013 will have plans implemented addressing these issues.

**Evidence:**

GOAL 4: This is a new Performance Indicator Activity. Most Louisiana Indian tribes are willing to pursue an emergency preparedness plan and training to assist their tribal members. Correspondence with tribal leaders demonstrates a need and desire for training and assistance in developing and implementing a plan. Half the tribes in Louisiana are located in a flood and hurricane evacuation zone and many of them have been greatly affected by the recent hurricanes.

GOAL 1: Native American youth have one of the highest drop out rates in high school. There is a need for Native youth to continue their education through high school and beyond and to develop strong leadership skills which build confidence and self-esteem. Tribal leaders are concerned that many of the youth are losing their culture and traditions. The American Indian Youth Leadership Camp incorporates traditional Native methods of training leadership skills as well as using modern educational techniques. For many of the youth, it is their first experience of

meeting other Native American youth from around the state, learning traditional methods of leadership and receiving encouragement to be leaders. The Governor's Office of Indian Affairs will help develop follow-up leadership weekends to continue the support and encouragement the youth need to be active leaders. The Office will also create greater involvement of tribal leaders to insure that the youth can participate in tribal activities, programs and leadership opportunities. The Office of Indian Affairs will also assist tribes in locating resources in promoting higher education for the Native youth. By 2013, the goal is to have 75% of youth participating in the Youth Leadership Camp involved in the tribes in a leadership capacity. Hopefully, these youth will be involved in the anti-alcohol and drug programs as well as domestic violence prevention programs.

GOAL 6: Native American tribes have one of the highest rates of alcohol and drug abuse as well as domestic violence among all minority groups in the US. Many tribes do not have the resources to develop programs that address these issues extensively. The Governor's Office of Indian Affairs will assist tribes in accessing resources in partnership with agencies (Drug and Safe Free Schools, Office of Addictive Disorders) so that by the year 2013, 75% of all tribes will have a long term program or policy addressing alcohol and drug abuse and domestic violence issues.

**Activity ID:** 222

**Activity Name:**

Administrative / Regulation of Gaming

**Department:** 08B Public Safety Services

**Agency:** 423 Louisiana Gaming Control Board

**Program:** 1000 Louisiana Gaming Control Board

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

Failure to fund this activity at continuation level will result in non-conformance with mandatory laws, diminished public confidence, violations of the state constitution regarding due process, and ultimate cessation of gaming activities in Louisiana causing substantial losses in state and local revenues. The requested increase will fund the projected increase in building rent for the current office for the LGCB.

**Activity Type:** Existing

**Objective:**

To increase public confidence through the regulation of Video, Riverboat, Land-Base, and Slot Machine Gaming at Pari-Mutuel Live Racing Facilities which ensures the integrity of gaming activities and promotes economic development through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of administrative actions of the Board	650	789	789	685	695
New	Key	Number of applications, licenses and permits denied, suspended and/or revoked	294	0	0	0	300
New	Key	Percentage of applications, licenses and permits denied, suspended and/or revoked	0.03	0	0	0	0.03
New	Supporting	Percentage of administrative actions processed within 30 days	0	0	0	0	90

**Narrative:**

The Gaming Control Board protects the public and promotes economic development through administrative action. Administrative actions of the Board includes issuance of licenses or permits; revocation, suspension, finding of unsuitability, or conditioning licenses or permits; imposition of a civil penalty; any documented action or decision by the Board including the issuance of approvals and orders. This action assists gaming interests in providing a stable, constant, efficient, and effective regulatory environment.

Gaming is a cash intensive business that is susceptible to corrupt influences if not highly regulated. Recognizing this, the Louisiana legislature enacted laws that govern the gaming industry through thorough regulatory oversight of all persons, locations, practices, associations, and activities related to the operation of gaming in Louisiana.

Accordingly, the legislature created the Gaming Control Board and empowered it to have all regulatory authority, control, and jurisdiction, including investigation, licensing, and enforcement, and all power incidental or necessary to such regulatory authority, control, and jurisdiction over all aspects of gaming activities and operations as authorized pursuant to the provisions of the Louisiana Riverboat Economic Development and Gaming Control Act, the Louisiana Economic Development and Gaming Corporation Act, and the Video Draw Poker Devices Control Law. Further, the board has limited regulatory, enforcement, and supervisory authority over gaming on Indian lands in Louisiana. This regulatory authority is carried out through administrative action taken by the Board.

**Explain How This Activity Advances State Outcome Goal:**

The Louisiana Legislature declared that the development of a controlled gaming industry to promote economic development of the state requires the thorough regulatory oversight of all persons, locations, practices, associations, and activities related to the operation of gaming activities. The Legislature created the Gaming Control Board and empowered it to have all regulatory authority, control, and jurisdiction, including investigation, licensing, and enforcement over all aspects of gaming activities and operations as authorized pursuant to the provisions of law.

Public safety is ensured through stringent regulatory oversight and enforcement actions of the Board. Rigorous screening of persons and entities prevents unsuitable and unsavory persons and corporations from entering the gaming market. Board regulation of gaming controls, procedures, practices, and methods provides additional protection to the public. Review and approval of these matters further ensures the integrity of games offered for play through Board oversight and authority. This action protects the public from illegal activity and promotes public confidence in gaming regulation.

Economic benefits are gained by enhanced public confidence which is attained through a thorough regulatory environment as found in Louisiana. The gaming industry desires structured, stable, and efficient regulation. Gaming companies who are thoroughly regulated are viewed more favorably by investors. This provides economic stimulus and incentive to grow the gaming industry in Louisiana. Failure of the Board to timely process administrative actions would have a detrimental effect on regulated entities resulting in possible loss of revenue to Louisiana.

Through efficient administrative actions of the Board, gaming is highly regulated in Louisiana which ensures public safety and promotes economic development.

**Evidence:**

The Louisiana Gaming Control Board was created in 1996. Since that time, the Board has provided consistent regulatory oversight that has been applied in a fair and effective manner. This regulatory philosophy not only promotes public confidence, but is balanced in a manner that has enabled the industry to invest in Louisiana providing for continued economic development and growth. Considering the nationwide ongoing economic recession, the Louisiana gaming market has fared exceptionally well. This is best demonstrated in the direct revenue to the state of \$737,642,055 in FY 07/08 which was an increase of \$11,275,778 from FY 06/07.

Through the administrative action of the Board, new licensees were able to commence operation thus generating additional gaming revenue and providing employment to citizens. This timely Board action enabled persons to work and pay income taxes. Board action also allowed new games to commence, machines to be connected for play, reconfigurations of gaming space which enhanced gaming operations, and issuance of a variety of other approvals requested by gaming operators. Timely processing of future administrative action by the Board will enable gaming entities to be more competitive thus further enhancing state gaming revenue.

Board action also afforded persons and entities due process on administrative action taken against them. The timely processing and hearing of these matters provided a fair and just resolution to the action.

**Activity ID:** 16

**Activity Name:**

Regulatory and Licensing - La State Racing Commission

**Department:** 01 Executive Department

**Agency:** 254 Louisiana State Racing Commission

**Program:** 1000 Louisiana State Racing Commission

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

The Licensing and Regulatory Activity requires funding in order to accomplish its mission of staffing and operating the seasonal, cyclical racing commission offices at each racetrack to collect self generated revenue, enforce racing statutes and regulations for racing participants and the public, and to work with all racing participants and the public daily to maintain honest, competitive thoroughbred and quarter horse racing in Louisiana in a statutory controlled cyclical environment.

Additional funds are needed because of the expansion of live race days from 80 to 130 annually at each racetrack in Louisiana by Act No. 242 in the 2009 Regular Session. These funds could be obtained from the statutory Pari-mutuel Live Racing Fac. Gaming Control Fund (slots). Net revenues from slots at racetracks and video poker devices at off track wagering sites have been steady and strong in the competitive gaming environment to protect the horse racing industry.

**Activity Type:** Existing

**Objective:**

Through the Licensing and Regulatory Activity, to license all qualified applicants annually and to test at least 15 horses and 3 humans per live race day.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
1056	Supporting	Number of Licenses Issued	18725	19828	21655	18700	18700
11601	Key	Percentage of humans testing positive	0.85	1.25	1.75	0.85	0.9
1058	Supporting	Number of human samples tested annually	1415	1416	1427	1415	1415

**Narrative:**

The Regulatory Activity includes the operations of seasonal field offices at the 4 Louisiana racetracks. A State Steward supervises and manages the operations of each field office, issues rulings, fines, suspensions, and refers cases to the Racing Commission. The Louisiana State Racing Commission (LSRC) field employees perform drug tests on humans and horses daily during the live race seasons. Samples of drug tests are screened by LSU laboratories and Dr. Steven Barker from LSU testifies before the LSRC in cases regarding the type of testing and reason for positive results. The LSRC employees also issue annual licenses and process paper work through the Oracle database to regulate racing eligibility and record results. The LSRC has an on-site auditor at each field office processing the daily revenue collections and performing audit procedures through the LSRC Oracle database.

**Explain How This Activity Advances State Outcome Goal:**

Numerous independent economic studies have demonstrated the major economic impact of horse racing in the State of Louisiana through revenues from direct state and local taxes and numerous supporting jobs such as

horse breeding, feed suppliers, transporting, boarding, training, office work, insurance, veterinarians, jockeys, trainers, record keeping, etc. to support the annual racing cycle. The Regulatory and Licensing Activity is a vital part of a successful Racing Commission Program which is statutorily dedicated using self generated funds to promote honest, efficient, and successful horse breeding and racing in Louisiana in keeping with the traditional, cultural heritage of the population. This activity creates regulations affecting Louisiana and horse racing throughout the USA. Horse racing continues to be more successful in Louisiana because of fair and necessary regulations supported interactively by participants and the public. Racetracks are operating successfully with self supporting pari-mutuel wagering, slots at racetracks, and video poker devices at off track wagering facilities.

#### Evidence:

Live horse racing continues to have popular support from racing participants and the public as evidenced by Act No 242 in the 2009 Legislative Session which increased the annual number of live race days at each Louisiana racetrack from 80 to 130. Normal racing operations and problems during live racing meets are supervised by a State Steward at the on site LSRC office. The Executive Director and his staff operate the Domicile and the cyclical LSRC field offices which open at each racetrack during the live meets and close after the end of the meet. Annual licenses are issued to all racing participants. Drug screening is performed and statutes are enforced continuously to deter illegal activity. Major racing decisions and cases are heard by the LSRC Commission at public meetings with a court reporter and less than 3% of cases are overturned by the Commission annually.

**Activity ID:** 49

**Activity Name:**  
Enforcement

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 4000 Gaming Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

There has already been a 20% budgetary reduction which has significantly reduced performance levels reflected from FY 2008-2009 and projections for 20% reduction in FY 2009-2010.

- Increase in the Number of Days to complete a new Casino Gaming Background from 100 to 115
- Increase in the Number of Days to complete a new Video Gaming Type 1&2 application from 137 to 158

At a 5% Budget Reduction, the following are performance projections:

- Increase in the Number of Days to complete a new Casino Background from 115 to 121
- Increase in the Number of Days to complete a new Video Gaming Type 1&2 application from 158 to 166

Gaming Enforcement Program submitted a request for 21 civilian positions to replace 21 Troopers. With a recent loss of 9 Troopers, Gaming would like to retain 9 of the 21 Troopers with the remaining 12 being reassigned in LSP. The requested civilian positions will perform background investigations currently performed by troopers saving over \$1.5 million.

**Activity Type:** Existing

**Objective:**

To ensure the protection of citizens from corruption through the civil regulation of license issuance for gaming entities.

To protect the interests of the State and its citizens through the detection of administrative gaming violations by inspection and regulation of gaming entities.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of casino Gaming and Video Gaming Type 1 & 2 New applications received	2378	3210	2789	0	2200
New	Key	Percentage of casino and video gaming new applicants denied.	0	0	0	0	2
New	Key	Percentage of approved casino and video gaming permits revoked	0	0	0	0	1
20915	Key	Number of Video Gaming Violations issued	1046	48	304	0	238

**Narrative:**

The Enforcement Activity consists of Enforcement and Licensing. Louisiana has 13 operating riverboats, 4 racetracks, and the New Orleans land-base casino as well as approximately 3000 video gaming establishments.

- Licensing provides oversight of all application/background processes associated with all licensed gaming entities subject to the authority of the Louisiana Gaming Control Board inclusive of Video Draw Poker, Riverboats, Slot Machines at Horse Racetracks, and Land Based Casinos as well as the oversight of all applications/ background checks for licensure as a Manufacturer, Supplier, Distributor of Gaming Devices/Equipment, and entities licensed as Gaming and Non-Gaming Suppliers.

- The Enforcement duties performed are derived from statutorily mandated duties outlined by the Louisiana Legislature. Enforcement conducts proactive enforcement and investigation of violations to State Gaming Laws and Regulations. Compliance Inspections are conducted by Enforcement and are an imperative part of ensuring that the gaming industry provides safe, fair, and legal forms of entertainment for the people of the state and patrons, while assisting the industry in being able to conduct successful businesses.

#### **Explain How This Activity Advances State Outcome Goal:**

Through the efforts of the Gaming Enforcement Activity, the state and its citizens have been safeguarded from corrupt or unfair practices of those involved in the gaming industry. Enforcement duties are an integral part of insuring the protection of the citizens of the state from peril and hazard through the use of civil regulation. The licensing process insures that the companies and individuals involved in the gaming industry not only comply with state law, but also gaming rules and regulations. This process is necessary to insure that those who are found to be unsuitable to conduct gaming operations in the state are kept from being involved in the gaming industry resulting in a safer Louisiana.

The state's interest are met through enforcement duties by constant oversight of companies and individuals to insure that there is no corruption or illegal activity taking place in licensed establishments. The regulation of industry after the issuance of a license insures that a licensed entity not only stays in compliance with state law, but also local law. A licensed entity faces fines, suspension, or revocation of its license if it does not remain in compliance with rules and statutes set forth. Licensed entities are required to stay current in all aspects of state law and local law in order to keep a gaming license.

#### **Evidence:**

Licensing FY 2008-2009

- Received 4,663 Casino Gaming applications
- Denied 103 Casino Gaming applications
- Received 151 Video Gaming Type 1&2 applications
- Denied 18 Video Gaming Type 1&2

The denials are a direct result of the backgrounds conducted on the applicants.

Enforcement FY 2008-2009

- Conducted 5,304 inspections at the state's gaming establishments
- Issued 275 violations from inspections of gaming establishments
- Conducted 2,565 inspections in video gaming establishments
- Issued 925 violations from inspections of video gaming establishments.

The inspections conducted range from the inspection of the equipment used by the casinos to security provided for the patrons.

**Activity ID:** 11

**Activity Name:**

Veterinarian - La State Racing Commission

**Department:** 01 Executive Department

**Agency:** 254 Louisiana State Racing Commission

**Program:** 1000 Louisiana State Racing Commission

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Reduced funding would reduce the veterinary workforce thus making it impossible to do pre-race exams which are essential to protecting the welfare of the horse, safety of the rider and integrity of the sport. Negative public perception will result in less dollars being wagered which in turn reduces state revenue. Also potential legal problems exist with the lack of oversight to horse and rider safety.

More funds are needed to attract qualified veterinarians to work for the LSRC. The current wage scale is inadequate for individuals with a professional degree and make it impossible to compete with the private sector. To assure adequate time to conduct a thorough exam, the ARCI recommends that they be limited to 35 exams per veterinarian. With only two exam vet's at each LA track, they are doing 50-60 exams daily per vet. Low pay and high work load has resulted in high employee turnover.

**Activity Type:** Existing

**Objective:**

Through the Veterinarian Program to perform pre-race examinations of all horses racing in Louisiana while applying the RCI model racing rules for medication, to test at least 15 horses per live race day, and to keep records of the examinations, soundness of horses, and of racing accidents.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22286	Supporting	Number of pre-race examinations of horses racing in Louisiana	41418	37294	37294	44000	43000
22287	Supporting	Percentage of horses injured while racing reduced to less than 1%	0.75	0.95	0.95	0.95	0.79
22288	Supporting	Percentage of horses with catastrophic injuries while racing	0.16	0.2	0.2	0.15	0.17
1057	Supporting	Number of equine samples tested annually	6609	6385	6814	7000	7800
11600	Key	Percentage of horses testing positive	1.41	0.97	0.38	1.4	1.4

**Narrative:**

Commission veterinarians examine each horse on race day. A brief physical exam in the stall is followed by an observation in motion. Race horses are also observed in the saddling paddock, during warm-up, at the gate, during the race and post race until they exit the track. Injuries are given appropriate emergency medical treatment while on the track. The winner and selected others are required to submit blood and urine samples for testing for prohibited drugs. All exam and injury data is entered into a national data base which is used to study race track safety.

**Explain How This Activity Advances State Outcome Goal:**

Maintaining the integrity of quality, drug free, safe horse racing in Louisiana is essential to its continued and future survival and success. Louisiana has 480+ days of live racing annually which require approximately 42-44,000 starters. Over \$1 billion is bet on Louisiana races annually and over 80% of these wagers are placed by out of state residents wagering on Louisiana races. Positive public perception and support are necessary for continued success. These discretionary pari-mutuel wagering revenues contribute to the success in the entire horse racing industry in Louisiana through higher commissions for racetracks, taxes, purses, and pass through income for breeders, feed suppliers, jockeys, trainers, etc. This is a deep rooted, historical, agricultural based industry operating throughout Louisiana in a statutory controlled and regulated environment depending on healthy horses able to run safely in honest, competitive races.

**Evidence:**

Pre-race exams have proven to reduce equine injury and rider safety. At one LA. track catastrophic injuries were reduced 40% after pre-race examinations were introduced. Continued vigilance in pre-race exams and post race testing is essential to improve public perception of safety and humane treatment of horses in this physically active sport.

Operations  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 4000 Gaming Enforcement  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

There has already been a 20% budgetary reduction which has significantly reduced performance levels reflected from FY 2008-2009 and projections for 20% reduction in FY 2009-2010.

- Reduce Number of Video Compliance Inspections from 1178 to 492
- Reduce Number of Riverboat Compliance Inspections from 3932 to 1760
- Reduce Number of Pari-Mutual Compliance Inspections from 903 to 320
- Reduce Number of Land-Based Compliance Inspections from 467 to 244

At a 5% Budget Reduction:

- Reduce Number of Video Gaming Compliance Inspections to 467 and of the 3000 Video Poker entities, 2033 would not be inspected.
- Reduce Number of Riverboat Compliance Inspections to 1672
- Reduce Number of Pari-Mutual Compliance Inspections to 304
- Reduce Number of Land-Based Compliance Inspections to 232
- Less deterrence to abiding by gaming laws and regulations
- Loss of revenue through increased fraud and corruption
- Decrease in the safety of Louisiana's citizens

**Activity Type:** Existing

**Objective:**

To ensure the integrity of the gaming system through review and approval of a licensee's internal controls; ensure proper accounting practices through an auditing program to account for all monies owed from gaming revenue; and continue regulation and control of authorized gaming entities, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of casino audit inspections resulting in violations.	0	0	0	0	4
New	Key	Number of compliance inspections completed by Technical personnel	473	409	260	0	184
New	Key	Number of slot system certifications completed by Techs	0	0	0	0	216
New	Supporting	Number of inspections conducted at Indian casinos	834	908	261	0	800
New	Supporting	Number of applications processed at Indian Casinos	1775	2257	1870	0	1700

**Narrative:**

The Operations Activity is critical to the ongoing control of gaming as mandated by the Louisiana Legislature. Operations are comprised of Technical Support, Audit, and Administration.

- Audits primary duty is to fulfill statutory responsibilities in the interest of the state while assisting industry in efforts to remain competitive. Audit must keep consistent knowledge of evolving technology and modify its audit programs and processes accordingly. Audit ensures accurate revenue reporting by all gaming licensees, monitors and reviews all gaming tax revenue remitted to the state, provides investigative assistance relative to the financial information submitted by gaming applicants, and conducts proactive investigations of gaming licensee's financial requirements as set forth in Louisiana law and rule.
- Technical Support monitors and ensures that all licensed gaming devices are accurately communicating with the required Central Computer System. Technical Support ensures the gaming industry's compliance with storage, transfers, and placement of gaming devices. Technical Support reviews new gaming technologies and devices for compliance with applicable Louisiana law and rule and provides investigative assistance in regards to technological data.
- Administration provides support relative to all administrative matters such as monitoring and development of all training, budget, personnel, property control, research and legislation relative to Louisiana gaming law and rule, operational/strategic planning, and statistical analysis. Administration reviews and approves the internal controls (internal policy and procedures) for each licensee, as well as approving tournaments, new games and equipment, and all emergency changes.
- Indian Gaming is charged with preventing organized crime and other criminal elements from infiltrating and corrupting games of chance on Indian land. Presently, three Indian casinos are in operation: Chitimacha in Charenton, Tunica-Biloxi in Marksville, and Coushatta in Kinder. Signed tribal compacts empower the Louisiana State Police Indian Gaming personnel to regulate the gaming industry on Indian reservations. Operations oversees the requirements to approve all types of games, rules of play, certification of all gaming employees, certification of all casino vendors, and enforcement of criminal statutes on the gaming floor.

**Explain How This Activity Advances State Outcome Goal:**

Operations contributes to Public Safety through regulatory oversight with the use of compliance inspections and all application/background procedures associated with all licensed gaming entities subject to the authority of the Louisiana Gaming Control Board. Compliance inspections are conducted in an effort to maintain a consistent and strict regulatory oversight within the gaming industry. Auditing the financial suitability of an applicant is vital in the overall suitability process. A stringent review and approval process of internal controls ensures citizens of the state receive fair play of all available games. The regulation and enforcement of criminal laws pertaining but not limited to gaming promotes the safety and welfare of the people of our state against corrupt and dishonest practices.

According to the Louisiana Legislative Auditor, during FY 2008-2009, Louisiana generated \$753,545,890 in revenues from Gaming operations. The Gaming Enforcement Program is proactive in its efforts to ensure the accuracy of revenue received through both Enforcement and Operations collaborative efforts.

**Evidence:**

The Gaming Enforcement Program has strived to improve the efficiency of its processes and the proficiency and knowledge of its investigators and support staff so that it may better serve the public.

Over the last couple of years, the division has analyzed its staffing levels and has undergone two separate re-alignments. The first re-alignment occurred in August of 2005 and the latest in April of 2008. These re-assignment have allowed the re-allocation of over 30 trooper positions to other areas in Louisiana State Police with greater demands.

To make sure licensees are operating within legal parameters, during FY 2008-2009 Operations carried out the following:

- 2,589 Video Poker Compliance Inspections
- 1046 Video Poker Violations
- 4662 Casino Compliance Inspections
- 261 Casino Violations
- Verified the proper communication of 22,046 Slot Machines

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.
- Concealed Handguns processes permit applications.

- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

#### **Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sherriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

#### **Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.

- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.

- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.

- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.

- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.

- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.

- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

------------------------------	-----	------------------------------------

**Activity ID:** 715

**Activity Name:**

Research in nutrition and preventive medicine

**Department:** 19A Higher Education

**Agency:** 600 LSU System

**Program:** 10A0 Pennington Biomedical Research Center

**State Outcome Goal:** 1B Higher Ed. Non-Formula

**Scalable:** True

**Scalable Description:**

The Pennington Biomedical Research Center(PBRC) is currently funded 25% from state appropriations and 75% from gifts, grants, and contracts from federal, state, and private sources. State funding provides the operational base from which the center can maintain and grow its research efforts. Historically PBRC has been able to leverage every \$1 of state unrestricted funding into \$3 of grant and contract funding. A decrease in state unrestricted funds would constrict this ability in the same way that an increase in state unrestricted funds will allow PBRC to maintain its competitive level and grow funding from other sources. Continued growth translates into more jobs and a greater influx of money from outside the state into the state economy. PBRC is also poised to open a new 90,000 square foot clinical research building which significantly expands the Center's research capabilities. New unrestricted funds will be required to operate and maintain this important new facility.

**Activity Type:** Existing

**Objective:**

To promote healthier lives through research and education in nutrition and preventive medicine.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
7344	Key	Increase in non-state funding	13.62	-0.11	0.44	16.5	16.5
9929	Key	Number of funded proposals	116	117	113	95	95
7346	Key	Number of clinical trial proposals funded	18	21	25	25	25
7348	Key	Number of participants	7733	2657	6665	7500	7500

**Narrative:**

The Pennington Biomedical Research Center (PBRC) conducts research and provides education in nutrition and preventive medicine with the goal of promoting healthier, disease free, and longer lives. To fulfill its education mission, PBRC has a Division of Education which conducts professional and public educational activities to promote understanding and the advancement of research among scientists worldwide, train post-doctoral researchers, and provide education on nutrition and healthier living to the population of Louisiana. To fulfill its research mission, PBRC has three large research programs in basic science, clinical research, and population science. Within these three large programs, PBRC performs research in the areas of cancer, diabetes, epidemiology and prevention, genomics and molecular genetics, neurobiology, neurodegeneration, nutrient sensing and signaling, obesity, physical activity and health, and stem cell and developmental biology. This range of research activities allows PBRC to foster

basic science discoveries, promote clinical applications and encourage the translation of our findings and those of others to the population at large.

**Explain How This Activity Advances State Outcome Goal:**

The Pennington Biomedical Research Center (PBRC) advances the Non-Formula Higher Education goal of the state as a world-class academic research institution. The work of PBRC scientists is recognized internationally as being at the forefront of research in obesity, nutrition, and the prevention of disease. PBRC research also promotes the state outcome goal of Economic Development through the attraction of research dollars into Louisiana, the development of intellectual property, and the start-up of knowledge-based companies. PBRC has a record of drawing funding into the state from federal, private, and other sources. PBRC's reputation for good science has resulted in consistent funding from federal sources like the National Institutes of Health, the U.S. Army, and the U.S. Department of Agriculture. PBRC also attracts private funding from large pharmaceutical companies like Merck, Glaxo-Smith-Kline, Eli Lilly, Bistol-Myers-Squibb, Pfizer, and others. PBRC research also promotes the state outcome goal of Health through its research and translational science to improve nutrition and prevent disease among the state's population.

**Evidence:**

The Pennington Biomedical Research Center's (PBRC) researchers attracted an average of 205 funded proposals per year over the last three years. Federal funding alone has averaged over \$20 million per year for the last three years, and total gift, grant, and contract funding has averaged \$38 million per year over the last three years. The quality of PBRC research is also evidenced by the fact the faculty have combined to publish over 200 research papers per year over the last three years in scholarly publications, and have been cited over 200,000 times. Over the past three years 17,000 Louisiana citizens have directly benefitted from PBRC research, either as participants in clinical trials or from educational outreach activities.

**Activity Name:**  
 Research Activities  
**Department:** 19A Higher Education  
**Agency:** 674 LA Universities Marine Consortium  
**Program:** 1000 LA Universities Marine Consortium  
**State Outcome Goal:** 1B Higher Ed. Non-Formula  
**Scalable:** True

**Scalable Description:**

LUMCON would not be able to perform the research required if these funds are not approved. We would not be able to uphold our end of the grant agreements/contracts. These funds are needed to retain our faculty/research groups and compete for further funding. We would not be able to complete our mission as a nationally acclaimed marine research facility.

**Activity Type:** New

**Objective:**

To conduct basic and/or applied research that increases the scientific understanding of Louisiana's marine and coastal environments.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
1.6	Key	Grants:State Funding Ratio	1.49	1.59	1.65	1.65	1.65

1.4	Key	Research Grants - Expenditures in Millions	3.3	3.86	4.3	3	3
1.5	Supporting	Number of Peer Reviewed Scientific Publications	25	16	12	15	15

**Narrative:**

LUMCON is recognized locally, statewide, nationally, and internationally as a center of excellence in marine science. LUMCON provides access to Louisiana's marine environments for scientists and students at Louisiana Universities, from across the US, and the globe. LUMCON activities are intended to encourage and stimulate the study of Louisiana's important coastal regions by members of Louisiana's university community. These studies are enhanced by a scientific staff of eight(8) PhD's resident at the marine center. These scientists take advantage of the location of the Marine Center and focus on estuarine, coastal, and Gulf of Mexico research, thereby stimulating research opportunities that are difficult for scientists on the more inland campuses. They take advantage of long-term experiments conducted in surrounding/nearby marshes, maintain brood stock for aquaculture experimentation, have ready access to coastal waters and deltas of the Mississippi and Atchafalaya Rivers. They initiate many collaborative efforts with colleagues on other campuses, resulting in research grants that are beneficial to both. Their presence, along with their research groups are essential to the functioning of the scientific enterprise (facilities, logistics, scientific operations). Data generated from research programs feed directly into the university-level courses at LUMCON and other member universities and provide basic research information for other LA researchers, resource managers, and federal agencies.

### Explain How This Activity Advances State Outcome Goal:

The research component of LUMCON is maintaining it's productivity though the state supported funding has decreased over the past years. Louisiana is a state highly dependent on it's coastal resources. Coastal fisheries and offshore oil and gas are two vital components of the state's economy. Louisiana's coastal communities are increasingly affected by coastal land loss, a factor that has been highlighted with the past four major hurricanes in 2005 and 2008. Eutrophication from river-borne nutrients impacts coastal habitats and Louisiana's continental shelf, including the "Dead Zone". Toxins from harmful algal blooms and pathogen contamination from improperly treated sewage impact oyster growing waters of the state. Pollutants from a variety of sources impact the state's wetlands, bays, estuaries, and continental shelf waters. Coastal wetland habitats are disappearing at an alarming rate. It is important for these issues to be addressed from within the state. LUMCON faculty and other collaborators must have the capabilities for addressing these important environmental issues and attracting federal funds for their research. Science education in Louisiana's universities and classrooms must stress these important issues that are culturally, ecologically, and economically tied to Louisiana's future, and assure that well-trained graduates are available to work on these issues. LUMCON is uniquely positioned -location, facilities, research, and education programs- to work with the universities and other researchers to address these important issues related to the coastal marine resources of Louisiana.

### Evidence:

The research component of LUMCON is maintaining it's productivity. Improved state general funds in FY07/08 saw an increase in LUMCON faculty by an Assistant Professor and FY 08/09 LUMCON added 2 more Assistant Professors. One faculty position was unfilled because of the impending/actual budget cuts in FY10. Filling new faculty positions results in an additional cost to the institution of start-up, steeped state plan (100/95/85) to the 75% coverage (which begins after 3 years). These additional faculty members have been very proactive in obtaining additional grant support (These 3 new faculty have produced an additional 8 new grants- 3 Federal, 3 Private, 2 IAT-BOR Start Up Support Funds). LUMCON's scientists are active participants in the scientific community. Year after year LUMCON has received funding - state, private, and federal dollars- for it's excellent scientific base that encompasses such scientific research areas as "The Dead Zone", Coral Reef Ecology, Offshore Platforms as Artificial Reefs, Fish Spawning and Propagation, Ecosystem Studies, Wetland Sedimentology, Harmful Algae & Their Toxins in Waters/Food Webs, CWPPRA, and CREST for the Restoration and Rehabilitation of the Louisiana Coastline. Research results/educational activities are provided to the citizens of LA. LUMCON has continuously received millions in federal funding related to the above scientific areas and is continuing to expand their research base with the collaboration of member universities, private institutions, and private industries. LUMCON is the fiscal agent/umbrella orgn. for NOAA's Coastal Restoration/Enhancement through Science & Technology and oversees the US Army Corps subcontracts for their Science Advisory Committee. LUMCON faculty have continuously received millions in federal funding related to the above scientific areas and are continuing to expand their research base with collaboration of member universities, private institutions/industries. LUMCON has partnered with several university-business opportunities in the fisheries field with the intent to enhance resources and provide jobs. Peer-reviewed publication rates of scientific faculty is high for senior scientists and developing for junior faculty. Two senior research scientists have high Science Citation Indices and 1 Paper in Estuaries is the Second most Cited Paper in the Journal for the past 20 years. LUMCON Faculty are highly respected and serve on many state/national/international panels/workshops/boards.

237	Key	Dollar amount of administrative costs (in millions)	2.5	5.7	4.3	2.7	2.7
11793	Key	Dollar amount of net event revenue (in millions)	0.48	1.46	0.68	0.34	0.64

**Narrative:**

The mission of the Louisiana Stadium and Exposition District (LSED) is to provide for the operation of the Louisiana Superdome and New Orleans Arena through self-generated operating revenues, collection of the 4% hotel occupancy tax in Jefferson and Orleans Parishes, and \$.01 Hotel Occupancy Tax from Orleans Parish (Sports Franchise Fund). Funds from these sources are distributed according to Act 640 as amended by Act 1191 to incorporate the \$205,000,000 sports package approved by the legislature in 1995. That package included improvements to the Superdome; construction of the New Orleans Arena adjacent to the Superdome; construction of the Jefferson Parish Baseball Stadium (Zephyr Field) in Metairie; construction of the John Alario Center at Bayou Segnette; an expansion of the Pontchartrain Center in Kenner; and improvements to three area recreation facilities: Mell Ott Park, King's Grant Park, and the N.O.R.D. Swimming Pool. The outstanding LSED debt was refinanced in 2006 by issuing \$294,325,000 of Series 2006 Revenue and Refunding bonds. In addition, the New Orleans Saints lease the Superdome, under an agreement with the State, the District, SMG, and the New Orleans Saints Limited Partnership (the Club), a NFL football franchise. The Agreement provides, among other things, certain inducements in the form of reduced rentals and the assignment of certain revenues attributable to the presence of the Club in the Superdome in exchange for the Club remaining in the Superdome through the 2010 NFL season. After servicing the debt and interest, funding the operation, administration, and maintenance of the sports facilities, the remaining

sources of revenues fund these contractual obligations and inducement payments to the Club.

### Explain How This Activity Advances State Outcome Goal:

The operation and administration of the Louisiana Stadium Exposition District will advance the state outcome goal of transparent, accountable, and effective government by identifying and reporting the sources and uses of revenues related to the sports and recreation facilities within the State.

### Evidence:

Prior to privatizing the operation of the Superdome in 1977, the State suffered annual operating deficits of approximately \$5 million. Through aggressive marketing, innovative operations, and prudent cost-control measures, SMG, the management company, turned the Superdome into a story of success. The facility was self supported on revenues and expenses prior to the signing of the Saints Agreement in 2001 and the Hornets move to New Orleans in 2002. Since 2003, subsidies have been necessary due to team obligations in the form of loans and general appropriation from the State. In the five years from Fiscal 2004 to Fiscal 2009, total operating expenses increased by 19% from \$14.9 million to \$17.7 million, due mainly to increased utilities of \$1,294,000, while revenues increased by 11% from \$21.3 million to \$23.6 million.

B01 - Public Providers

**Department:** 09 Department of Health and Hospitals

**Agency:** 306 Medical Vendor Payments

**Program:** 2000 Payments to Public Providers

**State Outcome Goal:** 7 Health

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To encourage all Medicaid enrollees to obtain appropriate preventive and primary care in order to improve their overall health and quality of life as shown by well-visits, annual dental visits, access to primary care practitioners and asthma and diabetes measures.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Average acute care length of stay per discharge for state hospitals	5.88	5.96	5.91	5.88	5.38

**Narrative:**

The Payments to Public Providers Program sole activity is the provision of payments for approved medically necessary services by public providers. Public providers are enrolled Medicaid Vendors that are state owned, and include:

- LSUHSC – Health Care Services Division
- LSUHSC – Shreveport
- LSUHSC – E. A. Conway
- LSUHSC – H. P. Long
- DHH – State MR/DD Services (including Special School District #1)
- DHH – State Nursing Homes - Villa Feliciana Medical Complex and John J. Hainkel Home
- DHH – Office of Public Health
- DHH – Community Mental Health
- DHH – Public Psychiatric Free Standing Units
- State Education
- Other Public Providers

**Explain How This Activity Advances State Outcome Goal:**

This activity provides access to care through safety net state providers that provide services not readily available in the private sector, such as services provided to individuals with severe mental illness, developmental disabilities, and specialty care.

**Evidence:**

As of June 30, 2009, Medicaid had 2,556 state enrolled providers ranging from clinic services to hospital inpatient services. The number of unduplicated Medicaid recipients served in SFY 08-09 was 312,764.

**Activity ID:** 348  
**Activity Name:**  
D01 - Uncompensated Care Costs  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 306 Medical Vendor Payments  
**Program:** 4000 Uncompensated Care Costs  
**State Outcome Goal:** 7 Health  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To encourage hospitals and other providers to provide access to medical care for the uninsured and reduce the reliance on their State General Fund by collecting disproportionate share (DSH) payments from UCC.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
17040	Supporting	Total DSH funds collected in millions	826.6	860.7	835.4	881.3	610.1
17041	Key	Total federal funds collected in million	587.1	613.1	582	616.6	385.3
17042	Supporting	Total state match in millions	239.5	247.6	253.3	264.7	224.8
New	Key	Number of Eligible adults enrolled in Primary Care DSH Waiver	0	0	0	0	119038
New	Key	Percent of providers receiving quality-related incentive payment	0	0	0	0	40

**Narrative:**

The Uncompensated Care Costs (UCC) Program funds payments to hospitals for providing inpatient and outpatient care for uninsured and low-income individuals who are not financially capable of paying for the medical services they receive. Hospitals that provide a certain percentage of their total patient care to the indigent population are designated Disproportionate Share hospitals (DSH); through Louisiana's DSH allotment, these hospitals receive federal funding to cover a portion of their costs of treating the uninsured and Medicaid patients. If this funding was not available, costs of treating the uninsured would have to be financed by State General Fund.

The following hospitals currently receive these payments:

- LSUHSC – Health Care Services Division
- LSUHSC – Shreveport
- LSUHSC – E. A. Conway
- LSUHSC – H. P. Long
- DHH – Villa Feliciana Chronic Disease Hospital
- DHH – Public Psychiatric Free Standing Units
- Some Private Hospitals

In SFY 11, DHH plans to link 5% of uncompensated care costs payments to quality initiatives. Hospitals must meet a set of clinical performance thresholds to receive the maximum payment rate. Proposed initiatives could include evidence-based care and systems designed to reduce medical errors.

#### **Explain How This Activity Advances State Outcome Goal:**

Without access to care, the uninsured population is likely to experience poorer health outcomes because they may not receive recommended screenings and follow-up care for urgent medical conditions. Delaying or forgoing needed medical care increases overall health care costs incurred by everyone because uninsured patients are more likely to be treated in either an emergency room or to be hospitalized for avoidable medical conditions. High bills that uninsured patients incur can permanently jeopardize their family's financial security.

The Uncompensated Care Costs Program also funds a significant portion of the cost of training physicians in Louisiana hospitals which results in long-term increased access to primary, preventive and specialty care for all state citizens.

#### **Evidence:**

Louisiana has the fourth largest DSH program in the United States. Without leveraging federal funding available through DSH, Louisiana would have to fund these uncompensated costs using State General Fund dollars.

Information about the importance of covering the uninsured can be found at:

**Activity ID:** 314

**Activity Name:**

A12 - Institutional Based Long Term Care for the Elderly and Disabled

**Department:** 09 Department of Health and Hospitals

**Agency:** 306 Medical Vendor Payments

**Program:** 1000 Payments to Private Providers

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Nursing homes (NH) are a mandatory Medicaid program per federal law. Reimbursement is a state issue. NH rate methodology is in statute, which also mandates inflation adjustments & periodic rebasing of rates. The adjustments requested in this offer are to meet statutory requirements.

These requirements have led to increased spending though utilization is trending downward. This offer proposes payment reforms that could be accomplished without changing law. Further reforms or expansion of these pilots would require law changes.

These reforms are budget neutral. Additional funds, if available, could be used to accelerate reforms such as reducing bed capacity. Over time, such investments could reduce spending growth. Reductions in funding typically result in rate cuts. Another approach would be eliminating optional eligibility groups, limiting NH care in Medicaid to those at SSI levels of income. This would cause current residents to lose coverage.

**Activity Type:** Existing

**Objective:**

To the extent possible within statutory limits, use spending to reduce unused bed capacity and improve quality to achieve national averages by 2015.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of national nursing home quality measures on which Louisiana nursing homes rate at or above the national average per most recent Dept. of Health & Human Services Report	0	0	0	0	30
New	Key	Percentage change in nursing facility utilization	-1.1	0	0	0	1.1
New	Key	Percentage change in nursing facility spending under Medicaid	4	0	0	0	3.75
New	Key	Nursing Home Occupancy rate	71.9	0	0	0	72

**Narrative:**

Nursing homes (NH) provide long term & rehab care to persons needing 24-hour nursing. Louisiana has 304 licensed facilities, 86% of which participate in Medicaid. Over 5 years, NH spending has risen 18%, while the number of recipients dropped 9%. Louisiana has the most NH beds & the highest number of residents per 1,000 population in the U.S. We also have one of the lowest occupancy rates at 72% & are below national average on 15 of 19 quality

measures used by the Agency for Healthcare Research and Quality. Low occupancy results in the state in effect spending over \$20 million a year on empty beds. This activity addresses these issues through a variety of strategies:

- Building on existing efforts to reduce excess capacity: DHH has worked with the NH industry to adopt a moratorium on new beds & bed-buy back, private bed conversion, & assisted living conversion programs incentivize owners to close beds. Bed buy-back encourages purchase & closure of underperforming facilities. This proposes developing additional incentives to close unused beds.
- Piloting care coordination: Frequent movement of patients between nursing homes & hospitals impacts health & costs. Using care teams, many such episodes may be preventable or treatable within the NH. The staff for such teams exists; the pilot would provide incentives tied to patient outcomes to use them more effectively. Reducing hospitalizations avoids trauma to the resident & can save money where Medicaid pays all or part of the hospital stay, medical transportation, & “bed-hold” payments to the NH.
- Pilot pay for performance to improve quality of care: This can be done outside the rate methodology using available revenue sources, with payments tied to specific, nationally bench-marked quality measures.
- Specialization Contracting: Patients with certain conditions (bariatric, ventilator-dependent, etc.) are difficult to place. The cost of caring for such patients makes it impractical for a “typical” home to treat isolated cases. Modifying existing “add-on” rates to establish rates for specialties & contracting with facilities regionally will make these services more available, reduce unused capacity, and improve health.

This activity also includes adjustments to increase the case mix rate due to: 1) statutory mandated inflation; 2) Increases in Bed Buy Back, Private Room and Sprinkler Reimbursement, and 3) Annualization of FY10 rebasing.

#### **Explain How This Activity Advances State Outcome Goal:**

Nursing facilities provide a vital service as part of the long term care continuum. However, as noted in the Request for Results, Louisiana is over-supplied and over-reliant when it comes to institutional care. As the population ages, it is critical to expand choices within the continuum, ensure persons receive care in the most appropriate & cost-effective setting, & improve quality & efficiency.

This proposal seeks to achieve the goals of Better Health and more affordable and appropriate care using the following purchasing strategies:

- Payment reform – provide incentives to eliminate excess capacity or convert it to alternate use; provide pay for performance incentives; enhance rates to improve access to specialized long term care.
- Coordinated case management – pilot care management as a tool to avoid preventable hospitalizations.
- Continuums of care that provide choice – Contract to improve access to specialized long term care.

DHH and the NH industry have already taken steps to reduce excess bed capacity. Further payment reforms could include enhancing the existing incentives or simply buying back beds directly, but this would require additional funds. Other reforms can be budget neutral, such as providing offsetting rate adjustments based on occupancy rates. These reforms do not require changes in law. Still other reforms, such as pay for performance, can also be piloted outside the rate methodology, but would require changes in law to implement on a large scale.

Coordinated case management can be piloted building on existing resources by organizing staff into care teams that meet frequently & have specific outcomes to achieve. Incentive payments and additional resources can be provided using an existing fund set aside for NH quality improvements.

These activities move us toward a system that allocates resources & provides care more rationally so persons needing long term care get it in the right place at the right time.

#### **Evidence:**

It is estimated there are 8,565 unoccupied nursing home beds in Louisiana. The National Academy for State Health Policy noted that addressing the transition from facility-based services to community-based services requires acknowledging the financial commitment undertaken by facility owners who in good faith expended resources to provide the services the State wanted at the time. CMS and other authorities cite the need to eliminate or convert excess bed capacity as vital to development of more sustainable long term care systems. Connecticut, Nebraska, Vermont, Indiana, and other states have enacted a variety of mechanisms to reduce unused capacity.

Care coordination has been shown to produce cost-savings and better health outcomes in a variety of settings. Coordination of care in nursing homes has been successfully piloted in Care Level Management Demonstration Projects conducted in California, Texas, and Florida. Such proposals capitate payment, make the nursing home a "medical home" & sometimes use a pay for performance approach. Research done in 2006 estimated the concept could be piloted for an annual cost of about \$200,000 per facility.

The effectiveness of pay for performance has also been demonstrated in various settings. The Institute of Medicine has recommended such initiatives to align payment incentives with quality improvement. A 2009 report by My Innerview© showed that NH in states with such programs score above average in consumer & worker satisfaction. The same report notes that such programs offer an opportunity for state Medicaid programs to establish cost-effective mechanisms for quality assurance going beyond regulatory sanctions. Financial incentives for providers can be aligned to improve outcomes across a broad set of performance parameters beyond regulatory compliance or clinical performance.

These initiatives can be undertaken in a way that is budget neutral or uses dedicated funding sources. Specialized rates and payments already exist, but targeting such services using performance-based contracts is a new concept. Care coordination & pay for performance pilots can be funded using a fund that by federal law uses monies from fines against nursing homes for quality initiatives. If these initiatives and pilots are successful, the necessary changes can be made to payment methodologies to apply the concepts on a larger scale to improved outcome and control cost growth.

**Activity ID:** 322  
**Activity Name:**  
A10 - Inpatient Hospitalization  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 306 Medical Vendor Payments  
**Program:** 1000 Payments to Private Providers  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

States are required to provide Medicaid for most individuals who receive federally assisted income maintenance payments and for related groups not receiving cash payments. A reduction of expenditures could be realized if existing optional eligibility groups were eliminated; however, these individuals will then become uninsured, resulting in increased financial cost in uncompensated care payments and further crippling safety net providers. Further reimbursement reforms may be implemented, such as reduced reimbursement, no reimbursement for costs related to "Never Events," a move to a Diagnosis Related Grouping (DRG) payment system, enhanced utilization management and reimbursement based on quality and health care outcomes. All of these options have an associated administrative cost to evaluate and implement.

**Activity Type:** Existing

**Objective:**

To provide necessary care for Medicaid recipients when acute care hospitalization is most appropriate and to lower the growth of inpatient hospital costs while moving toward a higher and consistent level of quality medical care.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Average (mean) length of stay (non-psych.) for Title XIX Medicaid recipients	4.5	0	0	0	4.3
New	Key	Percentage Change in expenditures for Inpatient Hospitals	9.8	0	0	0	-19.6
New	Key	Percentage change in inpatient hospitalizations related to pneumococcal meningitis and pneumococcal bacteria	0	0	0	0	-1

**Narrative:**

This activity includes the following sub-programs: Hospital-Inpatient, CRNAs, and Physicians.

- Hospital Inpatient Services includes all inpatient hospital care and services provided by the hospital facility. Historically, DHH required registration of acute inpatient stays and precertification for most all other admissions. In SFY 10, DHH is implementing an enhanced utilization management program that will require pre-certification of all inpatient admissions based on severity of illness and intensity of service as well as ongoing reviews during the inpatient stay to facilitate timely discharge to lower levels of care. In SFY 11, DHH plans to link 5% of current inpatient payment rates to quality initiatives. Hospitals must meet a set of clinical performance thresholds to receive the maximum payment rate. Proposed initiatives could include evidence-based care and systems designed to reduce medical errors.

- Certified Registered Nurse Anesthetist (CRNA) Services include anesthesia services provided by certified registered nurse anesthetists.

- Physician Services includes physician and other professional services, including the following professionals: physicians (including specialists), nurse midwives, nurse practitioners, optometrists, and podiatrists.

Also included in this activity are current and proposed intervention strategies - such as the chronic care management program (CCMP), aggressive inpatient utilization management of admissions, and adult immunization reimbursement and outreach initiatives - that seek to lower expenditures by reducing avoidable hospitalizations and minimizing a recipient's length of stay in hospitals.

**Explain How This Activity Advances State Outcome Goal:**

The inpatient hospitalization activity reflects the goal of improving the health of Louisiana's citizens and reducing avoidable inpatient hospitalizations. This activity provides medical care needed for the treatment of an illness or injury which can only be provided safely and adequately in a hospital setting and with the expectation that this care will be needed for 24 hours or more.

Implementation and expansion of the Inpatient Utilization Management Program will reduce the number of avoidable inpatient admissions as well as the length of stay for appropriate admissions. It will also facilitate movement of patients to the most appropriate level of care such as step down nurseries and home health services. Reimbursement reform opportunities are being evaluated to improve affordability and quality of the services provided and purchased. Immunization and Chronic Care Management Programs seek to improve overall health, avoid infections and disease exacerbations that result in avoidable inpatient stays.

**Evidence:**

- Dartmouth Medical School Professor Jack Wennberg has estimated, based on years of study, that up to one third of the over \$2 trillion that we now spend annually on health care is squandered on unnecessary hospitalizations; unneeded and often redundant tests; unproven treatments; overpriced, cutting-edge drugs; devices no better than the less expensive products they replaced; and, end-of-life care that brings neither comfort nor cure.
- The American Association of Diabetes Educators believe that diabetes self-management education is an essential component of care to achieve the outcomes desired by the person with diabetes, the diabetes educator, and other members of the health care team.
- The U.S. Department of Health and Human Services indicates that counseling and medication are effective when used by themselves for treating tobacco dependence. The combination of counseling and medication, however, is more effective than either alone. Thus, clinicians should encourage all individuals making a quit attempt to use both counseling and medication.
- According to the Centers for Disease Control and Prevention's Advisory Committee on Immunization Practices (ACIP), the Tdap vaccine for adults offers an opportunity to reduce the burden of pertussis (whooping cough) in the United States by reducing the reservoir of pertussis in the population at large thereby decreasing exposure of persons at risk for complicated infection (e.g. infants), and reducing the cost and disruption of pertussis in health-care facilities. The ACIP goes on to indicate that up to 5% of pneumonia hospitalizations for adults are from pertussis complications and vaccination could prevent the disease and associated hospitalizations.
- Pneumococcal vaccine (PPSV) is 60-70% effective in preventing invasive pneumococcal meningitis and pneumococcal bacteremia. This vaccine has not been demonstrated to provide protection against pneumococcal pneumonia.

**Activity ID:** 317

**Activity Name:**

A02 - Primary and Preventative Care

**Department:** 09 Department of Health and Hospitals

**Agency:** 306 Medical Vendor Payments

**Program:** 1000 Payments to Private Providers

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Primary health care and preventive services support reduced mortality, decreased use of emergency rooms (ER) and hospitals, better detection of preventable diseases such as cancer, higher patient satisfaction, less medication use, and overall lower related health care costs. In response to the continued escalation of health care costs and poor health outcomes nationwide and in Louisiana, funding for the existing primary care and prevention activities will support access to the right care at the right time. With expanded funding, proposed initiatives in this activity can be implemented, leading to better health outcomes and substantial savings on ER and hospitalization costs.

Without full funding, there will be an inability to implement any additional services and initiatives, which will result in a continuing increase in health care costs through inappropriate use of the ER, increased hospitalizations and poor health outcomes.

**Activity Type:** Existing

**Objective:**

To encourage all Medicaid enrollees to obtain appropriate preventive and primary care in order to improve their overall health (medical and oral) and quality of life, and to ensure that those who care for them provide that care.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22324	Key	Percentage of Children that have at least six well-visits within the first 15 months of life.	51.89	0	0	52	57
22325	Key	Percentage of adults aged 21-44 years that have at least one preventive care visit per year	4.66	0	0	5	6
22945	Key	Percentage of Medicaid enrollees, 12-21 years of age, who had at least one comprehensive well-care visit in a year	34.79	0	0	35	36
22947	Key	Percentage of Medicaid enrollees 2-21 years of age who had at least one dental visit in a year	41.73	0	0	50	45
New	Key	Percentage of children at age 2 years receiving appropriate immunizations	31.01	31.01	0	31.01	35

**Narrative:**

This activity includes the following sub-programs: Family Planning; Federally Qualified Health Centers (FQHCs); Rural Health Clinics (RHCs); Physicians; Early and Periodic Screening, Diagnosis, and Treatment (EPSDT); and

## Hospital-Outpatient.

- FQHCs and RHCs provide physician or professional services. Additional funding is required to meet the federal statute for these providers to receive reimbursement for services as defined in Section 1902 (bb) of the Social Security Act.
- Physician Services provides physician and other professional services, including those of the following professions: physicians (including specialists); nurse midwives; and nurse practitioners. New services proposed include: provision of smoking cessation and diabetes self-management education to support the Chronic Care Management Program; provision of the Tetanus, diphtheria and acellular pertussis (Tdap) vaccine for adults as well as enhanced outreach and education for the Pneumococcal vaccine to support prevention of these diseases, and a reduction in related hospitalizations and infant mortality; and reimbursement reform for physician administered medications (e.g. injectable antibiotics) to increase point of care access. Expanded services proposed include: increasing the reimbursement rates for physicians to stabilize provider participation; increasing the number of allowed office visits to provide a more appropriate level of care necessary for the chronically ill; and removing the yearly adult preventive office visit from counting towards the calendar year visit limit.
- EPSDT is the mandatory child-specific component of the Medicaid program for provision of preventive services including periodic preventive visits, immunizations and oral/dental care, as well as provision of diagnosis and treatment of any identified illnesses, conditions or disabilities. New services proposed include provision for pediatricians and other primary care physicians to provide oral health assessments and application of fluoride varnish to children under age six years; and expansion of the current Immunization Pay-for-Performance Initiative to add an adolescent immunization measure.
- Family Planning (including Waiver) provides services to Medicaid recipients for routine family planning services including doctor visits and counseling, contraceptives and certain lab services.
- Hospital Outpatient Services consist of outpatient hospital care and services.

### **Explain How This Activity Advances State Outcome Goal:**

This activity will improve health outcomes by expanding on existing primary health and prevention services, utilizing methods aligned with national best practices.

- Providing fair reimbursement for services provided will help maintain current providers and increase provider participation in Medicaid, allowing for greater access to services for Medicaid members. This will assist with members receiving the right care at the right time.
- Removing barriers to accessing appropriate health care by increasing the number of allowed physician visits will promote necessary care for the chronically ill, and removing the yearly adult preventive office visit from counting towards the yearly visit limit will provide members with a way to determine their state of health and provide preventive care that may reduce the need for more costly specialized care or hospitalization.
- Promoting preventive services, including health education, empowers members to take personal responsibility for their health and manage health concerns with available health care resources. Preventive services assist in detecting diseases early and help in minimizing the effect of a disease. Provision of the identified adult immunizations supports many facets of the state outcome goal for health, including access to disease management, preventive services and avoiding costly hospitalizations for vaccine-preventable diseases in adults. The addition of oral health assessments and preventive measures for young children by physicians and continued support of immunization initiatives will aid in health readiness for children entering school and kindergarten.
- Providing tobacco use/smoking cessation services and diabetes self-management training will enable members and their families to have a higher quality of life and reduce utilization of costly healthcare services.

### **Evidence:**

- The American Association of Diabetes Educators believe that diabetes self-management education is an essential component of care to achieve the outcomes desired by persons with diabetes, diabetes educators, and other members of health care teams.
- The U.S. Department of Health and Human Services indicates that counseling and medication are effective when used by themselves for treating tobacco dependence. The combination of counseling and medication, however, is more effective than either alone. Thus, clinicians should encourage all individuals making a quit attempt to use both counseling and medication.
- 17% of preschool-aged children and 50% of school-aged children have experienced tooth decay in their primary teeth.
- As stated by the American Academy of Pediatrics (AAP), "With dental caries being such a common and consequential disease process in the pediatric population, it is essential that pediatricians include oral health in their daily practice of pediatrics." The Academy recommends the application of fluoride varnish by the medical practitioner as an appropriate treatment for patients with significant risk of dental caries who are unable to establish a dental home.
- According to a Surgeon General's report, children missed 51 million hours of school time in 1999 due to dental conditions.
- According to the Centers for Disease Control (CDC) and Prevention, the Tdap vaccine for adults offers an opportunity to reduce pertussis (whooping cough) in the United States by reducing the reservoir of pertussis in the population at large thereby decreasing exposure of persons at risk for complicated infection (e.g. infants), and reducing the cost and disruption of pertussis in health-care facilities. The CDC goes on to indicate that up to 5% of pneumonia hospitalizations for adults are from pertussis complications and vaccination could prevent the disease and associated hospitalizations.

Estimated savings from DHH initiatives:

- Increasing the adult visit limit/removing well visits from limit will result in ER savings - \$1,485,393 in SFY11 (Jan-Jun 2011), \$2,970,785 in SFY12;
- Tdap vaccine for adults will prevent 5% of hospitalizations - \$446,719 in SFY11;
- Diabetes Self Management Training (DSMT) will result in inpatient hospital savings - \$2,593,375 in SFY 11, \$6,478,380 in SFY 12, \$6,737,580 in SFY 13;
- Smoking Cessation - long term savings of \$801,212 per year; and,
- Flouride varnish - savings of \$1,780.

**Activity ID:** 312  
**Activity Name:**  
A06 - Behavioral Health  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 306 Medical Vendor Payments  
**Program:** 1000 Payments to Private Providers  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

Funding of these initiatives will begin to close existing gaps in the continuum of behavioral health services by increasing the number and types of professionals available to serve the target populations, facilitating wider use of evidence-based practices and making community-based outpatient services available to more recipients. Reduced funding will limit the number and types of available services, limit the target population and require choosing between services for children versus services for adults. Continued funding at the current level will result in continued growth of expenditures for inpatient and other institutional-based services, out-of-home placements and overall poor health outcomes.

**Activity Type:** Existing

**Objective:**

For the Medicaid-eligible targeted population (Seriously Mentally Ill [SMI]/Emotional-Behavioral Disordered [EBD]), increase access to a full array of community-based, evidence-based and/or best practice behavioral services, improve health outcomes, and decrease reliance on institutional care.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of eligible recipients receiving behavioral health services in the community	3.2	0	0	0	4
New	Key	General Performance Indicator: Percent change in state in-patient psychiatric expenditures	0	0	0	0	51.6
New	Key	Percentage of recipients ages 6 and older receiving mental health outpatient care within 30 days	44.9	0	0	0	95

**Narrative:**

This activity includes the following sub-programs: Mental Health In-Patient and Mental Health Rehabilitation (MHR).

- Mental Health In-patient services are psychiatric hospital care.
- Mental Health Rehabilitation (MHR) provides outpatient mental health services for adults with severe and persistent mental illness (SPMI) and children with emotional behavioral disorders (EBD).

Existing Initiatives (including proposed expansions):

- Multi-Systemic Therapy (MST) – evidence-based, intensive therapy for juveniles aged 11-17 which addresses

serious anti-social behaviors in a cost-effective manner by limiting the need for incarceration/out of home placement.

- Mental Health Rehabilitation (MHR) – intensive home and community-based services for the SPMI/EBD population which seek to minimize the disabling effect of mental illness by preventing/ limiting inpatient treatment and promoting recovery through management of symptoms.
- Psychological and Behavioral Services (PBS) – Diagnosis, psychological testing and therapy for children under age 21 who have a Pervasive Developmental Disorder (PDD), such as autism, or other functional impairment which can be addressed by psychological treatment.

#### New Initiatives:

- Licensed Clinical Social Worker (LCSW) in Primary Care Setting - Integrated mental health services provided by an LCSW in a physician's group clinic.
- Early Childhood Supports and Services (ECSS) - Services for children 0-5 years which seek to identify and mitigate risk factors such as abuse, neglect, poverty, developmental delays, mental illness and parental substance abuse.
- Substance Abuse – Outpatient rehabilitation program for adolescents and adults which focuses on relapse prevention and reduced utilization of emergency room and inpatient services.
- Intensive Behavior Intervention Services – Early intensive behavior therapy, including best practices such as Applied Behavior Analysis (ABA) services for children with an Autism Spectrum Disorder.
- Coordinated System of Care for Child Welfare & Juvenile Justice Population – Waiver service TBD.

#### **Explain How This Activity Advances State Outcome Goal:**

Behavioral Health programs managed by the contracted Administrative Services Organization (ASO) will improve health outcomes by emphasizing primary and preventive care in the mental health arena, and increasing reliance on community-based services that are cost-effective and in line with national best practices. Currently, the state expends approximately 56% of mental health funding on hospital-based care and only 44% on community-based care, while the national trend is approximately 25% hospital and 75% community-based care.

- Health Care – Increases access to outpatient, community-based, best practice behavioral health services to reduce the level of unmet need in Louisiana which impacts the overall health of citizens and contributes to high medical costs.
- Education - Early identification and treatment of behavioral health issues reduces special education costs and contributes to success in the educational environment.
- Public Safety - Lack of access to behavioral health care is a major problem in the criminal, family and juvenile court system. Untreated mental illness and substance abuse are common characteristics of incarcerated individuals.
- Self-Sufficient Families - Serious mental illness and substance abuse are the two most significant factors contributing to homelessness in Louisiana, and adults and youth with mental health disorders are drastically unemployed and underemployed in Louisiana. Having access to behavioral health services will promote financial stability for families as caregivers are allowed to work outside of the home and have their ill family member's daily medical needs met in a constant and safe environment.
- Transparent, Accountable, Effective Government - The state can maximize use of limited General Fund and Block Grant dollars by providing for Medicaid reimbursement of services currently purchased by DSS and OJJ without benefit of Federal Match.

#### **Evidence:**

- Administrative Service Organization (ASO) management of services ensures consistency in care access, delivery and outcomes, creates capacity, tracks outcomes and manages and reduces costs of those services (National Council on Community Behavioral Health). Cost savings can then be used to expand and increase available services.
- For FY 10-11, estimates from the Surgeon General and the National Council for Community Behavioral Healthcare indicate approximately 18% of Louisiana's eligible Medicaid population, estimated at 213,847, need mental health services, yet only about 30,000 or 14% of the total actually received services in FY09, illustrating a large unmet need. Studies by Substance Abuse & Mental Health Services Administration indicate persons with SMI have a life expectancy 25 years less than the general public.
- A 2006 report published by the American Psychological Association maintains that limited access to services often leads to "inadequate care and treatment...Systematic reimbursement for evidence-based psychosocial and psychopharmacological treatments must be established." The requested Psychological & Behavioral Services expansion will allow reimbursement for neuropsychological evaluations and medical psychology services not currently covered.
- OJJ and DSS report that a large portion of the populations they serve (estimated 30% to 60%) are in need of psychological and other mental health services, which they currently pay for with SGF. The US Dept. of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Blueprints for Violence prevention Initiative and the US Surgeon General all consider MST a top evidence-based program which decreases out of home placement by 50-64% and recidivism/re-arrest by up to 60%.
- Wraparound Oregon, an early childhood mental health program similar to ECSS is in its 4th year. Data shows 78% family satisfaction and compliance, 70% of children doing better in school or daycare, and 69% of children now get along better with their families.
- Mental Health Rehabilitation (MHR) program has reduced the yearly cost per recipient from \$8,072 in 2005 to \$4,967 in 2009. The efficiency of the MHR program can be seen in the increased numbers of recipients that were served in FY 09 for nearly the same cost as the previous year.
- This activity supports goals 1 through 4 of the 2007 Louisiana Plan for Mental Health Access.

**Activity ID:** 321  
**Activity Name:**  
A09 - Emergency Care Services  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 306 Medical Vendor Payments  
**Program:** 1000 Payments to Private Providers  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

States must provide Medicaid for most individuals who receive federally assisted income payments and for related groups not receiving cash payments. A reduction in expenditures will be realized if optional eligibility groups are eliminated. Increasing the number of uninsured citizens will add to emergency room crowding, place a financial strain on citizens and health care providers. Decreasing fee for service and moving away from cost-based payment may reduce costs. Restricted access to alternative providers for urgent care, avoidable illnesses and exacerbation of uncontrolled chronic conditions add to the high costs and crowding in emergency departments. Significant savings are dependent on approval of initiatives such as: removal of annual visit limit for adults, removal of barriers to urgent care clinics, success of immunizations for preventable illness, and care management for those with chronic medical and behavioral health conditions.

**Activity Type:** Existing

**Objective:**

To reduce emergencies and non-emergency utilization of the emergency department through payment reform, care management, and improved access to preventative, primary and urgent care services; to shift use of costly institutional services to less costly community-based services.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	Percentage change in Number of ER Visits per 1,000 Population	0	0	0	0	0
New	Supporting	Percentage change in Number of low-level emergency room visits per 1,000	0	0	0	0	0
New	Key	Percentage of enrollees that access the Nurse Help Line	0	0	0	0.4	5

**Narrative:**

Emergency care services are specialty services in which a physician or health care provider renders treatment to patients with acute illnesses or injuries which require immediate medical attention to prevent serious impairment or loss of life. This activity includes the following sub-programs:

- Transportation-Emergency Ambulance includes transportation provided by an ambulance for an unforeseen combination of circumstances which demand immediate attention at a medical facility.
- Hospital-Outpatient includes emergency room services.
- Physician services include medical services provided by physicians (including specialists) and other health care

professionals, such as nurse practitioners, in the emergency department (ED).

Cost containment measures implemented in the past - such as the annual limit of 12 outpatient visits and the requirement of primary care provider (PCP) administrative referrals for urgent care and low level ED visits - initially resulted in savings. These limits have now become barriers to accessing primary and preventative care for those with chronic illnesses and co-morbid conditions or to accessing urgent care facilities when indicated, resulting in increasing avoidable expenditures in the ED. A substantial savings in this activity could be realized if: 1) the outpatient visit limit is increased and managed; 2) the Chronic Care Management Program (CCMP) is expanded to include individuals with conditions such as sickle cell and chronic obstructive pulmonary disease; 3) the PCP referral requirement is removed to allow access to urgent care facilities; and 4) health literacy is improved through outreach and education. DHH offers and will aggressively promote the 24-hour Nurse Helpline that utilizes national standards in assessing and triaging calls, directing clients to the most appropriate level of care, and preventing avoidable ED visits. PCPs with evening and weekend hours are able to receive an add-on reimbursement to the primary service rendered, and DHH plans to outreach and promote PCP extended hours of operation to establish alternatives to ED care. Other opportunities to affect inappropriate ED utilization include facilitating access to Substance Abuse and Pain Management services, as well as co-pays for non emergency use of the ED. Implementation of co-pays will require legislation.

#### **Explain How This Activity Advances State Outcome Goal:**

Access to and utilization of emergency services are vital to saving lives and preventing and/or minimizing permanent loss or impairment during an emergency. Overutilization and crowding in the ED taxes resources and may lead to delays in timely treatment. This and other related activities advance the state outcome goal of improving health outcomes by: reducing avoidable and inappropriate utilization of the ED by promoting alternatives for urgent care services; promoting the Nurse Helpline; enhancing care management; improving health literacy; and reducing the number and severity of emergencies as a result of adequate access to primary/preventative care and care management of chronic medical and behavioral health conditions. Access to primary care and care management services often prevents the need for more expensive health services such as hospitalizations, ED visits, surgeries and long-term care services due to disease exacerbation or late recognition of a medical condition. Use of co-pays for non-emergency use of the ED may drive down inappropriate use of the ED as well as promote personal responsibility for appropriate use of the health care system. All of these activities lead to the delivery of the right level of care at the right time by the most appropriate provider while improving overall independence and functioning of the individual, families and their communities.

#### **Evidence:**

- The presence of the Diabetic Disease Management Program (DDMP) in any health care site was associated with significantly lower overall costs of care within one year. The most important source of savings was a 22–30 percent decrease in hospitalization. Study found after 10 months of DDMP, number of ER visits dropped from 309.53 to 255.69. (Villagra and Ahmed. Effectiveness of a disease management program for patients with diabetes. Health Affairs. July/August 2004. p. 255-266.)
- A 2006 Harris Interactive survey found that nearly half of recent ED patients felt their problems could have been handled by a physician's office visit, had one been available, rather than using the ED. The study also noted that patients with chronic conditions made more ED visits, suggesting that their primary care providers may need to improve their methods of chronic disease management. CHCF commissioned Harris Interactive to conduct two sets of surveys, one of emergency room patients and one of primary care physicians and ED physicians. The patient survey found four key factors that drive increased ED use by insured patients who are not critically ill:
  - Lack of access to medical care outside the ED (such as same-day appointments with a primary care physician, or evening and weekend appointments);
  - Lack of advice on how to handle sudden medical problems;
  - Lack of alternatives to the ED (such as nurse advice lines or urgent care clinics); and,
  - Positive attitudes about the ED as a site of care.
- The problem of ED overcrowding cannot be solved without solutions in our current health care systems that will provide an accessible and comprehensive medical home. (Pediatrics 2007 120: 683-684.)

**Activity ID:** 809

**Activity Name:**

A03 Medicaid Administration - Health Standards

**Department:** 09 Department of Health and Hospitals

**Agency:** 305 Medical Vendor Administration

**Program:** 2000 Medical Vendor Administration

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

The number of surveys conducted by the Health Standards Section is directly affected by the number of T.O. that are employed with HSS. The contract with CMS for the federal oversight of health care facilities participating in Medicare and Medicaid prescribes for a TIER of survey work to be completed each federal fiscal year as deliverables in the contract, this includes complaint investigation surveys conducted on participating health care providers. Additionally, pursuant to state laws, licensing surveys of facilities are to be conducted on a periodic basis. Louisiana also has a state statute that prescribes timelines for complaint surveys of health care providers to be conducted.

**Activity Type:** Existing

**Objective:**

To verify facility and provider compliance with federal and state requirements in order for their continued participation in the Medicare and Medicaid programs and/or to have the privilege to remain licensed and operational as a healthcare provider in Louisiana.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
16533	Key	Percentage of complaint investigations conducted within 30 days after receipt by the Health Standards section of Medical Vendor Administration	94.95	97.44	0	95	95
16534	Key	Percentage of abuse complaint investigations conducted within two days after receipt by the Health Standards section of Medical Vendor Administration	97.96	95.95	0	97	97
16535	Key	Percentage of licensing surveys conducted	50.69	58.4	0	30	50

**Narrative:**

The Health Standards Section (HSS) licenses and certifies for participation in Medicare and Medicaid, those facilities and providers that offer healthcare services of various types to the citizens of the state. HSS has contracts with CMS to certify certain facility types for participation in Medicare and Medicaid and also to certify clinical labs. Pursuant to federal and state statutes and as deliverables for the CMS contracts, HSS performs surveys to determine compliance with state and federal regulations.

**Explain How This Activity Advances State Outcome Goal:**

Conducting periodic onsite surveys and complaint surveys in response to consumer complaints against health care facilities advance the state's outcome goal of improved healthcare for citizens by bringing to the attention of health care facilities those system failures that have the potential for or that have resulted in harm to patients/residents or clients. This allows the facility/provider to review and revise their policies and practices to bring them into alignment with federal and state regulations for the provision of care.

**Evidence:**

HSS conducts at least 97% of all complaint surveys triaged as immediate jeopardy within 2 days of receipt of the complaint. HSS conducts at least 95% of all other state complaints within 30 days of receipt of the complaint. HSS conducts 50% of all required periodic licensing surveys.

Complaint surveys are considered at a higher priority than periodic licensing surveys because of the potential for threat to the health and safety of patients/residents/clients.

**Activity ID:** 305

**Activity Name:**

Outpatient Services

**Department:** 09 Department of Health and Hospitals

**Agency:** 351 Office for Addictive Disorders

**Program:** 2000 Prevention and Treatment

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

We currently serve 32,600 clients in this activity at a cost of \$1318 per person served. To determine the impact of a funding decrease or increase, the proposed amount will be divided by the stated cost per person served.

**Activity Type:** Existing

**Objective:**

OAD's goal is to improve the health and safety of citizens by increasing abstinence from alcohol, drugs and compulsive gambling. Treatment for addictive disorders can reduce crime, workforce problems, child abuse, school drop-out rates, STD's & other diseases, and related traffic accidents.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of clients with arrest free status at the end of treatment	0	0	0	95	95
New	Key	Percentage of clients with employment/student status at the end of treatment	0	0	0	37	37
New	Key	Percentage of clients who are abstinent at the end of treatment	0	0	0	50	50

**Narrative:**

All outpatient services are delivered in community based non-residential settings and provide care for clients with alcohol, drug and compulsive gambling problems. These services allow individuals to remain in their communities and receive cost-effective care. Services include - but are not limited to – the following: screening/assessment, education, counseling (individual, group and family), pharmacological therapy, and relapse prevention. Outpatient services utilize practices that are evidence-based, outcome-oriented, and tailored to an individual's treatment needs and level of severity. There are two levels of outpatient care. One level involves "intensive outpatient services," which are provided at least three days a week in regularly scheduled sessions totaling a minimum of nine contact hours per week. The second level of care involves "outpatient services," which can range from one to eight hours per week. In order to determine what level or intensity of services an individual needs (i.e. outpatient or intensive outpatient services), the Office for Addictive Disorders utilizes the American Society of Addiction Medicines Patient Placement Criteria (ASAM PPC). Use of ASAM allows clinicians to appropriately and consistently match services and levels of care to the unique needs of the individual. By employing this "best practice," the agency maximizes efficiency and increases effectiveness.

### Explain How This Activity Advances State Outcome Goal:

Outpatient treatment advances the state goal of "Better Health." Increased abstinence reduces the transmission of HIV/AIDs, syphilis, and hepatitis, and it reduces the incidence of diseases such as cirrhosis, cancer, and heart disease. Increased abstinence reduces birth defects and infant mortality rates. Community based outpatient services allow individuals to receive treatment consistent with their needs while living and functioning in their communities. Outpatient treatment encourages personal health care responsibility, reduces the potential for relapse, and reduces the need for more expensive inpatient treatment. Outpatient services utilize evidence-based practices to maximize treatment outcomes and cost-effectiveness. Outpatient treatment also has an impact on the following state goals:

- 1) Public Safety. Outpatient treatment reduces drug and alcohol related crimes by encouraging personal responsibility and healthy behaviors. Outpatient treatment reduces the incidence of drug and alcohol related traffic injuries and fatalities through intervention and court-mandated treatment for persons convicted of DWI's.
- 2) Education. Through early intervention and prevention efforts, outpatient treatment decreases school drop-out rates and increases academic performance.
- 3) Safe and Thriving Children and Families. Outpatient treatment promotes competent parenting by increasing abstinence and personal responsibility. Sober parents are better able to care for their children.
- 4) Diversified Economic Growth. Outpatient treatment enhances economic growth by increasing the numbers of employable citizens who can produce quality work in a safe manner.

### Evidence:

- 1) Better Health. Each year, there are over 300,000 drug ER visits in the US (CDC, 2008). Increased abstinence slows the spread of HIV/AIDs, syphilis, and hepatitis, and it reduces the incidence of cirrhosis, cancer & heart disease. Alcohol/drugs are the leading preventable cause of birth defects (CDC, 2002). Ettner et al. (2006) found that for each dollar invested in treatment, there was a \$7 health care and criminal justice cost savings.
- 2) Public Safety. Every dollar invested in treatment can produce a \$4 - \$7 cost reduction in drug-related crime (NIDA, 2006). In Louisiana, 77.4% of adults in DOC facilities are charged with drug-related crimes (Scott, 2002). In 2008, 11,773 persons in the US were killed in alcohol related crashes (NHTA, 2008). Because of alcohol treatment/education, the DWI related vehicular fatalities in the US decreased 10% between 2007 and 2008. Similar gains can be expected for Louisiana. In 2007 in Louisiana, there were nearly 10,000 DWI arrests and 40,000 car crashes that resulted in almost 600 deaths, of which about 200 were related to alcohol.
- 3) Education. Addiction is a major predictor of educational failure (Battin-Pearson, 2000). Through early intervention and prevention efforts, school drop-out rates decline and academic performance increases. By reducing addiction, more students graduate and the size of employable workforce increases.
- 4) Safe and Thriving Children and Families: Addiction exists in 40% to 80% of families where children are victims of abuse (Child Welfare League of America, 2009). Almost 2/3 of all people in drug treatment were abused as children (NIDA, 1998). By reducing addictions, the financial burden on agencies such as OAD, OCS, Public Health, OCDD, OMH, police & court services, and FINS is reduced now and in the future.
- 5) Diversified Economic Growth: A Columbia University study (2009) estimated that \$891 million in federal payroll & fringe benefits are due to absenteeism caused by addiction. Reduced addiction in the labor force increases work quality and productivity while reducing injuries.
- 6) Reduced Societal Costs. According to the Columbia study, each dollar invested in drug treatment results in a \$12 reduction in criminal justice and health care costs. Louisiana currently spends more of each dollar on addiction consequences than treatment: 36 cents to criminal justice, 27 cents to health care, 26 cents to education, 4 cents to child & family assistance, and 5 cents to mental health.

**Activity ID:** 306  
**Activity Name:**  
 24 Hour Residential Services  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 351 Office for Addictive Disorders  
**Program:** 2000 Prevention and Treatment  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

We currently serve 17,197 clients in this activity at a cost of \$2646 per person served. To determine the impact of a funding decrease or increase, the proposed amount will be divided by the stated cost per person served. The cost per person served by MOF is as follows: SGF 1058, Federal 1058, IAT 450 and Tobacco Tax 80.

**Activity Type:** Existing

**Objective:**

OAD's goal is to improve the health and safety of citizens by increasing abstinence from alcohol, drugs and compulsive gambling. Treatment for addictive disorders can reduce crime, workforce problems, child abuse, school drop-out rates, STD's & other diseases, and related traffic accidents.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of clients who are abstinent at the end of treatment	0	0	0	65	65
New	Key	Percentage of successful completions	0	0	0	75	75

**Narrative:**

Inpatient treatment, which is part of a continuum of care, provides services to persons experiencing moderate to severe addiction and assists them in the process of recovery. This level of care is necessary for individuals who have severe addictions, high relapse potential, are at risk for a range of withdrawal symptoms, and who lack a supportive recovery environment. It is a necessary step for many individuals in achieving abstinence and recovery, when outpatient services have not met their intensive needs. Inpatient treatment includes detoxification and counseling (individual, group, and family) for alcohol abuse, drug abuse, and compulsive gambling. To ensure that all individuals receive comprehensive care, pharmacological therapies are also available as needed. All essential inpatient services are available 24 hours a day in a free-standing residential setting. Treatment services utilize clinical tools and practices that are evidence-based and outcome-oriented.

In order to determine what level or intensity of services an individual needs (i.e. outpatient, intensive outpatient or inpatient), the Office for Addictive Disorders utilizes the American Society of Addiction Medicines Patient Placement Criteria (ASAM PPC). Use of ASAM allows clinicians to appropriately and consistently match services and levels of care to the unique needs of the individual. By employing this "best practice," the agency maximizes efficiency and increases effectiveness.

**Explain How This Activity Advances State Outcome Goal:**

Inpatient treatment advances the state goal of "Better Health." By reducing substance use disorders, the transmission of diseases such as HIV/AIDs, syphilis, and hepatitis, and diseases such as cirrhosis, cancer, and heart disease are reduced. A reduction in addictions reduces birth defects and the infant mortality rate. Inpatient

treatment provides a stable environment and the support needed to overcome the barriers to recovery and abstinence. Clients learn personal health responsibility, which facilitates successful re-entry into society. The evidence-based services provided during inpatient treatment are tailored to the individual's needs and maximize treatment outcomes and cost-effectiveness. Upon successful completion of an inpatient program, individuals "step down" to outpatient services to maintain recovery. Inpatient treatment also has an impact on other state outcome goals in the following ways:

- 1)Public Safety. Inpatient treatment reduces drug related crimes and recidivism by encouraging personal responsibility and healthy pro-social behaviors. Inpatient treatment reduces the incidence of alcohol related traffic injuries and fatalities through intervention and court-mandated treatment for persons convicted of DWI's.
- 2) Education. While in inpatient treatment, adolescents continue their education in preparation for return to school (or other vocational training). This educational preparation, in conjunction with increased abstinence, has the potential to decrease the school drop-out rate.
- 3) Safe and Thriving Children and Families. Inpatient treatment promotes competent parenting by increasing abstinence and personal responsibility. Sober parents are better able to care for their children.
- 4) Diversified Economic Growth. Inpatient treatment enhances economic growth by increasing the numbers of employable citizens who can produce quality work in a safe manner.

#### **Evidence:**

- 1)Better Health. Each year, there are over 300,000 drug related ER visits in the US (CDC, 2008). Increased abstinence slows the spread of HIV/AIDs, syphilis, and hepatitis, and it reduces cirrhosis, cancer & heart disease rates. Alcohol/drugs are the leading preventable cause of birth defects (CDC, 2002). Ettner et al. (2006) found that for each dollar invested in treatment, there was a \$7 health care and criminal justice cost savings.
- 2)Public Safety. Every dollar invested in treatment can produce a \$4 - \$7 cost reduction in drug-related crime (NIDA, 2006). In Louisiana, 77.4% of adults in DOC facilities are charged with drug-related crimes (Scott, 2002). In 2008, 11,773 persons in the US were killed in alcohol related crashes (NHTA, 2008). Because of alcohol treatment/education, the DWI related vehicular fatalities in the US decreased 10% between 2007 and 2008. Similar gains can be expected for Louisiana. In 2007 in Louisiana, there were nearly 10,000 DWI arrests and 40,000 car crashes that resulted in almost 600 deaths, of which about 200 were related to alcohol.
- 3)Education: Addiction is a major predictor of educational failure (Battin-Pearson, 2000). Through early intervention and prevention efforts, school drop-out rates decline and academic performance increases. By reducing addiction, more students graduate and the size of employable workforce increases.
- 4)Safe and Thriving Children and Families: Addiction exists in 40% to 80% of families where children are victims of abuse (Child Welfare League of America, 2009). Almost 2/3 of all people in drug treatment were abused as children (NIDA, 1998). By reducing addictions, the financial burden on agencies such as OAD, OCS, Public Health, OCDD, OMH, police & court services, and FINS is reduced now and in the future.
- 5)Diversified Economic Growth: A Columbia University study (2009) estimated that \$891 million in federal payroll & fringe benefits are due to absenteeism caused by SUDs. Reduced addictions in the labor force increases work quality and productivity while reducing injuries.
- 6)Reduced Societal Costs: According to the Columbia study, each dollar invested in drug treatment results in a \$12 reduction in criminal justice and health care costs. Louisiana currently spends more of each dollar on addiction consequences than treatment: 36 cents goes to criminal justice, 27 cents to health care, 26 cents to education, 4 cents to child & family assistance, and 5 cents to mental health.

**Activity ID:** 362

**Activity Name:**

A05 Medicaid Administration - Monitoring

**Department:** 09 Department of Health and Hospitals

**Agency:** 305 Medical Vendor Administration

**Program:** 2000 Medical Vendor Administration

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Request is made at current level of funding with increases for workload adjustments (\$68,725), compulsory adjustments (\$385,500), new contracts or the expansion of existing contracts to perform mandated functions (\$1,591,516), and funding for the National Association of Medicaid Program Integrity (NAMPI) Conference to be held in New Orleans in September 2010 (\$30,000). In addition, five (5) classified positions are being requested for Health Standards due to Act 357 of the 2009 Regular Legislative Session which provides for the establishment of a state registration of Certified Nurse Aides (CNAs) that work in nursing homes or skilled nursing facilities (\$347,216). If requested increases are not funded, with the exception of funding for the NAMPI Conference, CMS mandated services will not be performed thereby putting the state's Medicaid program at risk of CMS findings, which could require the State to repay federal money. Also, additional funding would result in additional savings.

**Activity Type:** Existing

**Objective:**

Monitoring is responsible for ensuring that Medicaid expenditures are in compliance with federal/state regulations and that funding is used for appropriate medical services. By doing so, Monitoring will reduce the incidence of inappropriate Medicaid expenditures.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10618	Supporting	Number of waiver participants whose services are monitored	891	0	0	891	843
13375	Supporting	Number of School Boards quarterly claims targeted for monitoring	67	0	0	67	67
13376	Supporting	Percent of targeted school boards monitored	105.9	0	0	105.9	95

**Narrative:**

This activity is responsible for ensuring that Medicaid expenditures are in compliance with federal and state regulations. It includes:

\*Rate and Audit Review - Rate and Audit Review administers Medicaid reimbursements to institutional providers (nursing homes) and manages accountability of provider expenditures in compliance with federal and state regulations.

\*Program Integrity - Program Integrity assures that expenditures for Medicaid services are appropriate and identifies

fraud or abuse in the system and administers the Provider Enrollment function, and coordinates operations of the SURS unit at UNISYS. With more personnel and funds, it is more than probable that the State could recover funds and also eliminate more Providers that commit out and out fraud and/or billing abuses. Program Integrity also works on a regular basis the State A/G's Medicaid Fraud Unit (MFCU), which enhances exponentially Medicaid's ability and authority to pursue, collect and weed out "bad" providers.

\*Waiver Compliance - Waiver Compliance monitors two Program Offices, Office of Aging and Adult Services (OAAS) and the Office for Citizens with Developmental Disabilities (OCDD) to assure CMS that the waivers are operated in accordance with Federal guidelines. This section also performs rate and audit functions for Intermediate Care Facilities (ICFs), and administers transportation, support coordination, Family Planning Waiver, Physicians Supplemental Payments, and the American Indian "638" Clinic policy.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity advances the State Outcome Goal by decreasing the percentage of avoidable state government expenditures in the Medicaid program thereby ensuring that limited resources are used for health care initiatives that have proven to be the most responsive to the needs of patients. This activity also ensures that funding allocated to extremely large eligibility groups (nursing homes, waivers and ICFS) is properly spent. The Program Integrity function looks at the spending after it has occurred and either recovers the money, or removes inappropriate providers from the Medicaid program.

#### **Evidence:**

Evidence of the importance of this activity is the recent "Operation Somerall" which was conducted by Program Integrity, in cooperation with the A/G's staff, other Medicaid Sections and the Program Offices. In a nutshell, fourteen Provider Agencies that provide In-Home Direct Care were selected and reviewed as part of Operation Somerall. In an attempt to obtain an overall statewide perspective of the issues in these programs (PCS, PCS which included EDA and NOW), we selected providers in the Baton Rouge area, New Orleans area, Lafayette area, Alexandria area, Lake Charles area, Shreveport area, and Monroe area. Teams were sent in to review and request billing records from the audited providers. At the conclusion of this operation, the potential recovery from estimated overpayments is approximately \$600,000.00 dollars. Again, if more money is devoted not only to Program Integrity, but to all monitoring activities, it will save and or generate substantial monies for the state. On the other hand, if funding is reduced for this activity, not only will potential savings be missed, more losses will be sustained due to improper activities by miscreants who pose as caring and capable providers.

**Activity ID:** 320  
**Activity Name:**  
A08 - Support Services  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 306 Medical Vendor Payments  
**Program:** 1000 Payments to Private Providers  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

Federal regulations require that in-/outpatient hospital, rural health clinic, laboratory, radiology, and pharmacy services, among others, be provided for children under the age of 21, pregnant women and individuals in long term care facilities. Services provided to Medicaid-eligible adults who are non-institutional are optional. In Louisiana, transportation services must be covered as a result of a consent decree from the Pitt v. Steward lawsuit.

Scalability can be assessed in terms of eligibility categories. For example, of the 800,787 Medicaid recipients receiving pharmacy services in SFY09, 73% belonged to the mandatory category of eligibles, and 27% were of the optional category; 55% of the pharmacy payments were for mandatory services while 45% were optional.

Expenditures in this activity may be scaled by changes in the optional eligibility categories, but may result in more expenses to the state through higher uncompensated care costs due to a larger uninsured population.

**Activity Type:** Existing

**Objective:**

The objective of Support Services activity is to provide clinical and non-clinical services including pharmaceutical products, laboratory and radiology services and non-emergency transportation services.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
15421	Key	Amount of cost avoidance in Pharmacy (in Millions)	37.3	98.3	0	38.6	38.6
New	Key	Percentage(%) of Total Drug Rebates Collected	93	0	0	90	90
New	Key	Percentage of Total Scripts PDL compliance	93	0	0	0	0

**Narrative:**

This activity includes the following sub-programs: Lab & X-Ray, Pharmacy, Transportation - Non-Emergency Ambulance, and Transportation - Non-Emergency Non-Ambulance.

- Lab & X-Ray services consists of screening and diagnostic services performed by an independent laboratory or physician's office.
- Pharmaceutical Products and Services consists of prescription services for prescriptions issued by a licensed prescribing practitioner.
- Transportation (Non-Emergency – Ambulance) consists of transportation provided by an ambulance in which no other means of transportation is available and/or the recipient is unable to ride in any other type of vehicle. All

services are subject to review for medical necessity of ambulance transportation.

- Transportation (Non-Emergency – Non-Ambulance) provides transportation to and from routine medical appointments.

The Louisiana Medicaid Pharmacy Benefits Management (LMPBM) is responsible for the administration and payment of prescription services to the Medicaid eligibles. The LMPBM has implemented several cost containment initiatives over the years to improve the delivery of services, contain costs, and improve the healthcare of the patient. These include a point of sale system that processes claims using clinical edits which alerts the pharmacists of duplication of drug therapy, early refills, dosage alerts, pregnancy precautions, and duration of therapy alerts. Other functions include a system for invoicing, tracking and accounting for rebates, both federal and supplemental, a Preferred Drug List, retrospective drug utilization review, lock-in program for eligibles who have mis-utilized pharmacy services, prior authorization, coordination of benefits with third party payers, and pharmacy provider compliance audits. These initiatives have generated savings of over \$400 million per year.

The Radiology Utilization Management (RUM) program will allow Medicaid to improve patient health and safety through reduced exposure to unnecessary radiology studies and to ensure appropriate use of radiology services by Medicaid providers. Anticipated savings is approximately \$2,185,000 for SFY2009-10 and \$11,842,125 for SFY 2010-11.

**Explain How This Activity Advances State Outcome Goal:**

- Prescription drugs are used to treat patients with varying illnesses and diseases as prescribed by prescribing practitioners. Medications are important and have a growing role in basic health care and improving health statuses. They often prevent the need for expensive health services such as hospitalizations, emergency room visits, additional physician visits, surgeries and long-term care services. Thus, drugs lower the costs on non-drug medical spending. Additionally, they are often the least costly service to treat a particular condition.
- The RUM program will facilitate access to quality radiology services by ensuring recipients receive the clinically appropriate advanced imaging studies based on best evidence medical practices.
- Transportation helps achieve the goal of access to affordable and appropriate healthcare by providing recipients transportation to necessary medical appointments. In Louisiana, transportation is mandated to be covered as a result of a consent decree from the Pitt v. Steward lawsuit.

**Evidence:**

- Evidence to support the value of medications in treating and preventing illnesses is well established. Prescription medicines play an important and growing role in basic health care. Medications also are helpful in disease prevention and preventing progression of a disease. Disease prevention means an increased emphasis on prevention and becoming more proactive in treating diseases such as diabetes, hypertension and high cholesterol that require greater utilization of medications to treat and prevent escalation of these conditions. If pharmaceutical services are not accessible to Medicaid patients, soaring costs could be expected in more costly settings and mortality and morbidity will increase.
- The RUM program in Texas' Medicaid Program has produced \$95 million in savings since its inception in 2007. Based on preliminary analysis of the RUM program in Louisiana, the state could expect to save approximately \$70 million over the next three years.

------------------------------	-----	-------------------------------

**Activity ID:** 407

**Activity Name:**

Vital Records and Statistics

**Department:** 09 Department of Health and Hospitals

**Agency:** 326 Office of Public Health

**Program:** 1000 Vital Records and Statistics

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

The result of reducing staff or funding for this activity would adversely affect customer response times, limit productivity and negatively impact customer service and satisfaction. If funding were increased, productivity and customer service could be improved and enhanced.

**Activity Type:** Existing

**Objective:**

To administer a statewide central system of Vital Records and Statistics by registering and certifying the facts of births, deaths and marriages for Louisiana citizens. Respond to the data needs of health programs and providers, businesses, researchers, educational institutions and the public.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
2528	Key	Number of Records Processed	183645	170872	162335	140000	180000
2549	Supporting	Percentage of Emergency Document Service Requests Filled within 24-hours	98	97	92	85	98

2548	Supporting	Percentage of Mail Requests Filled within Two Weeks	79	73	38	85	85

**Narrative:**

The Center for Records and Statistics includes the Vital Records Registry and the State Center for Health Statistics. The program is organizationally situated in the Office of Public Health, Department of Health and Hospitals and has exclusive jurisdiction over the gathering, keeping, issuing and reporting of vital records and statistics for all parishes of the state (R.S. 40:5).

The Vital Records Registry is Louisiana's state government office established to manage its citizen's birth, death, fetal death, marriage, divorce, and induced termination of pregnancy records (R.S. 40:32 et seq.). The Vital Records Registry is mandated by statute to operate the Orleans Parish Marriage Office (R.S. 9:221). This is the process of issuing marriage licenses authorizing couples to be legally married in the State of Louisiana. Officiants, other than

judges or justices of the peace, must register with the State Registrar if they principally perform marriages in Orleans Parish (R.S. 9:204). In addition, the Vital Records Registry maintains the state's Putative Father Registry (R.S. 9:400), which records names of any person making a declaration to claim paternity of a child. This declaration does not have any effect on the birth certificate of the child. However, no adoption of the child can be decreed by a court without obtaining the consent of the putative father.

The day-to-day operation of the Vital Records Registry involves highly complex processes. The Louisiana Vital Records Registry operates as a centralized system that supports 62 parish Local Registrars and ten full customer service centers by providing these locations with the ability to issue certified copies of vital event documents.

The Center for Records and Statistics also operates the State Center for Health Statistics (R.S. 40:36 D). Health Statistics is responsible for demographically and medically coding vital records, standardizing the data, and analyzing it in concert with health information from other sources. Health Statistics makes this data available for use in research and planning, and publishes it for use by health care providers, health researchers and the general public. The Center for Health Statistics also functions as the State Health Care Data Clearinghouse (R.S. 40:1300.111). In this capacity, the Center for Health Statistics gathers, compiles and publishes information for the Louisiana Hospital Inpatient Discharge Data (LAHIDD) program.

#### **Explain How This Activity Advances State Outcome Goal:**

Vital Records provides services to native-born Louisianans and to residents of Louisiana. Individuals who are born, married, divorced, or die in Louisiana, their immediate families, certain state and federal agencies, and other recipients of vital-event information as approved by the State Legislature.

Vital Records also provides state health-status indicators and analyses for use in health-program planning and evaluation; for monitoring health problems that may occur in Louisiana; to evaluate Louisiana's progress toward Healthy People 2010 health goals; and to support health-research projects in conjunction with educational, private, public, and community-based agencies.

In addition, the Louisiana Inpatient Discharge Data (LAHIDD) provides accurate, informative, accessible data to all users investigating hospital admissions, discharge patterns and healthcare utilization in Louisiana. By monitoring hospital compliance and expanding statistical/analytic capabilities, it strives to improve data quality and strengthen collaborations in the national public health effort.

The Vital Records Co-op manually codes cause-of-death data information from Louisiana death certificates for submission to the National Center for Health Statistics (NCHS). This data is then analyzed and released with comparable data from the other states and the territories of the United States.

Vital Records receives most of its funds from the issuance of certified copies of vital records and by completing amendments and corrections to records. The program self-generates approximately \$4.7 million annually. Other funds come from the State General Fund, federal-grant contracts (e.g., Centers for Disease Control and Prevention, Office of Personnel Management, Social Security Administration, etc), and interagency transfers. Approximately 540,000 certified copies of vital records are issued annually.

#### **Evidence:**

Vital Records and Statistics has entered into two initiatives to improve efficiency and cost effectiveness by maximizing technology.

The Louisiana Electronic Event Registration System (LEERS) is a web-based integrated application to expedite collection and dissemination of vital records, which includes birth, death, fetal death, marriage, divorce and induced termination of pregnancy data. LEERS will replace the manual processes currently in place for Vital Records. Included are a business system and an imaging module to scan and save approximately 10 million archived birth, death and Orleans Parish marriage records onsite and associate the images with the corresponding data record. The application will be made available statewide to designated users and will be utilized by data providers such as OPH, hospitals, issuance offices, funeral homes, parish Clerks of Court, physicians, coroners and additional remote sites.

The Office of Public Health entered into a contract in January 2008 for the design and development of LEERS. The expected completion date for development of all system components is December 31, 2010.

**Project Goals:**

- Electronic registration of vital events
- Expand number of locations information is available
- Improve ability of remote sites to process and issue certified copies
- Integrate the various software systems used by Vital Records
- Increase revenue by streamlining and integrating systems
- Reduce request processing time
- Improve business processes, accounting and auditing systems
- Reduce time to get data to NCHS, SSA and other partners
- Reduce paperwork and keypunching
- Capture information closer to data source
- Improve reporting capabilities
- Image archived records

Vital Records and Statistics data is being used in conjunction with various other data sources to provide a public, web-based data query site for the Parish Health Profiles. This website will serve as a comprehensive source of health outcome and health indicator data for public use.

<b>Statutory Dedication:</b>	H19	Medicaid Trust Fund for the Elderly
------------------------------	-----	-------------------------------------

**Activity ID:** 314

**Activity Name:**

A12 - Institutional Based Long Term Care for the Elderly and Disabled

**Department:** 09 Department of Health and Hospitals

**Agency:** 306 Medical Vendor Payments

**Program:** 1000 Payments to Private Providers

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Nursing homes (NH) are a mandatory Medicaid program per federal law. Reimbursement is a state issue. NH rate methodology is in statute, which also mandates inflation adjustments & periodic rebasing of rates. The adjustments requested in this offer are to meet statutory requirements.

These requirements have led to increased spending though utilization is trending downward. This offer proposes payment reforms that could be accomplished without changing law. Further reforms or expansion of these pilots would require law changes.

These reforms are budget neutral. Additional funds, if available, could be used to accelerate reforms such as reducing bed capacity. Over time, such investments could reduce spending growth. Reductions in funding typically result in rate cuts. Another approach would be eliminating optional eligibility groups, limiting NH care in Medicaid to those at SSI levels of income. This would cause current residents to lose coverage.

**Activity Type:** Existing

**Objective:**

To the extent possible within statutory limits, use spending to reduce unused bed capacity and improve quality to achieve national averages by 2015.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of national nursing home quality measures on which Louisiana nursing homes rate at or above the national average per most recent Dept. of Health & Human Services Report	0	0	0	0	30
New	Key	Percentage change in nursing facility utilization	-1.1	0	0	0	1.1
New	Key	Percentage change in nursing facility spending under Medicaid	4	0	0	0	3.75
New	Key	Nursing Home Occupancy rate	71.9	0	0	0	72

**Narrative:**

Nursing homes (NH) provide long term & rehab care to persons needing 24-hour nursing. Louisiana has 304 licensed facilities, 86% of which participate in Medicaid. Over 5 years, NH spending has risen 18%, while the number of recipients dropped 9%. Louisiana has the most NH beds & the highest number of residents per 1,000 population in the U.S. We also have one of the lowest occupancy rates at 72% & are below national average on 15 of 19 quality measures used by the Agency for Healthcare Research and Quality. Low occupancy results in the state in effect spending over \$20 million a year on empty beds. This activity addresses these issues through a variety of strategies:

- Building on existing efforts to reduce excess capacity: DHH has worked with the NH industry to adopt a moratorium on new beds & bed-buy back, private bed conversion, & assisted living conversion programs incentivize owners to close beds. Bed buy-back encourages purchase & closure of underperforming facilities. This proposes developing additional incentives to close unused beds.
- Piloting care coordination: Frequent movement of patients between nursing homes & hospitals impacts health & costs. Using care teams, many such episodes may be preventable or treatable within the NH. The staff for such teams exists; the pilot would provide incentives tied to patient outcomes to use them more effectively. Reducing hospitalizations avoids trauma to the resident & can save money where Medicaid pays all or part of the hospital stay, medical transportation, & “bed-hold” payments to the NH.
- Pilot pay for performance to improve quality of care: This can be done outside the rate methodology using available revenue sources, with payments tied to specific, nationally bench-marked quality measures.
- Specialization Contracting: Patients with certain conditions (bariatric, ventilator-dependent, etc.) are difficult to place. The cost of caring for such patients makes it impractical for a “typical” home to treat isolated cases. Modifying existing “add-on” rates to establish rates for specialties & contracting with facilities regionally will make these services more available, reduce unused capacity, and improve health.

This activity also includes adjustments to increase the case mix rate due to: 1) statutory mandated inflation; 2) Increases in Bed Buy Back, Private Room and Sprinkler Reimbursement, and 3) Annualization of FY10 rebasing.

#### **Explain How This Activity Advances State Outcome Goal:**

Nursing facilities provide a vital service as part of the long term care continuum. However, as noted in the Request for Results, Louisiana is over-supplied and over-reliant when it comes to institutional care. As the population ages, it is critical to expand choices within the continuum, ensure persons receive care in the most appropriate & cost-effective setting, & improve quality & efficiency.

This proposal seeks to achieve the goals of Better Health and more affordable and appropriate care using the following purchasing strategies:

- Payment reform – provide incentives to eliminate excess capacity or convert it to alternate use; provide pay for performance incentives; enhance rates to improve access to specialized long term care.
- Coordinated case management – pilot care management as a tool to avoid preventable hospitalizations.
- Continuums of care that provide choice – Contract to improve access to specialized long term care.

DHH and the NH industry have already taken steps to reduce excess bed capacity. Further payment reforms could include enhancing the existing incentives or simply buying back beds directly, but this would require additional funds. Other reforms can be budget neutral, such as providing offsetting rate adjustments based on occupancy rates. These reforms do not require changes in law. Still other reforms, such as pay for performance, can also be piloted outside the rate methodology, but would require changes in law to implement on a large scale.

Coordinated case management can be piloted building on existing resources by organizing staff into care teams that meet frequently & have specific outcomes to achieve. Incentive payments and additional resources can be provided using an existing fund set aside for NH quality improvements.

These activities move us toward a system that allocates resources & provides care more rationally so persons needing long term care get it in the right place at the right time.

**Evidence:**

It is estimated there are 8,565 unoccupied nursing home beds in Louisiana. The National Academy for State Health Policy noted that addressing the transition from facility-based services to community-based services requires acknowledging the financial commitment undertaken by facility owners who in good faith expended resources to provide the services the State wanted at the time. CMS and other authorities cite the need to eliminate or convert excess bed capacity as vital to development of more sustainable long term care systems. Connecticut, Nebraska, Vermont, Indiana, and other states have enacted a variety of mechanisms to reduce unused capacity.

Care coordination has been shown to produce cost-savings and better health outcomes in a variety of settings. Coordination of care in nursing homes has been successfully piloted in Care Level Management Demonstration Projects conducted in California, Texas, and Florida. Such proposals capitate payment, make the nursing home a "medical home" & sometimes use a pay for performance approach. Research done in 2006 estimated the concept could be piloted for an annual cost of about \$200,000 per facility.

The effectiveness of pay for performance has also been demonstrated in various settings. The Institute of Medicine has recommended such initiatives to align payment incentives with quality improvement. A 2009 report by My Innerview© showed that NH in states with such programs score above average in consumer & worker satisfaction. The same report notes that such programs offer an opportunity for state Medicaid programs to establish cost-effective mechanisms for quality assurance going beyond regulatory sanctions. Financial incentives for providers can be aligned to improve outcomes across a broad set of performance parameters beyond regulatory compliance or clinical performance.

These initiatives can be undertaken in a way that is budget neutral or uses dedicated funding sources. Specialized rates and payments already exist, but targeting such services using performance-based contracts is a new concept. Care coordination & pay for performance pilots can be funded using a fund that by federal law uses monies from fines against nursing homes for quality initiatives. If these initiatives and pilots are successful, the necessary changes can be made to payment methodologies to apply the concepts on a larger scale to improved outcome and control cost growth.

**Activity ID:** 362

**Activity Name:**

A05 Medicaid Administration - Monitoring

**Department:** 09 Department of Health and Hospitals

**Agency:** 305 Medical Vendor Administration

**Program:** 2000 Medical Vendor Administration

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Request is made at current level of funding with increases for workload adjustments (\$68,725), compulsory adjustments (\$385,500), new contracts or the expansion of existing contracts to perform mandated functions (\$1,591,516), and funding for the National Association of Medicaid Program Integrity (NAMPI) Conference to be held in New Orleans in September 2010 (\$30,000). In addition, five (5) classified positions are being requested for Health Standards due to Act 357 of the 2009 Regular Legislative Session which provides for the establishment of a state registration of Certified Nurse Aides (CNAs) that work in nursing homes or skilled nursing facilities (\$347,216). If requested increases are not funded, with the exception of funding for the NAMPI Conference, CMS mandated services will not be performed thereby putting the state's Medicaid program at risk of CMS findings, which could require the State to repay federal money. Also, additional funding would result in additional savings.

**Activity Type:** Existing

**Objective:**

Monitoring is responsible for ensuring that Medicaid expenditures are in compliance with federal/state regulations and that funding is used for appropriate medical services. By doing so, Monitoring will reduce the incidence of inappropriate Medicaid expenditures.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10618	Supporting	Number of waiver participants whose services are monitored	891	0	0	891	843
13375	Supporting	Number of School Boards quarterly claims targeted for monitoring	67	0	0	67	67
13376	Supporting	Percent of targeted school boards monitored	105.9	0	0	105.9	95

**Narrative:**

This activity is responsible for ensuring that Medicaid expenditures are in compliance with federal and state regulations. It includes:

\*Rate and Audit Review - Rate and Audit Review administers Medicaid reimbursements to institutional providers (nursing homes) and manages accountability of provider expenditures in compliance with federal and state regulations.

\*Program Integrity - Program Integrity assures that expenditures for Medicaid services are appropriate and identifies

fraud or abuse in the system and administers the Provider Enrollment function, and coordinates operations of the SURS unit at UNISYS. With more personnel and funds, it is more than probable that the State could recover funds and also eliminate more Providers that commit out and out fraud and/or billing abuses. Program Integrity also works on a regular basis the State A/G's Medicaid Fraud Unit (MFCU), which enhances exponentially Medicaid's ability and authority to pursue, collect and weed out "bad" providers.

\*Waiver Compliance - Waiver Compliance monitors two Program Offices, Office of Aging and Adult Services (OAAS) and the Office for Citizens with Developmental Disabilities (OCDD) to assure CMS that the waivers are operated in accordance with Federal guidelines. This section also performs rate and audit functions for Intermediate Care Facilities (ICFs), and administers transportation, support coordination, Family Planning Waiver, Physicians Supplemental Payments, and the American Indian "638" Clinic policy.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity advances the State Outcome Goal by decreasing the percentage of avoidable state government expenditures in the Medicaid program thereby ensuring that limited resources are used for health care initiatives that have proven to be the most responsive to the needs of patients. This activity also ensures that funding allocated to extremely large eligibility groups (nursing homes, waivers and ICFS) is properly spent. The Program Integrity function looks at the spending after it has occurred and either recovers the money, or removes inappropriate providers from the Medicaid program.

#### **Evidence:**

Evidence of the importance of this activity is the recent "Operation Somerall" which was conducted by Program Integrity, in cooperation with the A/G's staff, other Medicaid Sections and the Program Offices. In a nutshell, fourteen Provider Agencies that provide In-Home Direct Care were selected and reviewed as part of Operation Somerall. In an attempt to obtain an overall statewide perspective of the issues in these programs (PCS, PCS which included EDA and NOW), we selected providers in the Baton Rouge area, New Orleans area, Lafayette area, Alexandria area, Lake Charles area, Shreveport area, and Monroe area. Teams were sent in to review and request billing records from the audited providers. At the conclusion of this operation, the potential recovery from estimated overpayments is approximately \$600,000.00 dollars. Again, if more money is devoted not only to Program Integrity, but to all monitoring activities, it will save and or generate substantial monies for the state. On the other hand, if funding is reduced for this activity, not only will potential savings be missed, more losses will be sustained due to improper activities by miscreants who pose as caring and capable providers.

**Activity ID:** 320  
**Activity Name:**  
A08 - Support Services  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 306 Medical Vendor Payments  
**Program:** 1000 Payments to Private Providers  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

Federal regulations require that in-/outpatient hospital, rural health clinic, laboratory, radiology, and pharmacy services, among others, be provided for children under the age of 21, pregnant women and individuals in long term care facilities. Services provided to Medicaid-eligible adults who are non-institutional are optional. In Louisiana, transportation services must be covered as a result of a consent decree from the Pitt v. Steward lawsuit.

Scalability can be assessed in terms of eligibility categories. For example, of the 800,787 Medicaid recipients receiving pharmacy services in SFY09, 73% belonged to the mandatory category of eligibles, and 27% were of the optional category; 55% of the pharmacy payments were for mandatory services while 45% were optional.

Expenditures in this activity may be scaled by changes in the optional eligibility categories, but may result in more expenses to the state through higher uncompensated care costs due to a larger uninsured population.

**Activity Type:** Existing

**Objective:**

The objective of Support Services activity is to provide clinical and non-clinical services including pharmaceutical products, laboratory and radiology services and non-emergency transportation services.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
15421	Key	Amount of cost avoidance in Pharmacy (in Millions)	37.3	98.3	0	38.6	38.6
New	Key	Percentage(%) of Total Drug Rebates Collected	93	0	0	90	90
New	Key	Percentage of Total Scripts PDL compliance	93	0	0	0	0

**Narrative:**

This activity includes the following sub-programs: Lab & X-Ray, Pharmacy, Transportation - Non-Emergency Ambulance, and Transportation - Non-Emergency Non-Ambulance.

- Lab & X-Ray services consists of screening and diagnostic services performed by an independent laboratory or physician's office.
- Pharmaceutical Products and Services consists of prescription services for prescriptions issued by a licensed prescribing practitioner.
- Transportation (Non-Emergency – Ambulance) consists of transportation provided by an ambulance in which no other means of transportation is available and/or the recipient is unable to ride in any other type of vehicle. All

services are subject to review for medical necessity of ambulance transportation.

- Transportation (Non-Emergency – Non-Ambulance) provides transportation to and from routine medical appointments.

The Louisiana Medicaid Pharmacy Benefits Management (LMPBM) is responsible for the administration and payment of prescription services to the Medicaid eligibles. The LMPBM has implemented several cost containment initiatives over the years to improve the delivery of services, contain costs, and improve the healthcare of the patient. These include a point of sale system that processes claims using clinical edits which alerts the pharmacists of duplication of drug therapy, early refills, dosage alerts, pregnancy precautions, and duration of therapy alerts. Other functions include a system for invoicing, tracking and accounting for rebates, both federal and supplemental, a Preferred Drug List, retrospective drug utilization review, lock-in program for eligibles who have mis-utilized pharmacy services, prior authorization, coordination of benefits with third party payers, and pharmacy provider compliance audits. These initiatives have generated savings of over \$400 million per year.

The Radiology Utilization Management (RUM) program will allow Medicaid to improve patient health and safety through reduced exposure to unnecessary radiology studies and to ensure appropriate use of radiology services by Medicaid providers. Anticipated savings is approximately \$2,185,000 for SFY2009-10 and \$11,842,125 for SFY 2010-11.

**Explain How This Activity Advances State Outcome Goal:**

- Prescription drugs are used to treat patients with varying illnesses and diseases as prescribed by prescribing practitioners. Medications are important and have a growing role in basic health care and improving health statuses. They often prevent the need for expensive health services such as hospitalizations, emergency room visits, additional physician visits, surgeries and long-term care services. Thus, drugs lower the costs on non-drug medical spending. Additionally, they are often the least costly service to treat a particular condition.
- The RUM program will facilitate access to quality radiology services by ensuring recipients receive the clinically appropriate advanced imaging studies based on best evidence medical practices.
- Transportation helps achieve the goal of access to affordable and appropriate healthcare by providing recipients transportation to necessary medical appointments. In Louisiana, transportation is mandated to be covered as a result of a consent decree from the Pitt v. Steward lawsuit.

**Evidence:**

- Evidence to support the value of medications in treating and preventing illnesses is well established. Prescription medicines play an important and growing role in basic health care. Medications also are helpful in disease prevention and preventing progression of a disease. Disease prevention means an increased emphasis on prevention and becoming more proactive in treating diseases such as diabetes, hypertension and high cholesterol that require greater utilization of medications to treat and prevent escalation of these conditions. If pharmaceutical services are not accessible to Medicaid patients, soaring costs could be expected in more costly settings and mortality and morbidity will increase.
- The RUM program in Texas' Medicaid Program has produced \$95 million in savings since its inception in 2007. Based on preliminary analysis of the RUM program in Louisiana, the state could expect to save approximately \$70 million over the next three years.

**Activity Name:**

Elderly & Adults with Disabilities Long Term Care (LTC)

**Department:** 09 Department of Health and Hospitals

**Agency:** 320 Office of Aging and Adult Services

**Program:** 1000 Administration Protection and Support

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Activity operates programs & services delivered thru more than \$1-billion in Medicaid provider payments described in companion APRs "Elderly & Adults with Disabilities Community-based LTC" & "Elderly & Adults with Disabilities Institutionally-based LTC." Offer for this Activity constitutes less than 1% of the total cost of services delivered & cannot be reduced without negative impact to operation of programs serving 44,000 participants & to DHH's ability to meet state & federal requirements for program access, oversight, & quality assurance/improvement. Increasing resources for this activity would improve service access times & speed implementation of program improvements & cost-controls. Companion APRs for expansion of 2 best-practice initiatives operated through this activity: (1) Governor's Office of Elderly Affairs to create a 2nd regional Single Point of Entry to Medicaid & non-Medicaid LTC (2) DHH/Medicaid offer PACE in Monroe (Program of All-inclusive Care for the Elderly)

**Activity Type:** Existing

**Objective:**

"Optimize the use of community-based care while also decreasing reliance on more expensive institutional care" (Better Health Goal, Indicator 1) to achieve national averages for institutional versus community-based spending by 2015.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard

program

#### **Narrative:**

Offer provides state & regional operation of major Medicaid Long Term Care (LTC) programs for the elderly & people with adult-onset disability, & does so at less than 1% of the direct service cost of those programs. Activity operates community-based LTC programs that expend over \$300 million in Medicaid provider payments; & Medicaid certification for nursing home care totaling over \$700 million. Via this Offer, OAAS will continue to manage, operate, & set policy for

Elderly & Disabled Adult (EDA) waiver

Adult Day Health Care (ADHC) waiver

Adult Residential Care (ARC) waiver

Long Term Personal Care Services (LTPCS)

Program of All-inclusive Care for the Elderly (PACE)

Nursing Facility (NF) certification/admission

By statute, OAAS is responsible for programs & functions of DHH related to LTC of the elderly & adults with disabilities, & shall administer the Department's long-term support & services programs. Operation of these programs is through 3 divisions - Policy, Program Operations, Research & Quality – & includes area & regional operations that support access, quality, & oversight functions for over 44,000 individuals served in the above programs. Offer also includes development & implementation of the following strategies to improve quality & efficiency:

SFY 10 implementation of resource allocation method that sets individual budget limits based on objective assessment of relative need.

Implementation in SFY 11 of a broader array of more cost-effective waiver services as alternative to current reliance on more costly 1:1 home care. Services to be added through a new or modified waiver include preventive therapies, assistive technology, contract meals & chore service, & respite for family caregivers. These will be provided under same or lower budget limits than the EDA waiver, & participants may choose “participant direction” of their services. This allows consumers to contract directly for goods & services, reducing costs by eliminating agency overhead.

Implementation in FY11 of single unified waiting list for all waivers so individuals can better access the most appropriate program to meet their needs.

The above can be accomplished at current funding. Additional funding is requested for:

-Contracts to improve quality & reduce excess bed capacity in NFs as proposed in Medicaid Offer for “Elderly & Adults with Disabilities Institutionally-based LTC.”

-New position for Alzheimer's initiatives as recommended by Task Force

#### **Explain How This Activity Advances State Outcome Goal:**

Offer achieves Indicator 1 of the Better Health Goal: Optimize use of community-based care while decreasing reliance on more expensive institutional care. The challenge is that population aging & growing demand for services drives up expenditures. The objective then is to serve more people at lower average cost while “fostering & facilitating independence for citizens with disabilities & the elderly.”

The “management company” making this Offer is doing that. OAAS was created in 2006, completed its divisional organization in 2009, & has never been staffed at recommended levels. Yet, using approaches described in the RFR, executive management & divisions in this Offer have brought the cost of community-based services to below the Medicaid average cost per person to serve the same individuals in a nursing home; reduced per person cost & rate of expenditure growth in Medicaid community based programs; & moved La much closer to national averages on expenditures for community LTC vs. institutions. OAAS is also using the following purchasing strategies recommended in the RFR:

FY10 phase-in of ARC waiver to provide assisted living as residential alternative to nursing homes. Daily rates are set lower than for nursing homes, assuring cost-effectiveness. ARC is consistent with De-institutionalization/Prevention.

Expand enrollment in 2 existing PACE programs, providing all acute & LTC for a capitated rate combining Medicaid & Medicare funding. PACE provides Prevention & a Continuum of Care. Its quality & capitation features are a Payment Reform strategy.

Complete implementation in FY 11 of data-driven QM system using performance based vendor contracts, independently conducted participant experience surveys, & benchmarked health outcome measures from 3 nationally recognized measure sets.

Pilot regional Single Point of Entry to streamline access to both Medicaid & non-Medicaid resources, with goal of preventing or delaying Medicaid eligibility & spend down.

#### **Evidence:**

Activity in this offer is a direct result of Plan for Immediate Action cited in the Better Health RFR as the major supporting evidence for improving LTC. Components of this Offer – consolidated Single Point of Entry, data-driven QM, wide array of community options, consumer-direction, use of comprehensive assessment for planning & resource allocation – are features of successfully balanced LTC systems (Mollica & Reinhard, Rebalancing State Long-Term Care Systems, 2005; Eiken et al, Profile for Assessing a State Long-Term Care System, 2006)

In FY 09, Medicaid spent \$316,961,086 to serve 14,914 individuals in the community (average cost \$21,253), compared to \$716,921,156 to serve 30,137 in nursing homes (average cost \$23,789). Community-based programs operated by this Activity do prevent institutionalization. Only 2% of EDA waiver participants transition to a nursing home. Of those receiving LTPCS without the EDA waiver, only 4% transition to nursing homes. In addition to expanding these programs to provide care at less cost than nursing homes, OAAS has reduced the rate of expenditure in the community programs themselves. Between FY07 & FY09, total participation in community-based LTC has grown 38%, from 9,295 participants to 14,914; & is projected to increase to 16,954 in FY 10 & to 18,956 in FY11. The cost of community-based LTC increased 53% from FY07 to 08, & 25% in FY09. However, due to cost-control measures implemented in FY10, cost for these programs are projected to decrease 1% in FY10 & increase only 7% in FY11. Average cost per participant will decline 13% in FY10 & decline an additional 4% in FY11. The opposite trend prevails for nursing homes: spending has risen 18% in 5 years while number of persons served has declined 9%. Use of Payment Reform to reverse this trend is limited because the NF reimbursement is detailed in statute. In companion APR, "Elderly & Adults with Disabilities Institutionally-based LTC," DHH proposes measures, within statutory limits, to reduce spending on empty beds & reward better quality & service diversification.

Additional Supporting Evidence for specific initiatives included in this offer:

<b>Statutory Dedication:</b>	H22	Safe Drinking Water Revolving Loan Fund
------------------------------	-----	---

**Activity ID:** 129

**Activity Name:**

Drinking Water Revolving Loan Fund

**Department:** 21 Ancillary Appropriations

**Agency:** 861 Safe Drinking Water Revolving Loan Fund

**Program:** E000 Safe Drinking Water Revolving Loan Fund

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

This fund is basically a cash account which accounts for the loan dollars for the Drinking Water Revolving Loan Fund Program.

**Activity Type:** Existing

**Objective:**

Ascertain that budget authority and funds are available to finance the loans closed for the program and to use the funds efficiently, and ensure that the fund corpus is maintained into perpetuity for providing financial assistance to public water systems.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
17023	Key	Percentage of loan applications and associated documents processed within 60 days of receipt	100	100	100	100	100

**Narrative:**

The Drinking Water Revolving Loan Fund (DWRLF) activities are actually conducted in Agency 326; however, the Ancillary Budget Agency 861 is where the loan dollars are disbursed. Fund H22 Agency 148 is where all funds related to the loans are deposited. The DWRLF program does not receive State dollars for the 20% state match required by the US Environmental Protection Agency Capitalization Grant; consequently, bonds are sold and the proceeds are deposited into Fund H22 Agency 148. The grant dollars are drawn from ASAP (Federal draw system) and classified into Fund H22 Agency 148 also. The Federal grant funds and match funds are then transferred to agency 861 for disbursement to loan recipients as projects proceed through construction. Each recipient is required to pay back principal annually and pay interest semi-annually; these dollars are deposited into Fund H22 and Agency 148 as well. Finally all Treasury interest earned on these dollars is also deposited into Funds H22 Agency 148.

**Explain How This Activity Advances State Outcome Goal:**

The actual construction of projects helps to further public health protection goals by improving public water systems. However, all of the human efforts required to make the loans are actually occurring in the DHH Agency (326) in Engineering and Sanitarian Services Activities.

<b>Statutory Dedication:</b>	H24	Addictive Disorders Prof Licensing and Cert Fund
------------------------------	-----	--

**Activity ID:** 305

**Activity Name:**

Outpatient Services

**Department:** 09 Department of Health and Hospitals

**Agency:** 351 Office for Addictive Disorders

**Program:** 2000 Prevention and Treatment

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

We currently serve 32,600 clients in this activity at a cost of \$1318 per person served. To determine the impact of a funding decrease or increase, the proposed amount will be divided by the stated cost per person served.

**Activity Type:** Existing

**Objective:**

OAD's goal is to improve the health and safety of citizens by increasing abstinence from alcohol, drugs and compulsive gambling. Treatment for addictive disorders can reduce crime, workforce problems, child abuse, school drop-out rates, STD's & other diseases, and related traffic accidents.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of clients with arrest free status at the end of treatment	0	0	0	95	95
New	Key	Percentage of clients with employment/student status at the end of treatment	0	0	0	37	37
New	Key	Percentage of clients who are abstinent at the end of treatment	0	0	0	50	50

**Narrative:**

All outpatient services are delivered in community based non-residential settings and provide care for clients with alcohol, drug and compulsive gambling problems. These services allow individuals to remain in their communities and receive cost-effective care. Services include - but are not limited to – the following: screening/assessment, education, counseling (individual, group and family), pharmacological therapy, and relapse prevention. Outpatient services utilize practices that are evidence-based, outcome-oriented, and tailored to an individual's treatment needs and level of severity. There are two levels of outpatient care. One level involves "intensive outpatient services," which are provided at least three days a week in regularly scheduled sessions totaling a minimum of nine contact hours per week. The second level of care involves "outpatient services," which can range from one to eight hours per week. In order to determine what level or intensity of services an individual needs (i.e. outpatient or intensive outpatient services), the Office for Addictive Disorders utilizes the American Society of Addiction Medicines Patient Placement Criteria (ASAM PPC). Use of ASAM allows clinicians to appropriately and consistently match services and levels of care to the unique needs of the individual. By employing this "best practice," the agency maximizes efficiency and increases effectiveness.

### Explain How This Activity Advances State Outcome Goal:

Outpatient treatment advances the state goal of "Better Health." Increased abstinence reduces the transmission of HIV/AIDs, syphilis, and hepatitis, and it reduces the incidence of diseases such as cirrhosis, cancer, and heart disease. Increased abstinence reduces birth defects and infant mortality rates. Community based outpatient services allow individuals to receive treatment consistent with their needs while living and functioning in their communities. Outpatient treatment encourages personal health care responsibility, reduces the potential for relapse, and reduces the need for more expensive inpatient treatment. Outpatient services utilize evidence-based practices to maximize treatment outcomes and cost-effectiveness. Outpatient treatment also has an impact on the following state goals:

- 1) Public Safety. Outpatient treatment reduces drug and alcohol related crimes by encouraging personal responsibility and healthy behaviors. Outpatient treatment reduces the incidence of drug and alcohol related traffic injuries and fatalities through intervention and court-mandated treatment for persons convicted of DWI's.
- 2) Education. Through early intervention and prevention efforts, outpatient treatment decreases school drop-out rates and increases academic performance.
- 3) Safe and Thriving Children and Families. Outpatient treatment promotes competent parenting by increasing abstinence and personal responsibility. Sober parents are better able to care for their children.
- 4) Diversified Economic Growth. Outpatient treatment enhances economic growth by increasing the numbers of employable citizens who can produce quality work in a safe manner.

### Evidence:

- 1) Better Health. Each year, there are over 300,000 drug ER visits in the US (CDC, 2008). Increased abstinence slows the spread of HIV/AIDs, syphilis, and hepatitis, and it reduces the incidence of cirrhosis, cancer & heart disease. Alcohol/drugs are the leading preventable cause of birth defects (CDC, 2002). Ettner et al. (2006) found that for each dollar invested in treatment, there was a \$7 health care and criminal justice cost savings.
- 2) Public Safety. Every dollar invested in treatment can produce a \$4 - \$7 cost reduction in drug-related crime (NIDA, 2006). In Louisiana, 77.4% of adults in DOC facilities are charged with drug-related crimes (Scott, 2002). In 2008, 11,773 persons in the US were killed in alcohol related crashes (NHTA, 2008). Because of alcohol treatment/education, the DWI related vehicular fatalities in the US decreased 10% between 2007 and 2008. Similar gains can be expected for Louisiana. In 2007 in Louisiana, there were nearly 10,000 DWI arrests and 40,000 car crashes that resulted in almost 600 deaths, of which about 200 were related to alcohol.
- 3) Education. Addiction is a major predictor of educational failure (Battin-Pearson, 2000). Through early intervention and prevention efforts, school drop-out rates decline and academic performance increases. By reducing addiction, more students graduate and the size of employable workforce increases.
- 4) Safe and Thriving Children and Families: Addiction exists in 40% to 80% of families where children are victims of abuse (Child Welfare League of America, 2009). Almost 2/3 of all people in drug treatment were abused as children (NIDA, 1998). By reducing addictions, the financial burden on agencies such as OAD, OCS, Public Health, OCDD, OMH, police & court services, and FINS is reduced now and in the future.
- 5) Diversified Economic Growth: A Columbia University study (2009) estimated that \$891 million in federal payroll & fringe benefits are due to absenteeism caused by addiction. Reduced addiction in the labor force increases work quality and productivity while reducing injuries.
- 6) Reduced Societal Costs. According to the Columbia study, each dollar invested in drug treatment results in a \$12 reduction in criminal justice and health care costs. Louisiana currently spends more of each dollar on addiction consequences than treatment: 36 cents to criminal justice, 27 cents to health care, 26 cents to education, 4 cents to child & family assistance, and 5 cents to mental health.

**Activity ID:** 362

**Activity Name:**

A05 Medicaid Administration - Monitoring

**Department:** 09 Department of Health and Hospitals

**Agency:** 305 Medical Vendor Administration

**Program:** 2000 Medical Vendor Administration

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Request is made at current level of funding with increases for workload adjustments (\$68,725), compulsory adjustments (\$385,500), new contracts or the expansion of existing contracts to perform mandated functions (\$1,591,516), and funding for the National Association of Medicaid Program Integrity (NAMPI) Conference to be held in New Orleans in September 2010 (\$30,000). In addition, five (5) classified positions are being requested for Health Standards due to Act 357 of the 2009 Regular Legislative Session which provides for the establishment of a state registration of Certified Nurse Aides (CNAs) that work in nursing homes or skilled nursing facilities (\$347,216). If requested increases are not funded, with the exception of funding for the NAMPI Conference, CMS mandated services will not be performed thereby putting the state's Medicaid program at risk of CMS findings, which could require the State to repay federal money. Also, additional funding would result in additional savings.

**Activity Type:** Existing

**Objective:**

Monitoring is responsible for ensuring that Medicaid expenditures are in compliance with federal/state regulations and that funding is used for appropriate medical services. By doing so, Monitoring will reduce the incidence of inappropriate Medicaid expenditures.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10618	Supporting	Number of waiver participants whose services are monitored	891	0	0	891	843
13375	Supporting	Number of School Boards quarterly claims targeted for monitoring	67	0	0	67	67
13376	Supporting	Percent of targeted school boards monitored	105.9	0	0	105.9	95

**Narrative:**

This activity is responsible for ensuring that Medicaid expenditures are in compliance with federal and state regulations. It includes:

\*Rate and Audit Review - Rate and Audit Review administers Medicaid reimbursements to institutional providers (nursing homes) and manages accountability of provider expenditures in compliance with federal and state regulations.

\*Program Integrity - Program Integrity assures that expenditures for Medicaid services are appropriate and identifies

fraud or abuse in the system and administers the Provider Enrollment function, and coordinates operations of the SURS unit at UNISYS. With more personnel and funds, it is more than probable that the State could recover funds and also eliminate more Providers that commit out and out fraud and/or billing abuses. Program Integrity also works on a regular basis the State A/G's Medicaid Fraud Unit (MFCU), which enhances exponentially Medicaid's ability and authority to pursue, collect and weed out "bad" providers.

\*Waiver Compliance - Waiver Compliance monitors two Program Offices, Office of Aging and Adult Services (OAAS) and the Office for Citizens with Developmental Disabilities (OCDD) to assure CMS that the waivers are operated in accordance with Federal guidelines. This section also performs rate and audit functions for Intermediate Care Facilities (ICFs), and administers transportation, support coordination, Family Planning Waiver, Physicians Supplemental Payments, and the American Indian "638" Clinic policy.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity advances the State Outcome Goal by decreasing the percentage of avoidable state government expenditures in the Medicaid program thereby ensuring that limited resources are used for health care initiatives that have proven to be the most responsive to the needs of patients. This activity also ensures that funding allocated to extremely large eligibility groups (nursing homes, waivers and ICFS) is properly spent. The Program Integrity function looks at the spending after it has occurred and either recovers the money, or removes inappropriate providers from the Medicaid program.

#### **Evidence:**

Evidence of the importance of this activity is the recent "Operation Somerall" which was conducted by Program Integrity, in cooperation with the A/G's staff, other Medicaid Sections and the Program Offices. In a nutshell, fourteen Provider Agencies that provide In-Home Direct Care were selected and reviewed as part of Operation Somerall. In an attempt to obtain an overall statewide perspective of the issues in these programs (PCS, PCS which included EDA and NOW), we selected providers in the Baton Rouge area, New Orleans area, Lafayette area, Alexandria area, Lake Charles area, Shreveport area, and Monroe area. Teams were sent in to review and request billing records from the audited providers. At the conclusion of this operation, the potential recovery from estimated overpayments is approximately \$600,000.00 dollars. Again, if more money is devoted not only to Program Integrity, but to all monitoring activities, it will save and or generate substantial monies for the state. On the other hand, if funding is reduced for this activity, not only will potential savings be missed, more losses will be sustained due to improper activities by miscreants who pose as caring and capable providers.

**Activity ID:** 293

**Activity Name:**

1000 - Executive Administration and Program Support

**Department:** 09 Department of Health and Hospitals

**Agency:** 307 Office of the Secretary

**Program:** 1000 Management and Finance

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

The strength of the Management and Finance program lies to a large extent in its internal operations. An increase in funding will allow us to more fully align administrative and programmatic support functions with the needs of citizens and customer agencies at a time when demand for health services continue to grow due to current economic conditions, H1N1 pandemic and the rise in increased health needs among the public. Since FY2008 the Office of the Secretary T.O. has declined by 52 positions. A reduction in funding will lead to longer recruitment cycles which will result in extended waits for service, critical positions remaining unfilled, critical health programs or services being reduced or eliminated, and will also impact policies, laws, and constitutional provisions, which are all factors in ensuring that government services are performed accurately and efficiently.

The OCD increased DHH allotment in living units (IAT) from 3,000 to 3,300 for Permanent Supportive Housing.

**Activity Type:** Existing

**Objective:**

To provide leadership, strategic and policy direction while maximizing resources and maintaining the highest level of government performance and accountability standards.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10029	Key	Percentage of OS indicators meeting or exceeding established targets	16	50	64	75	80
New	Key	Percentage of executed FEMA Heating, Ventilating, and Air Conditioning (HVAC) contracts with funds disbursed to the grant recipient within 14 working days	0	0	0	98	98
New	Supporting	Percentage of department's employees receiving annual Performance Progress Report (PPR) ratings	97	0	0	98	98
New	Supporting	Total number of DHH public and privately owned projects or construction plans reviewed and/or monitored for compliance with state licensing laws	257	0	0	300	300

**Narrative:**

Executive Management provides leadership, technical support, strategic and policy direction to various functions

throughout the department and ensures that policies and procedures put in place are relevant to the structure of agency operations and adhere to strictest government performance and accountability standards.

Bureau of Media and Communications is responsible preparing and distributing information relevant to all operations of the department. The bureau's main functions involve public information, internal communications and computer graphics. The intergovernmental relations coordinates legislative activities and communication between legislators and members of congress; reviews/tracks legislation and maintains a continuous stream of information for the citizens of Louisiana, executive staff of the department, the Legislature, Office of the Governor, and various news media.

Bureau of Policy Research and Program Development provides research, develops and implements special initiatives within the department and provides technical assistance in the areas of policy interpretation and cost-effectiveness calculations for waivers. It also includes a Policy Research section which is responsible for establishing state health policy directions, setting standards based on "best practices", including establishment of new programs and services, and building consensus for initiatives with applicable constituency groups.

Human Resources, Training & Staff Development provides services to applicants, employees, and managers in the areas of Time & Attendance, Employee Relations, Labor Law Compliance, Classification, Pay Administration, Performance Planning & Review, Drug Testing, Employee Administration, and Staff Development.

Division of Engineering & Architectural Services works with staff architects and engineers in reviewing plans and specifications for licensing of new or renovated hospitals and health care facilities for approximately 5,562,272 gross square feet of space in 1,249 facilities; also serves as a liaison between the Division of Administration's Facility Planning & Control and the various user agencies within the department and works with those agencies serving as consultants to insure their special needs and requirements are included in the implementation of their projects included in the Capital Outlay Bill.

#### **Explain How This Activity Advances State Outcome Goal:**

A significant part of the Executive Administration's mission is to lead the department in a way that reflects the values the Governor believes his administration should embody: responsiveness, accountability, transparency and efficiency. This means continuously improving government service delivery and agency accountability, holding ourselves to the highest standards in customer service, and engendering pride among our residents in the operation of government itself. All of the components that make up the Executive Administration activity succinctly contribute toward advancing the DHH goal to provide health related services in a transparent and accountable manner.

Executive Administration has one of the smallest and most streamlined Management and Finance teams in all of state government. Although workload demands in the Office of Management and Finance have steadily increased, T.O. has declined by 52 positions. All of the functions within the Executive Administration activity are geared toward adhering to the strictest government performance and accountability standards, delivering transparent, accountable and effective government services and making the overall department more transparent by allowing citizens and customer agencies to hold us more accountable for the way in which dollars are spent.

The components that make up Executive Administration are intricately woven into the DHH mission to provide better health outcomes to Louisiana citizens. All of these components contribute to the pillar that supports every program in DHH with the expectation that they will ensure that the department is operating in accordance with applicable laws and regulations in an effort to make the department more transparent and accountable to the citizens we serve.

#### **Evidence:**

The current leadership of DHH has already exhibited a passion for comprehensively analyzing and improving every aspect of agency management, functions and operations. Some of the initiatives for fiscal year 2010-2011 build on previous work to streamline critical business processes in the internal service agencies, while other initiatives represent new efforts to modernize critical operations systems in our internal service agencies. Work to streamline critical business processes in our internal service agencies has included consolidating all the department's HR units into one central location. The services of the Human Resources division ensures that agency staff are well managed and properly trained, that employee skills are matched to workload, and that staff are well supported.

Recruiting and retaining well credentialed staff with advanced degrees, professional certifications and industry experience will result in superior health service ultimately generating public satisfaction. However, all of our initiatives are aligned with our policy priorities: to provide leadership and technical support services, while maximizing resources, in order to fulfill the mission of the Department.

In Executive Administration, the Louisiana Health Care Consumer Right to Know (CRTK) initiative will directly increase access and utility of public data and information on the availability, quality, and cost of health care services for consumers, providers, and policy makers. The CRTK will collect and publish a broad range of healthcare information to give healthcare consumers expanded, web-based access to reliable information on the cost, quality and performance of their healthcare providers and health plans. The website will also provide a research portal that the public can access for more in depth analysis of hospitals, plans, and nursing homes and public health indicators. The Health Data Panel, a statutorily-created advisory committee, will provide recommendations to the Department on the design and implementation of the CRTK Act (SB 287/ACT 537 of the 2008 Regular Legislative Session).

A08 Medicaid Administration - Executive Administration  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 305 Medical Vendor Administration  
**Program:** 2000 Medical Vendor Administration  
**State Outcome Goal:** 7 Health  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing  
**Objective:**

To administer the Medicaid program and ensure that operations are in accordance with federal and state statutes, rules, and regulations.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	Administrative cost as a percentage of total cost	0	0	0	3.4	7

**Narrative:**

The Executive Administration activity includes the functions of the Medicaid Director's office, Financial Management and Operations, and Pharmacy and is responsible for:

- \*Administering the Medicaid program and ensuring that operations are in accordance with federal and state statutes, rules and regulations.
- \*Administering the Title XVIII, Title XIX, and Title XXI fiscal operations within federal and state regulations.
- \*Maintaining federal funding for program services and administrative expenditures.
- \*Developing and implementing the Bureau's strategic plan, operational plan, and performance indicator reporting function.

Also, this request includes the associated contract monitoring staff to facilitate the accompanying Agy 306 request for the Primary Care Grant.

**Explain How This Activity Advances State Outcome Goal:**

The Executive Administrative activity advances the state outcome goal by protecting and promoting health and ensuring access to medical, preventive, and rehabilitative services for the citizens of Louisiana. It is focused on enhancing regulatory and monitoring functions to mitigate fraud and abuse; creating coordinated systems of health and long-term care; providing choice in a competitive market; and employing health data information and policy analysis to improve health care outcomes, manage growth in future health care costs and creating a more sustainable model of state financing for health care that is quality-driven.

**Evidence:**

Managing costs and efficient management of resources through use of technology, best practices, and program analysis will enable the most cost-effective use of health care resources and reduce and eliminate inefficiencies, duplication of resources, and non optimal activities.

**Activity ID:** 677

**Activity Name:**

Area C - Community based Treatment

**Department:** 09 Department of Health and Hospitals

**Agency:** 330 Office of Mental Health (State Office)

**Program:** 5000 OMH Area C

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

This activity is scalable, the urgent and crisis level demand for mental health intervention is not. As a life threatening and personal/public safety issue, the less developed community-based system just forces the state to address the treatment and safety needs of the population through institutional alternatives.

**Activity Type:** Existing

**Objective:**

Increase community penetration rate and reduce reliance on hospitalization with provision of local crisis services (Act 477)

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Community utilization rate per 1,000 population	8.1	7.6	8.3	8.1	8.1
New	Key	State hospital utilization rate per 1,000 population	0.2	0.2	0.2	0.2	0.2

**Narrative:**

The Area C Office of Mental Health Program provides community based services in the DHH Regions 6, 7 and 8. This includes all parishes within central and north Louisiana. This request funds the existing operations of community mental health clinics and community based services as well as the continuation of structural realignments and enhancement of service models that the Office of Mental Health (OMH) initiated under the Cornerstone Project of FY 2007. This APR reflects as well, the expansion of community-based treatments which reduce dependency on institutional treatment/care models as the only solution available for addressing the current mental health crisis in Louisiana. The expanded evidence-based services for regions 7 and 8, include Assertive Community Treatment teams (ACT) which are effective with individuals who would otherwise be institutionalized, and Psych-Med Management as an initial step toward integration of behavioral health and primary care services for persons with long-term mental illness. These initiatives are designed to reduce the cost of individual episodes of care, and align services to take advantage of integrated service models and funding options in future budget cycles. State and federally funded treatment for persons with serious and persistent mental illness, and children with serious emotional disorders have been mandated under federal laws and Policies such as PL 102-321 (The Public Mental Health Planning Act), Healthy People 2010. State laws passed in 2008 (see ACTs, 401, 447 and 337). Evidence-based treatment is consistent with a multi-national consensus of best practice principles of behavioral health crisis response systems, and person-centered treatment. The specific mandate to restructure publicly-funded mental health services into an outcomes-based system of Behavioral Health Care is specified in Louisiana's Plan for Access to Mental Health Care, and The OMH Strategic Plan of 2008.

**Explain How This Activity Advances State Outcome Goal:**

This proposal specifically responds to each of the five Health review criteria: Assertive Community Treatment (ACT)

for adults, Multi-systemic therapy (MST) and Functional Family Therapy (FFT) demonstrate better outcomes than traditional psychotherapy and institutional care. The utilization of outcome-based cognitive behavioral interventions is consistent with effective treatment of exposure to trauma, children and family centered interventions and the Recovery movement for persons with persistent mental disorders and co-occurring conditions of mental illness and addictive disorders. The realignment of services and the management redesign of how services and programs are monitored, emphasizes accountability with respect to evidence-based standards will use The Level of Care Utilization Survey (LOCUS or CALOCUS), which is recognized as the practice standard across public sector managed care systems in many states. Evidence for accountability is linked to measures of consumer satisfaction and treatment outcomes related to individual functioning. To take advantage of current levels of expertise, staffing patterns, resources, service distribution, and service needs the following structure for community services is being proposed. It is proposed that the traditional outpatient mental health clinic (MHC) as it now operates will be transformed into more clearly defined set of service delivery programs. This will allow our current population of consumers to be more efficiently served, increase service access and integration with primary care treatment models. The Recovery Service Center (RSC) is a specialty MHC that will provide a comprehensive array of services for consumers whose Level of Care is High Intensity Community Based Services).

#### **Evidence:**

The OMH Activities taken as a whole, are designed as a comprehensive programmatic and fiscal redesign of OMH operations. The principle features of the redesign are as follows: (1) realignment/design of community programs to take advantage of other Medicaid funding streams over a 3-5 year period; (2) Redesign existing services in CMHCs and community contractual programs to reflect evidence-based interventions consistent with the service utilization needs of adults and children with serious mental health needs; and (3) eliminate 162 psych inpatient beds as a result of the DSH Medicaid Audit Rule, and convert hospital beds to residential beds for 60 patients at CLSH. An examination of the demographics of the adult population served in the community by the Office of Mental Health (OMH) indicates that approximately 44% of the persons served in FY2009' were those who had Medicaid coverage. In addition, the most frequent types of services provided were Medication Management (accounting for 35% of all the services provided) and Individual Therapy/Counseling (accounting for 29% of all the services provided). The two service components in which CMHCs will be realigned: a Medical Management (MM) Service and a Recovery Service Center (RSC). Initial client reviews in Regions 6, 7, and 8 indicate that 2,500 clients could be moved into the MM services model and free up more intensive services slots for clients with greater/more complex mental health needs. As the demand for MM services alone increases, the goal over the course of successive budget years would be to develop increased community capacity by assisting medical group practices to assume responsibility for providing this service or increase collaboration with primary care rural health clinics/FQHSCs. The more intensive mental health treatments are referred to above as Specialized Community Support or Psychosocial Rehabilitation Services (PRS) RSC staff will provide services within the RSC and in the community.

**Activity ID:** 294  
**Activity Name:**  
 5000-Information Technology  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 307 Office of the Secretary  
**Program:** 1000 Management and Finance  
**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government  
**Scalable:** True

**Scalable Description:**

An increase of \$800,000 to implement Master Data Management (MDM) Software for the creation of master data indexes and an additional \$575,000 for a professional services contract for implementation of the MDM Software. The MDM Software will allow DHH to centralize and integrate core data entities with other state agencies, improve data quality, & reduce duplicate data entry for core data entities such as patients, citizens, recipients, providers, and organizations. Today, much of this information is entered multiple times in multiple systems by multiple people.

More funding will yield a positive impact on the ability to develop, implement, and maintain the agency's statewide IT and telecommunications infrastructure; develop, implement & maintain major statewide applications; establish and oversee IT websites and related services; and advise agencies on technology solutions to improve health related services & initiatives targeting residents, businesses and visitors of the state.

**Activity Type:** Existing

**Objective:**

To reduce the cost of government IT operations and enhance service delivery by providing innovative technologies and a secure computing environment in accordance with industry standards.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of response to requests for IT assistance in less than 24 hours	0	0	0	95	95

**Narrative:**

DHH Information Technology develops, implements, and maintains the department's technology infrastructure. The Information Technology (IT) activity of DHH also provides innovative and computer technologies the department employees and its customers need to support the department's overall mission: to protect and promote health and to ensure access to medical, preventive, and rehabilitative services for all citizens of the State of Louisiana.

By partnering with the offices of DHH and the citizens they support, DHH Information Technology provides and facilitates quality IT solutions, support, information, guidance, and standards in order for DHH to accomplish its mission and goals. The DHH IT Staff fulfills these responsibilities through consistent staff training and development, and by exemplifying Ownership, Thoroughness, Communication and Closure (OTCC) in all aspects of their work. Examples of existing projects include:

Developing Microsoft SharePoint Framework and Center of Excellence to deploy solutions tailored to business processes;

Building collaboration environments quickly and providing a cost-effective foundation for building Web-based

applications;

Establishing a Disaster Recovery (DR) site at La Tech University to provide backup site to Baton Rouge Information Services Building Data Center;

Building out the department's web site and its content supporting "Consumer Right to Know" initiative;

Establishing projects to either improve, migrate and/or eliminate applications to meet department/inter-agency services integration initiative.

**Explain How This Activity Advances State Outcome Goal:**

A significant part of the Office of Management and Finance's mission is to lead the department in a way that reflects the values the Governor believes his administration should embody: responsiveness, accountability, transparency, and efficiency. This means continuously improving government service delivery and agency accountability, holding ourselves to the highest standards in customer service, and engendering pride among our residents in the operation of government itself.

The Office of Information Technology meets the primary goal of "Transparent and Accountable Government" by such current initiatives as:

1. SharePoint Services - which will connect people with information and resources they need including team workspaces, calendars, organize documents, and posting of important notifications and updates via in network and internet access. The service enables deploying collaborative environments with minimal administrative time and effort, single-server configurations to enterprise configurations.
2. A Real-time hot back-up site reduces the risk of lost data and lost time for business recovery. Long Term cost of securing and over all data management is reduced.
3. Consumer's Right To Know (CRTK) – A web based content is the departmental solution that addresses State level Transparency initiative.
4. By developing and executing an ongoing roadmap for the movement from the current silos of applications/data stores environment to an integrated state, the results are improved customer services, reduction in operational cost, reduction in duplication of data collection and positioning the department to address Health Information Technology (HIT) initiatives at faster pace.

**Evidence:**

The current leadership of DHH has already exhibited a passion for comprehensively analyzing and improving every aspect of agency management, functions and operations. Some of the initiatives for fiscal year 2010-2011 build on previous work to streamline critical business processes in the internal service agencies, while other initiatives represent new efforts to modernize critical operations systems in our internal service agencies.

One example of work to streamline critical business processes in our internal service agencies is the consolidating of all of the department's IT sections into one central unit. This effort was undertaken to modernize critical operation systems, allow for faster decision making, and more efficient operations. Furthermore, this initiative, among others, is aligned with our policy priorities: to provide leadership and technical support services, while maximizing resources, in order to fulfill the mission of the Department.

**Activity ID:** 362

**Activity Name:**

A05 Medicaid Administration - Monitoring

**Department:** 09 Department of Health and Hospitals

**Agency:** 305 Medical Vendor Administration

**Program:** 2000 Medical Vendor Administration

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Request is made at current level of funding with increases for workload adjustments (\$68,725), compulsory adjustments (\$385,500), new contracts or the expansion of existing contracts to perform mandated functions (\$1,591,516), and funding for the National Association of Medicaid Program Integrity (NAMPI) Conference to be held in New Orleans in September 2010 (\$30,000). In addition, five (5) classified positions are being requested for Health Standards due to Act 357 of the 2009 Regular Legislative Session which provides for the establishment of a state registration of Certified Nurse Aides (CNAs) that work in nursing homes or skilled nursing facilities (\$347,216). If requested increases are not funded, with the exception of funding for the NAMPI Conference, CMS mandated services will not be performed thereby putting the state's Medicaid program at risk of CMS findings, which could require the State to repay federal money. Also, additional funding would result in additional savings.

**Activity Type:** Existing

**Objective:**

Monitoring is responsible for ensuring that Medicaid expenditures are in compliance with federal/state regulations and that funding is used for appropriate medical services. By doing so, Monitoring will reduce the incidence of inappropriate Medicaid expenditures.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10618	Supporting	Number of waiver participants whose services are monitored	891	0	0	891	843
13375	Supporting	Number of School Boards quarterly claims targeted for monitoring	67	0	0	67	67
13376	Supporting	Percent of targeted school boards monitored	105.9	0	0	105.9	95

**Narrative:**

This activity is responsible for ensuring that Medicaid expenditures are in compliance with federal and state regulations. It includes:

\*Rate and Audit Review - Rate and Audit Review administers Medicaid reimbursements to institutional providers (nursing homes) and manages accountability of provider expenditures in compliance with federal and state regulations.

\*Program Integrity - Program Integrity assures that expenditures for Medicaid services are appropriate and identifies

fraud or abuse in the system and administers the Provider Enrollment function, and coordinates operations of the SURS unit at UNISYS. With more personnel and funds, it is more than probable that the State could recover funds and also eliminate more Providers that commit out and out fraud and/or billing abuses. Program Integrity also works on a regular basis the State A/G's Medicaid Fraud Unit (MFCU), which enhances exponentially Medicaid's ability and authority to pursue, collect and weed out "bad" providers.

\*Waiver Compliance - Waiver Compliance monitors two Program Offices, Office of Aging and Adult Services (OAAS) and the Office for Citizens with Developmental Disabilities (OCDD) to assure CMS that the waivers are operated in accordance with Federal guidelines. This section also performs rate and audit functions for Intermediate Care Facilities (ICFs), and administers transportation, support coordination, Family Planning Waiver, Physicians Supplemental Payments, and the American Indian "638" Clinic policy.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity advances the State Outcome Goal by decreasing the percentage of avoidable state government expenditures in the Medicaid program thereby ensuring that limited resources are used for health care initiatives that have proven to be the most responsive to the needs of patients. This activity also ensures that funding allocated to extremely large eligibility groups (nursing homes, waivers and ICFS) is properly spent. The Program Integrity function looks at the spending after it has occurred and either recovers the money, or removes inappropriate providers from the Medicaid program.

#### **Evidence:**

Evidence of the importance of this activity is the recent "Operation Somerall" which was conducted by Program Integrity, in cooperation with the A/G's staff, other Medicaid Sections and the Program Offices. In a nutshell, fourteen Provider Agencies that provide In-Home Direct Care were selected and reviewed as part of Operation Somerall. In an attempt to obtain an overall statewide perspective of the issues in these programs (PCS, PCS which included EDA and NOW), we selected providers in the Baton Rouge area, New Orleans area, Lafayette area, Alexandria area, Lake Charles area, Shreveport area, and Monroe area. Teams were sent in to review and request billing records from the audited providers. At the conclusion of this operation, the potential recovery from estimated overpayments is approximately \$600,000.00 dollars. Again, if more money is devoted not only to Program Integrity, but to all monitoring activities, it will save and or generate substantial monies for the state. On the other hand, if funding is reduced for this activity, not only will potential savings be missed, more losses will be sustained due to improper activities by miscreants who pose as caring and capable providers.

**Activity Name:**

A04 - Community-Based Long Term Care for Persons with Developmental Disabilities

**Department:** 09 Department of Health and Hospitals

**Agency:** 306 Medical Vendor Payments

**Program:** 1000 Payments to Private Providers

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

Although this proposal is designed to serve more people with developmental disabilities in more community settings with better outcomes at existing funding levels, it could be scaled up with increased funding to achieve the same objectives for additional people. [For example, OCDD will allocate a portion of existing state-funded Family Support funds towards obtaining a 3:1 federal match for providing 500 additional Children's Choice waiver slots.] Any scaling down from existing funding levels would still serve a significant number of people with increased effectiveness & efficiency; however, our ability to implement all components of this proposal & reduce the number of people, who are institutionalized, moving to community-based services would be decreased.

**Activity Type:** Existing

**Objective:**

To increase the total number of persons accessing community waiver services by 5 % the next year in a more cost-effective/efficient manner through a variety of innovative rebalancing/restructuring activities which focus existing funding towards higher quality outcomes, targeted to individual needs.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage change in number of persons served in community-based waiver services	9	0	0	0	9
New	Key	Percentage change in the cost of the New Opportunities Waiver post implementation of resource allocation	0	0	0	0	5
New	Key	Annualization change in the number of persons waiting for services on the Request for Services Registry	9287	0	0	0	9250
New	Key	Utilization of all waiver opportunities available through funding allocation or conversion of ICF/DD beds	83	0	0	0	95
New	Key	Percentage of waiver recipients reporting choice in services received and satisfaction with our system	94	0	0	0	80

**Narrative:**

The current Developmental Disabilities (DD) Service System has historically evolved from available funding impacted by stakeholder pressure on the legislature, federal Department of Justice mandates, public facilities being required to

serve the most difficult clients who the private sector were unable to serve, & the addition of new waivers over time. This process resulted in targeted funding to select individuals, multiple waiting lists, recipients choosing the next available (or most costly) waiver over one targeted to individual needs & a system less focused on efficiency & effectiveness of service delivery. The following activities will achieve the Objective described above: a.) Allocate a portion of existing state-funded Family Support towards obtaining a 3:1 federal match for providing 500 new Children's Choice Waiver slots; b.) Implement the Residential Options Waiver, designed to divert persons in crisis to community settings in lieu of institutions, return people with DD from nursing facilities to the community & convert existing private ICF/DD community homes to waiver shared living homes. Since this waiver's budget is based on funding levels for ICFs/DD, no waiver recipient can exceed the maximum institutional funding levels. Since there are few individual service caps, services never offered before (dental) can be added/tailored to fit recipients' specialized needs; c.) Improve effectiveness & efficiency of the New Opportunities Waiver & DD Services System through: "SIS/LA Plus Assessment Tools" (currently in use); "Guidelines for Support Planning" manual (currently in use); Resource Allocation" process (currently in use); electronic, real time ISP (in the final testing stage); initial & yearly certifications mandated for case managers (currently in use); & Case Management rate restructuring (nearing completion); d.) As a new initiative, combine the current waiting lists, registry & process for assigning waivers into 1, uniform waiting list/process for all waiver applicants; award a generic waiver slot so that each person will be assigned the most flexible, safe & cost-effective waiver, best designed to meet his specific needs. Also, each recipient can be re-assessed at any time & moved to a higher cost waiver should his condition deteriorate; & e.) Expand current Supports Waiver initiatives by promoting vocational providers who expand supported employment opportunities for persons with DD.

#### **Explain How This Activity Advances State Outcome Goal:**

The narrative activities in a thru e (above) provide better health & more affordable care through optimizing the availability of community-based health care & decreasing reliance on more costly institutional care. Specifically, community-based health care is improved by: a)-converting existing state funds into Medicaid funds which increase access to more community services by more children with smaller waiting lists; b)-providing more flexible/specialized community service alternates to the causes of institutionalization (crisis, abuse/neglect, unmet medical/behavioral needs); by converting private ICF/DD community homes into waiver slots; by assuring that community funding levels cannot exceed institutional ones; & matching services to individual needs through nationally recognized assessment tools; c)-using systemic improvements to assure cost-effectiveness, more efficient/higher quality community services with specific outcomes tied to specific funding. These innovations will form the basis for implementing the next steps in our system's refinement as outlined in item 4, (d); d)-eliminating separate waiting lists for separate waivers & placing the responsibility on the Program Office (not the Legislature) for targeting funding for specific, most appropriate, cost-effective waivers with most effective healthy outcomes to the appropriate individuals waiting for services. This matching process serves all persons on the waiting list more efficiently & fairly based on individual needs via evidence-based, data driven, statistically proven & nationally recognized assessment tools; & e)-targeting available funding to the most appropriate, nationally recognized best practices in vocational service delivery; shifting from segregated employment to community-integrated jobs working alongside non-handicapped peers. Persons who are more fulfilled in their work settings tend to lead healthier & more productive lives.

#### **Evidence:**

(1.) United Cerebral Palsy "Case for Inclusion Report"-2009 documents the need for increased community services for people with DD in La & the need for conversion of ICF/DD settings to community waiver settings: La ranks 50th among all states with only 56.5% of its citizens with DD receiving community waiver services (compared to the national average of 83.9%); La ranks 41st among all states with only 65.5% of its citizens with DD living independently, with family or in community shared settings of up to 3 persons (compared to the national average of 76.4%); La Ranked 9th highest in ICF/DD total expenditures & 50th (or last place) in cost per ICF/DD resident; (2.) The move towards choice, independence, person-centered planning, decreased institutional care, increased community services in the most integrated, least restrictive setting with assurances of health, safety & quality of life is supported by: national mandates such as Olmstead; Gary W; Chisolm; the DOJ's settlement with OCDD over its large public institutions; the DD Law; (3.) The AAIDD recognized OCDD for improving its SIS, a copyrighted, nationally recognized, statistically proven needs assessment tool & OCDD was recognized for development of its LA Plus assessment tool which addressed specialized areas not covered by the SIS; (4.) OCDD's SIS/LA Plus Assessment Tools, Guidelines for Support Planning, & Resource Allocation Model have all been approved for use by CMS, the federal agency which approves, renews & oversees all waivers. Other states have successfully used

similar resource allocation models to reduce waiver costs; (5.) In 8/09, CMS published “Advanced Notice of Rulemaking” as a precursor to regulatory revisions which support & allow the combining of multiple, existing waivers & waiting lists for different target populations into a single waiver designed to serve multiple populations with multiple needs. Thus, OCDD’s proposal to combine waiting lists, use generic waiver slots & match individual needs to specific waiver types using data-based assessments comports with national mandates; (6.) These articles validate supported employment as delivering the best outcomes for DD persons: (a) Cimera, R. (2000) The cost-efficiency of supported employment programs: A literature review. Journal of Vocational Rehabilitation, 14(2000), 51-61; (b) Cimera, R., (2008) The cost-trends of supported employment versus sheltered employment. Journal of Vocational Rehabilitation, 28(2008), 15-20.

**Activity ID:** 787

**Activity Name:**

OCDD Regional Office Community Programs & Management

**Department:** 09 Department of Health and Hospitals

**Agency:** 340 Office for Citizens w/Developmental Disabilities

**Program:** 2000 Community-Based

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

The goal of this activity is to provide community-based service delivery and program management to people with developmental disabilities in the most integrated, least restrictive, safe and cost-effective setting possible closest to their community and family in order to prevent institutionalization. The number of individuals served will proportionately increase or decrease with the availability of funds to either enhance existing community programs or convert them to waiver slots via 3:1 federal match. Any decrease in waiver funds would adversely affect OCDD's ability to implement and manage community waiver programs in a manner that is most responsive to people with developmental disabilities and their families and that is the most efficient/effective assuring health/safety and quality of life. Maintenance or increase in funding would increase our ability to implement program activities, cost-saving innovations and additional waiver slots as described in our Medicaid APR.

**Activity Type:** New

**Objective:**

To provide effective/efficient regional level management and delivery of Community Programs and Waiver Services through OCDD's five Regional Community Offices and nine Regional Waiver Units to optimize the use of community -based care while decreasing reliance on more expensive institutional care.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
22461	Key	Percentage of people surveyed reporting they had overall satisfaction with the services received	95.9	81	92.7	80	90
22462	Key	Percentage of people surveyed reporting that they had choice in the services they received	94.3	88	0	80	90
22473	Supporting	Percentage of Individual Support Plans (ISPs) completed for NOW participants utilizing the Support Intensity Scale/Louisiana Plus Assessments	100	0	0	90	98
22481	Supporting	Percentage of available cash subsidy stipends utilized in accordance with the Community and Family Support Act	101	100	100	95	95
22474	Key	Percentage of persons referred for Single Point of Entry (SPOE) evaluations assessed within the mandated timelines	96.1	100	72.1	95	95

**Narrative:**

The LA Developmental Disabilities (DD) Services System strives to serve people with developmental disabilities in the most integrated, least restrictive settings and/or in their own homes/communities. Community services are designed to address crisis/special needs of people who are not able to access more stable waiver funding. Community services which assist individuals to avoid institutional care until community waiver supports can be accessed include: Cash Subsidy - a cash stipend for families of children who have the most profound/severe impairments to assist in keeping their children at home; Individual & Family Support - crisis or emergency services on a temporary basis to persons living in the community who are most at risk for catastrophic consequences; Single Point of Entry - the initial point of entry, eligibility determination, planning and identification of types/extent of a person's need for services; Intermediate Care Facilities for Persons with Developmental Disabilities (ICF/DD) Placement – evaluation/assessment of a person's need for institutional placement; and Pre-Admission Screening & Annual Resident Review (PASARR) services - evaluation of the need for nursing home placement for persons with DD and/or the need for specialized DD services in NH settings. Effective regional management is integral to optimizing the use of waivers and other community-based services while decreasing reliance on more expensive institutional care. Proposed waiver initiatives include: a) Allocate a portion of existing state-funded Family Support towards a 3:1 federal match for providing 500 new Children's Choice Waiver slots; b) Implement the new Residential Options Waiver, designed to divert persons in crisis to community settings in lieu of institutions, return people with DD from nursing facilities to the community and convert existing private ICF/DD community homes to waiver homes; c) Improve effectiveness/efficiency of the New Opportunities Waiver through the: "SIS/LA Plus Assessment Tools" (currently in use); "Guidelines for Support Planning" manual (currently in use); Resource Allocation" process (currently in use); electronic, real time ISP (in the final testing stage); & initial & yearly certifications mandated for case managers (currently in use).

**Explain How This Activity Advances State Outcome Goal:**

The outcome goal of Better Health: "Optimize the use of community-based health care while also decreasing reliance on expensive institutional care" is advanced by regional system of community-based services through its flexible and individualized system of identification/remediation of emergency or crisis needs of persons with developmental disabilities on a temporary basis (until a waiver can be accessed) to prevent unnecessary, inappropriate and more costly institutional placement. This same goal is advanced through the management of regional waiver services by: a) converting existing state funds into Medicaid funds increasing access to more community services by more children with smaller waiting lists; b) providing more flexible/specialized community service alternates to the causes of institutionalization (crisis, abuse/neglect, unmet medical/ behavioral needs) through the conversion of private ICF/DD community homes into waiver slots, the assurance of community funding levels not exceeding institutional ones, and the matching of services to individual needs through nationally recognized assessment tools; and c) using systemic improvements to assure cost-effectiveness/efficient/higher quality community services with specific outcomes tied to specific funding.

**Evidence:**

1) United Cerebral Palsy "Case for Inclusion Report" issued in 2009 documents the need for increased community-based services for people with developmental disabilities in LA and conversion of Intermediate Care Facilities for Persons with Developmental Disabilities (ICF/DD) settings to community-based waiver settings noting that LA ranks 50th among all states with only 56.5% of its citizens with DD receiving community-based waiver services (compared to national average of 83.9%); LA ranks 41st among all states with only 65.5% of its citizens with developmental disabilities living independently, with family or in community-based shared settings of up to 3 persons (compared to the national average of 76.4%); LA Ranked 9th highest in ICF/DD total expenditures and 50th (or last place) in cost per ICF/DD resident; 2) The move toward choice, independence, person-centered planning, decreased institutional care, increased community services in the most integrated, least restrictive setting with assurances of health, safety and quality of life is supported by national mandates such as Olmstead; Gary W; Chisholm; the DOJ's settlement with OCDD over its large public institutions; and LA's Developmental Disability Law; 3) The AAIDD recognized OCDD for improving the Support Intensity Scale (SIS), a copyrighted, nationally recognized, statistically proven needs-assessment tool and for development of the LA Plus assessment tool which addressed specialized areas not covered by the SIS; 4) OCDD's SIS/LA Plus Assessment Tools, Guidelines for Support Planning, and Resource Allocation Model have all been approved for use by CMS, the federal agency which oversees all waivers; 5) In 8/09, CMS published "Advanced Notice of Rulemaking" as a precursor to regulatory revisions which supports OCDD's

proposal to combine waiting lists, use generic waiver slots and match individual needs to specific waivers using data-based assessments; 6) Central Office monitoring of statewide community services demonstrates a 93 % average compliance with Cash Subsidy (CS) policies/procedures; a 99% average utilization of available CS stipends; and a 95% average utilization of Individual & Family Support (IFS) funds; 7) Annual surveys of recipients of both the Individual and Family Support and Cash Subsidy Programs have consistently reported high degrees of satisfaction; and 8) the latest Legislative Fiscal Office audit of OCDD's management of its Community Services Program reported no deficiencies.

**Activity ID:** 192

**Activity Name:**

Operations & Maintenance

**Department:** 07 Department of Transportation and Development

**Agency:** 276 Engineering and Operations

**Program:** 1000 Engineering

**State Outcome Goal:** 3 Transportation

**Scalable:** True

**Scalable Description:**

SEE ATTACHMENT "3".

**Activity Type:** Existing

**Objective:**

Effectively maintain and improve the State Highway System so that the system stays in its current or better condition each FY.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
14265	Key	Percentage of Interstate Highway System miles in fair or higher condition (ride-ability)	93.3	92.93	94.94	97	97
14267	Key	Percent of National Highway System miles in fair or higher condition(ride-ability)	90.58	92.36	91.71	95	95
21705	Key	Percent of Highways of Statewide Significance miles in fair or higher condition (ride-ability)	93.79	94.79	95.5	80	80
21706	Key	Percent of Regional Highway System miles in fair or higher condition (ride-ability)	82.15	83.75	83.53	80	80
21707	Key	Percentage of Louisiana bridges that are classified as structurally deficient or functionally obsolete	26.2	26.6	27	26	25

**Narrative:**

Maintenance and improvement of the highway system is the primary function of DOTD. This activity includes the design, construction and maintenance of existing and new highway infrastructure. Maintaining the highway system includes protection of the highway system through compliance with legal size and weight limits and effective enforcement of state and federal laws. This Activity also supports the Governor's goal of Economic Development.

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state Transportation outcome goal by delivering safer bridges and smoother roads. The State of Louisiana needs to have an efficient and reliable transportation network for the movement of freight and

people. The safe reliable and efficient operation of the state highway network is a crucial component in our overall transportation network. Structurally sound bridges are a key component in the efficient movement of freight through this state. Increasing the mileage of our system of smooth pavements reduce maintenance costs for motorists and provides a better transportation system overall.

Effective enforcement of weight and size laws is another key element in protecting and maintaining the highway system. Oversize loads can damage bridges and create safety hazards to the public. Overweight vehicles can severely damage pavements and bridge structures. Effective enforcement provides a deterrent to violators and prevents the damage that might otherwise occur to the system. Enforcement also provides a mechanism to recoup some portion of the damage caused through collection of violation fines.

A major source of funds for this activity comes from the federal Transportation Trust fund through the Federal Highway Administration. Effective weight enforcement is a requirement for qualifying to receive federal highway funds. Effectiveness in this area also supports LA's outcome goal of Public Safety.

**Evidence:**

Performance data on scorecard there have been some increases and some decreases in the objective.

**Activity ID:** 193  
**Activity Name:**  
Program & Project Delivery  
**Department:** 07 Department of Transportation and Development  
**Agency:** 276 Engineering and Operations  
**Program:** 1000 Engineering  
**State Outcome Goal:** 3 Transportation  
**Scalable:** True

**Scalable Description:**  
SEE ATTACHMENT "3".

**Activity Type:** Existing

**Objective:**

Deliver 25% active projects without addenda or change orders due to design errors each FY (new objective FY 11).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent projects delivered without addenda or change orders	0	0	0	25	25
New	Supporting	Total number of projects	0	0	0	176	176
New	Supporting	Number of projects delivered without addenda or change orders	0	0	0	158	158

**Narrative:**

This activity is the delivery of quality construction plans, engineering specifications and cost estimates for highway construction. The major source of funds for this activity comes from the federal Transportation Trust fund through the Federal Highway Administration.

FED FUNDS:\$553.70- 71.9%

STATE FUNDS:\$148.10- 19.2%

TIME FUNDS:\$11.60- 1.5%

BONDS: \$25.70 - 3.3%

TOLLS / LOCAL:\$18.602.4%

TOTAL:\$770.50 100.0%

**Explain How This Activity Advances State Outcome Goal:**

This activity supports the state Transportation outcome goal by delivering quality construction plans for highway infrastructure. Improving quality in plans reduces construction time as well as lowering costs. Quality plans result in reduced risk for contractors and DOTD. Accurate estimates improve utilization of resources and provides for more effective project planning. Improved quality reduces overhead and administrative costs for DOTD and allows for better optimization of resources. Higher efficiency and lower costs translates into more construction funds that can be applied to improving the overall system. These improvements also support LA's outcome goals: Economic Development, Public Safety, and Transparent and Accountable Government.

**Evidence:**

The LADOTD has received additional Federal Funds (obligation authority) over the past 20 plus years at the end of

each Federal Fiscal year. This year alone the amount obligation authority was over \$20 million. This is due to this agencies ability to deliver projects, on time, without the need for addenda and within the engineer's estimate range of +/- 10%.

------------------------------	-----	----------------------------

**Activity ID:** 23

**Activity Name:**

Panel

**Department:** 21 Ancillary Appropriations

**Agency:** 814 Patients Compensation Fund Oversight Board

**Program:** 1000 Administrative

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

A decrease in funding which results in a decrease in staffing could result in delays in notices being sent and thus the PCFOB would not be in compliance with the statutes. This would hinder the timeliness of an injured party having their complaint processed and delay restitution. Increased funding could result in a more aggressive approach and possibly speed up the panel process and allow conclusion of a complaint in a shorter timeframe.

**Activity Type:** Existing

**Objective:**

Enforce compliance with R.S. 40:1299.47 and PCFOB and Regulations in dealing with requests to establish medical review panels against private healthcare providers and to do so in a timely manner.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of Panels Close to Open Ratio	0	0	0	0	90
New	Key	Percentage of Notifications Processed Within 10 Days	0	0	0	0	90

**Narrative:**

The request for a medical review panel serves as the first step to medical malpractice litigation. This activity involves the acceptance of medical review panel requests and review to determine compliance with the statutes regarding the information required in a submission. Sending notices advising all parties of the complaint and whether or not there is coverage with the PCFOB and if a filing fee is due. Advise all parties of timeframes set forth in the statutes and ensure computer system reminders are set. Monitor the process sending notices as necessary and to ensure deadlines are met and panel completed and closed. Record final outcome of the panel.

**Explain How This Activity Advances State Outcome Goal:**

Operates as a repository and oversees that each panel request follows all mandated procedures established by statute. Records and provides statistical data upon request. Ensures process progresses timely and efficiently and that all notices are properly and timely sent. This alerts all parties of the requirements and gives advance notice of mandated deadlines. All procedures are posted on the website.

**Evidence:**

The multiple notices needed for the medical review panel process are being sent in a timely manner and in compliance with the statutory mandates. All parties are kept informed of the steps needed to complete the panel. The staff attempts to ensure all involved parties are given their due diligence.

**Activity ID:** 24

**Activity Name:** Claims

**Department:** 21 Ancillary Appropriations

**Agency:** 814 Patients Compensation Fund Oversight Board

**Program:** 1000 Administrative

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

A decrease in funding would hinder the PCFOB's ability to quickly and fairly compensate parties injured as a result of medical malpractice as there would be less staff to review and evaluate claims for possible payment. This would result in increase in payment of interest and delays restitution. An increase could allow more aggressive claims handling and quicker conclusions of claims.

**Activity Type:** Existing

**Objective:**

Timely evaluate, properly set reserves, negotiate a fair resolution or defend medical malpractice claims without merit that are filed against private healthcare providers (HCP) enrolled in the Patient's Compensation Fund (PCF).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10400	Key	Number of Claims Evaluated	1166	990	1356	1000	1000
10399	Supporting	Case Reserves (in millions)	262642171	273000000	250000000	250000000	250000000

**Narrative:**

Claims are filed against private HCP's enrolled in the PCF. The PCF claim activity monitors all claims and gathers information to determine if there is exposure to the PCF above the HCP's primary liability limit of \$100,000. If so then the PCF claims section will evaluate, set the reserve, negotiate, settle or defend these claims for the HCP accordingly. Payment of all past and future medical expenses are made as well as the reimbursement of Medicaid and Medicare payments associated with these claims. Exposure to the PCF is capped at \$400,000 plus medical and legal expenses as well as judicial interest. The role of the PCF is to fairly compensate injured parties of medical malpractice as mandated in Statute RS 40:1299.42 and 43.

**Explain How This Activity Advances State Outcome Goal:**

The role of the PCF claims section is to obtain information and to timely evaluate claims so as to fairly compensate those injured as a result of medical malpractice. The total amount paid, number of open claims and contact information is posted on the PCFOB website and updated monthly. Other statistical data is provided as requested. The PCF does not receive state general funds; all revenue is received as a result of payments by private Louisiana healthcare providers enrolled in the PCF.

**Evidence:**

Internal data shows the staff is resolving claims quicker and thus compensating injured parties more timely. The number of open claims has been decreasing and the number of claims paid each year has been increasing, without increasing the average payment per claim. The ongoing medical bills are being processed within 30 days of receipt. Despite this, surcharge rates to the providers have remained reasonable, thus ensuring a stable source of healthcare providers for the citizens of the state.

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

A decrease in funding would result in inability to continue to update the website, perform required accounting duties and budget preparation in a timely manner. This activity provides support staff for the other activities and a reduction in this activity would impact all other activities.

**Activity Type:** Existing

**Objective:**

Oversee operations of & to provide support staff, including HR, IT, Accounting, & Administration, to ensure all activities of PCFOB are conducted in a manner that is timely, efficient & in compliance with all state mandates, rules, regulations and that relevant information is available to the public.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10398	Key	Fund Balance	545880593	476473680	411336388	400000000	500000000

**Narrative:**

The Administration activity is to ensure the longevity of the PCF by maintaining its financial stability. Such financial stability is balanced in the need for sufficient funds to adequately compensate those injured as a result of medical malpractice. The PCFOB activities impact the surcharge rates which need to be kept at reasonable levels so that health care providers will be encouraged to remain in Louisiana. The Administration activity for the PCF consists of four sections; Accounting, I.T./Records, Management and Human Resources.

**Explain How This Activity Advances State Outcome Goal:**

The collections and payments are posted on the website so that those that pay surcharges are able to see where their money goes. The number of panels filed, claims paid, claims open and other financial information as well as board meeting minutes are posted on the PCFOB website. A complete list of contact information is also available on the website. The PCF is held accountable by utilizing all state accounting systems such as ISIS; STO; OMF; OSP; OCR; OSRAP; OPB. This office is a budget unit of the state, however receives no state funds, revenue is generated from surcharges collected from private Louisiana health care providers and fees collected when a panel is filed. Activities are reported at monthly board meetings which are open to the public.

**Evidence:**

Private health care enrollments increase each year ensuring healthcare providers are available to the citizens of the state. The fund balance has grown with PCFOB guidance and commitment. All HR functions, accounting functions and budget functions and reports are timely. IT staff has expanded the information available on the website and expanded the reporting functions in the new system. Actuarial reports have been fine tuned and considered improved by the actuary. Reports available to the public have increased.

**Activity ID:** 21

**Activity Name:**  
Surcharge

**Department:** 21 Ancillary Appropriations

**Agency:** 814 Patients Compensation Fund Oversight Board

**Program:** 1000 Administrative

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

Decreased funding resulting in fewer employees would result in a delay in processing enrollments, entering data required to issue certificates of enrollment, determine qualification for coverage of medical malpractice complaints and bill health care providers. Increased funding could provide an opportunity to send more notices and keep the health care providers more informed regarding coverage issues.

**Activity Type:** Existing

**Objective:**

Compliance with La. R.S. 40:1299.44-45 and the PCFOB Rules and Regulations and to insure proper surcharges are collected from, and timely notices sent to, the healthcare providers of Louisiana that voluntarily seek medical malpractice coverage from the PCFOB.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6092	Key	Amount of Surcharge Collected	174393897	164171935	147774083	140000000	160000000
6095	Key	Number of Enrolled Providers	16967	16972	16622	15000	15000

**Narrative:**

Provide medical malpractice coverage to approximately 17,000 private healthcare provider in Louisiana. Collection and audit of surcharge payments from insurance companies and agents and individual healthcare providers. Processing notices regarding renewals, proof of coverage, explanations of rates and penalties. Calculating experience rating of providers based on payout history, auditing security deposits, sending bills to self insured HCP's

**Explain How This Activity Advances State Outcome Goal:**

Allows PCFOB to list enrolled providers and post certificates evidencing coverage online. Ensures timely, accurate information is available to insurance companies and healthcare providers, including hospitals who need to verify coverage of physicians. Information relative to amounts collected and paid out are posted on the website. The PCF is not funded by state general funds, but receives payments from the health care providers enrolled in the Patient's Compensation Fund. Annual actuary reports are made available to those that request them.

**Evidence:**

The PCFOB has provided a stable source of medical malpractice coverage for the private healthcare providers in Louisiana. This inturn allows for those parties injured as a result of medical malpractice to have a source for compensation. In past years, due to lack of proper staffing levels, the PCFOB was months behind in issuing certificates evidencing coverage which resulted in delays in credentialing and physicians being granted privileges at hospitals. This has been resolved. Accuracy has also improved and PCFOB staff is able to provide more timely responses to inquiries and processes more notices to healthcare providers to ensure they have the necessary coverage.

**Activity ID:** 299

**Activity Name:**

Executive

**Department:** 08B Public Safety Services

**Agency:** 422 Office of State Fire Marshal

**Program:** 1000 Fire Prevention

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

Funding of the Executive Activity of the Office of State Fire Marshal (OSFM) ensures the infrastructure to achieve consistent statewide administration of code enforcement via plan review and inspections, licensure of fire protection and other contractors, arson investigation and emergency services. Funding will allow continued cross-training between sections, elimination of duplicative services and collaboration with local governments and the design, construction, fire protection and other regulated industries that serve in an advisory capacity as requested by the Fire Marshal. Funding will allow continued monitoring of performance to ensure timely reviews and inspections to positively impact economic development, public safety and fire safety education while minimizing cost of code compliance. Lack of funding of the Executive Activity will eliminate proper leadership, oversight, and direction, and cause state spending without proper delivery of fire prevention services.

**Activity Type:** Existing

**Objective:**

By seeing that 80% of objectives are met, to ensure efficient use of state resources to ensure citizens and visitors are safe, individuals with disabilities are provided equal access, and that energy efficiency, fire safety education, and timely emergency services are provided through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of agency objectives met.	0	0	0	0	80

**Narrative:**

The Office of State Fire Marshal (OSFM) was established by the State Legislature by passage of Act 152 of 1904. R. S. 40:1562.1 provides that OSFM shall be organized into the Administrative (Executive), Engineering (Plan Review), Inspection and Investigation sections. OSFM is charged with the responsibility of the protection of the life and property of the citizens of the State of Louisiana from fire, explosion and related hazards in the constructed environment through the enforcement of legislative mandates and administrative rules or directives. OSFM is provided with enforcement authority to investigate fires of suspicious origin and to inspect buildings, structures, watercrafts and movables to ensure that they are operated in a safe manner. OSFM is also responsible for ensuring the provision of equal access to disabled individuals in the same constructed environment, and to promote the efficient use of energy in accordance with the Commercial Building Energy Conservation Code based on ASHRAE/IES 90.1-1989 (Energy Code). Act 125 of the 1958 legislative session created a Fire Marshal Tax which currently funds approximately 85% of the activities of the office.

The Fire Marshal specifically performs the following activities in the normal scope of his duties: intervention in code

compliance issues; instruction and consultation with architects on Life Safety and other codes/standards; response to fire calls for service; performance of fire investigations; development and delivery of public safety announcements; provision of fire safety education. The Fire Marshal also acts as public information officer for the Fire Marshal's office. The Executive Section also monitors performance indicators and consults with associated industry leaders regarding public need and modifies office practice accordingly.

**Explain How This Activity Advances State Outcome Goal:**

The Executive Activity of the Office of State Fire Marshal provides leadership and support to all public safety programs of the office and maximizes efficiency in personnel, workload and use of resources. Oversight by the Executive Activity allows the office to stay in touch with public need, maintain proper direction and tools for effective service, and promotion of life safety and property protection. For example, satellite offices have been established in Alexandria, Lake Charles, Shreveport, Monroe, Slidell, and New Orleans to provide code consultation and interpretation at the local level with support and supervision from the main office in Baton Rouge. Implementation of a proposed new computer system will allow for state of the art, real-time interaction with the general public, local officials, and other state agencies. The Executive Activity collaborates with state agencies local governmental entities to ensure that various state, laws, rules, and codes are upheld.

**Evidence:**

Satellite offices established at the direction of the Fire Marshal (of the Executive Activity) in Alexandria, Lake Charles, Shreveport, Monroe, Slidell, and New Orleans have provided code consultation and interpretation at the local level, and have assisted in the timely performance of plan reviews. Safety is maintained in buildings with specific frequency of inspections as defined by the Executive Activity. Lower fire insurance premiums are realized through consistent statewide enforcement and collaboration with local fire prevention bureaus as promoted by the Executive Activity.

------------------------------	-----	--

**Activity ID:** 745

**Activity Name:**

Resource Services

**Department:** 17 Department of Civil Service

**Agency:** 561 Municipal Fire and Police Civil Service

**Program:** 1000 Administrative

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

With a minimum T.O. of 19 positions, the Office of State Examiner (OSE) will be uniquely positioned to effectively deliver oversight to Louisiana's Municipal Fire and Police Civil Service System, continuing to build upon our seven-decade reputation and commitment to professionalism and excellence of service to Louisiana's citizens. Under the capable oversight of the OSE, those classified employees who serve in good behavior to protect the lives and property of the people of Louisiana may be assured of continued employment in a fair merit-based system without fear of political influence. Citizens may expect that professionalism in the fire and police services will be maintained. Without proper funding to permit the OSE to continue as the central point of contact for advice, direction, and resources that are essential to the efficient operation and oversight of the classified service, there is greater risk that Louisiana citizens will receive diminished public safety services.

**Activity Type:** New

**Objective:**

By June 30, 2011, achieve a 91% positive rating on resource services provided to assist local officials and classified employees in the efficient operation of the MFPCS system and to insure that it operates in accordance with the law.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
14310	Key	Percentage of local civil service boards and jurisdictions indicating overall satisfaction with OSE services.	91	94	94	65	91
14312	Supporting	Percentage of survey respondents utilizing agency legislative tracking site and finding the site informative and helpful.	89	86	96	64	90
14315	Supporting	Average number of working days to respond to telephone inquiries	1	1	1	3	1
14316	Supporting	Average number of working days to respond to written requests for guidance	8	6	5	15	6

**Narrative:**

Evolving from a statutory mandate to serve in an advisory capacity, the Office of State Examiner has become established as a single point of support, having developed and refined a range of services that provides stakeholders

an unparalleled resource for information, advice, consultation, and collaboration. Based on seven decades of experience, the agency provides effective oversight to civil service boards, governing and appointing authorities, departmental chiefs, and fire and police employees in order to make the distinctive, merit-based fire and police civil service system operational at the local level. At the core of the agency's resource services is its expertise in the application of Louisiana's Fire and Police Civil Service Law, which provides for basic principles and a framework within which the system operates, and a unique understanding of management and administration of fire and police personnel. Civil service boards are comprised of residents of the areas served, most of whom have little or no personnel administration experience. Board membership changes fairly frequently due, in part, to staggered appointments. It is, therefore, unreasonable to expect them to develop the necessary expertise to administer the civil service system without adequate support, and local boards depend heavily on the Office of State Examiner. Additionally, local authorities and employees generally do not have a working knowledge of how the system is intended to operate, nor are they necessarily equipped with an understanding of complex HR practices. The OSE fills the gap by providing accurate and dependable advice and guidance regarding such personnel matters as appointments, discipline, appeals, leaves of absence, and political activities. The OSE is directly involved in matters of classification and allocations, involving in-depth analyses of essential duties and responsibilities of every position in the classified service, and the identification of their qualifications and incumbent underlying competencies. Advice and consultation is readily available by telephone and through correspondence. Support is augmented by seminars, training manuals and videos, as well as the agency's website. Assistance from our team of experts in all areas of support is based on a mix of best practice thinking, practical experience with public safety services, knowledge of employment law - particularly civil service law, and a commitment to peerless public service.

#### **Explain How This Activity Advances State Outcome Goal:**

Constitutionally and statutorily mandated services provided under this activity include the development of classification plans based on local job analysis, review of all personnel movements within the system, review of requests for examinations by civil service boards, review of lists of candidates approved by local civil service boards for compliance with the law, tracking site for fire and police related legislation, training materials including manuals and videos, local and statewide information via agency website, seminars, and response to requests for information through agency in-person visits, letters, and 24-hour availability by telephone. Through the provisions of these services, the MFPCS system operates in accordance with the law and provides the employees in the system with the confidence that they may do their jobs free from political influence in a climate that provides fair hiring and promotions and an independent, objective review of disciplinary actions, to ensure that they are only taken in good faith for cause. Management and administrative personnel, on the other hand, are provided with the tools necessary to insure compliance with federal and state law in the effective management of fire and police personnel. Each local civil service board in the 107 jurisdictions is comprised of local citizens with no previous experience in civil service or employment law who serve three-year terms without compensation. The system is extremely cost-effective in that most of the work is done locally through the independent local civil service boards. The central, independent oversight by the OSE makes the operation of the system possible. Qualified fire and police personnel serve with confidence even in rural areas because they are insured of a professional, merit-based system. The 2.6 million citizens who live in the areas served benefit from the quality of first responders made possible through the system.

#### **Evidence:**

The strongest evidence of the effectiveness the OSE's Resource Services is demonstrated by consistently high satisfactory ratings received from stakeholders for the quality of services provided. Advice and guidance from the Office of State Examiner is sought out by legislators, city and parish council members, mayors, fire district commissioners, attorneys, department chiefs, and rank and file employees of the fire and police services. Since FY 2002/03, when the agency began tracking this performance, the OSE has achieved ratings of over 90%; the average being 94.5%. We continue our commitment to service by making information available on our website, producing and distributing training materials, tracking legislation of interest to the stakeholders, and being immediately responsive to stakeholders' needs. The agency's commitment to service is evidenced by the fact that the State Examiner and Deputy State Examiner freely provide their residential telephone numbers to stakeholders, and take calls after hours, 24-hours per day.

**Activity ID:** 743  
**Activity Name:**  
Testing Services  
**Department:** 17 Department of Civil Service  
**Agency:** 561 Municipal Fire and Police Civil Service  
**Program:** 1000 Administrative  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

With a minimum T.O. of 19 positions, the Office of State Examiner (OSE) will have the resources necessary to continue providing lists of qualified eligibles for promotion or hire through employment testing for the fire and police services. If the OSE is not properly funded, the quality selection of qualified personnel in public safety jobs will be diminished, and any test which is developed and administered based on obsolete or incorrect job information will increase the risk of legal challenges, exposing the state of Louisiana to the possibility of unfavorable legal judgments and significant monetary penalties

**Activity Type:** New

**Objective:**

Efficiently and cost-effectively respond to the needs of administrators, classified employees, and the 2.6 million Louisiana residents protected by the MFPCS System by providing, through validated selection tests, lists of qualified eligibles for hire and promotion within 30 days of giving tests.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent of entrance level hires who are deemed a "good hire" by local appointing authorities following working test probational period .	96.1	95.56	98.74	0	96
New	Key	Percent of promotional appointees who are deemed qualified, and confirmed by local appointing authorities following working test probational period .	99.23	99.33	99.12	0	98
New	Key	Percent of eligibility lists provided within 30-day target period from date of exam to date scores are mailed	93	0	0	0	94
New	Key	Percent of survey respondents indicating satisfaction with OSE Testing Services	0	0	0	0	89

**Narrative:**

Employment tests in both the private and public sectors are widely viewed to be one of the most cost-effective means of identifying candidates for hiring or promotion who possess the necessary knowledge, skills and abilities (KSAs) to be successful in their prospective jobs. According to the American Management Association, 41% of employers test job applicants in basic literacy and/or math skills, 68% engage in various forms of employment testing, and 35% of job applicants tested lacked sufficient skills for the jobs they sought. For nearly seventy years the Office

of State Examiner (OSE) has been charged by the constitution and statutes with the responsibility for developing and administering employment tests for the purpose of identifying applicants who are qualified and have the skills necessary for jobs in the fire and police services within the state of Louisiana. In order for a test to be used for selection, it must be validated and supported by adequate documentation, and administered fairly and impartially. The validation of exams is done at all times with a goal of selecting qualified applicants while minimizing adverse impact on protected groups; therefore, the OSE adheres to the professional standards and principles established for employment selection, including the EEOC Uniform Guidelines on Employee Selection Procedures. Each test prepared and administered by the OSE is based on a thorough and extensive job analysis. Entrance tests often measure competencies associated with applicants' trainability, such as reading comprehension, math, mechanical aptitudes, and listening skills. Promotional tests generally evaluate job knowledge or expertise that candidates must possess immediately upon promotion, and some upper-level and specialty classes involve assessment center testing where candidates are given a job simulation exercise that allows a pool of trained raters to evaluate management and interpersonal communications skills. On average, the agency administers over 500 examinations each year and tests approximately 7,000 candidates per year. Of these, approximately 1,200 (20%) are screened out of the selection process. Our process of designing the test around the local job analysis information insures that it will measure knowledge and skills required on the job. While this process is extensive and time-consuming, we believe the outcome is worth the effort. There has never been a successful legal challenge to an OSE test.

**Explain How This Activity Advances State Outcome Goal:**

The Office of State Examiner was established under the Municipal Fire and Police Civil Service Law, in part, to provide lists of qualified eligible candidates for appointment to positions in the fire and police services. Qualified fire and police personnel insure a continuity of public safety protection across both rural and urban areas of the state. Carefully developed and administered employment tests have long been recognized by private and public organizations for their value in identifying applicants who possess the knowledge, skills and abilities (KSAs) or competencies necessary to perform well on the job, to be responsive to training, to contribute to the general welfare of the organization and its customers, and to commit to a long term employment relationship. Citizens of the state of Louisiana deserve to live and work in an environment where they are free from threats and hazards that imperil their lives and property, and should be assured of a standard of professionalism from public safety employees throughout the state. It is, therefore, necessary that government must attract and retain personnel who possess the qualities that assure public safety.

**Evidence:**

The OSE annually administers an average of 500 examinations for the fire and police classified service, and tests approximately 7,000 candidates each year. During the past five-year period, the agency has tested 30,029 candidates, of which 24,356, or 81% , were reported to local civil service boards for certification for employment or promotion in the fire and police services. From the date of the request to the date scores are reported, the entire process is completed within 95 days (five-year average). Notwithstanding the number of candidates processed and the speed with which the OSE responds, costs are extremely low. Conservative estimates of costs involved in the development by private or commercial developers of pre-employment tests for the fire and police services are approximately \$50,000 per exam, with a minimum estimate of \$25,000. Outsourcing only 70 promotional exams to commercial developers would cost a minimum of \$1,750,000, thus exceeding the OSE's current budget for this one item. Outsourcing all 500 exams would cost the state between \$5,000,000 and \$13,000,000, or an average per capita cost of \$3.36. In FY 2008/2009, the costs associated with administering the Department of State Civil Service was \$9,313,204, or a per capita cost to the citizens of the state of \$2.11. However, the cost to the citizens of Louisiana covered by the fire and police civil service system during the same period was only \$.59, and the testing function was delivered at a per capita cost of only \$.27. Finally, and of great significance, there has never been a successful legal challenge to one of our examinations. There is no other testing service, public or private, local or otherwise, that can deliver these results for less.

**Activity ID:** 658

**Activity Name:**

Office of Health Insurance

**Department:** 04G Commissioner of Insurance

**Agency:** 165 Commissioner of Insurance

**Program:** 2000 Market Compliance

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

The reduction in funding for this division will have a negative impact with all the divisions in the Office of Health which regulates state requirements applicable to commercial and government-operated health benefit plans. This office provides protection to Louisiana consumers, assures continued viability of health benefit plans and determines whether enhancements or modifications are necessary to assure continued compliance. There are six divisions in operation under the Office of Health; Louisiana Health Care Commission, HIPAA Quality Management Consumer Affairs/Contracts and forms; Quality Assurance; Supplemental Health Products; and Senior Health Insurance Information Program (SHIIP).

**Activity Type:** Existing

**Objective:**

To respond consumer complaints, provide info/programs to assist seniors; license & examine Medical Necessity Review Organizations; review forms, rates & advertising of Medicare Insurance Supplements; support the activities of the Health Care Commission.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
12290	Key	Average number of days to process health contract/policy forms	16	14	21	30	30
12125	Key	Number of seniors receiving services (telephone, home-site, fairs, group presentations, etc)	34722	43258	22498	12500	14000
14044	Key	Number of MNROs examined	16	42	16	21	36

**Narrative:**

The Office of Health Insurance has four specific divisions for the regulation of health insurance under the Insurance Code; Senior Health Insurance Information Program (SHIIP), HIPAA Quality Management, Louisiana Health Care Commission and Supplemental Health/Medical Necessity Review.

Through various outreach methods, including presentations to large groups and individual counseling, SHIIP provides information to Medicare eligible citizens in matters related to health care coverage and benefits (Medicare, Medicaid, Medicare Supplements, Medicare Advantage plans (HMOs) and Medicare Prescription Drug plans) to maximize benefits/savings. This program is funded by a federal grant.

The Health Insurance Portability and Accountability office investigates most health insurance complaints and assures that health insurance products, including contracts and policy forms, comply with Louisiana law. The office performs forms review/approval of contract/policy forms, advertising and rates related to major medical and excess/stop-loss health related coverage's, enforces state and federal laws related to HIPAA, and handles complaints related to prompt payment of major medical claims.

The Health Care Commission was created in 1992 by statute. The functions, duties and responsibilities of the commission are to review and study the availability, affordability and delivery of quality health care in Louisiana. Specifically, the commission examines the rising costs of health care, including but not limited to the costs of medical malpractice and liability and shall examine the adequacy of consumer protections. Statute requires the commission to meet at least twice a year. The Commission serves as an advisory body to the insurance commissioner who must submit to the legislature an annual report on health care and health insurance, which takes into consideration the recommendations, actions and studies of the commission.

Supplemental Health/Medical Necessity Review Organizations (MNRO) investigates consumer complaints and handles forms, advertising and rate review and approval/disapproval for Medicare Insurance Supplements; reviews licensing applications (initial and renewal), forms and performs statutory examinations of MNROs.

**Explain How This Activity Advances State Outcome Goal:**

The SHIIP program helps to improve outcomes for Medicare beneficiaries. Savings to seniors are calculated using a formula developed by the Centers for Medicare and Medicaid Services. Savings may result when a client learns that he/she is eligible for other programs including: Medicaid, Medicare Prescription Drug Plan coverage, or drug plans by pharmaceutical companies or the client saves on premium costs by choosing more suitable supplementary HMO coverage. Savings, if any, depend upon the situation of the individual being counseled.

As a regulatory body, the DOI has access to the records of insurers and producers, including consumers' claims records when problems arise. Without compromising proprietary information of insurers or producers, the department investigates whether an insurer or producer has performed in compliance with the law and the terms and conditions of the policy. Since all health insurance contracts and policy forms must be reviewed and approved by DOI before they can be offered for sale in the state, the DOI seeks to improve its efficiencies in this process. Good efficiency in this area is important to the department's efforts to attract more companies to do business in the state.

The Health Care Commission gives a public forum for valuable debate and insight into timely issues of health care and health insurance. Members of the commission are appointed through nominations by governing boards of state colleges/universities and by the Insurance Commissioner, some at-large members and others representing stakeholders in this debate, such as insurers, medical providers, attorneys, pharmacy owners, and others enumerated in La. R.S. 22: 2161(A).

As a regulator, the DOI is charged with examining MNROs and their filings to ascertain that they are operating within the laws and regulations of the state and that all form filings comply with applicable law. The department strives to reduce the average time for processing all MNRO filings.

**Evidence:**

The SHIIP program broadens the educational services to senior citizens, Medicare beneficiaries and their families through providing information, counseling and assistance on Medicare as well as other health insurance. FY 2008-2009, \$4,218,517 is estimated in savings SHIIP has helped in counseling senior health clients. There were 34,722 seniors that received services (telephone, home site, at fairs, group presentations, etc) from our SHIIP division during FY 2008-09.

The HIPAA Quality Management Consumer Affairs Division provides direct assistance and protection to consumers and health care providers regarding benefits covered; timely and proper payment of claims and refunds; advertising; marketing; underwriting; changes in coverage; access to managed care providers and covered services, contractual terms and provisions; and policyholder services. In FY 2008-09, HIPAA received 1150 health complaints and 1,063 complaints investigations were concluded.

The HIPAA Quality Management Insurance Contracts and Forms Division performs detailed analyses and reviews of major medical plans, insurance and health maintenance organization (HMO) contract form filings related to products proposed for marketing and issuance to the public. In FY 2008-09 there were 5,668 health contract/policy forms, advertising and rates received; 6,337 were processed.

The Quality Assurance Division's responsibility is to assure compliance by Medical Necessity Review Organizations (MNROs) and health insurance issuers in accordance with La. R.S. 22:1831-1838 and La. R.S. 22:1121-1144. FY 2008-09 there were 109 MNRO filings and applications (new and renewal) received, 104 were processed.

The Supplemental Health Products Division is responsible for performing detailed analyses and reviews of Medicare supplemental benefit plan filings. This division is also responsible for the review and approval of all limited benefit plan filings to assure compliance with all state filing procedures. Insurance Examiners in this division can assist with the interpretation of statutes, rules and regulations, filing procedures and fees, and the status request on pending filings, as well as answer inquiries and conduct investigations of consumer complaints relative to limited benefit and supplemental health insurance products.

**Activity ID:** 392

**Activity Name:**

Support Services

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 3000 Operational Support

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To provide logistic support to both Louisiana State Police and all of Public Safety Services as well as emergency and tactical operations support to other local, state, and federal law enforcement agencies, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20911	Supporting	Percentage of convicted child predators and sex offenders information distributed	100	100	100	100	100
New	Key	Percentage of fingerprint cards processed	0	0	0	0	100
New	Key	Percentage of patrol vehicles receiving recommended 5000 mile oil changes	0	0	0	0	90
New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State

Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.

- Concealed Handguns processes permit applications.
- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

**Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sheriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

**Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.
- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.
- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.
- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.
- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.
- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.
- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**Activity ID:** 50

**Activity Name:**  
Investigations

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 2000 Criminal Investigation

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

A reduction in the current budget would negatively affect the number of cases opened and closed, arrests, and other agency assists. Detectives provide expertise/assistance to other law enforcement agencies that do not have the experience or resources necessary to investigate cases which are complex and multi-jurisdictional.

A 5% reduction of the budget would ultimately lead to a reduction in man-power by 20-25% therefore leading to a decline of enforcement throughout the state. In 2008, the criminal program opened over 2,000 cases. With a reduction in man-power, the number of cases opened would likely decline to approximately 1,600. The effect of those 400 cases not able to be opened would lead to an increase in criminal activity in many parts of the state.

Over 1,000 requests for assistance from other agencies would be denied due to the lack of resources available to the Criminal Program.

**Activity Type:** Existing

**Objective:**

To prevent and detect crime, apprehend criminals, and perform any other related duties by increasing the number of criminal investigations by 5% by June 30, 2013.

**Performance Indicators:**

**Narrative:**

The Louisiana State Police Criminal Investigation (LSP) activity is the only statewide law enforcement agency equipped to handle large scale, multi-jurisdictional criminal investigations. LSP investigates police shootings, corruption, politically sensitive cases, supports local agencies and jurisdictions with investigative assistance, violent crimes, and child predator investigations. LSP also enforces all local, state, and federal statutes that prohibit the possession, use, and distribution of narcotics, dangerous drugs, and prohibited substances. LSP concentrates on large-scale narcotics operations, with an emphasis on individuals/organizations implicated in interstate and international drug trafficking, and organized prescription fraud by practitioners. A great number of investigations result in the seizure of assets/proceeds from criminal activity. These funds are tracked and utilized to further/enhance criminal investigations.

**Explain How This Activity Advances State Outcome Goal:**

This program directly advances the Public Safety Goal. It aids local law enforcement with investigative resources not available at the local level, which enables the apprehension of criminals and the reduction of potential future crimes. LSP acts as a facilitator in criminal investigations that extend past the jurisdictional boundaries of local law enforcement. LSP targets areas in the state with a propensity for violence and/or drug abuse with saturated patrols

and enforcement efforts. LSP focuses on the apprehension of violent crime fugitives, drug diversion violations, and child predators.

**Evidence:**

In 2008-2009, this activity exceeded its performance indicators of 1,200 criminal investigations initiated by opening 2,015 criminal cases. This activity also exceeded its performance indicator of 1,100 criminal investigations closed by closing 1,661 criminal investigations. The investigations resulted in over 1,000 arrests, over \$2,000,000.00 in assets being seized, and over \$10,000,000.00 in illegal controlled dangerous substances and property recovered. Over 30 training sessions/crime prevention classes have been presented throughout the state where approximately 2,000 individuals of all ages have attended. In addition, this program has obtained 100% compliance for investigators on the Information Reporting System.

**Agency:** 419 Office of State Police  
**Program:** 2000 Criminal Investigation  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To identify, apprehend, and prepare cases for prosecution of individuals who have committed insurance fraud and auto theft, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of investigations initiated	0	0	0	0	160
New	Key	Number of investigations closed	0	0	0	0	145
New	Key	Percentage of investigations resulting in arrests	0	0	0	0	54

**Narrative:**

Insurance Fraud is operated with statutorily dedicated funds. Insurance Fraud maintains a data base of reported and investigated occurrences of insurance fraud which assists the investigation and prosecution of fraud. The program also assists in the detection of cloned and switched vehicle identification number on vehicles. Insurance fraud and auto theft cases are monitored to ensure the department is in compliance with both federal and state regulations.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the Public Safety and Economic Development goals.

**Public Safety**

Insurance Fraud provides funding for operational expenses for its investigators to conduct thorough criminal investigations relating to insurance fraud. This process aids in our goal of being a more proactive law enforcement agency to help deter and prevent insurance fraud throughout the State of Louisiana. Insurance Fraud provides manpower to participate in local task forces to combat auto theft and insurance fraud throughout the state. These task forces remove the obstruction of jurisdictional boundaries that local agencies may encounter when criminal activity exceeds their authorized jurisdiction.

**Economic Development**

This process provides investigators with the necessary tools to help reduce the amount of insurance fraud and auto theft and thereby may assist insurance providers to lower insurance rates in Louisiana. Reducing the insurance rates helps foster a stronger business climate and increases the wealth of citizens.

**Evidence:**

In 2008, Insurance Fraud received 442 referrals of suspected fraud. Of the 442 submitted referrals, Insurance Fraud opened 166 criminal cases, closed 152 cases, and made 155 arrests. In 2008, Insurance Fraud was responsible for 68 convictions and 4 pre-trial interventions. Insurance Fraud was also responsible for individuals receiving 92 years and 10 months of probation time, \$27,778.00 in fines, \$809,629.72 in restitution, 81 years and 6 months of jail time, and 40 hours of community service. In the first and second quarters of 2009, the activity received 219 referrals, opened 103 cases, closed 103 cases and made 69 arrests.

**Activity ID:** 659  
**Activity Name:**  
Office of Legal Services  
**Department:** 04G Commissioner of Insurance  
**Agency:** 165 Commissioner of Insurance  
**Program:** 2000 Market Compliance  
**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government  
**Scalable:** True

**Scalable Description:**

A reduction in budget would affect the Office of Legal Services by its representation of the DOI in hearings; promulgation of rules and regulations; internal legal and policy opinions as requested by department staff; investigations of suspected incidents of claim fraud and producer/company fraud; handling of background checks for producer and company licensing divisions and the support of the Louisiana Auto Theft and Insurance Fraud Prevention Authority (LATIFPA) program to educate the Louisiana consumers.

**Activity Type:** Existing

**Objective:**

To represent DOI in hearings; promulgation of rules/regulations; internal legal and policy opinions; investigation of suspected claim and producer/company fraud; background checks for licensing divisions; support activities of the La. Auto Theft and Insurance Fraud Prevention Authority.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
12276	Key	Percentage of initial claim fraud complaint investigations completed within 10 working days	97	96	88	60	85
12278	Key	Percentage of background checks completed within 15 working days	65	84	85	60	85

**Narrative:**

The Office of Legal Services provides representation for the department at all regulatory hearings against licensees, drafts and promulgates rules and regulations which are authorized or required by the legislature, and provides internal legal and policy opinions, as requested by department staff.

Within the Office of Legal Services, the Fraud Division investigates suspected incidents of claim fraud and producer/company fraud, and as appropriate, refers cases to law enforcement for further handling. In addition, the Fraud Division performs background checks for all applicants for producer and company licenses.

The Louisiana Auto Theft and Insurance Fraud Prevention Authority (LATIFPA) combats vehicle insurance fraud, including fraud by theft and other criminal acts. By law, LATIFPA solicits and accepts gifts, grants, donations, loans and other assistance from various entities which are deposited into a statutory dedicated fund. It uses the funds to provide tools to law enforcement that aid the arrest of car thieves; current initiatives include providing bait cars and license plate readers to law enforcement. LATIFPA also conducts programs for middle and high school students and the public to educate them about the consequences of vehicle theft, to improve their strategies to avoid being a victim of vehicle theft, and to collaborate on solutions to auto theft and insurance fraud.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Legal Services improves the regulatory efficiencies of the department by representing the department at regulatory hearings requested by licensees who have been fined or penalized by the department and by drafting and promulgating rules and regulations which are authorized or required by the legislature. By providing timely legal and policy opinions to department staff, the department personnel are able to operate in a manner consistent with their legal authority.

The Department of Insurance works to reduce costs of insurance for consumers by aggressively pursuing insurance fraud and to protect consumers by preventing those with felony records from engaging in the insurance business. Last year, the Fraud Division opened 1,090 claim fraud investigations, referred 285 claim fraud cases to law enforcement, and performed 1,778 background checks for the company and licensing divisions of the department.

LATIFPA provides services to the public that are intended to deter auto theft and insurance fraud and to assist law enforcement in its efforts to apprehend perpetrators of auto theft and insurance fraud. The authority conducts two educational programs "The Consequences of Automobile Fraud" and "Parking Smart: Don't Be a Victim of Vehicle Theft" in four public school districts, with intentions to expand into four additional parishes and include private and parochial middle and high schools by 2009-10. In FY 2008-09, LATIFPA conducted a one-day conference for consumers, insurance producers, special insurance investigators, and business people and law enforcement personnel. The conference focused on current fraud trends and initiatives for combating insurance fraud and vehicle theft.

**Evidence:**

Fiscal Year 2007-08, Office of Legal Services (OLS) tracked approximately 247 entries relating to legal representation of the DOI in its enforcement and regulatory capacity. Each attorney works closely with different Department offices/divisions to, for example, revoke certificates of authority, cite companies for failure to meet statutory deposits and failure to file reports timely to the Office of Financial Solvency; and to represent the Office of Licensing and Compliance in matters such as mergers and acquisitions, misappropriations, misrepresentations and failure to pay taxes, fines or assessments.

Staff attorneys serve as prosecutors and fine collectors for law violations in legal issues. FY 2007-08, the OLS assisted the Commissioner of Insurance in collecting \$215,212.28 in fines; and in FY 2008-09, \$217,428.48. FY 2007-08, the OLS issued 29 advisory letters, bulletins, opinions or rules and regulations; in FY 2008-09, the OLS issued 34 advisory letters, bulletins, opinions or rules and regulations.

The Insurance Fraud Section has two key roles. The roles are investigating allegations of fraud and conducting extensive background investigations. FY 2008-09, the Fraud Section completed the initial claim fraud complaint investigations above the 85% performance target. The last quarter in FY 2008-09, the fraud section fell slightly behind in the background checks completions in a timely manner due to staff vacancies.

FY 2008-09, the LATIFPA program expanded its Auto Theft Education Program to include colleges/universities. Since the inception of the LATIFPA Program, education materials on vehicle theft and vehicle theft prevention have been presented to approximately 11,475 students in Louisiana. In 2008-09, LATIFPA enhanced community awareness about insurance fraud/vehicle theft through a statewide radio and billboard campaign that conveyed the impact fraudulent claims have on insurance premiums, the importance of reporting vehicle theft and insurance fraud to assist in reducing auto insurance rates and the consequences of vehicle theft and insurance fraud. In October 2008, the LATIFPA hosted its first conference on insurance fraud and vehicle theft. This brought over 300 participants from the insurance industry, law enforcement, governmental agencies and businesses in the state to discuss current fraud trends in the insurance industry.

**Activity Name:**  
Office of Management & Finance  
**Department:** 04G Commissioner of Insurance  
**Agency:** 165 Commissioner of Insurance  
**Program:** 1000 Administrative  
**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government  
**Scalable:** True

**Scalable Description:**

The Office of Mgt and Finance provides essential services and internal controls. Administrative Services maintains inventory records, handles mail/ messenger services, building maintenance, fleet mgt, contracts, leases. Assessments & Data Mgt invoices and collects assessments, receives all revenue, collects data on injury lawsuits. Human Resources manages personnel and building security. Fiscal deposits revenue, handles accounts payable/receivable, travel, and statutory deposits. Information Technology maintains databases and systems, develops on-line access to information and services. Strategic/Operational Planning prepares strategic and operational plans, reports performance results, collects information for legislative fiscal notes and regulation impact statements. Budget manages the department's appropriation by developing and monitoring expenditures, collections, legislation and mid-year adjustments. Purchasing procures supplies, equipment, furniture and printing services.

**Activity Type:** Existing

**Objective:**

To provide internal support for the DOI with purchases, supplies, human resources, training, IT development, budget, and strategic planning.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	Number of technology projects planned to maximize employee productivity, improve or maintain compatibility with regulated entities, and warehouse data.	3	3	1	3	3
890	Supporting	Total amount of revenue collected from taxes, assessments, fees, penalties and miscellaneous amounts in \$ millions.	422.6	411	348	422.2	431.8

**Narrative:**

The Office of Management & Finance oversees the management of the department's fiscal, budget, human resources, information technology, purchasing, supplies, equipment, inventory/property control, administrative services and is responsible for strategic and operational planning for the entire department. The Office collects data and taxes from the insurance industry and data related to tort litigation. In 2007-08, the Department of Insurance collected 7 types of taxes and 64 different fees. For FY 08-09, the Department collected 7 types of taxes and 71 different fees. All revenue is deposited to the State Treasury. Human Resources assists with the hiring process and conducts the orientation of all new employees, maintains records on employee benefits, is responsible for employee relations (grievances, counseling, equal opportunity, drug testing) and supervision of the performance planning and

review process. OMF also provides continuing training in safety and governmental ethics for all employees; does at least monthly budget recaps to determine if the department's resources are being directed as planned and as needed; authorizes cash awards for professional development and salary incentives for taking on additional duties. All purchasing is conducted in compliance with the state's procurement laws and the purchasing director continuously researches cost saving strategies.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Management and Finance maintains its commitment to transparency and accountability in government by providing information to all employees via the Intranet, by utilizing the Intranet to track intra-department activities and flows of resources, and by providing information to the public via the department's website and in response to public records requests. Ongoing training of employees includes agency and department wide meetings for all employees and support for management and employee participation in educational opportunities with the National Association of Insurance Commissioners, Insurance Regulatory Examiner Society, National Conference of Insurance Legislatures, Council of State Audit Groups, Department of State Civil Service, where employees learn best practices, receive industry and regulatory updates, and improve supervisory skills.

**Evidence:**

July 16, 2009, audit report of the Louisiana Property Assistance Agency had no major negative findings and all corrective actions have been taken.

Cost savings in the procurement department include less stock-pile on office supplies and consistently acquiring cost savings in any area based on the state's procurement laws and guidelines. New lease for copiers throughout department reduced annual expenses by \$17,392.16.

DOI employees receive safety training programs every quarter and HR staff maintains safety inspection checklist. Hazard control is maintained throughout the building on a monthly log. Fire drill evaluations are performed each year and have always received a passing achievement.

Due to the reduced budget for the FY 2009-10, the DOI has reduced its workforce with 6 retirement incentives and discharging 19 WAEs, 20 students and 6 probationers. Two unclassified positions are unfilled as of September 30, 2009.

Affirmative Action report filed with DSCS on May 13, 2009, demonstrated that DOI had both females and minorities in classified and unclassified service in all occupational categories (management/financial operations; professional; office/administrative support) at a rate higher than the Baton Rouge rate for the civilian work force. During FY 2008-2009 approximately 1,529 leave hours were used for employee training in various fields which included the following: Comprehensive Public Training Program; Bob Brooks School of Insurance; Office of Risk Management – Safety; IRES – Insurance Regulatory Examiner Society; ISIS – Time Management Reporting.

In testimony to the DOI's commitment to serving its constituency, over 50 employees spent a total of 419 man hours maintaining phone assistance to the La. Citizens during the aftermath of Hurricane Gustav which caused a 4-day general office closure in Baton Rouge because of power outage.

All employees received training along with the software update for Office 2007 (MS Word, Outlook, Excel). During the past two years, DOI redesigned its Regulated Entities Database, created a Competitive Market Data Collection system, re-engineered its IT system for tracking activities of the OLS and created an on-line supply request system to improve industry service, to improve information collected for more informed regulatory policymaking, to more systematically track regulatory casework and internal legal opinions, and to document supply requisitions and real-time inventory levels.

**Activity ID:** 629

**Activity Name:**

Louisiana School for the Visually Impaired

**Department:** 19B Special Schools and Commissions

**Agency:** 651 Louisiana School for the Visually Impaired

**Program:** 2000 Instructional Services

**State Outcome Goal:** 1 Education

**Scalable:** True

**Scalable Description:**

Increasing funding will allow the agency to implement new programs to improve and increase educational outcomes for children with visual impairments (VI). Specifically, increased funding will allow the implementation of a vocational program, increased exposure to assistive and adaptive technology and the expansion of the current expanded core curriculum including Orientation & Mobility (O&M) service to children statewide through the outreach program. Conversely, decreases in funding will result in fewer services and ultimately the failure to meet federally mandated goals and educational plans. After sustaining a 20% cut in FY 09-10, additional cuts will eliminate all residential services; thus drastically reducing educational opportunities for VI children.

**Activity Type:** Existing

**Objective:**

Increase student academic performance through research based, data driven literacy and numeracy programs created specifically for students who are blind or visually impaired.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
8316	Key	Number of students achieving 80% of IEP objectives	74	73	75	80	80

**Narrative:**

Louisiana School for the Visually Impaired (LSVI) provides educational and support services to children with low incidence disabilities specific to blindness. This includes Braille, Orientation & Mobility, assistive and adaptive technology.

Early intervention is critical for children with visual impairments as many developmental skills are interconnected. Problems in one domain lead to further delays in other areas but intervention can reduce developmental gaps and the need for further remediation at a later time. VI children communicate differently than sighted children using their hands to express desires. Parents often miss these cues. Parents who lack early intervention training don't interact with their children in an optimal way. They tend to talk to their children less which impacts future communication skills. They often supply children with language instead of letting the children generate the language themselves. Parents of VI children often do not spend enough time communicating with their children in tactile ways which leads to other developmental problems). LSVI's statewide Outreach programming strives to provide early intervention and parent training to address these needs. VI children have unique educational needs that relate directly to developmental delays experienced in early childhood. They have a wide range of additional skills they need in order to successfully complete the core curriculum and compete with sighted peers. These skills include concept

development, spatial understanding, study skills, speaking and listening, and communication skills. In academic settings, children who are blind or visually impaired may learn to read using Braille, large print, magnification devices or a variety of other options. The experts and experienced staff at LSVI provide these services. By offering a full continuum of diagnostic, instructional, and residential care LSVI meets the unique challenges of each child participating in our programming.

In the 2009 Legislative session, LSVI funding was decreased by \$1.7million. To compensate for this loss of revenue, the school relocated to the Louisiana School for the Deaf (LSD) and realigned the service delivery model to incorporate shared services.

#### **Explain How This Activity Advances State Outcome Goal:**

In order to increase self sufficiency among blind and visually impaired citizens of Louisiana, every student must have a strong and appropriate education designed to meet their unique needs. Knowing the national unemployment average among blind individuals is greater than 70% (CANnect, 2009), we must be persistent in our effort to increase student achievement and to prepare visually impaired students to reach their full potential and be self sufficient, contributing members of our society. This will require a focused and methodical effort to:

Identify and address common areas of developmental delay

Identify and address the unique educational needs of students who are blind or visually impaired

Initiate and equip students with compensatory or functional academic skills, including communication modes

By implementing, assessing and adjusting its educational programs, population, LSVI will produce a more educated workforce and a more self sufficient citizenry, thus contributing to two of the governor's outcome goals. Particular focus and attention will be given to Braille literacy, ECC and vocational training.

#### **Evidence:**

The expanded core curriculum assessment results indicate that over 90% of the students enrolled in the residential program showed improvement in at least of the six life domains. In 2007 the rate was 95.58%, 2008 was 95%, and 2009 was 94.55% thus exceeding our goal of 90% despite increased enrollment.

Past performance indicators show 57% of the 08-09 graduates completed post secondary educational work as dually enrolled students in community college or technical college prior to graduation. The 06-07 class had 100% post secondary enrollment. The 07-08 classes had 66% who participated in dual enrollment or post secondary experiences. Budget cuts in FY 08-09 prevented LSVI from acquiring drivers to provide transportation for children to participate in the dual enrollment program.

All students enrolled at LSVI are served by Individualized Education Plans. However, not all students are pursuing a high school diploma. Approximately 50% of the population served are identified with multiple disabilities and are pursuing certificates of achievement. Statistical data indicates: 2007 – 84% achieved 80% of their IEP goals, 2008- 84.8% achieved 80% of their goals with a benchmark of 70%, in 2009 – 80.88% of the students achieved 80% of their goals. This decrease is contributed to mid-year enrollment.

In FY 10-11, students will be challenged to achieve a higher degree of success on IEP measured by a comprehensive team of individuals.

**Activity ID:** 639

**Activity Name:**  
Louisiana School for the Deaf

**Department:** 19B Special Schools and Commissions

**Agency:** 653 Louisiana School for the Deaf

**Program:** 2000 Instructional Services

**State Outcome Goal:** 1 Education

**Scalable:** True

**Scalable Description:**

Requested funding will allow the agency to continue to implement data driven research-based language, literacy, and numeracy programs to improve and increase educational and vocational outcomes for children with hearing impairments. Having had approximately 10% of the budget cut for the FY 09-10, any additional cuts would result in elimination of vital programs (such as American Sign Language (ASL) instruction, reading remediation, and credit recovery) that provide the remediation that is required and necessary for hearing impaired students to bridge the learning gap not experienced by their hearing peers. Any further budget cuts would severely and negatively impact LSD's ability to deliver and comply with state and federal mandates which require IEP driven instructional programs and other services to students with disabilities.

**Activity Type:** Existing

**Objective:**

Increase student academic performance through research-based, data driven literacy and language programs for hearing impaired children.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
8335	Key	number of students making satisfactory progress towards achieving 70% of taheir IEP objectives	29	28	28	20	20

**Narrative:**

During the last decade, there has been widespread recognition that the academic achievement of deaf and hard-of-hearing students is well below that of their hearing peers. Research shows that early language intervention is critical for hearing impaired children, and that children need the opportunity to interact with both peers and adults in a wide variety of settings as they are learning and practicing language and literacy knowledge, skills, and strategies.

An increasing number of educators, researchers, and deaf community members argue that if hearing impaired students are provided with a visually accessible learning environment and given access to the curriculum through a natural sign language, literacy levels and academic achievement will improve. Research has documented for the first time a significant relationship between students' proficiency in American Sign Language (ASL) and their English literacy skills. Since 1989, an increasing number of school programs serving hearing impaired children in North America (including Louisiana School for the Deaf (LSD)) have adopted a bilingual perspective, introducing ASL into classrooms and homes as the primary language of instruction.

ASL/English bilingual education responds to the educational needs of hearing impaired children and provides leadership in professional development through the promotion of the acquisition and development of both ASL and English for academic purposes for hearing impaired students, their educational staff, and parents, by supporting staff in the effective use of ASL and English as languages of instruction in educational settings. Towards this end, LSD provides data driven research based literacy instruction for children using the bilingual approach of using ASL and

English to implement Milestones for students reading below 4th grade level and Scholastic Read 180 for students who read at the 4th grade level and above. The Reading Milestones program was developed for the deaf to address the needs of beginning readers whose reading levels range from kindergarten to fourth grade. Read 180 is a comprehensive reading program geared toward students reading below the proficient level in grades 4 to 12.

Hearing impaired children have unique educational needs that relate directly to language and literacy. The experts and experienced staff at LSD are able to provide these educational opportunities for children using research based programs.

#### **Explain How This Activity Advances State Outcome Goal:**

In order to increase self sufficiency among the hearing impaired population of Louisiana, every student must have a strong and appropriate education designed to meet their unique needs. We must be persistent in our effort to increase student achievement and to prepare all students to reach their full potential and be self sufficient, contributing members of our society. This will require a focused and methodical effort to:

Identify and address areas of language delay

Identify and address literacy needs of all students

Implement with fidelity data-driven, research-based programs in order to increase student academic achievement through language and literacy instruction.

By implementing, assessing, adjusting the educational programs designed to improve and increase student language and literacy, LSD will more effectively produce a more educated workforce and a more self-sufficient hearing impaired citizenry, thus contributing to two of the Governor's student outcome goals.

#### **Evidence:**

At LSD, experts and experienced staff work in conjunction to deliver data driven research-based programs to remediate and educate hearing impaired children to become self-sufficient workforce ready citizens. In order to achieve this goal, focused efforts must be made to address areas of language delay, address literacy needs, increase academic achievement, and increase workforce readiness.

In the area of language delay, LSD uses the Kendall Conversational Proficiency Assessment to assess student language levels. In the case of hearing impaired students at LSD, the primary language assessed is American Sign Language (ASL). LSD has begun to implement an ASL/English Bilingual Education Program that promotes effective bilingual instruction using ASL and English for hearing impaired students. The proponents of bilingual programs have argued that if sign language is well established as a first language, the acquisition of English literacy (language two) can be achieved without the involvement of English in its primary form (Israelite et al, 1992; Mason & Ewoldt, 1996).

Most hearing impaired students leave high school reading on approximately a 4th grade level. As students are taught using the ASL/English Bilingual Education Program to reinforce their first language, literacy instruction and remediation are vital. LSD uses the Gates MacGinitie Reading Comprehension Test to measure student growth in the area of literacy as the Reading Milestones and Read 180 research based reading programs are implemented.

Louisiana requires students to complete required Carnegie Units and pass the Graduate Exit Exam in the areas of ELA, Math, and Science or Social Studies in order to earn a high school diploma. For some hearing impaired students, this is simply unachievable due to poor language and literacy skills. For these students, a program to provide Industry Based Certification (IBC) in several areas (such as welding, culinary arts, drafting, graphic design, etc.) will be offered so that they may exit high school with an IBC ready to enter the workforce.

<b>Statutory Dedication:</b>	I12	Auto. Theft and Insurance Fraud Prev. Auth. Fund
------------------------------	-----	--

**Activity ID:** 659

**Activity Name:**

Office of Legal Services

**Department:** 04G Commissioner of Insurance

**Agency:** 165 Commissioner of Insurance

**Program:** 2000 Market Compliance

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

A reduction in budget would affect the Office of Legal Services by its representation of the DOI in hearings; promulgation of rules and regulations; internal legal and policy opinions as requested by department staff; investigations of suspected incidents of claim fraud and producer/company fraud; handling of background checks for producer and company licensing divisions and the support of the Louisiana Auto Theft and Insurance Fraud Prevention Authority (LATIFPA) program to educate the Louisiana consumers.

**Activity Type:** Existing

**Objective:**

To represent DOI in hearings; promulgation of rules/regulations; internal legal and policy opinions; investigation of suspected claim and producer/company fraud; background checks for licensing divisions; support activities of the La. Auto Theft and Insurance Fraud Prevention Authority.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
12276	Key	Percentage of initial claim fraud complaint investigations completed within 10 working days	97	96	88	60	85
12278	Key	Percentage of background checks completed within 15 working days	65	84	85	60	85

**Narrative:**

The Office of Legal Services provides representation for the department at all regulatory hearings against licensees, drafts and promulgates rules and regulations which are authorized or required by the legislature, and provides internal legal and policy opinions, as requested by department staff.

Within the Office of Legal Services, the Fraud Division investigates suspected incidents of claim fraud and producer/company fraud, and as appropriate, refers cases to law enforcement for further handling. In addition, the Fraud Division performs background checks for all applicants for producer and company licenses.

The Louisiana Auto Theft and Insurance Fraud Prevention Authority (LATIFPA) combats vehicle insurance fraud, including fraud by theft and other criminal acts. By law, LATIFPA solicits and accepts gifts, grants, donations, loans and other assistance from various entities which are deposited into a statutory dedicated fund. It uses the funds to provide tools to law enforcement that aid the arrest of car thieves; current initiatives include providing bait cars and

license plate readers to law enforcement. LATIFPA also conducts programs for middle and high school students and the public to educate them about the consequences of vehicle theft, to improve their strategies to avoid being a victim of vehicle theft, and to collaborate on solutions to auto theft and insurance fraud.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Legal Services improves the regulatory efficiencies of the department by representing the department at regulatory hearings requested by licensees who have been fined or penalized by the department and by drafting and promulgating rules and regulations which are authorized or required by the legislature. By providing timely legal and policy opinions to department staff, the department personnel are able to operate in a manner consistent with their legal authority.

The Department of Insurance works to reduce costs of insurance for consumers by aggressively pursuing insurance fraud and to protect consumers by preventing those with felony records from engaging in the insurance business. Last year, the Fraud Division opened 1,090 claim fraud investigations, referred 285 claim fraud cases to law enforcement, and performed 1,778 background checks for the company and licensing divisions of the department.

LATIFPA provides services to the public that are intended to deter auto theft and insurance fraud and to assist law enforcement in its efforts to apprehend perpetrators of auto theft and insurance fraud. The authority conducts two educational programs "The Consequences of Automobile Fraud" and "Parking Smart: Don't Be a Victim of Vehicle Theft" in four public school districts, with intentions to expand into four additional parishes and include private and parochial middle and high schools by 2009-10. In FY 2008-09, LATIFPA conducted a one-day conference for consumers, insurance producers, special insurance investigators, and business people and law enforcement personnel. The conference focused on current fraud trends and initiatives for combating insurance fraud and vehicle theft.

**Evidence:**

Fiscal Year 2007-08, Office of Legal Services (OLS) tracked approximately 247 entries relating to legal representation of the DOI in its enforcement and regulatory capacity. Each attorney works closely with different Department offices/divisions to, for example, revoke certificates of authority, cite companies for failure to meet statutory deposits and failure to file reports timely to the Office of Financial Solvency; and to represent the Office of Licensing and Compliance in matters such as mergers and acquisitions, misappropriations, misrepresentations and failure to pay taxes, fines or assessments.

Staff attorneys serve as prosecutors and fine collectors for law violations in legal issues. FY 2007-08, the OLS assisted the Commissioner of Insurance in collecting \$215,212.28 in fines; and in FY 2008-09, \$217,428.48. FY 2007-08, the OLS issued 29 advisory letters, bulletins, opinions or rules and regulations; in FY 2008-09, the OLS issued 34 advisory letters, bulletins, opinions or rules and regulations.

The Insurance Fraud Section has two key roles. The roles are investigating allegations of fraud and conducting extensive background investigations. FY 2008-09, the Fraud Section completed the initial claim fraud complaint investigations above the 85% performance target. The last quarter in FY 2008-09, the fraud section fell slightly behind in the background checks completions in a timely manner due to staff vacancies.

FY 2008-09, the LATIFPA program expanded its Auto Theft Education Program to include colleges/universities. Since the inception of the LATIFPA Program, education materials on vehicle theft and vehicle theft prevention have been presented to approximately 11,475 students in Louisiana. In 2008-09, LATIFPA enhanced community awareness about insurance fraud/vehicle theft through a statewide radio and billboard campaign that conveyed the impact fraudulent claims have on insurance premiums, the importance of reporting vehicle theft and insurance fraud to assist in reducing auto insurance rates and the consequences of vehicle theft and insurance fraud. In October 2008, the LATIFPA hosted its first conference on insurance fraud and vehicle theft. This brought over 300 participants from the insurance industry, law enforcement, governmental agencies and businesses in the state to discuss current fraud trends in the insurance industry.

**Narrative:**

During the last decade, there has been widespread recognition that the academic achievement of deaf and hard-of-hearing students is well below that of their hearing peers. Research shows that early language intervention is critical for hearing impaired children, and that children need the opportunity to interact with both peers and adults in a wide variety of settings as they are learning and practicing language and literacy knowledge, skills, and strategies.

An increasing number of educators, researchers, and deaf community members argue that if hearing impaired students are provided with a visually accessible learning environment and given access to the curriculum through a natural sign language, literacy levels and academic achievement will improve. Research has documented for the first time a significant relationship between students' proficiency in American Sign Language (ASL) and their English literacy skills. Since 1989, an increasing number of school programs serving hearing impaired children in North America (including Louisiana School for the Deaf (LSD)) have adopted a bilingual perspective, introducing ASL into classrooms and homes as the primary language of instruction.

ASL/English bilingual education responds to the educational needs of hearing impaired children and provides leadership in professional development through the promotion of the acquisition and development of both ASL and

English for academic purposes for hearing impaired students, their educational staff, and parents, by supporting staff in the effective use of ASL and English as languages of instruction in educational settings. Towards this end, LSD provides data driven research based literacy instruction for children using the bilingual approach of using ASL and English to implement Milestones for students reading below 4th grade level and Scholastic Read 180 for students who read at the 4th grade level and above. The Reading Milestones program was developed for the deaf to address the needs of beginning readers whose reading levels range from kindergarten to fourth grade. Read 180 is a comprehensive reading program geared toward students reading below the proficient level in grades 4 to 12.

Hearing impaired children have unique educational needs that relate directly to language and literacy. The experts and experienced staff at LSD are able to provide these educational opportunities for children using research based programs.

#### **Explain How This Activity Advances State Outcome Goal:**

In order to increase self sufficiency among the hearing impaired population of Louisiana, every student must have a strong and appropriate education designed to meet their unique needs. We must be persistent in our effort to increase student achievement and to prepare all students to reach their full potential and be self sufficient, contributing members of our society. This will require a focused and methodical effort to:

Identify and address areas of language delay

Identify and address literacy needs of all students

Implement with fidelity data-driven, research-based programs in order to increase student academic achievement through language and literacy instruction.

By implementing, assessing, adjusting the educational programs designed to improve and increase student language and literacy, LSD will more effectively produce a more educated workforce and a more self-sufficient hearing impaired citizenry, thus contributing to two of the Governor's student outcome goals.

#### **Evidence:**

At LSD, experts and experienced staff work in conjunction to deliver data driven research-based programs to remediate and educate hearing impaired children to become self-sufficient workforce ready citizens. In order to achieve this goal, focused efforts must be made to address areas of language delay, address literacy needs, increase academic achievement, and increase workforce readiness.

In the area of language delay, LSD uses the Kendall Conversational Proficiency Assessment to assess student language levels. In the case of hearing impaired students at LSD, the primary language assessed is American Sign Language (ASL). LSD has begun to implement an ASL/English Bilingual Education Program that promotes effective bilingual instruction using ASL and English for hearing impaired students. The proponents of bilingual programs have argued that if sign language is well established as a first language, the acquisition of English literacy (language two) can be achieved without the involvement of English in its primary form (Israelite et al, 1992; Mason & Ewoldt, 1996).

Most hearing impaired students leave high school reading on approximately a 4th grade level. As students are taught using the ASL/English Bilingual Education Program to reinforce their first language, literacy instruction and remediation are vital. LSD uses the Gates MacGinitie Reading Comprehension Test to measure student growth in the area of literacy as the Reading Milestones and Read 180 research based reading programs are implemented.

Louisiana requires students to complete required Carnegie Units and pass the Graduate Exit Exam in the areas of ELA, Math, and Science or Social Studies in order to earn a high school diploma. For some hearing impaired students, this is simply unachievable due to poor language and literacy skills. For these students, a program to provide Industry Based Certification (IBC) in several areas (such as welding, culinary arts, drafting, graphic design, etc.) will be offered so that they may exit high school with an IBC ready to enter the workforce.

**Activity ID:** 629  
**Activity Name:** Louisiana School for the Visually Impaired  
**Department:** 19B Special Schools and Commissions  
**Agency:** 651 Louisiana School for the Visually Impaired  
**Program:** 2000 Instructional Services  
**State Outcome Goal:** 1 Education  
**Scalable:** True

**Scalable Description:**

Increasing funding will allow the agency to implement new programs to improve and increase educational outcomes for children with visual impairments (VI). Specifically, increased funding will allow the implementation of a vocational program, increased exposure to assistive and adaptive technology and the expansion of the current expanded core curriculum including Orientation & Mobility (O&M) service to children statewide through the outreach program. Conversely, decreases in funding will result in fewer services and ultimately the failure to meet federally mandated goals and educational plans. After sustaining a 20% cut in FY 09-10, additional cuts will eliminate all residential services; thus drastically reducing educational opportunities for VI children.

**Activity Type:** Existing

**Objective:**

Increase student academic performance through research based, data driven literacy and numeracy programs created specifically for students who are blind or visually impaired.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
8316	Key	Number of students achieving 80% of IEP objectives	74	73	75	80	80

**Narrative:**

Louisiana School for the Visually Impaired (LSVI) provides educational and support services to children with low incidence disabilities specific to blindness. This includes Braille, Orientation & Mobility, assistive and adaptive technology.

Early intervention is critical for children with visual impairments as many developmental skills are interconnected. Problems in one domain lead to further delays in other areas but intervention can reduce developmental gaps and the need for further remediation at a later time. VI children communicate differently than sighted children using their hands to express desires. Parents often miss these cues. Parents who lack early intervention training don’t interact with their children in an optimal way. They tend to talk to their children less which impacts future communication skills. They often supply children with language instead of letting the children generate the language themselves. Parents of VI children often do not spend enough time communicating with their children in tactile ways which leads to other developmental problems). LSVI’s statewide Outreach programming strives to provide early intervention and parent training to address these needs. VI children have unique educational needs that relate directly to developmental delays experienced in early childhood. They have a wide range of additional skills they need in order to successfully complete the core curriculum and compete with sighted peers. These skills include concept development, spatial understanding, study skills, speaking and listening, and communication skills. In academic settings, children who are blind or visually impaired may learn to read using Braille, large print, magnification devices or a variety of other options. The experts and experienced staff at LSVI provide these services. By offering a full continuum of diagnostic, instructional, and residential care LSVI meets the unique challenges of each child

participating in our programming.

In the 2009 Legislative session, LSVI funding was decreased by \$1.7million. To compensate for this loss of revenue, the school relocated to the Louisiana School for the Deaf (LSD) and realigned the service delivery model to incorporate shared services.

#### **Explain How This Activity Advances State Outcome Goal:**

In order to increase self sufficiency among blind and visually impaired citizens of Louisiana, every student must have a strong and appropriate education designed to meet their unique needs. Knowing the national unemployment average among blind individuals is greater than 70% (CANnect, 2009), we must be persistent in our effort to increase student achievement and to prepare visually impaired students to reach their full potential and be self sufficient, contributing members of our society. The will require a focused and methodical effort to:

Identify and address common areas of developmental delay

Identify and address the unique educational needs of students who are blind or visually impaired

Initiate and equip students with compensatory or functional academic skills, including communication modes

By implementing, assessing and adjusting its educational programs, population, LSVI will produce a more educated workforce and a more self sufficient citizenry, thus contributing to two of the governor's outcome goals. Particular focus and attention will be given to Braille literacy, ECC and vocational training.

#### **Evidence:**

The expanded core curriculum assessment results indicate that over 90% of the students enrolled in the residential program showed improvement in at least of the six life domains. In 2007 the rate was 95.58%, 2008 was 95%, and 2009 was 94.55% thus exceeding our goal of 90% despite increased enrollment.

Past performance indicators show 57% of the 08-09 graduates completed post secondary educational work as dually enrolled students in community college or technical college prior to graduation. The 06-07 class had 100% post secondary enrollment. The 07-08 classes had 66% who participated in dual enrollment or post secondary experiences. Budget cuts in FY 08-09 prevented LSVI from acquiring drivers to provide transportation for children to participate in the dual enrollment program.

All students enrolled at LSVI are served by Individualized Education Plans. However, not all students are pursuing a high school diploma. Approximately 50% of the population served are identified with multiple disabilities and are pursuing certificates of achievement. Statistical data indicates: 2007 – 84% achieved 80% of their IEP goals, 2008- 84.8% achieved 80% of their goals with a benchmark of 70%, in 2009 – 80.88% of the students achieved 80% of their goals. This decrease is contributed to mid-year enrollment.

In FY 10-11, students will be challenged to achieve a higher degree of success on IEP measured by a comprehensive team of individuals.

<b>Statutory Dedication:</b>	LB1	Louisiana Workmans Compensation 2nd Injury Board
------------------------------	-----	--

**Activity ID:** 289

**Activity Name:**

Administration of the Second Injury Board

**Department:** 14 Louisiana Workforce Commission

**Agency:** 475 Office of Workers' Compensation

**Program:** 2000 Injured Worker Reemployment

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

The Second Injury Board is funded by an annual assessment which is paid into the Second Injury Fund by all entities that pay Workers Compensation benefits to Louisiana employees. A change in the level of funding to the Board would affect reimbursement payments to the beneficiaries in either a positive or negative manner depending on whether the funding were increased or decreased.

**Activity Type:** Existing

**Objective:**

Administrative costs of the SIB will remain below 4% of claim reimbursement payments annually while maintaining efficient operations of the functions of the Board. This will reflect a greater percentage of funds being reimbursed to the beneficiaries ultimately furthering the program mission.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3965	Supporting	Percentage of Administrative Cost to Claim Payments	2	2.5	2	4	4
10395	Key	Percentage of Decisions Rendered Within 9 Months of Receipt	15	18.2	15.5	20	25

**Narrative:**

The Second Injury Board encourages the employment of physically handicapped employees who have a permanent, partial disability by protecting employers, group self-insured funds and property and casualty insurers from excess liability for workers compensation in certain instances. The Board is funded by an annual assessment that is paid into by all entities that pay Workers Compensation benefits to Louisiana employees who in turn seek reimbursement for qualifying claims. The claims for reimbursement must be investigated to determine if all criteria are met to qualify the claim to be reimbursed and audited to determine the eligible for reimbursement of payments.

**Explain How This Activity Advances State Outcome Goal:**

Proper administration of the Second Injury Board provides the beneficiaries of the Fund with the ability to lower the future exposure on those claims that are accepted by the Board. Lowering the exposure of these claims should ultimately result in lower premiums for employers and insurers as well as direct reduction in costs to self-insured employers and groups. This should in turn encourage the hiring or retaining of employees with preexisting permanent partial disabilities.

**Evidence:**

The Second Injury Board has maintained efficient operations while keeping administrative costs of the Board below the stated standard. Continuing to maintain proper efficiencies in the Board operations should be reflected in the continuation of lowering the claim exposure to the Fund beneficiaries.

**Activity Name:**

Fraud and Compliance Section

**Department:** 14 Louisiana Workforce Commission

**Agency:** 475 Office of Workers' Compensation

**Program:** 1000 Injured Workers' Benefit Protection

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

At current funding level, the Fraud and Compliance Sections are able to meet current performance measures as well as those tasks that are not measurable. Without current or continued funding, the functions of this activity unit, which include the collection of annual assessments which fund the OWCA, auditing of self-insured employers, as well as the investigation of allegations of workers' compensation fraud could not be accomplished.

**Activity Type:** Existing

**Objective:**

To complete investigations of allegations of workers' compensation fraud and create public awareness of its economic impact.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3904	Key	Percentage of Investigations Completed	95	95	95	95	95

**Narrative:**

The Office of Workers' Compensation Administration (OWCA) Fraud and Compliance Sections are enforcement arms of the Office of Workers' Compensation Administration (OWCA). They are charged with investigating fraudulent activity by any party affiliated with the Louisiana Workers' Compensation System, as well as ensuring that all employers within the State comply with their legal duty to be properly secured for workers' compensation coverage. These tasks are completed through the conducting of investigations of any allegations of fraudulent activity received through tips from the public, insurers, employers, law enforcement or the OWCA Hearings Division, as well as conducting of audits of self-insured employers to ensure proper compliance.

**Explain How This Activity Advances State Outcome Goal:**

The Office of Workers' Compensation Fraud and Compliance Sections are designed to enhance the economic environment of the State through enforcement of regulations pertaining to fraudulent and illegal conduct. By effectively identifying fraudulent activities of employees and referring these matters for prosecution, these actions can help the business community realize cost savings through the avoidance of payment of unwarranted benefits. Further, by identifying businesses who have failed to properly secure workers' compensation coverage and imposing fines and penalties authorized by law, legitimate and law-abiding businesses can be prevented from having to bear a disproportionate share of claims costs generated by uninsured employers.

**Evidence:**

The efforts of the Fraud and Compliance Section are easily recognizable by the increase in the number of investigations initiated over the past fiscal year. An increase of nearly 60% in the number of investigations initiated was realized from fiscal year 2008 to 2009. Additionally, criminal referrals increased from 3 in fiscal year 2008 to 16 in fiscal year 2009.

**Activity ID:** 142

**Activity Name:**

OSHA

**Department:** 14 Louisiana Workforce Commission

**Agency:** 475 Office of Workers' Compensation

**Program:** 3000 OSHA - Consultation

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Consultation services are provided through facility on-site consultative visits upon the request of the approximate 123,654 employers of the State of Louisiana, with special emphasis being given to the employers who are listed as high hazard industries based on their occupational exposure and illness and injury experiences. Additional funding would provide the means to increase the quality and quantity of safety and health program services provided to other employers that are not high hazard. Reduction in state funding could result in a decrease in services and subsequently lose federal funds required to operation the Section.

**Activity Type:** Existing

**Objective:**

The Workplace Safety Section will respond to 92% of requests received from high hazard private employers within 45 days of request.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3914	Key	Number of at risk employers inspected	541	541	541	541	541
3939	Key	Average number of days between requests and visits to high hazard employers with employment between 1-500	24	23	19	45	35
3944	Key	Average number of days from visit close to case closure	73	30	35	45	45

**Narrative:**

The Office of Workers' Compensation Workplace Safety and Health Section consists of two programs: Workplace Safety and OSHA Consultation. The Section is charged with providing consultation, regulation, enforcement and educational information to employers, regarding State of Louisiana and OSHA guidelines and regulations, in an effort to provide Louisiana workers and employers with a healthy and safe work environment, without levying fines and penalties

Safety and Industrial Health/Hygiene Consultants offer their expertise to Louisiana businesses in an effort to help those businesses develop and implement a comprehensive safety and health management system. OSHA consultants assist qualified businesses with participation in the Safety and Health Achievement Recognition Program (SHARP) and Workers' Compensation Cost Containment Program (CCP), providing them with an opportunity to enhance their safety program and realize a reduction in their workers' compensation premiums. Workplace Safety

consultants are charged with providing consultation, enforcement and educational information to employers regarding compliance with the Ten Point Safety Plan mandated by The Office of Workers' Compensation, Title 40, Chapter 9.

The Workplace Safety and Health Section also coordinates the Louisiana Office of Risk Management Annual Loss Prevention Audit for the Louisiana Workforce Commission. Also, this Section has developed and manages a quarterly database system for employers to report occupational illnesses and injuries; which allows the identification of employers needing assistance.

#### **Explain How This Activity Advances State Outcome Goal:**

The Office of Workers' Compensation Workplace Safety and Health Section offers Louisiana businesses free expertise in the field of workplace safety and health. Through the utilization of these programs, businesses have the opportunity to reduce the number and/or severity of work related accidents and injuries, thereby increasing productivity while reducing overhead related to insurance premiums. In doing so, improved workplace safety and the overall reduction of workers' compensation costs lead to a healthier business environment that will become more attractive to companies considering conducting business operations within our state. The OSHA Consultation Program funding consists of 90% Federal funds and 10% Office of Workers' Compensation Administration Self-Generated funds. The Workplace Safety Program is 100% funded by Office of Workers' Compensation Administration Self-Generated funds.

#### **Evidence:**

The Workplace Safety and Health Section embraces the State Outcome Goal for social services reform and is committed to improving its services to clients by continuing to focus on preventing workplace injuries and illnesses. In 2008, this Section identified 809 safety and health hazards and of this number 699 were serious hazards. Approximately 23,359 employers and employees benefited from these services. The Section conducted 1012 on-site visits. The Section assisted numerous outstanding employers in achieving the national safety and health certification achievement recognition award. Seventeen state-wide seminars, training and speaking engagements were conducted. The Section received 8,173 consultation inquiries and requests for services. The Section processed 23,558 quarterly reports of occupational illnesses and injuries. With full staff in place, this Section will continue to provide outstanding and unequivocal safety and health program services to the employers and employees of the State of Louisiana.

**Activity ID:** 359  
**Activity Name:** Hearings  
**Department:** 14 Louisiana Workforce Commission  
**Agency:** 475 Office of Workers' Compensation  
**Program:** 1000 Injured Workers' Benefit Protection  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** True

**Scalable Description:**

At current funding level, the hearings Section is unable to meet current performance measures, as well as those tasks that are not measurable. Increased funding is needed to address the administrative, clerical and judicial functions of this activity unit, required by the filing of more than 7,000 preferred provider (PPO) claims filed throughout the state. These PPO claims are not directly related to injured workers but generally involve disputes between health care providers, insurers and employers. Current funding is barely sufficient to address the administrative tasks involved in handling the approximate 8,000 non-PPO claims filed annually, in this activity unit, which do involve injured workers. Without increased funding, the functions of this activity unit, which is to resolve disputed claims between employees, employers, health care providers and insurers is unsustainable.

**Activity Type:** Existing

**Objective:**

The objective of the Hearings Section is to provide timely resolution of disputed workers' compensation claims filed by employees, employers, health care providers and insurers by reducing the average duration of a claim by 12% by FY 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Decrease the average duration of a claim by 4%	0	0	0	0	4

**Narrative:**

A claim for benefits, the controversion of entitlement to benefits, or other relief under the Workers' Compensation Act is initiated by the filing of a LDOL- WC 1008 or Disputed Claim for Compensation form or can also be filed by petition. Once the claim is filed the injured employee may request an initial mediation conference during which a workers' compensation mediator attempts to resolve the dispute informally. If the dispute is not resolved informally, the parties proceed through the judicial process until it is amicably settled by the parties, either by compromise or a lump sum. If it is not settled a trial is held by a workers' compensation judge and a final decision rendered. Court activity is concluded in a claim when it is either settled or a final judgment rendered. The number of days between the filing of the 1008 and the conclusion of court activity is averaged for all claims closed in a month. The goal is that the average of the days to closure should not exceed 180 days.

**Explain How This Activity Advances State Outcome Goal:**

The average delay for closing 1008s is a picture of the efficiency with which this activity unit resolves disputed claims. It is also a reflection of the speed with which injured workers are returned to work. There is a direct correlation between this number and health care dollars spent per injured worker and dollars paid to injured workers in the form of indemnity benefits. Lower average delays for closing 1008s reflect lower health care costs and indemnity benefits and ultimately decreased costs of doing business in this state for employers.

**Evidence:**

Obviously, the longer an injured worker remains out of work the higher the costs to the employer in dollars paid out in indemnity and health care benefits. It is also quite obvious that workers' compensation can become unexpectedly complicated and expensive when disputed claims are filed. Therefore, it is in the best interest of all workers' compensation stakeholders to return the worker back to work as quickly as possible. The Hearings Section is an integral part of the best interest of the stakeholders inasmuch as its r'aison d'etre is to resolve disputed claims. Hearings uses both formal and informal methods to accomplish this purpose. The sooner the Hearings section can conduct a trial and render a final decision regarding the injured worker's entitlement to workers' compensation benefits and return to work status the lower the costs for all interested parties. Moreover, Hearings may further reduce the cost of workers' compensation to its employers if it were provided the legislative and financial wherewithal to resolve claims before they become disputes. Hearings is exploring this option by offering pre-1008 mediation to the workers' compensation community.

**Activity ID:** 262

**Activity Name:**

Support Services

**Department:** 14 Louisiana Workforce Commission

**Agency:** 474 Office of Workforce Development

**Program:** 7000 Management and Finance

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

This activity is scalable to the extent that sufficient staffing levels are required to adequately support program activities. However, the department continues to seek out opportunities to reduce expenditures on administrative staff and to redirect those savings to services for customers.

**Activity Type:** Existing

**Objective:**

To help provide and support effective and quality management by 1) providing accurate and timely financial information to business units and 2) by having an accurate and complete PPR system.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23157	Supporting	Percent of quarterly allocations completed in 45 days	0	0	0	0	85
23158	Supporting	Percent PPR's completed timely and within Civil Service guidelines	0	0	0	0	85
23159	Supporting	Percent of LWC supervisory level staff that receive required LWC and State Civil Service developmental training	0	0	0	0	85

**Narrative:**

This activity is designed to improve the LWC's organizational capacity to pursue its vision, mission, and goals in a timely and sustainable manner. These services assist primary program providers by providing the necessary talent to delivery quality services to customers, properly account for millions of dollars of federal and state funding, and procurement of services and equipment. This activity provides an environment that enables the service units to concentrate on their core mission of providing workforce development services to business and citizens of the state in furtherance of the state outcome goal of economic diversification. Employee development is a key to successfully implementing an integrated workforce development system. A comprehensive employee performance evaluation system is critical to increase the agency's overall performance.

**Explain How This Activity Advances State Outcome Goal:**

To provide support services to Office of Workforce Development and Office of Workers Compensation in support of state goals regarding social and economic development reform.

**Evidence:**

The agency successfully implemented a new employee performance management system, key management level positions have been filled with qualified staff, and no audit findings resulted in disallowed cost.

**Activity ID:** 208

**Activity Name:**

Customized Training

**Department:** 14 Louisiana Workforce Commission

**Agency:** 474 Office of Workforce Development

**Program:** 9000 Incumbent Worker Training Program

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

An increase in funding would allow for enhanced capacity in the IWTP Customized Training Program, which would help to build a diversified portfolio of businesses across multiple industry sectors in Louisiana. Enhanced funding would further promote the building of capacity of the state's workforce through customized training tailored to the needs of individual companies, sectors, and occupations. This would perpetuate further job creation, average wage increases, as well as retained jobs. A decrease in funding would result in fewer or smaller customized grants being awarded to Louisiana businesses. This would impede the ability of these businesses to train and maintain a competitive workforce. This decrease in workforce competitiveness would be manifested across a broad array of industry sectors. This lack of competitiveness would almost certainly lead to the stagnation of salaries, and the cancellation of many proposed business expansions.

**Activity Type:** Existing

**Objective:**

As a direct result of IWTP Customized Training increase the number of new jobs create by 10% annually; target 50% of customized training to regionally identified high demand occupations; and increase the number of incumbent workers trained per year by 10%.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23168	Key	Increase the number of new jobs created as a direct result of IWTP training by 10% annually	0	0	0	975	1210
New	Key	Increase the number of incumbent workers trained per year by 10%	0	0	0	0	3300
23167	Key	Percentage of employees trained in LWC defined regionally targeted occupations.	0	0	0	0	50

**Narrative:**

The program provides funds for Louisiana businesses to partner with Louisiana based training providers in order to deliver customized training to the employees of the awarded company. This activity aligns training and educational programs with current and future workforce needs as driven by the needs of Louisiana employers. The intent is to increase the workers' skills, prevent the loss of jobs, as well as create new jobs. Additionally, this activity advances the state's economic reform goals by building a diversified portfolio of businesses across multiple industry sectors, many of which are positioned to grow by retaining, growing and attracting good jobs by making strategic investments in the state's workforce.

**Explain How This Activity Advances State Outcome Goal:**

A company's workforce typically plays a critical role in determining the success of that entity. Consequently, most business executive decisions pertaining to significant business initiatives involve quality and quantity of workforce as a key consideration criteria. IWTP Customized Training promotes both the quality and capacity of the Louisiana Workforce. In fiscal year 2008-2009, 692 Louisiana companies received training funds; this resulted in 69,460 Louisiana employees receiving customized training through IWTP. Among those workers who received a pay increase as a result of training, the average increase was 14%. The program encourages employer contributions toward the training, in the form of contributing to the cost of training or through in-kind contributions such as donations of equipment or use of facilities for training. In IWTP contracts approved in fiscal year 2008-2009, employers committed to \$6,411,988 in contributions on \$25,878,709 in total awards. This represents an employer contribution of 25% of the funds awarded, a one to four match.

**Evidence:**

Since inception in fiscal year 1998-1999, the Incumbent Worker Training Program has awarded over \$380,000,000 in training contracts to 1,962 Louisiana businesses. 354,565 Louisiana workers have received training at an average cost of \$736 per student. In the last three fiscal years, employers receiving IWTP grants have reported retaining 72,881 jobs. The Louisiana Workforce Commission recently issued revised guidelines that give special emphasis to training in regionally targeted demand occupations, which will result in an increase in this type of training. Customer satisfaction reports submitted by employers each quarter consistently show approval ratings of 9 on a scale of 1 to 10, 10 being "excellent", to describe the company's overall satisfaction with the services of IWTP. The participation by over 120 Louisiana training providers (public and private institutions) in the IWTP demonstrates the commitment of the State's educational system to this program. Performance to date and commitment to the program by Louisiana's business and education communities support the continued attainment of growth in Louisiana workforce development through the Incumbent Worker Training Program.

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To achieve 90% of agency performance objectives by FY 2012.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23154	Key	Percentage of Performance objectives achieved	0	0	0	70	80

**Narrative:**

This activity provides executive level leadership and administrative services to support the agency's effort to build a well trained workforce and become the indispensable provider of workforce solutions.

**Explain How This Activity Advances State Outcome Goal:**

To provide support services to the Office of Workforce Development and Office of Worker's Compensation in support of state goals regarding social and economic development reform.

**Evidence:**

A key to diversified economic growth is to assure the availability of a qualified Workforce. The leadership of LWC managed to pass sweeping legislation designed to reinvent the existing workforce development programs into a comprehensive, integrated service delivery system designed to make the best use of limited funding for workforce training. Also, the Office of Workforce Development successfully met 100% of its federally mandated performance objectives.

Information Technology Services

**Department:** 14 Louisiana Workforce Commission

**Agency:** 474 Office of Workforce Development

**Program:** 8000 Occupational Information System

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Information Technology (IT) infrastructure must be scalable in order to support the fluctuations in the agency’s workload and to adapt to technological advancements in the industry. It is imperative that adequate funding is available to enhance infrastructure and modernize the Workforce Commission’s processes.

**Activity Type:** Existing

**Objective:**

To provide quality information technology services to agency business units and stakeholders achieving customer satisfaction rate of 90%.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23160	Key	Percent of internal Customers who indicate satisfaction with information technology services	0	0	0	85	90

**Narrative:**

Develop, maintain and provide IT support services to all divisions and programs of the LWC. Major functions of LWC include: Unemployment Insurance, Workers’ Compensation and Workforce Development. Evaluate, purchase and maintain hardware and software to support the agency’s technology infrastructure. IT also supports 50+ area offices providing LWC services across the state.

**Explain How This Activity Advances State Outcome Goal:**

With IT supporting the agency’s programs, employers, unemployed workers, injured workers and job seekers are able to access relevant LWC services timely. Clients can access a majority of these services through the internet.

**Evidence:**

The LWC IT infrastructure continues to provide secure, robust, timely and accurate services to all users. The systems are capable of handling increased workloads as was evidenced following Hurricane Katrina. IT processed over 350,000 unemployment claims in a six week period, and paid those claims weekly. Before Katrina, IT was only processing 3,000 initial claims and paying out 30,000 claims a week. During the same period, IT implemented paying weekly benefits through Debit Cards, replacing paper checks. We have well trained and dedicated staff, who are knowledgeable in both technology and business processes to provide service to all programs of LWC.

**Narrative:**

This activity provides executive level leadership and administrative services to support the agency's effort to build a well trained workforce and become the indispensable provider of workforce solutions.

**Explain How This Activity Advances State Outcome Goal:**

To provide support services to the Office of Workforce Development and Office of Worker's Compensation in support of state goals regarding social and economic development reform.

**Evidence:**

A key to diversified economic growth is to assure the availability of a qualified Workforce. The leadership of LWC managed to pass sweeping legislation designed to reinvent the existing workforce development programs into a comprehensive, integrated service delivery system designed to make the best use of limited funding for workforce training. Also, the Office of Workforce Development successfully met 100% of its federally mandated performance objectives.

**Activity ID:** 301  
**Activity Name:**  
 Unemployment Insurance Taxes  
**Department:** 14 Louisiana Workforce Commission  
**Agency:** 474 Office of Workforce Development  
**Program:** 3000 Unemployment Benefits  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** True

**Scalable Description:**

The U.I. program must be scalable in order to respond to normal fluctuations in claims load and catastrophic events such as recessions and natural disasters. It is imperative that adequate funding is available to efficiently collect employer payments that provide for UI claim benefits. Proper funding further supports continued improvements to the operation methods specific to LWC which enhances our service to our clients and encourages growth of our employer base.

**Activity Type:** Existing

**Objective:**

To provide benefits to the unemployed worker and maintain the solvency and integrity of the Unemployment Insurance Trust Fund by collecting quarterly unemployment taxes from liable employers and depositing 100% of taxes in three days.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3820	Key	Percentage of liable employers issued account numbers within 180 days	89	90	90	89	90
3829	Key	Percentage of monies deposited within 3 days	99	99	97	95	99

**Narrative:**

The Unemployment Insurance (UI) Tax Section is responsible for the registration of employers, assignment of tax rates and collection of taxes from employers determined to be subject under Louisiana Employment Security Law and liable to pay UI taxes. This is a business tax on an employer's payroll and not a deduction from employee wages. Employers are responsible for submitting quarterly employee payroll data along with the payment of UI taxes. Taxes are deposited into the UI Trust Fund within 3 days of receipt, and are used to pay unemployment compensation to the unemployed. The payroll data is utilized in determining the monetary eligibility of unemployment claims. Compliance audits are conducted to ensure employers are reporting properly, to obtain missing wage data and to collect delinquent taxes.

**Explain How This Activity Advances State Outcome Goal:**

The Unemployment Insurance (UI) program acts as an economic stabilizer, allowing individuals who have lost their jobs to remain in the local area while they receive training and search for employment. The UI benefits paid out of the Trust Fund from employer collections provide economic stimulus to the local area. The UI Trust Fund has been solvent for many years without borrowing from the federal government, thus reducing the tax burden to employers. Our tax rating system is designed with triggers to allow employer tax rate reductions for high Trust Fund levels, which has consistently been achieved for almost 20 years, while simultaneously providing funding for the Incumbent Worker Training Program (IWTP). By maintaining a healthy UI Trust Fund, employer tax rates and the taxable wage

base have been kept low, thereby attracting new employers to the state, encouraging existing employers to expand, and providing employment to our population.

**Evidence:**

The Unemployment Insurance (UI) program has been the cornerstone of the Louisiana Workforce Commission for over Fifty (50) years. We have trained and dedicated staff, and information technology infrastructure in place to operate an effective program. Our depth of experience is unparalleled. Following Hurricane Katrina we processed over 350,000 claims in a six week period and paid out over \$1.1 billion in benefits to Louisiana citizens, while effectively providing customer service to over 100,000 employers, collecting taxes and depositing into the Trust Fund. We have consistently met and exceeded previous performance indicators in the registration of new employers and timely depositing of quarterly taxes.

23171	Key	Percent of first payments to intrastate claimants with issues within 28 days of the end of the first payable week	0	0	0	0	80

**Narrative:**

The Unemployment Insurance (UI) Benefits Section is responsible for paying benefits to unemployed individuals in accordance with provisions of the Louisiana Employment Security Law. Funds used to pay benefits come from the UI Trust fund that is financed by quarterly payroll taxes paid by Louisiana employers. Administrative responsibility includes the determination of: monetary entitlement, weekly eligibility, deductible income, and non-monetary eligibility, including disqualifications for voluntary leaving and misconduct discharges. Initial and weekly claims are filed over the Internet or by telephone through the UI Call Center. Non-monetary determinations are issued through the adjudication unit. Timely payment of the first week of eligibility is the primary performance goal.

**Explain How This Activity Advances State Outcome Goal:**

The state UI program falls under the state outcome goal "Diversified Economic Growth". The Unemployment Insurance (UI) program is an economic stabilizer, because it allows individuals who have lost their jobs to remain in the local area while they receive training and search for subsequent employment. Following a mass lay off, UI benefits help keep the labor force intact and are a direct boost to the local economy.

**Evidence:**

The Unemployment Insurance (UI) program has been the cornerstone of the Louisiana Workforce Commission for over Fifty (50) years. We have trained and dedicated staff along with a proven information technology infrastructure in place to operate an effective program. Our depth of experience is unparalleled. Following Hurricane Katrina we processed over 350,000 claims in a six week period and paid out over \$1.1 billion in benefits to Louisiana citizens.

**Activity ID:** 292  
**Activity Name:**  
 Jobseeker Services  
**Department:** 14 Louisiana Workforce Commission  
**Agency:** 474 Office of Workforce Development  
**Program:** 4000 Job Training and Placement  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** True

**Scalable Description:**

The number of jobseekers and businesses served are connected to the amount of funding received. Additionally, the ability to successfully integrate programs and workforce development activities across agencies at the service delivery level depends on leveraging of resources and adequate funding.

**Activity Type:** Existing

**Objective:**

LWC leverages and integrates federally funded employment and training programs, across agencies to increase the number of participants receiving LWC services entering or re-entering the labor market and achieving self-sufficiency by 2012.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23164	Key	Percent of adult and dislocated workers employed after receipt of services	0	0	0	0	65
23166	Key	Percent of youth that obtain a Degree or Certification after receipt of services	0	0	0	0	50
New	Key	Percentage of individuals served achieving locally-defined self-sufficient wages.	0	0	0	0	10

**Narrative:**

Act 743 charges the Louisiana Workforce Commission to begin taking steps to integrate, to the extent practical, the administration and functions of the various workforce training and education programs of the state to achieve efficient, effective and demand-driven delivery of services. By strategically leveraging federal Workforce Investment Act (WIA) funds with workforce dollars from integrating agencies, employment services to the youth, adult, dislocated, unemployed, and underemployed of our state can be better aligned to be more efficient. Additionally, consolidation and integration efforts empower regional and local WIA leadership to set the overall policy and vision for the operation of programs within the 18 Business and Career Solutions Centers that provide the required core services for jobseekers and employers and targeted investments supporting those regional economies.

**Explain How This Activity Advances State Outcome Goal:**

Employment services are designed to assist clients to acquire, a job and/or reenter into the workforce, start a business and/or become self-employed, obtain training in a specific job skill, etc.  
 Education services are designed to improve job opportunities and competency skills, life skills and work readiness skills through securing adequate education training. WIA and other federal funding are allocated to provide workforce training services to youth, adults, the unemployed and underemployed. Through LWC's redesign initiative using the career exploration process, targeted populations will be afforded access to an integrated service delivery system

designed to assist individuals with multiple barriers to employment. This systems establishes integration of workforce training programs, job skills training throughout different agencies to align resources, provide non-duplication of administrative processes and overall improved performance.

**Evidence:**

To ensure the seamless delivery of effective and efficient services to Business and Career Solutions customers, the LWC reviews both the operation and management of its Business and Career Solutions Centers and the function of Local Workforce Investment Boards. There are specific regulations, and policies from the federal government that dictate the scope of the monitoring, and in some cases, how often they are to be monitored. Monitoring consists of programmatic review, financial review, Internal Controls review and a review to ensure compliance with the uniform administrative requirements. The monitoring process highlights compliance, service quality and consistency standards and best practices.

**Activity ID:** 262

**Activity Name:**

Support Services

**Department:** 14 Louisiana Workforce Commission

**Agency:** 474 Office of Workforce Development

**Program:** 7000 Management and Finance

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

This activity is scalable to the extent that sufficient staffing levels are required to adequately support program activities. However, the department continues to seek out opportunities to reduce expenditures on administrative staff and to redirect those savings to services for customers.

**Activity Type:** Existing

**Objective:**

To help provide and support effective and quality management by 1) providing accurate and timely financial information to business units and 2) by having an accurate and complete PPR system.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23157	Supporting	Percent of quarterly allocations completed in 45 days	0	0	0	0	85
23158	Supporting	Percent PPR's completed timely and within Civil Service guidelines	0	0	0	0	85
23159	Supporting	Percent of LWC supervisory level staff that receive required LWC and State Civil Service developmental training	0	0	0	0	85

**Narrative:**

This activity is designed to improve the LWC's organizational capacity to pursue its vision, mission, and goals in a timely and sustainable manner. These services assist primary program providers by providing the necessary talent to delivery quality services to customers, properly account for millions of dollars of federal and state funding, and procurement of services and equipment. This activity provides an environment that enables the service units to concentrate on their core mission of providing workforce development services to business and citizens of the state in furtherance of the state outcome goal of economic diversification. Employee development is a key to successfully implementing an integrated workforce development system. A comprehensive employee performance evaluation system is critical to increase the agency's overall performance.

**Explain How This Activity Advances State Outcome Goal:**

To provide support services to Office of Workforce Development and Office of Workers Compensation in support of state goals regarding social and economic development reform.

**Evidence:**

The agency successfully implemented a new employee performance management system, key management level positions have been filled with qualified staff, and no audit findings resulted in disallowed cost.

**Activity Name:**  
Youth Worker Protection  
**Department:** 14 Louisiana Workforce Commission  
**Agency:** 474 Office of Workforce Development  
**Program:** 6000 Worker Protection  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** True

**Scalable Description:**

Additional funding would lead to an increase in staffing which would broaden exposure and enforcement efforts thus enhancing employer and public awareness.

**Activity Type:** Existing

**Objective:**

To conduct 7500 compliance inspections annually to ensure proper field presence and to heighten public awareness so that minors in the workplace are protected and their work experience enhances, not hampers, their education.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3864	Key	Number of inspections conducted	5835	5049	5152	6800	7500

**Narrative:**

Staff provides services and assistance to businesses and jobseekers as well as oversight and compliance audits relative to statutory requirements related to Louisiana's Minor Labor Law, Private Employment Service Law and Medical Exam and Drug Testing Law.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the state's economic reform goal by assisting employers develop and maintain a qualified competitive workforce. Minors are ensured a work environment that will not adversely affect their health, safety, well being and education resulting in fewer on the job injuries and less dropouts and promoting self sufficiency and a successful career path. Active and effective worker protection programs across multiple industry sectors will ensure level playing fields and discourage out migration of qualified workers thus increasing the state's economic competitiveness by improving its overall business climate.

**Evidence:**

Worker protection programs are essential in attracting and maintaining a confident, qualified workforce that is aligned with the needs of the current and future Louisiana economy. Ensuring that minors receive their initial general work ethic and soft skills work experience in an environment which is safe and conducive to garnering marketable skill training is paramount to building a strong workforce pipeline. Developing an internal policy of allowing employers the opportunity to correct their mistakes and demonstrate appropriate corrective measures before consideration of civil money penalties has fostered strong working relationships between employers and this agency. Within the Labor Programs Unit, enforcement means education and assistance, not just fines. The strongest evidence of this is that 99% of all past cases have been resolved at reduced level of penalties in exchange for the employer's cooperation and commitment to future compliance.

**Activity Name:**  
Information Technology Services

**Department:** 14 Louisiana Workforce Commission

**Agency:** 474 Office of Workforce Development

**Program:** 8000 Occupational Information System

**State Outcome Goal:** 2 Economic Development

**Scalable:** True

**Scalable Description:**

Information Technology (IT) infrastructure must be scalable in order to support the fluctuations in the agency's workload and to adapt to technological advancements in the industry. It is imperative that adequate funding is available to enhance infrastructure and modernize the Workforce Commission's processes.

**Activity Type:** Existing

**Objective:**

To provide quality information technology services to agency business units and stakeholders achieving customer satisfaction rate of 90%.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23160	Key	Percent of internal Customers who indicate satisfaction with information technology services	0	0	0	85	90

**Narrative:**

Develop, maintain and provide IT support services to all divisions and programs of the LWC. Major functions of LWC include: Unemployment Insurance, Workers' Compensation and Workforce Development. Evaluate, purchase and maintain hardware and software to support the agency's technology infrastructure. IT also supports 50+ area offices providing LWC services across the state.

**Explain How This Activity Advances State Outcome Goal:**

With IT supporting the agency's programs, employers, unemployed workers, injured workers and job seekers are able to access relevant LWC services timely. Clients can access a majority of these services through the internet.

**Evidence:**

The LWC IT infrastructure continues to provide secure, robust, timely and accurate services to all users. The systems are capable of handling increased workloads as was evidenced following Hurricane Katrina. IT processed over 350,000 unemployment claims in a six week period, and paid those claims weekly. Before Katrina, IT was only processing 3,000 initial claims and paying out 30,000 claims a week. During the same period, IT implemented paying weekly benefits through Debit Cards, replacing paper checks. We have well trained and dedicated staff, who are knowledgeable in both technology and business processes to provide service to all programs of LWC.

			Prior FY	2 Yrs Ago	3 Yrs Ago		
23170	Key	Percent of first payments to intrastate claimants without issues withing 7 days of the end of the first payable week	0	0	0	0	95
23171	Key	Percent of first payments to intrastate claimants with issues within 28 days of the end of the first payable week	0	0	0	0	80

**Narrative:**

The Unemployment Insurance (UI) Benefits Section is responsible for paying benefits to unemployed individuals in accordance with provisions of the Louisiana Employment Security Law. Funds used to pay benefits come from the UI Trust fund that is financed by quarterly payroll taxes paid by Louisiana employers. Administrative responsibility includes the determination of: monetary entitlement, weekly eligibility, deductible income, and non-monetary eligibility, including disqualifications for voluntary leaving and misconduct discharges. Initial and weekly claims are filed over the Internet or by telephone through the UI Call Center. Non-monetary determinations are issued through the adjudication unit. Timely payment of the first week of eligibility is the primary performance goal.

**Explain How This Activity Advances State Outcome Goal:**

The state UI program falls under the state outcome goal "Diversified Economic Growth". The Unemployment Insurance (UI) program is an economic stabilizer, because it allows individuals who have lost their jobs to remain in the local area while they receive training and search for subsequent employment. Following a mass lay off, UI benefits help keep the labor force intact and are a direct boost to the local economy.

**Evidence:**

The Unemployment Insurance (UI) program has been the cornerstone of the Louisiana Workforce Commission for over Fifty (50) years. We have trained and dedicated staff along with a proven information technology infrastructure in place to operate an effective program. Our depth of experience is unparalleled. Following Hurricane Katrina we processed over 350,000 claims in a six week period and paid out over \$1.1 billion in benefits to Louisiana citizens.

**Activity Name:**  
 Unemployment Insurance Taxes  
**Department:** 14 Louisiana Workforce Commission  
**Agency:** 474 Office of Workforce Development  
**Program:** 3000 Unemployment Benefits  
**State Outcome Goal:** 2 Economic Development  
**Scalable:** True

**Scalable Description:**

The U.I. program must be scalable in order to respond to normal fluctuations in claims load and catastrophic events such as recessions and natural disasters. It is imperative that adequate funding is available to efficiently collect employer payments that provide for UI claim benefits. Proper funding further supports continued improvements to the operation methods specific to LWC which enhances our service to our clients and encourages growth of our employer base.

**Activity Type:** Existing

**Objective:**

To provide benefits to the unemployed worker and maintain the solvency and integrity of the Unemployment Insurance Trust Fund by collecting quarterly unemployment taxes from liable employers and depositing 100% of taxes in three days.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3820	Key	Percentage of liable employers issued account numbers within 180 days	89	90	90	89	90
3829	Key	Percentage of monies deposited within 3 days	99	99	97	95	99

**Narrative:**

The Unemployment Insurance (UI) Tax Section is responsible for the registration of employers, assignment of tax rates and collection of taxes from employers determined to be subject under Louisiana Employment Security Law and liable to pay UI taxes. This is a business tax on an employer's payroll and not a deduction from employee wages. Employers are responsible for submitting quarterly employee payroll data along with the payment of UI taxes. Taxes are deposited into the UI Trust Fund within 3 days of receipt, and are used to pay unemployment compensation to the unemployed. The payroll data is utilized in determining the monetary eligibility of unemployment claims. Compliance audits are conducted to ensure employers are reporting properly, to obtain missing wage data and to collect delinquent taxes.

**Explain How This Activity Advances State Outcome Goal:**

The Unemployment Insurance (UI) program acts as an economic stabilizer, allowing individuals who have lost their jobs to remain in the local area while they receive training and search for employment. The UI benefits paid out of the Trust Fund from employer collections provide economic stimulus to the local area. The UI Trust Fund has been solvent for many years without borrowing from the federal government, thus reducing the tax burden to employers. Our tax rating system is designed with triggers to allow employer tax rate reductions for high Trust Fund levels, which has consistently been achieved for almost 20 years, while simultaneously providing funding for the Incumbent Worker Training Program (IWTP). By maintaining a healthy UI Trust Fund, employer tax rates and the taxable wage

base have been kept low, thereby attracting new employers to the state, encouraging existing employers to expand, and providing employment to our population.

**Evidence:**

The Unemployment Insurance (UI) program has been the cornerstone of the Louisiana Workforce Commission for over Fifty (50) years. We have trained and dedicated staff, and information technology infrastructure in place to operate an effective program. Our depth of experience is unparalleled. Following Hurricane Katrina we processed over 350,000 claims in a six week period and paid out over \$1.1 billion in benefits to Louisiana citizens, while effectively providing customer service to over 100,000 employers, collecting taxes and depositing into the Trust Fund. We have consistently met and exceeded previous performance indicators in the registration of new employers and timely depositing of quarterly taxes.

------------------------------	-----	------------------------------

**Activity ID:** 295

**Activity Name:**

Coastal Zone Management

**Department:** 11 Department of Natural Resources

**Agency:** 435 Office of Coastal Restoration and Management

**Program:** 1000 Coastal Restoration and Management

**State Outcome Goal:** 8 Natural Resources

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To ensure that the loss of wetlands resulting from activities regulated by the coastal management program will be offset by actions that fully compensate for their loss on an annual basis and thereby insure that there is no net loss of wetland value due to these activities.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3432	Key	Percentage of Disturbed Wetland Habitat units that are Mitigated by Full Compensation of Loss	112	110	104	100	100

**Narrative:**

Through the Coastal Zone Management Activity the Department of Natural Resources ensures that there is no net loss of wetland value due to activities that are regulated. This is accomplished through permitting, consistency determinations and field investigations. Coastal Use Permitting requires a sequencing approach to avoid, minimize and where necessary mitigate for unavoidable impacts to wetland habitat. The permitting is accomplished through a cooperative effort among Local, State and Federal agencies which begins with a joint public notice that is performed through contract services at the Department of Natural Resources. The joint public notice includes the State/Local Coastal Use Permit, U.S. Army Corps of Engineers Wetland Section 404 Permit and Louisiana Department of Environmental Quality's Water Quality Certification. The Coastal Use Permitting process includes comments from Local, State and Federal Resource agencies to ensure that agency concerns are addressed. Federal Consistency determinations require that federal actions taken be consistent with Louisiana's Coastal Resources Program and thereby ensure that the federal actions do not have an adverse impact on wetland habitat. Through its field investigations the Office of Coastal Management is able to properly evaluate project impacts as well as identify projects that may have taken place without being permitted and take appropriate enforcement action to see that mitigation of wetland impacts is accomplished.

**Explain How This Activity Advances State Outcome Goal:**

The Coastal Zone Management Activity advances the State's Outcome Goal of natural resources by protecting our abundant natural resources to preserve Louisiana as a sportsman's paradise. Through coastal management, coastal wetland habitat is preserved and the wildlife and fisheries of our coastal zone remain one of the most productive in

the nation. The preservation of coastal wetland habitat serves to protect our state, citizens and wildlife from storm damage. The importance of this program is evidenced by the impacts to coastal Louisiana that have occurred due to man's activities prior to coastal management regulation and is further evidenced by the impacts caused by recent hurricanes. In addition, due to the effective implementation of the State Coastal Wetlands Conservation Plan, the State match on Federal funding for Coastal Wetlands Planning, Protection and Restoration Act (CWPPRA) projects has been reduced from 25 to 15% saving the State millions of dollars in its battle to fight coastal erosion and provide hurricane protection. This has resulted in a net savings over the past 10 years of greater than \$60 million. Coastal wetlands also serve an important function as a filtering system that provides environmental protection for coastal waters. This activity has been successful in achieving no net loss of wetland habitat for many years and it is projected it will continue to be successful due to processes put in place that ensure project impacts are avoided, minimized and /or mitigated. This activity is accomplished through a cooperative effort of Local, State, and Federal agencies using a computerized permitting system that ensures efficiency, effectiveness and transparency. The State receives federal grant funds from the National Oceanographic and Atmospheric Administration (NOAA) to administer the program which requires matching funds. State match is provided through the Coastal Resources Trust Fund and Coastal Protection and Restoration Fund.

#### **Evidence:**

The Coastal Zone Management activity has been effective in ensuring no net loss of wetland habitat due to activities that are regulated. This is evidenced by the activity meeting its performance indicator of percentage of disturbed wetland habitat units mitigated by full compensation of loss. This activity allows multiple uses of the coastal zone and encourages the development of the coastal economy while protecting the citizens and natural resources of our coastal zone. In 2006, over 2 million residents, more than 47% of the state's population, lived in Louisiana's coastal parishes. Among the 50 states, Louisiana ranks 1st in crude oil production and 2nd in natural gas production with much of that exploration, development and production occurring in or supported by facilities/communities located in the coastal zone or outer continental shelf. Significant economic impact is realized within the coastal zone from waterborne commerce (5 of the top 15 ports in the US are located in LA), commercial and recreational fishing, hunting, wildlife watching, and fur and timber harvest. Management of the coastal resources to provide multiple uses and protect our natural resources and habitats are accomplished through the coastal zone management activity. Evidence clearly points out that we must protect the coastal area through management practices to be cost effective and timely in our coastal protection efforts as the cost of coastal restoration efforts continue to rise and the impacts of storms continues to magnify. Coastal wetlands serves as a natural buffer for protection of storm surge, provide important habitat for many coastal species and serve as a filtering mechanism for our coastal waters. The effective implementation of the State Coastal Wetlands Conservation Plan, the State match on Federal funding for CWPPRA projects has been reduced from 25 to 15% saving the State millions of dollars in its ongoing battle to fight coastal erosion and provide hurricane protection. Marine fisheries and oyster production are integral components of the coastal economy and had a gross farm value of greater than \$268 million in 2007. Coastal management is a key activity in providing protection of these and other valuable natural resources of coastal Louisiana.

**Activity ID:** 271

**Activity Name:**

Business Support Services

**Department:** 11 Department of Natural Resources

**Agency:** 431 Office of the Secretary

**Program:** 2000 Management and Finance

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Reduction in the funds will have an adverse impact on this activity, and could result in a repeat audit finding.

**Activity Type:** Existing

**Objective:**

To provide a timely and cost effective administration of accounting and budget controls, procurement and contract management, data processing (SONRIS), management and program analysis, personnel management and grants management that complies with state and federal laws and accounting principles.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6763	Key	Number of Repeat Audit Exceptions	0	0	0	0	0
23101	Key	Percentage of FTE's Reduced	0	0	0	5	5

**Narrative:**

This activity is responsible for accounting and budget control, procurement and contract management, data processing management and program analysis, personnel management, and grants & contracts management for the department, all of its offices and the Governor's Office of Coastal Protection and Restoration (OCPR). Included in this activity is the Strategic Online Natural Resources Information System (SONRIS). SONRIS provides complete online access to all oil and gas records (production, well location, depth, ownership, etc.), all state water bottom leases, status of coastal use permits and permit applications, and coastal project status. This information may be accessed by record number or geographical location through the GIS applications at no cost to the user. Support accounting services administers a current year operating budget including OCPR, of \$280,025,689.00; a capital outlay appropriations, including OCPR, of \$705,687,854.00 and is responsible for collecting and classifying of major state revenue of \$704,767,964.00. Support services contracts in FY 08/09 managed \$1,907,727,000.91 of contracts and amendments (88 contracts and 150 amendments); and \$931,596,664.26 grants and amendments (27 grants and 57 amendments). Human Resources managed over 14,000 personnel transactions as well as provided safety training for over 500 employees and averaged 75 employee contacts per day during fiscal year 2008/09. Support purchasing processed 3,867 total orders. Internal Audit performed 36 internal audits and program reviews.

**Explain How This Activity Advances State Outcome Goal:**

Having an effective support services activity increases our ability to conserve, restore and preserve the natural resources of the state. This activity through (SONRIS) facilitates economic development and provides transparency and accountability in governmental regulation in the oil and gas industry and coastal zone development. This activity

ensures the support needed to achieve the Governor's goal of an abundant and sustainable environment and natural resources.

**Evidence:**

The effectiveness of the support services activity has resulted in no repeat legislative audit findings in the last four years; and no audit findings for the last two years. A recent audit of Human Resources Division resulted in no findings by State Civil Service. The Federal Department of Transportation's audit of the Pipeline Safety Program revealed no administrative or fiscal findings. The SONRIS is regarded as the best online oil and gas reporting system in the United States by the oil and gas industry. Further evidencing the effectiveness of this activity is the fact that it is providing the support services for the new Governor's Office of Coastal Protection and Restoration (OCPR) created by Act 523 of 2009 with no increased staff. It must be pointed out that, in spite of the growth of coastal restoration activity and the creation of OCPR, the staff for this activity has not increased since FY 2005/06 and is actually being reduced by two next fiscal year.

**Activity ID:** 268

**Activity Name:**

Executive Administration

**Department:** 11 Department of Natural Resources

**Agency:** 431 Office of the Secretary

**Program:** 1000 Executive

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

The reduction in funds for this activity will affect the Department's ability to attain stated goals and objectives.

**Activity Type:** Existing

**Objective:**

Implement strategies so that the Department's goals and objectives are acheived.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23100	Key	Percentage of Department Performance Objectives Acheived	83	76	71	75	80

**Narrative:**

This activity provides integrated and coordinated leadership and executive guidance in upholding the mission of the Department of Natural Resources and in implementing the Governor's and Legislature's directives. This is performed through the activities of the Chief Administrative Officer (Secretary) Assistant Chief Administrative Officer (Deputy Secretary), Public Information and Legal Sections.

**Explain How This Activity Advances State Outcome Goal:**

This activity coordinates and directs the various Offices of the Department and ensures compliance with legislative mandates, administration policies, laws, rules and regulations. In this activity the leadership organizes, plans, supervised, directs, administers, executes, and is responsible for all functions and programs vested in the department. By diligent, prudent and wise performance of this activity the Governor's goal of abundant, sustaining natural resources for all current and future citizens to enjoy is achieved.

**Evidence:**

In the prior year the department exceeded its performance objective. The leadership provided by this activity is also evidenced by the role the department played in consolidating groundwater activities and aggressively pursuing the management of this natural resource, and facilitating the creation of an office to coordinate coastal restoration and flood control activities. Through the leadership provided by this activity the focus of the Atchafalaya Basin has been redirected to environmental concerns as part of an effort directed at long term preservation of the basin; and modernization of Louisiana's approach to its energy resources has been achieved as evidenced by the enhanced responsibility of the recently renamed Louisiana Mineral and Energy Board.

Also accomplished through the leadership provided by this activity was the reduction of the number of coastal use

authorizations with a greater than 90 day active processing review time was reduced from 150 to 4.

**Activity ID:** 283  
**Activity Name:**  
Oilfield Site Restoration  
**Department:** 11 Department of Natural Resources  
**Agency:** 432 Office of Conservation  
**Program:** 1000 Oil and Gas Regulatory  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Oilfield site restoration activity is outsourced to contractors, therefore an increase in funding is likely to result in a greater number of orphan sites restored. Inversely, a reduction in funding is likely to decrease the number of orphan sites restored in a given year.

**Activity Type:** Existing

**Objective:**

To properly plug and abandon orphaned wells and restore the associated surface locations thereby rendering locations suitable for redevelopment and protecting both the environment and the public.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23108	Key	Number of public safety incidents reported involving orphaned wellsites.	0	0	0	0	0
3401	Key	The number of orphaned wellsites restored to a condition suitable for redevelopment during fiscal year.	124	166	161	186	160

**Narrative:**

The Oilfield Site Restoration Activity (OSR) was created by Act 404 of the 1993 Regular Session to address the growing problem of unrestored orphaned oilfield sites across the State. Orphan wells are oil and gas wells for which no viable responsible party can be located, or such party has failed to maintain the wellsite in accordance with State rules and regulations. The specific focus of the Activity is to properly plug and abandon orphan wells and to properly restore the sites to approximate pre-wellsite conditions.

Revenue for the Activity is entirely generated from a fee on oil and gas production in the State of Louisiana which is paid quarterly by Louisiana oil and gas operators. These flat-rate fees are deposited to the oilfield site restoration fund which is dedicated by statute to fund the operation of the Activity. No tax-payer dollars are utilized.

The site restoration activities are consistent with those required of a responsible party and in accordance with Office of Conservation rules and regulations including plugging of oil and gas wells, pit closure, site remediation, and removal of oilfield equipment. Restoration costs for an individual site can range from less than \$10,000 to excess of \$1,000,000. Cost variation can be attributed to numerous factors such as wellbore construction, environment (land or water), accessibility, degree of environmental impact, project size and scope, and overall activity in the oilfield.

Orphan wellsites are prioritized to direct available funding to those sites that pose the greatest threat to public safety and environment. However, in order to also economically decrease the total number of orphaned wells in the State, lower priority sites located near a proposed project area are often included in the project scope of work to increase

cost-effectiveness by lowering overall individual well plugging costs. Project design and oversight is handled by in-house petroleum engineering staff while all other restoration-specific tasks are contracted to approved oilfield contractors. Project bids are solicited in accordance with the State bid law and projects are awarded to the lowest qualified bidder.

**Explain How This Activity Advances State Outcome Goal:**

This activity directly correlates to two State Outcome goals: Natural Resources, and Diversified Economic Growth. The activity is an example of industry, government and the environmental community working together to proactively reduce risk to the public, improve the quality of the environment of Louisiana, and promote economic stimulus by restoring orphan well sites to a condition suitable for redevelopment.

Orphan wells are found throughout the State in all areas where there has been historic oil and gas activity. Currently there are over 2700 documented unrestored orphan wellsites in Louisiana. These sites deteriorate over time due to neglect and therefore become susceptible to releasing oil, gas and saltwater to the surrounding area. This Activity has addressed sites near schools and public buildings in sensitive coastal wetland areas, and near private residences. Emergency situations involving leaking orphan wells require immediate action to protect the environment and the health and safety of the public. This Activity is uniquely qualified to efficiently address these situations.

Petroleum engineering staff is currently employed to design projects and provide oversight and technical guidance during field activities. OSR cost savings are achieved by outsourcing to contractors all specialized equipment, materials, and field labor necessary to plug wells and restore sites.

This activity continually seeks to extend limited funding through outside assistance. Past and continuing collaborative efforts include a partnership with the Louisiana Oil Spill Coordinators Office to cost-share in projects where state navigable waterways are affected by oil spills originating from orphan wellsites. Further, the Activity has participated in numerous endeavors with both the Environmental Protection Agency and the United States Coast Guard to leverage OSR funding with federal money from the National Pollution Funds Center.

**Evidence:**

This Activity provides a present and future benefit to the environment, and public health, safety, and welfare by implementing the proper clean up, closure, and restoration of orphaned oilfield sites. From inception in 1993 through July 30, 2009, the Activity has plugged a total of 2138 orphan wells, closed 590 production pits, and removed 278 associated production facilities. The total number of remaining unrestored orphan wellsites in the State reached a maximum level in 2002 with 3839 wells and has since been in steady decline due in large part to the efforts and success of this Activity.

Underlying examples of OSR achievements are evident across the State including a former oilfield site located near the south gates of Louisiana State University in Baton Rouge near Burbank Drive and West Parker. The Activity plugged eight orphan wells, closed numerous production pits and removed a large production facility in an area adjacent to campus that now comprises several new residential buildings and commercial establishments, including condominiums, stores, restaurants, and a parking garage. The subsequent development of the area demonstrates the potential of OSR to eliminate public safety threats and return previously unusable oilfield sites back to commerce.

It is important to note that the Activity is also responsible for the clean-up and restoration of fifty-two orphan wellsites located in Louisiana State Wildlife Management Areas such as Buckhorn, Thislewaite, Salvador, Red River, Maurepas Swamp, and Pointe Aux Chenes.

Despite the current inventory of documented orphan sites which continue to pose a potential environmental threat, there have been no public safety incidents reported to the Office of Conservation involving orphan wellsites over the past ten years.

**Activity ID:** 290

**Activity Name:**

Lease Sales and Administration

**Department:** 11 Department of Natural Resources

**Agency:** 434 Office of Mineral Resources

**Program:** 1000 Mineral Resources Management

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

The number of leases reviewed for compliance is directly related to funding levels.

**Activity Type:** Existing

**Objective:**

Agressively pursue a development program to increase mineral productive acreage on state-owned land and water bottoms, which are under contract, by 1% per year.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3424	Key	Percentage of Productive Acreage to Total Acreage Leased	41.6	40	40.2	34.9	40
3424	Supporting	State leased acreage under contract	944169	983981	1011179	974500	974500
3426	Supporting	Productive state lease acreage	393076	399482	406035	340295	389800

**Narrative:**

This activity is responsible for advertising acreage available for bids, issuing new leases, monitoring the leases to ensure they are developed in accordance with the lease terms, and ensuring that inactive leases are released by the lessee and returned to commerce. Upon receipt of a nomination of acreage from industry, the staff reviews the nomination for accuracy and availability for lease. After the nomination has been validated, the acreage is advertised for bids at an upcoming lease sale. The bids are publicly opened and read aloud. The staff geologists review each bid and advise the State Mineral and Energy Board (SMEB) as to whether the bid is in the best interest of the state. The SMEB awards leases that are in the best interest of the state. Following the lease sale, the staff issues the awarded leases and monitors those leases until the leases are released back to the state.

**Explain How This Activity Advances State Outcome Goal:**

The Natural Resources state outcome goal of economic development from the management of our non renewable resources is advanced by this activity because this activity ensures that the state's mineral resources are prudently developed. This activity monitors the development of leases to ensure that lessees drill and produce mineral products in accordance with the terms of their leases.

In addition to primarily addressing the state Natural Resources goal, this activity also supports two other state goals: (1) Diversified Economic Growth and (2) Transparent, Accountable, and Effective Government. The Economic

Growth goal includes retaining and growing good jobs while wisely utilizing natural resources. This activity ensures that the oil and gas industry remains a strong and viable part of the Louisiana economy by issuing new leases and returning unproductive acreage to commerce for future development. Through the Strategic On-line Natural Resources Information System (SONRIS), this activity provides timely public access to state oil and gas leasing activities. For example, bid information is available on the internet as soon as the bids have been publicly opened and read. Part of the Transparent, Accountable, and Effective Government goal includes leveraging additional funding sources and this activity accomplishes this goal by utilizing no State General Fund revenues for its operating expenses.

**Evidence:**

Staff through the Lease Review process reviews all of the active State Leases for development of the non-producing state lease acreage. If the staff determines that the lease is not being prudently developed, a request for a release of the undeveloped acreage is made through the Lease Review process. The following are examples of the results of the Lease Review Process:

- 1)State Lease 378 (Lease Royalty – 12.5%), acreage released through the Lease Review Process was later leased for a total cash bonus of \$320,845 plus an increase in royalty that ranged from 20.25% to 25%.
- 2)State Lease 3624, 3762, 3763, & 3842 (Lease Royalty – 16.67%), acreage released through the Lease Review Process was later leased for a total cash bonus of \$896,489 plus an increase in royalty that ranged from 21.25% to 23%.
- 3)State Lease 340, Lighthouse Point Selection (Lease Royalty – 12.5%), acreage released through the Lease Review Process was later leased for a total cash bonus of \$5,917,115 plus an increase in royalty to 25%.
- 4)State Lease 293, (Lease Royalty – 12.5%), acreage released through the Lease Review Process was later leased for a total cash bonus of \$174,400 plus an increase in royalty that ranged from 20% to 21.5%.

**Activity ID:** 291

**Activity Name:**

Revenue Classification and Audit

**Department:** 11 Department of Natural Resources

**Agency:** 434 Office of Mineral Resources

**Program:** 1000 Mineral Resources Management

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

The number of audits performed is directly related to funding levels.

**Activity Type:** Existing

**Objective:**

Increase the percentage of royalties audited to total royalties paid by 1% per year in order to maximize revenue derived from mineral production. Coordinate and complete severance and royalty audits to provide efficiencies for payors and the State.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3428	Key	Percentage of Total Royalties Paid which are Audited.	18.6	23	22.4	18.15	18.15
23144	Key	Percentage of repeat audit findings	0	0	0	25	25

**Narrative:**

This activity includes both the desk audit and field audit functions and is responsible for collecting, classifying, and auditing royalties received on state mineral leases. The field audit function will review severance data to determine costs and would now complete a severance audit to submit to the Department of Revenue for Tax Administration.

Each royalty payment is accompanied by a state royalty (SR) report, which contains all details pertaining to the payments. Every royalty report is subjected to a desk audit, which is designed to detect and correct somewhat obvious reporting and/or payment errors. After being subjected to a desk audit, every royalty report is entered into SONRIS for classification to the correct funds. After the reports are entered and processed, the desk auditors perform post-processing audit procedures to ensure that all funds were properly classified. This activity is also responsible for maintaining property information in SONRIS to ensure that the revenues are classified to the correct funds.

Each payor is also subjected to in-depth field audits on a rotating basis approximately every five years. The field audits involve examining meter statements, purchaser statements, and other original documentation to ensure that the state received fair value for its mineral products in accordance with the terms of the lease agreement. The in-depth field audits would be coordinated such that a dual payor (royalty and severance would be subjected to one field audit from the state). Those payors of severance tax only would become a part of the field audit rotation.

**Explain How This Activity Advances State Outcome Goal:**

The Natural Resources state outcome goal of economic development from the management of our non renewable resources is advanced by this activity because this activity ensures that the state receives fair value for its mineral products. This activity audits the royalty revenues received on state mineral leases to ensure that the lessees are

paying the state in accordance with the terms of the leases. Additionally, because severance taxes are shared with the parishes, audit of the severance payors ensures that the state's local government share are optimal.

In addition to primarily addressing the state Natural Resources goal, this activity also supports two other state goals: (1)Diversified Economic Growth and (2)Transparent, Accountable, and Effective Government. The Economic Growth goal includes retaining and growing good jobs while wisely utilizing natural resources. This activity ensures that the oil and gas industry remains a strong and viable part of the Louisiana economy by collecting and distributing royalties in a timely manner. Based upon legal provisions, royalties are distributed to the State General Fund, parish governments, local school boards, and the Department of Wildlife and Fisheries. Through the Strategic On-line Natural Resources Information System (SONRIS), this activity provides timely public access to mineral revenue information. Numerous reports on royalties, rentals, bonuses, and other mineral income are available on the internet in real time. Members of the public, other governmental entities, and industry members are able to view & download information on royalties collected and how they are distributed. Part of the Transparent, Accountable, & Effective Government goal includes leveraging additional funding sources and this activity accomplishes this goal by utilizing no State General Fund revenues for its operating expenses. However, with DNR taking on the severance audit functions, two auditor positions must be paid with general funds.

**Evidence:**

Over the past 10 fiscal years, royalty collections from field audits have averaged \$14,414,887 per year while the payroll costs for the field audit staff have averaged \$832,644 per year. That equates to a 1731% return on investment. The offer to provide severance audit functions is to meet this goal from royalty auditing by ensuring dual payors are being audited at the same time for both, in a systematic rotation.

Oil and Gas Administration  
**Department:** 11 Department of Natural Resources  
**Agency:** 432 Office of Conservation  
**Program:** 1000 Oil and Gas Regulatory  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

A decrease in the funding would impede the Activity in the management of non-renewable resources (oil, gas, minerals); auditing of production and transportation, protection of all mineral property rights; ensuring safety, environmental and economic benefits to Louisiana and its citizens.

**Activity Type:** Existing

**Objective:**

Manage non-renewable natural resources (oil, gas, minerals); audit production and transportation, protect mineral property rights; ensure safety; environmental and economic benefits to Louisiana and its citizenry.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Production from permitted Wells	315288426	323336249	319352662	310000000	310000000
New	Key	Production from Unitization Wells	237811261	234582171	234533152	230000000	230000000
23107	Key	Percentage of annual production fee revenue collected of total amount invoiced	99.1	99.2	96.8	95	95

**Narrative:**

The conservation & economic development of non-renewable resources, protection of mineral rights, protection of La citizens & environment are provided by this Activity. These are done through permitting, unitization, auditing, enforcement with legal guidance & representation, managerial oversight of fiscal & performance matters, and records & documentation management.

An application for a Permit to Drill for Minerals is reviewed by engineering staff to ensure the regulatory parameters are met. The parameters include safety related to well proximity to structures & public roadways & durable pipe to withstand pressures associated with oil & gas (O&G) drilling/production & to protect drinking water sources; well proximity to lease & property lines to ensure equitable share of the reservoir contents & to avoid waste & drilling of unnecessary wells.

Enforcement ensures that O & G operators adhere to the rules & regulations, act as a deterrent to future violations & are accomplished through: evidence of a rule violation noted in either an inspection report or other required documentation resulting in the issuance of a Compliance Order to notify the responsible party (RP) of the specifics related to the violation & establish a deadline for correcting same. Should the RP fail to correct the noted violation by the specified deadline, additional regulatory sanctions are imposed. These sanctions include; the levy of fines or civil penalties, the suspension of authority to transport oil, escrow of funds from the sale of oil &/or gas, suspension of

drilling permit approvals, & the declaration of wells as "orphaned". The complete enforcement process may last from several weeks to several years depending on the Compliance Order requirements & the responsiveness of the RP.

Oil and Gas production volumes, storage, & transportation are audited for compliance. Tolerance levels exceeded &/or errors are investigated resulting in compliance & enforcement proceedings. The auditing process provides a data set, utilized to fix annual production fees based on nonrenewable resource production & utilized by other departments to quantify severance & royalty payment or receipts.

Unitization is the process by which O & G reservoirs are delineated & the mineral rights therein are determined for purposes of distribution of the production (using well logs) & the resulting proceeds. It is how the "pie" is divided amongst participants when dealing with O & G production.

#### **Explain How This Activity Advances State Outcome Goal:**

The Activity advances the Natural Resources, the Economic Growth & the Transparent, Accountable, & Effective Government outcome goals. It requires staff with quality engineering, geological, legal & technical skills to govern over 1900 active fields, 60,000 + active wells & future development of oil & gas (O&G) resources. Application & production fees, penalties, general funds, lease payments & royalties fund this activity. A private sector data management firm via a cooperative agreement (leveraged resources), provides well logs images at no cost.

Active O&G wells are a source of income & a threat to the healthy & productive habitats of LA. Without the permit and enforcement processes, there is little incentive for the O&G community to adhere to rules & regulations that minimize negative environmental & safety impacts caused by O&G exploration & production operations while ensuring these operations develop LA's O&G in an orderly & efficient manner. These processes conserve & preserve the O&G resources for future generations, while assisting the O&G industry to develop these resources that provide substantial job opportunities in LA.

The audit process creates a production data base used by state & local agencies, O&G industry, stakeholders, & the public to enhance the economy through revenue (lease payments & royalties & O&G sales) & taxation. Public access & review of audit records promotes government transparency.

Unitization determines mineral right owners' equitable share in O&G production resulting in economic benefit for all mineral right owner through royalty income. The process includes hearings, orders & unit production. O&G hearings were 1,970 in 2008 & went above 1000 starting in 2003. Hearings held pursuant to LA RS30 under the auspices of the Commissioner of Conservation are the venue for mineral owners' issues to be heard & decisions made, providing a transparent, accountable & cost effective means of managing the O&G resources.

#### **Evidence:**

Act 127 of 1912 gave the Office of Conservation (OC) authority to make regulations to protect state resources. Proceedings of the 2nd National Conservation Congress of St. Paul, Sept 5-8, 1910: "With regard to National Efficiency: The maintenance of National & State conservation commissions is necessary to ascertain & make public the facts of our natural resources." This Activity provides data that LA is viable for exploration of new non-renewable resources, as in the Haynesville Shale Area discovery in northwest Louisiana.

Unbiased permitting & enforcement are needed as evident in early O&G exploration & development (Jennings & Caddo Lake oil fields) when inefficient location, spacing, drilling & well operations caused a reduced quantity of O&G recovered, leaving abandoned & polluted sites. Statistics show averages of ~600 compliance orders per year are issued to correct violations of regulations. The total production for FY 07: 319,352,662 BOE; FY 08:323,336,249 BOE; FY 09:315,288,426 BOE [Barrel of Oil Equivalent, equal to 5.58 mcf (1mcf=1000 cubic feet) gas to one barrel of oil].

Production records are used to set annual fees & revenue estimates. Audit success is measured by the % of production fees collected vs production fees invoiced (FY07 :96.8%, FY08:99.2% & FY09:99.1%) The incremental production outcome indicator shows increases in production reporting related to audits. Under reporting benefits the producer & reduces revenues to stakeholders.

Unitization O&G production, in barrel of oil equivalent (BOE) was FY07: 234,533,152, FY08:234,582,172 & FY09:237,811,261. The % of critical date orders (CDO) issued within the time frame requested (FY 07:100%, FY 08:100% & FY 09:96.7%) & cost savings (estimate at \$193,901,366 for FY07 to FY 09) to the developers of the resources is evidence of its success. Cost savings are duplicative (already paid once) & other such as drilling rig standby rates that would occur if CDO are not issued timely.

**Activity ID:** 281

**Activity Name:**  
Inspection

**Department:** 11 Department of Natural Resources

**Agency:** 432 Office of Conservation

**Program:** 1000 Oil and Gas Regulatory

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

A reduction or increase in activity funding results in a corresponding decrease or increase in the number of inspections possible in a given year.

**Activity Type:** Existing

**Objective:**

To conduct periodic inspection of wells in an effort to minimize the number of wellsites in violation of regulations thereby conserving natural resources, reducing the number of orphaned wells, and protecting the environment and public safety.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23109	Key	Percentage of well sites inspected which are in violation of the applicable rules	0	0	0	0	0

**Narrative:**

The periodic random inspection of O&G wells by a Conservation Enforcement Specialist (CES) ensures that O&G operators adhere to the rules and regulations of the Office of Conservation which in turn allows for the orderly and efficient development of Louisiana's oil and gas resources while protecting citizens' rights, preventing waste, and protecting the environment and public safety. Inspections are also used to assess regulatory effectiveness, direct regulatory changes, provide focus for deployment of limited inspection resources and deter rule violations.

There are approximately 60,000 active O&G wells located throughout Louisiana and many of these well locations are inaccessible without off road or water transportation. At a minimum, each well is inspected at least once in a five year cycle. Typical inspections include review of the following items: well identification and condition; storage tank identification, condition, and configuration; production vessel condition; secondary containment condition; and pit condition. Louisiana State Police Hazardous Materials Incident Reports, citizen complaints, and enforcement action re-inspections are also used to prioritize potentially problem wells for inspection.

Stakeholders and beneficiaries of the inspection activity include Louisiana citizens, land and mineral owners, commercial users and energy producers. Inspection reports are made available to these groups through the Strategic On-Line Natural Resources Information System (SONRIS).

**Explain How This Activity Advances State Outcome Goal:**

Each of Louisiana's 60,000+ active O&G wells represent both a potential source of revenue for the State & its citizens and a potential threat to the scenic, healthy and productive natural habitats of Louisiana.

A successful inspection activity is a proactive strategy for reducing the potential for negative environmental impacts

caused by current O&G exploration & production (E&P) operations while ensuring that these operations develop Louisiana's O&G resources in an orderly and efficient manner. The inspection activity contributes to the diversified economic growth state outcome goal since it can reduce or eliminate the negative impacts of O&G activity on the future development of a site & neighboring properties.

The periodic random inspection of O&G wells by a Conservation Enforcement Specialist (CES) ensures that O&G operators adhere to the rules and regulations, and acts as a deterrent for future rule violations. Louisiana State Police Hazardous Materials Incident Report & citizen complaints are also used in a collaborative effort to extend the reach of the program & focus limited inspection resources on problem areas. Inspection planning and efficiency have also been improved through the recent implementation of a computer-based inspection report system. In keeping with the goal of maintaining a transparent government, inspection reports are made available to the public and the regulated community through the Strategic On-line Natural Resources Information System (SONRIS).

To measure the results of the inspection activity, the new FY 10 outcome indicator is the "Percentage of wellsites inspected which are in violation of applicable rules. The rationale is that by maintaining or reducing the number of sites in violation through inspection activities, the threats to the environment posed by the E&P activities are minimized.

Funding provided through fees related to the regulation of the O&G industry; and revenues generated through State Mineral leases.

**Evidence:**

Random inspection by an independent party is an accepted and proven method of ensuring that a regulated community complies with rules and regulations.

The regulated industry of E&P companies is a large, dynamic and varied group, consisting of integrated multinational corporations, independent producers, and single-person operators. As a result, corporate culture cannot be relied upon to ensure regulatory compliance where strong economic incentives exist to the contrary. Previous inspection statistics show, in a given year, that 5% to 7% of the inspected well sites are in violation of Office of Conservation (OC) regulations. This equates to between 3000 and 4200 well sites statewide. Each site represents potential threat to the environment if it is not operated in accordance with the applicable OC regulations. Performance measures include "% of existing wells inspected" (FY08 29.2% & FY09: 2.1%), "Number of distinct wells inspected" (FY08: 17947, FY09: 13576) "Number of field inspection reports" (FY07: 12091, FY08: 27796, FY09: 27662), and Newly identified orphaned wellsites during the fiscal year" FY07: 102, FY08: 64, & FY09: 211).

The need for an inspection activity is also evident in the large numbers of "orphaned" and "legacy" sites. These sites were primarily developed in a period of industry self-regulation prior to implementation of a formal inspection program and now require some level of environmental assessment or remedial action prior to closure. Operation of a successful inspection activity is a strategy for preventing current E&P operations from resulting in future legacy or orphaned sites.

**Department:** 11 Department of Natural Resources  
**Agency:** 432 Office of Conservation  
**Program:** 2000 Public Safety  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

A reduction or loss of the sources would impede the activity in fulfilling its duties leaving a less protected environment and a negative business climate. Funding is through fees, penalties, federal grants and state funds.

**Activity Type:** Existing

**Objective:**

Protect underground sources of drinking water, public health and the environment by regulating subsurface injection of waste, other fluids and gases; surface coal mining & reclaiming coal-mined sites & restoring past non-coal mined lands where no responsible party exists under state or federal law.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23113	Key	Percent of permitted wells that result in verified unauthorized releases into the environment annually	0	0	0	0	0.02
New	Key	Number of off-site impacts	0	0	0	0	0
New	Key	% of active surface coal mines or fluid injection wells that cause unauthorized degradation of underground sources of drinking water, surface waters, or land surface resulting in activity-mandated remediation of the impacted media	0	0	0	0	0.02

**Narrative:**

Underground Injection Control (UIC) is delegated by the U.S. Environmental Protection Agency to LA full permitting & enforcement authority over the current 5 classes of injection wells to protect underground sources of drinking water (USDW), surface waters & the land from endangerment by regulating subsurface injection of hazardous & nonhazardous waste fluids; subsurface storage of liquid, liquefied, & gaseous fluids; mineral solution mining; injection for enhanced oil recovery; & carbon dioxide sequestration.

The UIC responsibility affects the entire citizen & business population of LA & has national implications with regulatory authority over the U. S. Strategic Petroleum Reserve crude oil storage facilities & the LA Offshore Oil Port. It regulates the underground storage of natural gas assuring adequate gas supplies nationally, the waste disposal options of the oil & gas industry, & injection for enhanced oil recovery thus contributing to the national energy supply. Its most recent charge is in regulating carbon dioxide sequestration. Unauthorized releases are defined as the movement of the program approved injected material into an underground source of drinking water or

surface that is directly attributable to the operation of the permitted injection well.

The Surface Mining (SM) & Abandoned Mine Lands (AML) responsibility is delegated by the U.S. Department of the Interior, Office of SM with full permitting & enforcement authority for surface coal mining & mine reclamation operations in LA to protect public health & the environment.

The responsible mining of coal in quantities to prevent the premature exhaustion or ruin of the coal supply in LA is essential & economically beneficial for our citizens. The mined coal gives electric power utilities the ability to generate low-cost electricity for LA & Texas. Restoration of lands disturbed by SM protects, conserves & replenishes the natural resources of LA.

Skilled professional scientists, inspectors, & administrative support personnel manage by engaging in processes aligned with analyzing permit applications, complex geological, geomechanical, engineering, environmental studies, analytical laboratory reports, operation monitoring reports, inspecting permitted sites, doing well mechanical integrity testing, & all actions associated with regulatory oversight to protect USDWs, to prevent adverse effects to public health & unreasonable degradation of land, water, & other natural res.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity aligns with the state's outcome goal to advance the Natural Resource Quality Index by proactively managing injection wells, coal mining and reclamation projects to protect USDWs, prevent degrading of land and surface waters that would be harmful to the welfare, health and property rights of citizens. Defined laws, regulations, policies, permit guidelines, inspection and enforcement methods assure regulatory consistency to protect the public, environment, wildlife habitats, and provide a climate that bolsters energy and economic development.

The state and nation benefit from this activity. The petroleum, petrochemical, and allied industries—key business customers—form the foundation of the state's economy. Coal mining for electrical power and land reclamation to conserve soil is in the public interest. The state's economy benefits in conserving natural resources and fish and wildlife habitats in assuring land for commercial, residential, recreational, agricultural use by preventing erosion, floods and pollution. The activities balance the needs of all stakeholders with environmental safeguards.

Readily available laws and regulations allow businesses to be educated with criteria to operate within the activity's scope, either on their own or in meetings with activity staff. This is also available to the public for their personal education. Consistency and openness provides a level playing field for business to move to the state and prosper.

The activity collaborates with federal and other state agencies, academia and noted experts when added technical support is needed. This informal arrangement proves useful and cost-effective.

Funding is through fees, penalties, federal grants and state funds. A reduction or loss of the revenue sources would impede the activity in fulfilling its duties leaving a less protected environment and a negative business climate.

#### **Evidence:**

This activity has historically and continues performing its duties as charged, that being to provide strict oversight and enforcement of subsurface well injection, surface coal mining and reclamation activities to minimize impacts that may negatively affect USDWs, public health, the environment, and the natural resources of the state. The U.S. Environmental Protection Agency and U.S. Department of the Interior audit the activities annually and report no major issues.

The performance indicators for environmental and public protection show the regulated activities have had no negative environmental impact. Of note is a specific indicator that tracks the universe of injection wells whose operators-of-record remain noncompliant with any activity regulation. The indicator peaked at 673 net noncompliant wells in the 1st quarter FY 2002 and is at 87 net noncompliant wells for the 1st quarter FY 2010, an 87% reduction. This shows the programs effectiveness in regulating and enforcing its rules.

Examples of key performance indicators with their 3-year reported values are, Number of injection/disposal wells verified to be out of compliance with mechanical integrity requirements and remaining in operation (0);

Injection/disposal wells inspected each year as a percentage of total wells (32% to 41%); Number of significant violations at coal mines (0). An outcome indicator, Percentage of permitted wells that result in verified unauthorized releases into the environment annually, reported 0% for the past three years. The 1st Quarter FY 2010 records 0.02% or 1 well out of roughly 4,000 wells. That one well resulted in a small surface leak with no environmental impact.

Transparency, openness and accountability to stakeholders are hallmarks of this activity. With very few exceptions, activity files and records are public documents from the moment of receipt. This activity makes information available to stakeholders online and as hardcopy files.

This activity has always been strongly committed to protecting USDWs, public health, safety and the environment from the effects of subsurface injection and surface coal mining as evidenced by its overall performance indicators.

<b>Statutory Dedication:</b>	N08	Underwater Obstruction Removal
------------------------------	-----	--------------------------------

**Activity ID:** 284

**Activity Name:**

Pipeline (Including Underwater Obstructions)

**Department:** 11 Department of Natural Resources

**Agency:** 432 Office of Conservation

**Program:** 2000 Public Safety

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Reduction of funding would have a negative impact on the Pipeline Safety Program resulting in a reduced field presence which would correlate to a decrease in the number of inspections of pipelines and associated facilities. Also, federal matching funds would be reduced accordingly.

An increase in funding would have a positive impact on the Program allowing expansion of services such as hiring more inspectors, providing more safety training for industry personnel, and public outreach. In addition, federal matching funds could be increased up to 80% from the current level of 50%.

The Underwater Obstruction Program responsibility is outsourced to contractors, changes in program funding would result in a corresponding change in the number of underwater obstructions which can be verified and removed.

**Activity Type:** Existing

**Objective:**

The Pipeline (PL) Activity enforces, inspects & regulates to protect public safety & environment, sound operation & maintenance of the jurisdictional PLs & facilities in LA's transportation system. UWO aids normal navigation & commercial fishing in LA navigable waters by verifying & removing UWO.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10637	Key	Cost (Dollar Amount) of Property Damage Due to Reportable Accidents on Louisiana Jurisdictional Pipelines, annually.	4507186	437281116	166133	6167354	610679
6801	Key	Number of underwater obstructions removed	0	1	77	7	10

**Narrative:**

The Louisiana Pipeline Safety Activity has existed since the early 1970s. The Pipeline(PL)Division has entered into a Certification Agreement with the U. S. Dept. of Transportation, PL & Hazardous Materials Safety Administration (US DOT/PHMSA), pursuant to Chapter 601, Title 49 of the U. S. Code, which grants the authority to the PL Division to regulate the intrastate natural gas (NG) & hazardous liquid (HL) pipelines with regard to safety. The Federal/State partnership, in developing & maintaining the program, has helped to improve & enhance the safety of the public & preservation of Louisiana's environment. It is responsible for regulating over 300 intrastate PL operators (HL & NG transmission, municipals, master meters, private distributions, & gathering) having over 50,000 miles of PLs. Its

duties consist of PL operator inspections, compliance & enforcement, safety programs (Public Awareness, Operator Qualification, NG & HL Integrity Management, & Drug & Alcohol), accident investigations, & record maintenance & reporting, & operator training. PL inspectors receive mandatory federal PL safety training provided by the US DOT/PHMSA/Office of Training & Qualifications. US DOT/PHMSA conducts annual program audits to ensure compliance with the requirements of the Certification Agreement. Federal funding is based on the audit results. The PL Operation Program regulates the use, end-use, conservation & transportation of intrastate NG; reviews applications pertaining to the construction & related activities of the intrastate NG pipelines, carbon dioxide PL & compressed NG facilities. PL Emergency Preparedness & Response responsibilities are to monitor the needs & requirements for NG services to intrastate NG transporters in order to provide service to the citizens, businesses, & industry of LA for as long as emergency conditions exist. Priorities for the allocation of NG are reviewed by the staff & ultimately assigned by the Commissioner of Conservation.

The Underwater Obstruction (UWO) Removal Program addresses UWOs in the navigable waters of LA. UWO process is to enhance the Fisherman's Gear Compensation Fund Program (FGCF) which allows the mitigation of financial losses caused by UWOs, but does not provide a long-term solution to the problem. The UWO responsibility is to verify & remove UWO which pose an impediment to normal navigation & commercial fishing in navigable LA waters. The UWO funding is via a \$250,000 annual transfer from the FGCF.

**Explain How This Activity Advances State Outcome Goal:**

Approximately 50,000 miles of jurisdictional PLs have a direct affect on the production of oil & gas (O&G) by providing the necessary mode of transportation to move the O&G from the wellhead to its markets resulting in revenue source for LA and its citizens. A lack of PL capacity to handle the potential O&G from the Haynesville Shale may reduce the drilling of new wells & the potential revenue sources. By providing a predictable regulatory framework, PL companies can plan PL expansion projects & obtain permits in a timely & efficient manner promoting economic development.

The PL operations network has the potential to negatively impact the environment, & the comprehensive inspection program conducts inspections of 90 to 100% of the regulated companies to reduce this potential. The Activity is moving toward risk-based inspections; focusing resources on problem areas. The implementation of the online inspection system allows computer-based inspection reports to be completed & submitted from the field directly into the Strategic On-line Natural Resources Information System (SONRIS) database, leading to an efficient utilization of inspection resources & promoting government transparency as all inspections reports are available via SONRIS.

The Certification Agreement with the U.S. Dept. of Transportation, PL & Hazardous Materials Safety Administration (US DOT/PHMSA) allows the PL Safety Program to receive Federal Grants which are allocated on a calendar year (CY) basis & are paid according to the allocated % funding of total expenditures. The proposed matching fund % for CY09 will be between 50% & 59% which is an increase over CY08 figure of approximately 43%.

The UWO Program has cleared 400 areas of all obstructions (weighting over 5,450 tons which included 17 barges, 8 tanks, 174 boats, 87 flow lines, & numerous pipes & pilings). Past collaborative efforts include partnerships with the National Oceanic & Atmospheric Administration & local fishermen.

**Evidence:**

Success of the Pipeline Safety activities is reflected by the past results of the key performance indicator: "maintain the ratio of number of accidents on intrastate pipelines per 1,000 miles of intrastate pipelines per 1,000 at or below the national ratio". The year-end results for the last 3 fiscal years are as follows: 1) 5.88% above the national rate in FY 06/07; 2) 52.38% below the national rate in FY 07/08, and 3) 50% below the national rate in FY 08/09.

Further, success is also confirmed by the scores received by the Activity as a result of the annual audits by the U. S. Dept. of Transportation, Pipeline & Hazardous Materials Safety Administration (US DOT/PHMSA). The audit process includes the evaluation of various aspects of the Program which include General Program Compliance, Inspections (Procedures, Records, forms), Incident Investigations & Field Inspections for a possible total score of 100 points. The results from the last 3 calendar years (CY) are as follows: 1) 100 points for CY 2006; 2) 100 points for CY 2007 and 3) 100 points for CY 2008.

The comprehensive inspection process & the continued outreach to operators, through education and communication, have had a positive impact on the number of violations of the safety regulations found. The number has decreased from 143 in FY 07/08 to 29 in FY 08/09.

The Underwater Obstruction activity provides a present & future benefit to the environment, & public health, safety, & welfare by removing underwater obstructions in navigable State waters. From its inception in 1997 through July 30, 2009, the Program has cleared 400 areas of all obstructions having a combined weight of over 5,450 tons.

Beginning in FY 07/08, Program funding was temporarily redirected to support a coast-wide storm-related marine debris removal effort involving the Federal Emergency Management Agency (FEMA), the United States Coast Guard (USCG) & the Department of Natural Resources. Although Program performance was affected due to these funding changes, recent reimbursement of the redirected funds will allow six (6) obstructions located in the Caillou Lake to be removed by the Program in FY 09/10. It is anticipated that the program will remain actively involved in removing obstructions which are not eligible for removal under the FEMA/USCG effort.

All of these successes contribute to the protection of the public safety & the environment & the advancement of the Natural Resource outcome goal.

**Scalable:** True

**Scalable Description:**

A reduction or loss of the sources would impede the activity in fulfilling its duties leaving a less protected environment and a negative business climate. Funding is through fees, penalties, federal grants and state funds.

**Activity Type:** Existing

**Objective:**

Protect underground sources of drinking water, public health and the environment by regulating subsurface injection of waste, other fluids and gases; surface coal mining & reclaiming coal-mined sites & restoring past non-coal mined lands where no responsible party exists under state or federal law.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23113	Key	Percent of permitted wells that result in verified unauthorized releases into the environment annually	0	0	0	0	0.02
New	Key	Number of off-site impacts	0	0	0	0	0
New	Key	% of active surface coal mines or fluid injection wells that cause unauthorized degradation of underground sources of drinking water, surface waters, or land surface resulting in activity-mandated remediation of the impacted media	0	0	0	0	0.02

**Narrative:**

Underground Injection Control (UIC) is delegated by the U.S. Environmental Protection Agency to LA full permitting & enforcement authority over the current 5 classes of injection wells to protect underground sources of drinking water (USDW), surface waters & the land from endangerment by regulating subsurface injection of hazardous & nonhazardous waste fluids; subsurface storage of liquid, liquefied, & gaseous fluids; mineral solution mining; injection for enhanced oil recovery; & carbon dioxide sequestration.

The UIC responsibility affects the entire citizen & business population of LA & has national implications with regulatory authority over the U. S. Strategic Petroleum Reserve crude oil storage facilities & the LA Offshore Oil Port. It regulates the underground storage of natural gas assuring adequate gas supplies nationally, the waste disposal options of the oil & gas industry, & injection for enhanced oil recovery thus contributing to the national energy supply. Its most recent charge is in regulating carbon dioxide sequestration. Unauthorized releases are defined as the movement of the program approved injected material into an underground source of drinking water or

surface that is directly attributable to the operation of the permitted injection well.

The Surface Mining (SM) & Abandoned Mine Lands (AML) responsibility is delegated by the U.S. Department of the Interior, Office of SM with full permitting & enforcement authority for surface coal mining & mine reclamation operations in LA to protect public health & the environment.

The responsible mining of coal in quantities to prevent the premature exhaustion or ruin of the coal supply in LA is essential & economically beneficial for our citizens. The mined coal gives electric power utilities the ability to generate low-cost electricity for LA & Texas. Restoration of lands disturbed by SM protects, conserves & replenishes the natural resources of LA.

Skilled professional scientists, inspectors, & administrative support personnel manage by engaging in processes aligned with analyzing permit applications, complex geological, geomechanical, engineering, environmental studies, analytical laboratory reports, operation monitoring reports, inspecting permitted sites, doing well mechanical integrity testing, & all actions associated with regulatory oversight to protect USDWs, to prevent adverse effects to public health & unreasonable degradation of land, water, & other natural res.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity aligns with the state's outcome goal to advance the Natural Resource Quality Index by proactively managing injection wells, coal mining and reclamation projects to protect USDWs, prevent degrading of land and surface waters that would be harmful to the welfare, health and property rights of citizens. Defined laws, regulations, policies, permit guidelines, inspection and enforcement methods assure regulatory consistency to protect the public, environment, wildlife habitats, and provide a climate that bolsters energy and economic development.

The state and nation benefit from this activity. The petroleum, petrochemical, and allied industries—key business customers—form the foundation of the state's economy. Coal mining for electrical power and land reclamation to conserve soil is in the public interest. The state's economy benefits in conserving natural resources and fish and wildlife habitats in assuring land for commercial, residential, recreational, agricultural use by preventing erosion, floods and pollution. The activities balance the needs of all stakeholders with environmental safeguards.

Readily available laws and regulations allow businesses to be educated with criteria to operate within the activity's scope, either on their own or in meetings with activity staff. This is also available to the public for their personal education. Consistency and openness provides a level playing field for business to move to the state and prosper.

The activity collaborates with federal and other state agencies, academia and noted experts when added technical support is needed. This informal arrangement proves useful and cost-effective.

Funding is through fees, penalties, federal grants and state funds. A reduction or loss of the revenue sources would impede the activity in fulfilling its duties leaving a less protected environment and a negative business climate.

#### **Evidence:**

This activity has historically and continues performing its duties as charged, that being to provide strict oversight and enforcement of subsurface well injection, surface coal mining and reclamation activities to minimize impacts that may negatively affect USDWs, public health, the environment, and the natural resources of the state. The U.S. Environmental Protection Agency and U.S. Department of the Interior audit the activities annually and report no major issues.

The performance indicators for environmental and public protection show the regulated activities have had no negative environmental impact. Of note is a specific indicator that tracks the universe of injection wells whose operators-of-record remain noncompliant with any activity regulation. The indicator peaked at 673 net noncompliant wells in the 1st quarter FY 2002 and is at 87 net noncompliant wells for the 1st quarter FY 2010, an 87% reduction. This shows the programs effectiveness in regulating and enforcing its rules.

Examples of key performance indicators with their 3-year reported values are, Number of injection/disposal wells verified to be out of compliance with mechanical integrity requirements and remaining in operation (0);

Injection/disposal wells inspected each year as a percentage of total wells (32% to 41%); Number of significant violations at coal mines (0). An outcome indicator, Percentage of permitted wells that result in verified unauthorized releases into the environment annually, reported 0% for the past three years. The 1st Quarter FY 2010 records 0.02% or 1 well out of roughly 4,000 wells. That one well resulted in a small surface leak with no environmental impact.

Transparency, openness and accountability to stakeholders are hallmarks of this activity. With very few exceptions, activity files and records are public documents from the moment of receipt. This activity makes information available to stakeholders online and as hardcopy files.

This activity has always been strongly committed to protecting USDWs, public health, safety and the environment from the effects of subsurface injection and surface coal mining as evidenced by its overall performance indicators.

**Activity ID:** 288  
**Activity Name:**  
Environmental  
**Department:** 11 Department of Natural Resources  
**Agency:** 432 Office of Conservation  
**Program:** 2000 Public Safety  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Reducing funding for this activity would negatively impact the agency's ability to fulfill its duties resulting in a less protected environment and natural resources, and a less stable business climate for the oil and gas industry, municipal and agricultural intests. Funding is through fees, penalties and state funds.

**Activity Type:** Existing

**Objective:**

Protect public health, safety, welfare, the environment & groundwater resources by regulating offsite storage, treatment and disposal of oil and gas exploration and production waste (E&P waste)and evaluation and remediation of E&P waste impacted sites and managing groundwater resources.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of Act 312 Settlement or Court Referral Evaluation or Remediation Plans Approved by the Division and Implemented	100	100	0	85	85
New	Key	Number of verified Incidents of Improper Handling and Disposal of Exploration & Production Waste Resulting in Unauthorized Releases or Impacts that have necessitated an Evaluation or Remediation Activity above and beyond Initial Response Activities	1	1	0	0	2
New	Key	Number of new Areas of Ground Water Concern determined or issued by the Commissioner of Conservation	0	0	0	0	0

**Narrative:**

The Exploration & Production (E&P) Waste Management responsibility was mandated by LA Revised Statutes (LRS) 30:4.I during the 1980's. It continues to function to control offsite disposal of E&P waste through regulation, surveillance, & enforcement for all matters relating to offsite storage, treatment & disposal of E&P waste, statewide. Since the generation of E&P waste is an inevitable consequence of crude oil & natural gas exploration, development & production, proper offsite management of waste materials is necessary to adequately protect public health, safety, welfare & the environment while providing industry with safe & viable options to commercially manage & dispose of the waste.An unauthorized release is the movement of E&P Waste material defined in LAC 43::XIX.501 beyond the boundaries of approved spill collection or containment areas at permitted commercial facilities or transfer station

sites.

The Legacy Site Remediation responsibility is mandated by LRS 30:29 following passage of ACT 312 of 2006 (ACT 312). The Office of Conservation (OC) is required to be notified of all litigation caused by or alleging environmental damage to an E&P site &, as directed by reviewing courts, must provide the reviewing courts recommendations on most feasible site evaluation or remediation plans where the courts have established responsible parties & that environmental damages have occurred. ACT 312 requires responsible parties to address environmental damages in a manner protective of public health, safety, welfare & the environment under the regulatory oversight of the OC. Duties include site evaluation & remediation plan review & approval for ACT 312 related settlements; reviewing, approving & overseeing the implementation & closure of other oil & gas E&P site evaluation & remediation plans to address E&P waste impacted soils & groundwater at locations under the agency's jurisdiction.

The Groundwater (GW) Resources responsibility began in 2001 as mandated by the authority of LRS 38:3097.1 et seq. OC is empowered & responsible for all matters related to the management of the state's GW resources by providing for the most advantageous use of the resource consistent with the protection, conservation, & replenishment thereof. GW includes water well (WW) registration, proposed well use & aquifer evaluation & management, enforcement, conservation education & outreach & emergency provisions to protect the health & sustainability of the state's aquifer system.

**Explain How This Activity Advances State Outcome Goal:**

E&P Waste Management meets the goals of the Natural Resources Quality Index by providing for E&P waste generator requirements, waste tracking, commercial waste facility, location, design and operational criteria, waste facility closure funding and pollution liability coverage requirements to prevent environmental damage to land and water resources from unauthorized releases of E&P waste, and provide for a means to adequately address such incidences should they occur. Other responsibilities include waste facility permitting, periodic site inspections, enforcement and permit compliance reviews and waste tracking (Manifest) audits to manage offsite E&P waste in a manner protective of the environment. Transparency for this responsibility is provided through public hearings and comment periods.

Legacy Site Remediation meets the goals of Natural Resources Quality index by requiring responsible parties to address environmental damages to property in a manner protective of public health, safety, welfare and the environment by evaluating and, where necessary, remediating such properties to applicable standards under the regulatory oversight of the agency, thus ensuring that the state's land and water resources are adequately protected for future use and value.

The Groundwater Resources meets the goals of the Natural Resources Conservation, Restoration and Utilization indicator by providing the resources to preserve and manage the state's aquifer systems by evaluating and assessing groundwater use for the prevention or alleviation of damaging or potentially damaging salt water movement, water level decline, land subsidence and loss of aquifer sustainability; and carefully monitoring the use of groundwater and water levels in the three established areas of groundwater concern in the Sparta Aquifer.

**Evidence:**

Regulation of the Offsite movement & disposal of E&P waste has been in effect approximately 30 years originating predominately out of the necessity to control where & how this waste material was to be disposed of since, at that time, there were known incidences of E&P waste being improperly discharged at night into waterways or dumped into surface features on private property, unabated & with unwanted environmental consequences. Through the agency's implementation & enforcement of commercial facility regulations, the number of incidences of improper discharges or waste disposal activities reported to or discovered by the agency have decreased to the point where it is seldom an issue. As depicted in the performance indicator, the outcome performance indicator for E&P waste has been met for at least the past three years.

Implementation of the statutory duties for Groundwater Resources (GW) began 8 years ago. The GW management laws address concerns of reported water level declines in populated areas of the Sparta aquifer. GW management regulations were promulgated to require WW registration & evaluation & to address areas of groundwater concern. Subsequently, 3 concerns were established in the Sparta aquifer. In 2008, the legislature provided the Office of

Conservation (OC) with the authority to issue compliance orders & assess civil penalties to enforce its regulations. With this new authority, it is expected that the GW Resources will continue to improve its effectiveness in protecting & managing the GW resources of the state. The outcome performance indicator for Groundwater resources has been met for at least the past 3 years. Act 437 of 2009, section, requires DOTD-Office of Public Works(OPW) & DNR-OC to enter into a Memorandum of Understanding to setup the transition of water well's & water well driller responsibilities from DOTD to DNR eliminating duplication of services.

Act 312 was decided favorably by the Louisiana Supreme Court just over a year ago. As such, there is simply not much information available to assess the impact of the Act. However, the Office of Conservation has upheld its statutory mandates related to court referrals & settlements for matters subject to the provisions of the Act. The Outcome performance indicator goal for Legacy Site Remediation has been met for past three years.

**Activity ID:** 283  
**Activity Name:**  
Oilfield Site Restoration  
**Department:** 11 Department of Natural Resources  
**Agency:** 432 Office of Conservation  
**Program:** 1000 Oil and Gas Regulatory  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Oilfield site restoration activity is outsourced to contractors, therefore an increase in funding is likely to result in a greater number of orphan sites restored. Inversely, a reduction in funding is likely to decrease the number of orphan sites restored in a given year.

**Activity Type:** Existing

**Objective:**

To properly plug and abandon orphaned wells and restore the associated surface locations thereby rendering locations suitable for redevelopment and protecting both the environment and the public.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23108	Key	Number of public safety incidents reported involving orphaned wellsites.	0	0	0	0	0
3401	Key	The number of orphaned wellsites restored to a condition suitable for redevelopment during fiscal year.	124	166	161	186	160

**Narrative:**

The Oilfield Site Restoration Activity (OSR) was created by Act 404 of the 1993 Regular Session to address the growing problem of unrestored orphaned oilfield sites across the State. Orphan wells are oil and gas wells for which no viable responsible party can be located, or such party has failed to maintain the wellsite in accordance with State rules and regulations. The specific focus of the Activity is to properly plug and abandon orphan wells and to properly restore the sites to approximate pre-wellsite conditions.

Revenue for the Activity is entirely generated from a fee on oil and gas production in the State of Louisiana which is paid quarterly by Louisiana oil and gas operators. These flat-rate fees are deposited to the oilfield site restoration fund which is dedicated by statute to fund the operation of the Activity. No tax-payer dollars are utilized.

The site restoration activities are consistent with those required of a responsible party and in accordance with Office of Conservation rules and regulations including plugging of oil and gas wells, pit closure, site remediation, and removal of oilfield equipment. Restoration costs for an individual site can range from less than \$10,000 to excess of \$1,000,000. Cost variation can be attributed to numerous factors such as wellbore construction, environment (land or water), accessibility, degree of environmental impact, project size and scope, and overall activity in the oilfield.

Orphan wellsites are prioritized to direct available funding to those sites that pose the greatest threat to public safety and environment. However, in order to also economically decrease the total number of orphaned wells in the State, lower priority sites located near a proposed project area are often included in the project scope of work to increase

cost-effectiveness by lowering overall individual well plugging costs. Project design and oversight is handled by in-house petroleum engineering staff while all other restoration-specific tasks are contracted to approved oilfield contractors. Project bids are solicited in accordance with the State bid law and projects are awarded to the lowest qualified bidder.

**Explain How This Activity Advances State Outcome Goal:**

This activity directly correlates to two State Outcome goals: Natural Resources, and Diversified Economic Growth. The activity is an example of industry, government and the environmental community working together to proactively reduce risk to the public, improve the quality of the environment of Louisiana, and promote economic stimulus by restoring orphan well sites to a condition suitable for redevelopment.

Orphan wells are found throughout the State in all areas where there has been historic oil and gas activity. Currently there are over 2700 documented unrestored orphan wellsites in Louisiana. These sites deteriorate over time due to neglect and therefore become susceptible to releasing oil, gas and saltwater to the surrounding area. This Activity has addressed sites near schools and public buildings in sensitive coastal wetland areas, and near private residences. Emergency situations involving leaking orphan wells require immediate action to protect the environment and the health and safety of the public. This Activity is uniquely qualified to efficiently address these situations.

Petroleum engineering staff is currently employed to design projects and provide oversight and technical guidance during field activities. OSR cost savings are achieved by outsourcing to contractors all specialized equipment, materials, and field labor necessary to plug wells and restore sites.

This activity continually seeks to extend limited funding through outside assistance. Past and continuing collaborative efforts include a partnership with the Louisiana Oil Spill Coordinators Office to cost-share in projects where state navigable waterways are affected by oil spills originating from orphan wellsites. Further, the Activity has participated in numerous endeavors with both the Environmental Protection Agency and the United States Coast Guard to leverage OSR funding with federal money from the National Pollution Funds Center.

**Evidence:**

This Activity provides a present and future benefit to the environment, and public health, safety, and welfare by implementing the proper clean up, closure, and restoration of orphaned oilfield sites. From inception in 1993 through July 30, 2009, the Activity has plugged a total of 2138 orphan wells, closed 590 production pits, and removed 278 associated production facilities. The total number of remaining unrestored orphan wellsites in the State reached a maximum level in 2002 with 3839 wells and has since been in steady decline due in large part to the efforts and success of this Activity.

Underlying examples of OSR achievements are evident across the State including a former oilfield site located near the south gates of Louisiana State University in Baton Rouge near Burbank Drive and West Parker. The Activity plugged eight orphan wells, closed numerous production pits and removed a large production facility in an area adjacent to campus that now comprises several new residential buildings and commercial establishments, including condominiums, stores, restaurants, and a parking garage. The subsequent development of the area demonstrates the potential of OSR to eliminate public safety threats and return previously unusable oilfield sites back to commerce.

It is important to note that the Activity is also responsible for the clean-up and restoration of fifty-two orphan wellsites located in Louisiana State Wildlife Management Areas such as Buckhorn, Thislewaite, Salvador, Red River, Maurepas Swamp, and Pointe Aux Chenes.

Despite the current inventory of documented orphan sites which continue to pose a potential environmental threat, there have been no public safety incidents reported to the Office of Conservation involving orphan wellsites over the past ten years.

**Activity ID:** 280  
**Activity Name:**  
Oil and Gas Administration  
**Department:** 11 Department of Natural Resources  
**Agency:** 432 Office of Conservation  
**Program:** 1000 Oil and Gas Regulatory  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

A decrease in the funding would impede the Activity in the management of non-renewable resources (oil, gas, minerals); auditing of production and transportation, protection of all mineral property rights; ensuring safety, environmental and economic benefits to Louisiana and its citizens.

**Activity Type:** Existing

**Objective:**

Manage non-renewable natural resources (oil, gas, minerals); audit production and transportation, protect mineral property rights; ensure safety; environmental and economic benefits to Louisiana and its citizenry.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Production from permitted Wells	315288426	323336249	319352662	310000000	310000000
New	Key	Production from Unitization Wells	237811261	234582171	234533152	230000000	230000000
23107	Key	Percentage of annual production fee revenue collected of total amount invoiced	99.1	99.2	96.8	95	95

**Narrative:**

The conservation & economic development of non-renewable resources, protection of mineral rights, protection of La citizens & environment are provided by this Activity. These are done through permitting, unitization, auditing, enforcement with legal guidance & representation, managerial oversight of fiscal & performance matters, and records & documentation management.

An application for a Permit to Drill for Minerals is reviewed by engineering staff to ensure the regulatory parameters are met. The parameters include safety related to well proximity to structures & public roadways & durable pipe to withstand pressures associated with oil & gas (O&G) drilling/production & to protect drinking water sources; well proximity to lease & property lines to ensure equitable share of the reservoir contents & to avoid waste & drilling of unnecessary wells.

Enforcement ensures that O & G operators adhere to the rules & regulations, act as a deterrent to future violations & are accomplished through: evidence of a rule violation noted in either an inspection report or other required documentation resulting in the issuance of a Compliance Order to notify the responsible party (RP) of the specifics related to the violation & establish a deadline for correcting same. Should the RP fail to correct the noted violation by the specified deadline, additional regulatory sanctions are imposed. These sanctions include; the levy of fines or civil penalties, the suspension of authority to transport oil, escrow of funds from the sale of oil &/or gas, suspension of

drilling permit approvals, & the declaration of wells as "orphaned". The complete enforcement process may last from several weeks to several years depending on the Compliance Order requirements & the responsiveness of the RP.

Oil and Gas production volumes, storage, & transportation are audited for compliance. Tolerance levels exceeded &/or errors are investigated resulting in compliance & enforcement proceedings. The auditing process provides a data set, utilized to fix annual production fees based on nonrenewable resource production & utilized by other departments to quantify severance & royalty payment or receipts.

Unitization is the process by which O & G reservoirs are delineated & the mineral rights therein are determined for purposes of distribution of the production (using well logs) & the resulting proceeds. It is how the "pie" is divided amongst participants when dealing with O & G production.

**Explain How This Activity Advances State Outcome Goal:**

The Activity advances the Natural Resources, the Economic Growth & the Transparent, Accountable, & Effective Government outcome goals. It requires staff with quality engineering, geological, legal & technical skills to govern over 1900 active fields, 60,000 + active wells & future development of oil & gas (O&G) resources. Application & production fees, penalties, general funds, lease payments & royalties fund this activity. A private sector data management firm via a cooperative agreement (leveraged resources), provides well logs images at no cost.

Active O&G wells are a source of income & a threat to the healthy & productive habitats of LA. Without the permit and enforcement processes, there is little incentive for the O&G community to adhere to rules & regulations that minimize negative environmental & safety impacts caused by O&G exploration & production operations while ensuring these operations develop LA's O&G in an orderly & efficient manner. These processes conserve & preserve the O&G resources for future generations, while assisting the O&G industry to develop these resources that provide substantial job opportunities in LA.

The audit process creates a production data base used by state & local agencies, O&G industry, stakeholders, & the public to enhance the economy through revenue (lease payments & royalties & O&G sales) & taxation. Public access & review of audit records promotes government transparency.

Unitization determines mineral right owners' equitable share in O&G production resulting in economic benefit for all mineral right owner through royalty income. The process includes hearings, orders & unit production. O&G hearings were 1,970 in 2008 & went above 1000 starting in 2003. Hearings held pursuant to LA RS30 under the auspices of the Commissioner of Conservation are the venue for mineral owners' issues to be heard & decisions made, providing a transparent, accountable & cost effective means of managing the O&G resources.

**Evidence:**

Act 127 of 1912 gave the Office of Conservation (OC) authority to make regulations to protect state resources. Proceedings of the 2nd National Conservation Congress of St. Paul, Sept 5-8, 1910: "With regard to National Efficiency: The maintenance of National & State conservation commissions is necessary to ascertain & make public the facts of our natural resources." This Activity provides data that LA is viable for exploration of new non-renewable resources, as in the Haynesville Shale Area discovery in northwest Louisiana.

Unbiased permitting & enforcement are needed as evident in early O&G exploration & development (Jennings & Caddo Lake oil fields) when inefficient location, spacing, drilling & well operations caused a reduced quantity of O&G recovered, leaving abandoned & polluted sites. Statistics show averages of ~600 compliance orders per year are issued to correct violations of regulations. The total production for FY 07: 319,352,662 BOE; FY 08:323,336,249 BOE; FY 09:315,288,426 BOE [Barrel of Oil Equivalent, equal to 5.58 mcf (1mcf=1000 cubic feet) gas to one barrel of oil].

Production records are used to set annual fees & revenue estimates. Audit success is measured by the % of production fees collected vs production fees invoiced (FY07 :96.8%, FY08:99.2% & FY09:99.1%) The incremental production outcome indicator shows increases in production reporting related to audits. Under reporting benefits the producer & reduces revenues to stakeholders.

Unitization O&G production, in barrel of oil equivalent (BOE) was FY07: 234,533,152, FY08:234,582,172 & FY09:237,811,261. The % of critical date orders (CDO) issued within the time frame requested (FY 07:100%, FY 08:100% & FY 09:96.7%) & cost savings (estimate at \$193,901,366 for FY07 to FY 09) to the developers of the resources is evidence of its success. Cost savings are duplicative (already paid once) & other such as drilling rig standby rates that would occur if CDO are not issued timely.

**Activity ID:** 281

**Activity Name:** Inspection

**Department:** 11 Department of Natural Resources

**Agency:** 432 Office of Conservation

**Program:** 1000 Oil and Gas Regulatory

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

A reduction or increase in activity funding results in a corresponding decrease or increase in the number of inspections possible in a given year.

**Activity Type:** Existing

**Objective:**

To conduct periodic inspection of wells in an effort to minimize the number of wellsites in violation of regulations thereby conserving natural resources, reducing the number of orphaned wells, and protecting the environment and public safety.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23109	Key	Percentage of well sites inspected which are in violation of the applicable rules	0	0	0	0	0

**Narrative:**

The periodic random inspection of O&G wells by a Conservation Enforcement Specialist (CES) ensures that O&G operators adhere to the rules and regulations of the Office of Conservation which in turn allows for the orderly and efficient development of Louisiana's oil and gas resources while protecting citizens' rights, preventing waste, and protecting the environment and public safety. Inspections are also used to assess regulatory effectiveness, direct regulatory changes, provide focus for deployment of limited inspection resources and deter rule violations.

There are approximately 60,000 active O&G wells located throughout Louisiana and many of these well locations are inaccessible without off road or water transportation. At a minimum, each well is inspected at least once in a five year cycle. Typical inspections include review of the following items: well identification and condition; storage tank identification, condition, and configuration; production vesel condition; secondary containment condition; and pit condition. Louisiana State Police Hazardous Materials Incident Reports, citizen complaints, and enforcement action re-inspections are also used to prioritize potentially problem wells for inspection.

Stakeholders and beneficiaries of the inspection activity include Louisiana citizens, land and mineral owners, commercial users and energy producers. Inspection reports are made available to these groups through the Strategic On-Line Natural Resources Information System (SONRIS).

**Explain How This Activity Advances State Outcome Goal:**

Each of Louisiana's 60,000+ active O&G wells represent both a potential source of revenue for the State & its citizens and a potential threat to the scenic, healthy and productive natural habitats of Louisiana.

A successful inspection activity is a proactive strategy for reducing the potential for negative environmental impacts

caused by current O&G exploration & production (E&P) operations while ensuring that these operations develop Louisiana's O&G resources in an orderly and efficient manner. The inspection activity contributes to the diversified economic growth state outcome goal since it can reduce or eliminate the negative impacts of O&G activity on the future development of a site & neighboring properties.

The periodic random inspection of O&G wells by a Conservation Enforcement Specialist (CES) ensures that O&G operators adhere to the rules and regulations, and acts as a deterrent for future rule violations. Louisiana State Police Hazardous Materials Incident Report & citizen complaints are also used in a collaborative effort to extend the reach of the program & focus limited inspection resources on problem areas. Inspection planning and efficiency have also been improved through the recent implementation of a computer-based inspection report system. In keeping with the goal of maintaining a transparent government, inspection report are made available to the public and the regulated community through the Strategic On-line Natural Resources Information System (SONRIS).

To measure the results of the inspection activity, the new FY 10 outcome indicator is the "Percentage of wellsites inspected which are in violation of applicable rules. The rationale is that by maintaining or reducing the number of sites in violation through inspection activities, the threats to the environment posed by the E&P activities are minimized.

Funding provided through fees related to the regulation of the O&G industry; and revenues generated through State Mineral leases.

**Evidence:**

Random inspection by an independent party is an accepted and proven method of ensuring that a regulated community complies with rules and regulations.

The regulated industry of E&P companies is a large, dynamic and varied group, consisting of integrated multinational corporations, independent producers, and single-person operators. As a result, corporate culture cannot be relied upon to ensure regulatory compliance where strong economic incentives exist to the contrary. Previous inspection statistics show, in a given year, that 5% to 7% of the inspected well sites are in violation of Office of Conservation (OC) regulations. This equates to between 3000 and 4200 well sites statewide. Each site represents potential threat to the environment if it is not operated in accordance with the applicable OC regulations. Performance measures include "% of existing wells inspected" (FY08 29.2% & FY09: 2.1%), "Number of distinct wells inspected" (FY08: 17947, FY09: 13576) "Number of field inspection reports" (FY07: 12091, FY08: 27796, FY09: 27662), and Newly identified orphaned wellsites during the fiscal year" FY07: 102, FY08: 64, & FY09: 211).

The need for an inspection activity is also evident in the large numbers of "orphaned" and "legacy" sites. These sites were primarily developed in a period of industry self-regulation prior to implementation of a formal inspection program and now require some level of environmental assessment or remedial action prior to closure. Operation of a successful inspection activity is a strategy for preventing current E&P operations from resulting in future legacy or orphaned sites.

**Activity ID:** 621

**Activity Name:**

Administration of the POST (Peace Officer Standards and Training) Program and Local Law Enforcement

**Department:** 01 Executive Department

**Agency:** 129 Louisiana Commission on Law Enforcement

**Program:** 2000 State

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

LCLE will be unable to achieve goals and objectives relative to the State Statutory Requirements

**Activity Type:** Existing

**Objective:**

To implement and administer a training curriculum for basic and correction training to certify Louisiana peace officers and reimburse local law enforcement agencies for tuition costs related to those basic training courses.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
272	Key	Number of basic training courses for Peace officers conducted	60	73	60	60	60
274	Supporting	Number of local law enforcement recruits trained/certified	1581	1666	1490	1500	1500
279	Key	Number of grants awarded to local law enforcement agencies from self-generated funds	181	194	155	150	150
280	Supporting	Dollar amount of grants from self-generated funds awards to local agencies	987136	1025398	1109467	1000000	1000000

**Narrative:**

Peace Officer Standards and Training (POST) develops training standards for peace officers in Louisiana. Last year the council certified 1581 Basic Peace Officers, 302 Basic Correctional Peace Officers, and 746 Corrections Officers. POST Staff hosted 18 Homicide Investigator related trainings with 436 investigators trained. POST Staff conducted 4 School Resource Officer (SRO) schools, certifying 103 SRO. POST Staff coordinated 3 "Active Shooter" classes, which trained 76 officers. The Council certified 32 new Firearms Instructors and recertified 437 Firearms Instructors in 4 sessions throughout the state. The Council also certified 23 new Corrections Instructors and recertified 72 Corrections Instructors. POST Staff assisted the Attorney General's Office in hosting 3 Domestic Violence classes that instructed 150 trainers. In addition, 27 basic training academies are continuously monitored and periodically evaluated each year. The Act 562 funds the local law enforcement assistance grant program which provides assistance to local law enforcement and criminal justice agencies throughout the state. The assistance funds may be used to purchase law enforcement or criminal justice-related equipment. Approximately \$375,000 was awarded to 147 local agencies last year for either equipment needs or for use in specialty training courses. The Act 562 Funds

are also used to provide basic training reimbursement to local Law Enforcement agencies. Approximately \$495,000 was reimbursed to local agencies for Basic Peace Officer training, and approximately \$160,00 was reimbursed to local agencies in the area of Corrections training.

#### **Explain How This Activity Advances State Outcome Goal:**

Funds awarded through this activity will advance State Outcome Goal 5-Public Safety by funding the basic training of peace officers throughout Louisiana to bring security to all Louisiana citizens. It is anticipated that the POST Council will certify approximately 1600 basic peace officers, 302 basic correctional peace officers, 746 jailers, and recertify 437 firearms instructors and 72 corrections instructors. POST will reimburse approximately \$495,000 to local agencies for basic officer training, and an additional \$160,000 to local agencies for basic correctional officer training giving law enforcement additional resources to put criminals behind bars and keep them behind bars. Funds to be awarded will advance State Goal # 5 by bringing security to all Louisiana citizens by keeping approximately 450 POST certified firearms instructors proficient in firearms. These firearms instructors, in turn, qualify approximately 15,000 peace officers annually statewide with annual firearm qualifications. Also, the Council will recertify approximately 100 Corrections Instructors to ensure local jails are able to meet mandated training requirements. Grants to be awarded through this activity will advance State Outcome Goal 5-Public Safety by funding local efforts to pursue drug dealers, provide assistance to local law enforcement and prosecutors with tools to put criminals behind bars, and improve communication within law enforcement. Approximately \$490,000 will be awarded to 147 local criminal justice agencies this year to purchase electronic equipment, training equipment, or equipment for narcotics detection and enforcement or for use in specialty training courses.

#### **Evidence:**

In fiscal year 2007-2008, the POST council certified 1414 Basic Peace Officers, 219 Basic Correctional Peace Officers, and 382 Corrections Officers. POST Staff hosted 12 Homicide Investigator related trainings with 313 investigators trained. POST Staff conducted 3 School Resource Officer (SRO) schools, certifying 104 SRO. POST Staff coordinated 3 "Active Shooter" classes, which trained 76 officers. The Council certified 47 new Firearms Instructors and recertified 420 Firearms Instructors in 4 sessions throughout the state. POST certified firearms instructors to qualify approximately 15,000 peace officers annually statewide with their firearm qualifications. The Council also certified 31 new Corrections Instructors and recertified 64 Corrections Instructors. Corrections Instructors certify Correctional Officers to keep the local jails staffed with properly trained personnel. POST Staff assisted the Attorney General's Office in hosting 5 Domestic Violence classes that instructed 177 trainers. POST Staff coordinated and hosted 2 Internal Affairs seminars that trained 29 investigators. In addition, 27 basic training academies are continuously monitored and periodically evaluated each year. The Act 562/440 fund the local law enforcement assistance grant program which provides assistance to local law enforcement and criminal justice agencies throughout the state. The assistance funds may be used to purchase law enforcement or criminal justice-related equipment. Approximately \$302,000 was awarded to 194 local agencies last year for either equipment needs or for use in specialty training courses. The Act 562 Funds are also used to provide basic training reimbursement to local Law Enforcement agencies. Approximately \$327,000 was reimbursed to local agencies for Basic Peace Officer training, and approximately \$80,000 was reimbursed to local agencies in the area of Corrections training. As shown in these two previous fiscal years, the promised results can be reached with awarded funds.

**Activity ID:** 865  
**Activity Name:**  
Immunization  
**Department:** 09 Department of Health and Hospitals  
**Agency:** 326 Office of Public Health  
**Program:** 2000 Personal Health Services  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

Reduced funding of this activity would result in diminished control and delayed elimination of vaccine preventable diseases (VPD). The consequences of a rise in VPD are disabilities and death of LA children and adults. Examples of VPD that a short time ago disabled and killed children and adults are as follows: Diptheria, Pertusssis (whooping cough) haemphilus influenza type b (HIB), varicella (chicken pox), Rubella (German measles), mumps, Polio, etc. If funding is increased, it would enhance and assure best practice control and management of vaccines and systematic immunization of susceptible children, adolescents, adults and outreach/education on the value of immunizations that prevent diseases.

**Activity Type:** Existing

**Objective:**

To control or eliminate preventable diseases by providing vaccine to susceptible persons.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	% of children 19 to 35 mos. of age up to date for DTP, 3 Polio, 3 hib, 3 HBV, 1 MMR and 1 VAR	0	0	0	81.9	82
New	Key	% of kindergartners up to date with 4 DTP, 3 Polio, 2 MMR, and 2 VAR	0	0	0	94.2	95
New	Supporting	% of 6th graders, 11-12 years of age, up to date with 1 Meningitis, 1 Tdap, 2 VAR, 2 HBV, 2 MMR	0	0	0	0	90

**Narrative:**

Immunization prevents outbreaks of infectious diseases through surveillance and outbreak control methods. Through the Immunization Federal Grant, the Immunization program protects LA citizens from the spread of infectious disease by: assuring access to vaccines through the federally funded vaccine for children (VFC) Program. VFC public and private providers receive the vaccine at no charge. This eliminates vaccine cost as a barrier to vaccinating children and provides greater opportunity for vaccination at more health care providers' locations.

According to the US Census Bureau, 18% of LA citizens are considered underinsured. Underinsured are individuals who have insurance but their insurance does not cover immunizations, insurance deductibles are high or have not met their deductibles. OPH data on vaccine doses administered indicates that OPH health units are currently providing 15% of all the vaccines administered in the state. It should be noted that underinsured children are not eligible for vaccine purchase by VFC funds and administered by private providers, thus OPH is the safety net provider.

### Explain How This Activity Advances State Outcome Goal:

Vaccines prevent serious illness and saves lives. The number of cases of most VPD is at an all time low, and hospitalizations and deaths have shown amazing decreases due to vaccinations. Smallpox is gone from the globe. Polio, measles and rubella viruses can no longer circulate in the US population due to high immunity from vaccinations. Immunized children grow to be healthy and productive members of LA, protected against VPD and death. Immunized LA adults are able to lead healthier lives, protected against VPD and death. Louisiana benefits because of the reduced disease burden.

### Evidence:

In our mobile society, over a million people each day travel to and from other countries, where many VPDs remain relatively common. Without vaccine, epidemics of many preventable diseases could return, resulting in increased and unnecessary illness, disability and death among children.

Due to the importance of childhood vaccinations, immunization coverage of children is a major bench mark of the health of our children. In August of each calendar year, a National Immunization Survey (NIS) is conducted to determine estimated vaccination coverage of children 19-35 months of age. The NIS is sponsored by the National Center for Immunizations and Respiratory Diseases (NCIRD) and conducted jointly by NCIRD and the National Center for Health Statistics (NCHS), Center for Disease Control and Prevention.

The NIS conducted in 2008 ranked LA 2nd in the nation for estimated vaccine coverage of individual vaccines and selected vaccination series for children 19-35 months of age. Massachusetts was ranked first and Montana was ranked 50th.

Statute: Section 1928 of the Social Security Act (42 USC 1396s- Provides free vaccines to providers to eliminate cost barriers, accessibility, and promote medical homes as part of the comprehensive well child care providing free vaccine to healthcare providers. Also, it enables us to educate and inform healthcare providers, monitor their activities and ensue fraud and abuse prevention.

Statute: LA R.S. 17:170. This law establishes immunization requirements of persons attending schools, kindergartens, sixth grade, colleges, proprietary or vocational schools and day cares for the first time; and makes the DHH OPH responsible to establish containment procedures in the event of an outbreak.

**Agency:** 326 Office of Public Health  
**Program:** 2000 Personal Health Services  
**State Outcome Goal:** 7 Health  
**Scalable:** True

**Scalable Description:**

If funding is reduced for this activity, morbidity and mortality for women of child-bearing age,, pregnant teens, and infants will increase. These increases will occur as the result of the reduction in preventive health services, information, counseling and clinical services, pertaining to contraception and natural family planning provided by the Family Planning Program (FPP).

**Activity Type:** Existing

**Objective:**

To assist individuals in determining the number and spacing of their children, through the provision of education, counseling, and medical services.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
2395	Key	# of women in need of publicly funded FP services	49599	48809	42871	61905	65000
New	Key	% of clients returning for follow up FP visits	0	0	0	0	54
11168	Supporting	Average cost of providing FP services per person	177	258	244	177	158

**Narrative:**

FP services are offered to women of child bearing age and men, with priority of services given to individuals from low -income families. A broad range of acceptable and effective family planning methods are offered. FP methods include natural FP, infertility services and adolescent abstinence counseling. The broad range of services does not include abortion as a FP method. Preventive Health Services, in accordance with nationally recognized standards of care are an integral component of the FP clinic visit. Preventive services included, but not limited to, complete physical exam, breast and cervical cancer screening and prevention services, sexually transmitted disease (STD) and HIV prevention education, testing and referral. FPP receives federal funding (publicly supported FP clinic) from the Office of Population Affairs (Title X).

**Explain How This Activity Advances State Outcome Goal:**

FP clinics are often the only source of medical care and health information for most of the people who attend the clinic. In 2006, FP services helped women avoid 4.94 million unintended pregnancies. Contraceptive services at publicly funded FP clinics helped prevent 1.48 million of these unintended pregnancies. Without publicly funded FP services, the number of unintended pregnancies and abortions occurring in the United States would be nearly two-thirds higher among women overall and among teens.

**Evidence:**

According to the Alan Guttmacher Institute, publicly funded clinic services afford considerable fiscal benefits to

federal and state governments - \$4.3 billion in savings in a single year. For every dollar spent, the government saves \$4.02. These estimated savings come from avoiding the public sector costs for maternal and infant care that would otherwise result from births women had wanted to avoid.

According to studies conducted by the National Campaign to Prevent Teen Pregnancy: 1) Teens are waiting longer to have sex than they did in the past. Some 13% of females and 15% of males, age 15-19, in 2002, had had sex before age 15; compared with 19% and 21%, respectively, in 1995. 2) The majority of the decline in teen pregnancy rates is due to more consistent contraceptive use; the rest is due to higher proportions of teens choosing to delay sexual activity.

Title X FPP - Public Law 91-572; Authority: 42 U.S.C. 3009-4; Statute and Regulations 45 CFR Part 59.

**Activity ID:** 293

**Activity Name:**

1000 - Executive Administration and Program Support

**Department:** 09 Department of Health and Hospitals

**Agency:** 307 Office of the Secretary

**Program:** 1000 Management and Finance

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

The strength of the Management and Finance program lies to a large extent in its internal operations. An increase in funding will allow us to more fully align administrative and programmatic support functions with the needs of citizens and customer agencies at a time when demand for health services continue to grow due to current economic conditions, H1N1 pandemic and the rise in increased health needs among the public. Since FY2008 the Office of the Secretary T.O. has declined by 52 positions. A reduction in funding will lead to longer recruitment cycles which will result in extended waits for service, critical positions remaining unfilled, critical health programs or services being reduced or eliminated, and will also impact policies, laws, and constitutional provisions, which are all factors in ensuring that government services are performed accurately and efficiently.

The OCD increased DHH allotment in living units (IAT) from 3,000 to 3,300 for Permanent Supportive Housing.

**Activity Type:** Existing

**Objective:**

To provide leadership, strategic and policy direction while maximizing resources and maintaining the highest level of government performance and accountability standards.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10029	Key	Percentage of OS indicators meeting or exceeding established targets	16	50	64	75	80

New	Supporting	Percentage of department's employees receiving annual Performance Progress Report (PPR) ratings	97	0	0	98	98
New	Supporting	Total number of DHH public and privately owned projects or construction plans reviewed and/or monitored for compliance with state licensing laws	257	0	0	300	300

**Narrative:**

Executive Management provides leadership, technical support, strategic and policy direction to various functions

throughout the department and ensures that policies and procedures put in place are relevant to the structure of agency operations and adhere to strictest government performance and accountability standards.

Bureau of Media and Communications is responsible preparing and distributing information relevant to all operations of the department. The bureau's main functions involve public information, internal communications and computer graphics. The intergovernmental relations coordinates legislative activities and communication between legislators and members of congress; reviews/tracks legislation and maintains a continuous stream of information for the citizens of Louisiana, executive staff of the department, the Legislature, Office of the Governor, and various news media.

Bureau of Policy Research and Program Development provides research, develops and implements special initiatives within the department and provides technical assistance in the areas of policy interpretation and cost-effectiveness calculations for waivers. It also includes a Policy Research section which is responsible for establishing state health policy directions, setting standards based on "best practices", including establishment of new programs and services, and building consensus for initiatives with applicable constituency groups.

Human Resources, Training & Staff Development provides services to applicants, employees, and managers in the areas of Time & Attendance, Employee Relations, Labor Law Compliance, Classification, Pay Administration, Performance Planning & Review, Drug Testing, Employee Administration, and Staff Development.

Division of Engineering & Architectural Services works with staff architects and engineers in reviewing plans and specifications for licensing of new or renovated hospitals and health care facilities for approximately 5,562,272 gross square feet of space in 1,249 facilities; also serves as a liaison between the Division of Administration's Facility Planning & Control and the various user agencies within the department and works with those agencies serving as consultants to insure their special needs and requirements are included in the implementation of their projects included in the Capital Outlay Bill.

#### **Explain How This Activity Advances State Outcome Goal:**

A significant part of the Executive Administration's mission is to lead the department in a way that reflects the values the Governor believes his administration should embody: responsiveness, accountability, transparency and efficiency. This means continuously improving government service delivery and agency accountability, holding ourselves to the highest standards in customer service, and engendering pride among our residents in the operation of government itself. All of the components that make up the Executive Administration activity succinctly contribute toward advancing the DHH goal to provide health related services in a transparent and accountable manner.

Executive Administration has one of the smallest and most streamlined Management and Finance teams in all of state government. Although workload demands in the Office of Management and Finance have steadily increased, T.O. has declined by 52 positions. All of the functions within the Executive Administration activity are geared toward adhering to the strictest government performance and accountability standards, delivering transparent, accountable and effective government services and making the overall department more transparent by allowing citizens and customer agencies to hold us more accountable for the way in which dollars are spent.

The components that make up Executive Administration are intricately woven into the DHH mission to provide better health outcomes to Louisiana citizens. All of these components contribute to the pillar that supports every program in DHH with the expectation that they will ensure that the department is operating in accordance with applicable laws and regulations in an effort to make the department more transparent and accountable to the citizens we serve.

#### **Evidence:**

The current leadership of DHH has already exhibited a passion for comprehensively analyzing and improving every aspect of agency management, functions and operations. Some of the initiatives for fiscal year 2010-2011 build on previous work to streamline critical business processes in the internal service agencies, while other initiatives represent new efforts to modernize critical operations systems in our internal service agencies. Work to streamline critical business processes in our internal service agencies has included consolidating all the department's HR units into once central location. The services of the Human Resources division ensures that agency staff are well managed and properly trained, that employee skills are matched to workload, and that staff are well supported.

Recruiting and retaining well credentialed staff with advanced degrees, professional certifications and industry experience will result in superior health service ultimately generating public satisfaction. However, all of our initiatives are aligned with our policy priorities: to provide leadership and technical support services, while maximizing resources, in order to fulfill the mission of the Department.

In Executive Administration, the Louisiana Health Care Consumer Right to Know (CRTK) initiative will directly increase access and utility of public data and information on the availability, quality, and cost of health care services for consumers, providers, and policy makers. The CRTK will collect and publish a broad range of healthcare information to give healthcare consumers expanded, web-based access to reliable information on the cost, quality and performance of their healthcare providers and health plans. The website will also provide a research portal that the public can access for more in depth analysis of hospitals, plans, and nursing homes and public health indicators. The Health Data Panel, a statutorily-created advisory committee, will provide recommendations to the Department on the design and implementation of the CRTK Act (SB 287/ACT 537 of the 2008 Regular Legislative Session).

<b>Statutory Dedication:</b>	P01	Louisiana Fire Marshal Fund
------------------------------	-----	-----------------------------

**Activity ID:** 430

**Activity Name:**

Arson

**Department:** 08B Public Safety Services

**Agency:** 422 Office of State Fire Marshal

**Program:** 1000 Fire Prevention

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

- Uninvestigated arson cases seriously impact Life Safety and the state's economy;
- An estimated \$27 Million per year in fraudulent arson-related claims is paid each year, resulting in Louisiana having the 3rd highest insurance rates in the nation;
- Arson Division manpower was cut 47% in 2001, reducing its ability to respond to arson calls by over 30% despite significantly increased efficiencies in operations;
- Post-Katrina arson calls for service have risen dramatically (34.5%);
- Existing funding for Arson Investigation does not meet the needs of the state's Fire Service, Law Enforcement and Public interests.
- Continued or increased funding for personnel would allow retention of the productivity status quo of 60 cases per investigator per year (upon completion of training);
- A reduction in funding would result in an immediate decrease in productivity in excess of 60 cases/year due to the investigative void created and resulting increase in response time(s).

**Activity Type:** Existing

**Objective:**

To identify, investigate and prosecute perpetrators of fires of suspicious origin; to order investigation of fires that result in human death and of significant social and/or economic impact; to investigate at least 540 cases per year with a clearance rate of 30% through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
2096	Supporting	Number of Investigations conducted	550	550	537	540	540
11542	Key	Arson Clearance Rate(percentage)	36.7	36.02	36.26	18	30

**Narrative:**

RS 40:1568 and 1568.1 directs the Fire Marshal's Office to investigate fires of suspicious origins, any fire reported to have been caused by design, and to order special investigation(s) of any fire resulting in human death within the state. The mandated duties of the Arson Division affects the following State Goals:

- Public Safety;
- Economic Growth;
- Safe and Thriving Children and Family;

The Arson Investigation Division is the agency's law enforcement arm:

- composed of 11 investigators (\*2 recently added) and 1 field supervisor;
- 3 investigators are regional Accelerant Detection K-9 handlers;
- All P.O.S.T. certified law enforcement officers;
- Commissioned pursuant to RS 40: 1563.1;
- Statewide authority;
- Trained in the specialized field of Arson Investigation;
- Self-Funded through the Fire Marshal Fund.

The Arson Division currently investigates, on average, 540-550 cases per year.

- Emphasis on high profile events and fire fatality cases (inclusive of homicide), which account for approximately 9% of the investigations.
- FY 08-09: 46 fatality fires involving 65 victims;
- FY 08-09: 3 of 4 homicide cases closed by arrest (6 victims).

The majority of the Arson Division's cases originate in smaller communities and largely rural areas served by local law enforcement with no expertise in arson investigation, and small or all volunteer fire departments that have limited fire cause and origin expertise and no investigative capabilities.

- Without the Arson Division, these fires would not be investigated.
- There is heavy reliance upon the Arson Division for its specialized investigative skills as well as the arson-related training provided to these entities as well as the public.
- The Arson Division also supplements fire investigations in metropolitan areas, particularly the deployment of Accelerant Detection K-9 assets to major fire events.

The Arson Division successfully partners with all LA fire and law enforcement entities as well as federal law enforcement agencies, state and federal prosecutors and the insurance industry in investigating and combating arson.

#### **Explain How This Activity Advances State Outcome Goal:**

The activities of the Arson Division are critical to the state's Public Safety and Economic Growth goals, particularly during times of major storm activity, economic uncertainty, and high insurance rates. The state's Educational and family oriented goals are also impacted by services provided.

#### **Facts:**

- The state's property insurance rates rank 3rd in the nation;
- An estimated \$27 million is paid in fraudulent arson/fire claims every year, directly affecting property insurance rates;
- 34.5% increase in arson calls for service since FY 04/05 (post Katrina);

To advance the stated goals, the Arson Division has:

- Increased individual caseload and performed at a rate double that of the national average;
- Partnered with the insurance industry to place two K-9 accelerant detection dogs in south Louisiana in an effort to combat these crimes;
- Begun an educational program instructing local fire and law enforcement agencies in the fields of fire cause and origin, arson scene security, and fire fatality investigation;
- Continued to provide public and youth education in the schools, promoting Safe and Thriving Children and Family;
- Begun development of regional Arson Task Forces, partnering with local Fire Service and Law Enforcement, with the intent of providing timely response, consistent and effective investigations, and enhanced arson-related education to local fire service, law enforcement and the public;
- Actively sought Federal funds to enhance the collaborative Task Force effort, recently awarded over \$62,000 to purchase and equip six (6) Arson Investigation trailers to be regionally located to facilitate Task Force operations;

Through these efforts the Arson Division is proactively collaborating and communicating with all stakeholders to amplify the likelihood of long term success.

#### **Evidence:**

Past performance levels:

- In FY 99-00, the Arson Division investigated 794 cases;
- Caseload per investigator from 99-00 to 01-02 averaged 39 cases/investigator;
- Average Case Clearance 99-00 through 01-02 was 25.4%
- In 2001 (FY 01-02) manpower was reduced from 17 to 9 investigators;

Current performance levels:

- Due to the manpower reduction, calls for service have been reduced to the current average of 550 cases/year;
- Caseload per investigator now averages 60 cases/investigator per year;
- Despite increased caseload, the division's 9 investigators have consistently sustained case clearance rates (inclusive of undetermined fires), double the FBI's Uniform Crime Report (UCR) figure of 18% for the past three years, averaging a clearance rate of 36.33% over the period;

Projection:

- Once the Task Forces become fully operational, it is anticipated that calls for service will exceed projections for the current and upcoming Fiscal Years;
- Unless sufficient manpower is available to manage the increased calls for service, it is likely there will be a resulting reduction of the Key Performance Indicator – Arson Case Clearance.

**Activity ID:** 421  
**Activity Name:** Inspections  
**Department:** 08B Public Safety Services  
**Agency:** 422 Office of State Fire Marshal  
**Program:** 1000 Fire Prevention  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Continued funding will:

- Save and improve the lives and property of the citizens and visitors of Louisiana
- Expedite the opening of safe businesses and events, insuring positive economic growth and increase state revenue.
- Enhance collaboration with other state agencies, local governments, and private industry to promote safety and education.
- Improve the cultural and recreational opportunities available throughout the state by insuring safe venues pre-activity inspections and presence at activities
- Strengthen governmental ability to achieve results efficiently and effectively by the collection of data by inspectors which can be utilized in formulation of legislation to enhance public safety.

Reduced funding will:

- Increase the probability of death or injury with non-compliance to life-safety codes
- Impact economic growth by postponing the openings of new and expanding businesses
- Increases in insurance premiums or loss of insurability.

**Activity Type:** Existing

**Objective:**

To save lives and property while promoting economic growth by performing inspections of new/expanding businesses within 2 weeks of request, addressing all consumer concerns, increasing fire safety awareness and protecting the public and business community from consumer fraud through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
2035	Supporting	Percentage of Inspections performed within 2 weeks	97	98	98	93	95
2046	Supporting	Percentage of events(amusements) inspected	100	100	100	75	100
20156	Supporting	Percentage of public firework displays inspected	100	100	100	75	100
10564	Supporting	Percentage of Licensing Investigations cleared	134	70	76	80	80
2082	Supporting	Percentage of required healthcare inspections completed	93.6	90.4	87	80	93

**Narrative:**

The activities of the Inspections section insure the safety of the citizens and visitors of Louisiana, enhance the

protection of property, and educate the public and industry in an effort to create a safe environment and promote economic growth and development. These activities include:

- 98 % of new and renovated structures are inspected within 2 weeks of requested inspection date allowing these businesses to open in a timely manner, promoting positive economic growth and development.
- The majority of fire deaths occur in private homes. As a result of inspections performed by this office 7,941 family daycare homes are now equipped with smoke detectors and fire extinguishers.
- Inspection of all commercial and public structures in the state, including in home child-care operations, which includes but not limited to all institutional occupancies requiring state and federal licenses and certification, detention, colleges, universities, state-owned or state-leased properties, hospitals and nursing homes, schools, manufactured homes, industrialized buildings, and licensing of private industries;
- Boiler and pressure vessel inspections per American Society of Mechanical Engineer (ASME) and the National Board of Boiler and Pressure Vessels (NBIC) inspection code;
- Amusement rides/attractions in accordance with American Standards Testing Material (ASTM) standards;
- Fireworks in accordance with all National Fire Protection Association (NFPA) related standards;
- Regulation of life safety and property protection contractors and employees of said contractors for compliance to all applicable NFPA codes and standards, including but not limited to sprinkler, fire and security alarms and systems, and locksmiths;
- Licensing of manufactured housing contractors, retailers, developers, salesman and installers,
- Perform criminal background checks on licensing applicants to reduce the number of convicted felons in homes and businesses.
- Collect and maintain records of fires occurring in the state, together with all facts, statistics, and circumstances thereof, including the origin of the fire, that have been determined by the investigations provided for in this section or otherwise.
- No fire deaths have occurred in functioning commercial properties that have passed inspection by the this office
- Recurring inspections reduce operations expenditures of business, through reduced insurance costs and reduced down-time.

#### **Explain How This Activity Advances State Outcome Goal:**

The Fire Inspection activity makes a direct impact on the Public Safety and Economic Development Goals.

The Fire Inspection activity enables new businesses to open and existing business to expand without delay. It further improves the business climate by reducing insurance rates, while protecting the health and safety of our residents and visitors.

The Inspection process:

- Provides data which assists in the development of or modification to codes making buildings safer thus saving lives and property;
- Assures the safety of individuals and families during all types of events;

The Licensing process:

- Promotes fair and equitable business growth;
- Ensures proper installation of systems and equipment for protecting life and property;
- Prevents convicted felons in home and businesses;
- Protects consumers from fraud.
- The collection and analysis of fire data helps to identify areas of concern and provides a basis for development of education materials and legislation to promote a safe environment within the state.

#### **Evidence:**

In fiscal year 2007-2008

- The inspections section received 10,038 requests to conduct final inspections of new and renovated properties, of which 9,882 (98%) of these inspections were conducted within two weeks of the requested date making it possible for these businesses to open in a timely manner thus promoting economic development.
- The inspection section conducted 70,993 inspections at family in home daycares, daycare centers, residential board and care facilities, public assemblies, schools, state leased buildings, colleges and universities, detention centers, and a multitude of other types of occupancies, insuring public safety while impacting the insurance rates by

reducing the likelihood of injury, death or damage. In the State of Louisiana, from 2007-2008, less than 2% of all building fires, less than 4% of total property loss, and zero fire related deaths were in buildings that receive regular annual inspections by the State Fire Marshal.

- A majority of fire deaths occur in single family homes, however, as a result of this office inspecting in home family daycares 7,941 single or private homes are now provided with smoke detectors and fire extinguishers.

- There were no significant building damages or explosions from the 33,000 boilers that we have in the state .

- No major injuries or fatalities occurred on the 4,000 rides/attractions inspected.

- Dramatically decreased the number of illegal fireworks at the 800 fireworks retail stands and licensed over 350 public firework displays without incident. This is all done by cross training and certifying inspectors in a number of different disciplines.

- In fiscal year 2007-2008, the licensing section received 643 complaints and processed 8,265 applications. By providing proactive enforcement and collaborated training with the life safety and property protection industry, we have been able to reduce the number of complaints received in fiscal year 2008-2009 to 536 and have increased the number of new applications being submitted to 8,480.

**Activity ID:** 299  
**Activity Name:** Executive  
**Department:** 08B Public Safety Services  
**Agency:** 422 Office of State Fire Marshal  
**Program:** 1000 Fire Prevention  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Funding of the Executive Activity of the Office of State Fire Marshal (OSFM) ensures the infrastructure to achieve consistent statewide administration of code enforcement via plan review and inspections, licensure of fire protection and other contractors, arson investigation and emergency services. Funding will allow continued cross-training between sections, elimination of duplicative services and collaboration with local governments and the design, construction, fire protection and other regulated industries that serve in an advisory capacity as requested by the Fire Marshal. Funding will allow continued monitoring of performance to ensure timely reviews and inspections to positively impact economic development, public safety and fire safety education while minimizing cost of code compliance. Lack of funding of the Executive Activity will eliminate proper leadership, oversight, and direction, and cause state spending without proper delivery of fire prevention services.

**Activity Type:** Existing

**Objective:**

By seeing that 80% of objectives are met, to ensure efficient use of state resources to ensure citizens and visitors are safe, individuals with disabilities are provided equal access, and that energy efficiency, fire safety education, and timely emergency services are provided through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of agency objectives met.	0	0	0	0	80

**Narrative:**

The Office of State Fire Marshal (OSFM) was established by the State Legislature by passage of Act 152 of 1904. R. S. 40:1562.1 provides that OSFM shall be organized into the Administrative (Executive), Engineering (Plan Review), Inspection and Investigation sections. OSFM is charged with the responsibility of the protection of the life and property of the citizens of the State of Louisiana from fire, explosion and related hazards in the constructed environment through the enforcement of legislative mandates and administrative rules or directives. OSFM is provided with enforcement authority to investigate fires of suspicious origin and to inspect buildings, structures, watercrafts and movables to ensure that they are operated in a safe manner. OSFM is also responsible for ensuring the provision of equal access to disabled individuals in the same constructed environment, and to promote the efficient use of energy in accordance with the Commercial Building Energy Conservation Code based on ASHRAE/IES 90.1-1989 (Energy Code). Act 125 of the 1958 legislative session created a Fire Marshal Tax which currently funds approximately 85% of the activities of the office.

The Fire Marshal specifically performs the following activities in the normal scope of his duties: intervention in code compliance issues; instruction and consultation with architects on Life Safety and other codes/standards; response to fire calls for service; performance of fire investigations; development and delivery of public safety announcements; provision of fire safety education. The Fire Marshal also acts as public information officer for the Fire Marshal's office. The Executive Section also monitors performance indicators and consults with associated industry leaders

regarding public need and modifies office practice accordingly.

### Explain How This Activity Advances State Outcome Goal:

The Executive Activity of the Office of State Fire Marshal provides leadership and support to all public safety programs of the office and maximizes efficiency in personnel, workload and use of resources. Oversight by the Executive Activity allows the office to stay in touch with public need, maintain proper direction and tools for effective service, and promotion of life safety and property protection. For example, satellite offices have been established in Alexandria, Lake Charles, Shreveport, Monroe, Slidell, and New Orleans to provide code consultation and interpretation at the local level with support and supervision from the main office in Baton Rouge. Implementation of a proposed new computer system will allow for state of the art, real-time interaction with the general public, local officials, and other state agencies. The Executive Activity collaborates with state agencies local governmental entities to ensure that various state, laws, rules, and codes are upheld.

### Evidence:

Satellite offices established at the direction of the Fire Marshal (of the Executive Activity) in Alexandria, Lake Charles, Shreveport, Monroe, Slidell, and New Orleans have provided code consultation and interpretation at the local level, and have assisted in the timely performance of plan reviews. Safety is maintained in buildings with specific frequency of inspections as defined by the Executive Activity. Lower fire insurance premiums are realized through consistent statewide enforcement and collaboration with local fire prevention bureaus as promoted by the Executive Activity.

Emergency Services  
**Department:** 08B Public Safety Services  
**Agency:** 422 Office of State Fire Marshal  
**Program:** 1000 Fire Prevention  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Requested funding will:

- Save and improve the lives and property of the citizens and visitors of Louisiana,
- Enhance collaboration with local, state and federal agencies and departments in providing a coordinated and effective emergency response to hurricanes, fires, flooding and other emergencies, and
- Improve the recovery of devastated areas after a disaster.

Lack of funding will:

- Increase the probability of death or injury in times of disaster,
- Impact economic growth by postponing the openings of disaster affected businesses, and
- Increase insurance premiums or loss of insurability.

**Activity Type:** New

**Objective:**

By participating in four training drills per year including two peer review post-evaluations, to ensure Louisiana will have an effective state-wide fire service response to all disasters, natural or man-made, to reduce the potential number of injuries, deaths and property loss through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard

New	Supporting	Number of fire departments reached through Liaison Program	0	0	0	0	75
New	Supporting	Percentage of response to requests for assistance	0	0	0	0	100

**Narrative:**

The SFM's stated mission and legal mandate (R.S.40:1563) is to "protect life and property from the devastation of fire and explosion." Historically, the agency's focus has been on fire prevention, code enforcement, and fire investigation. Prior to 2006, the SFM's emergency response role was limited to inspecting evacuation shelters and assisting Louisiana State Police (LSP) in telephone calls involving evacuation. In the aftermath of Hurricanes Katrina and Rita, the SFM's response role was expanded per the State of Louisiana Emergency Operations Plan. The SFM office now has primary and support responsibilities for the following Emergency Support Functions (ESF): ESF 4-Fire (primary); ESF 6-Mass Care, Emergency Assistance, Housing and Human Services (support to Department of Social Services in inspecting shelters); ESF 8-Public Health & Medical Services (support to Department of Health and Hospitals-DHH in emergency medical response); ESF 9-Search & Rescue (support to Wildlife & Fisheries-WLF in search and rescue); ESF 10-Oil Spill, Hazardous Materials and Radiological (support to LSP in hazardous material response); and, ESF 15-Emergency Public Information (to support Governor's Office of

Homeland Security and Emergency Preparedness for communication). As part of its primary responsibility for ESF 4, the SFM is now tasked for coordinating all in-state, interstate and federal firefighting resources during times of emergency. The SFM has also been named as the Administrator for three newly created Urban Search & Rescue (US&R) Regional Teams.

No additional funding was provided to the SFM for its new emergency response duties. The SFM has crossed trained current staff and utilized current equipment and budget to fulfill its legal responsibilities.

This offer includes the following:

- The purchase of a new command vehicle-one time cost,
- A leased facility for storage of vehicle and equipment-reoccurring cost,
- A generator for the SFM Operations Center-one time cost, and
- Resources to sustain SFM team and US&R Regional Teams-reoccurring cost.

The SFM cannot maintain its current level of response without additional funding for equipment and training, thus putting the citizens of the state at risk to more property damage, injury and even death because of a slowed or ineffective response. Requested sustaining funding will allow the SFM to maintain coordination and operational level of response and administration of regional US&R teams.

#### **Explain How This Activity Advances State Outcome Goal:**

The SFM coordinates and responds to various man-made and natural disasters and emergencies. This offer provides the tools to best position the SFM to fulfill its emergency preparedness mission. The mission is fulfilled by a forty-man field emergency response team and additional agency staff to man the SFM Operations Center located at the agency's headquarters. All team members come from current staff from across other agency activities and are crossed-trained to perform such duties. The field team uses a retrofitted arson and fire investigation truck as a command & communication vehicle. This vehicle is 11 years old and is in need of replacement, but has shown the agency's dedication of using existing resources to fulfill its mission. The operations center team members identify and fill requests for fire, rescue and medical resources as requested by local fire departments in times of emergencies. The center has no emergency power backup.

SFM will utilize the command vehicle and operations center in regularly scheduled training exercises with other fire departments and state agencies to ensure proficiency with the equipment and team building with other departments. The vehicle will be stored in Baton Rouge and will be used throughout Louisiana at all emergency incidents and training exercises the field response team is involved with.

Additionally, field team members and the command vehicle will be used statewide to assist in the agency's recovery role by using it as a mobile office to review and expedite plans in devastated areas. All agency resources and manpower will be deployed, when requested, to any incident in support of local fire resources or other state and federal agencies during man-made or natural disasters.

#### **Evidence:**

As evidence of the SFM Emergency Response Team's (SFMERT) capabilities the following activity was accomplished during Hurricanes Gustav and Ike:

The SFMERT was activated on August 27, 2009 in preparation for Gustav.

The SFMERT manned its Operations Center with 24 staff members. The SFMERT completed 27 missions in support of fire and EMS response activities. These missions included coordinating in-state and out of state fire resources, including but not limited to, securing and deploying apparatus, man power and supplies to affected areas.

The SFMERT Liaison program contacted all 600 fire departments (FDs) in the state through the 64 parish OEP offices to determine current and anticipated needs and provided proper state resource contact information and procedures for future needs.

The SFMERT Field Team deployed and fulfilled the following missions:

Hurricane Gustav August 30 – September 6

- Performed medical triage/patient assessment at the LSU John M. Parker Coliseum for bus evacuees in support of DHH.
- Stood up in anticipation in Gonzales to assist WLF for rescue response in Orleans, Terrebonne, and Vermillion Parish. Did not deploy due to no response needed.
- Assisted WLF in its response in Avoyelles Parish. Missions included evacuation of citizens, providing water/food to citizens, assisting the Avoyelles Parish Sheriff's office in unloading trucks and utilizing its mobile command vehicle for communication and command support to the parish OEP.
- Assisted Baker FD in distributing water, food, ice and tarps to citizens.
- Assisted Bayou Cane FD in logistical support for area FDs.
- Remained activated from September 6 until September 13 while preparing for Ike.

#### Hurricane Ike September 13-21

- Performed liaison visits (to assess storm impact and needs) to FDs in Cameron, Calcasieu, Allen, Beau Regard, Vernon, Vermillion, Jefferson Davis, Evangeline, Acadia, Rapides and Lafayette Parishes.
- Performed security, medical and fire response for the Erath flood event, including utilizing its mobile command vehicle for communication and command for the town and the portable light tower for security lighting.
- Set up its mobile command vehicle for communication and command in support of the Cameron Parish OEP in Hackberry and Johnson Bayou. Provided fire support to the local FDs.

SFMERT was awarded the Fire Service Award of Excellence by the International Association of Fire Chiefs for its hurricane response.

**Activity ID:** 523  
**Activity Name:**  
 Fire Safety Education  
**Department:** 08B Public Safety Services  
**Agency:** 422 Office of State Fire Marshal  
**Program:** 1000 Fire Prevention  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Proposed funding will enhance public safety and save lives by providing fire safety education to the general public. The desired results of this particular program are to reduce the number of fires and fire deaths in the State of Louisiana.

If fully funded, SFM can provide the following:

- \*Fire education targeting low-income families and fire prone regions of the State
- \*Fire and Life Safety programs geared towards pre-school and school aged children
- \*Public awareness campaigns on fire and life safety issues with Public Service Announcements
- \*Manage a Statewide Public Fire Education and Awareness program
- \*Establish a more active voice in the collaborative public safety awareness campaigns.

**Activity Type:** New

**Objective:**

To reduce fire deaths, injuries and property loss through education by reaching 2,500 children and 1,000 adults, annually, with fire safety programs and educational venues and to assist local fire departments in establishing and sustaining fire safety education programs through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	Percentage of those who complete fire safety education program with 20% improvement on knowledge assessment	0	0	0	0	80

**Narrative:**

The Office of the State Fire Marshal is the state agency responsible for the safety of citizens and visitors to our State as it pertains to life safety due to fire. There has been a significant need for a "Lead" agency to partner with local fire agencies in a collaborative effort to educate citizens to the dangers of fire and what they can do to protect themselves. This proposed function of the SFM can be utilized in conjunction with other state and local agencies to provide aggressive and pro-active safety education. With adequate funding we anticipate an aggressive program that will meet the following objectives:

- Fire education targeting low-income families and fire prone regions of the State.
- Fire and Life Safety programs geared towards pre-school and school aged children.
- Reduction of fire deaths and injuries.
- Establishment of cooperative relationships with citizens and visitors to our state.
- Development of cooperative relationships with local Fire Prevention Bureaus.
- Collection and analysis of data in an effort to project national and local trends.
- Establish training needs based on national and local trends.
- Launch statewide "Hi-Impact"/"Blitz" type media campaigns.

- Plan and conduct community fire and life safety education programs.
- Plan and conduct special events
- Develop fire related educational materials to deliver message of prevention

#### **Explain How This Activity Advances State Outcome Goal:**

The proposed activity of the Public Fire Education section of our office has been established with the intent to save lives and reduce the property losses in our state due to fire. The goal of educating individuals to readily be able to protect themselves when challenged with a fire emergency, as well as, the ability to provide safety measures in their homes and businesses is paramount to "effective" and "pro-active" leadership. This activity will certainly advance the State outcome goal of Youth Education by providing fire safety education to our youth by direct programs (with the use of educational tools such as "all hazard" safety trailers and fire extinguisher simulators) as well as partnerships with other state and local Public Safety organizations. It will also advance the state outcome goal of Hurricane Protection and Emergency Preparedness by public educational programs offered at various venues. Another advancement of a State outcome goal is in the area of Diversified Economic Growth, by reducing the number of fire deaths and property losses which will have a positive impact on business wanting to locate in a "fire safe" state. The final state outcome goal that will advance due to this activity will be Public Safety, through collaborative efforts with other state and local Public Safety agencies working towards the common goal of saving lives.

#### **Evidence:**

Over the last 3 years, Louisiana has experienced 223 deaths due to fire. Last year, we were able to determine that of the 65 Fire deaths experienced; only 3 homes where the deaths occurred had a working smoke detector. We also have reports from local fire departments of many citizens who acknowledged that a child that received fire education information made the difference of whether or not a smoke detector was present in their home.

National statistics show that:

- On average in the United States in 2006, someone died in a fire about every 162 minutes, and someone was injured every 32 minutes
- Four out of five fire deaths in 2006 occurred in homes.
- Most victims of fires die from smoke inhalation and not burns.
- Cooking equipment, most often a range or stovetop, is the leading cause of reported home fires and home fire injuries in the United States.
- In 2006, residential fires caused nearly \$7 billion in property damage.

**Activity ID:** 913

**Activity Name:**

Office of School and Community Support - Support Services

**Department:** 19D Department of Education

**Agency:** 678 State Activities

**Program:** 5000 Office of School & Community Support

**State Outcome Goal:** 1 Education

**Scalable:** True

**Scalable Description:**

There are limited state funds, and with some interventions like driver education programming, no state funds available to support state level involvement in improving adherence to legislative requirements. Without additional funds, an organizational infrastructure which supports a comprehensive learning supports system to address the barriers to learning and teaching will not be fully developed. Additional funding will allow for the expansion of a state-level learning supports resource team that is necessary to begin modeling the infrastructure of the coalesced efforts that regions, districts, and schools should adopt to implement a comprehensive learning supports system. Additional funding will also allow for expansion of school bus transportation and driver education support staff and related expenses in the oversight of these activities.

**Activity Type:** Existing

**Objective:**

Through administration of the 21st Century Community Learning Centers Program, to have a 5% increase in the number of providers that earns a rating of satisfactory or above in the annual program evaluation process.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago

15844	Key	Number of students participating (21st CCLC)	36644	13611	8633	13000	13000

**Narrative:**

The mission of the Office of School and Community Support (OSCS) is to ensure the provision of high quality support and services to all communities and schools participating in the various programs administered by the Office. The office is responsible for the administration of three divisions: (1) Division of Nutrition Assistance, (2) Division of Dropout Prevention/Adult & Family Services, and (3) Division of Student Learning and Support.

The focus of the Division of Student Learning and Support (SLS) is to assist districts in crafting a comprehensive system of student learning supports, thereby, enhancing districts' ability to significantly raise academic achievement for Louisiana's students and create world-class school environments that are safe and healthy. SLS also provides operational activities for student transportation, driver education, and emergency planning with other state agencies. A Comprehensive Learning Supports System consists of various interventions which been grouped into six programmatic arenas that serve as our blueprint. These six learning support content arenas capture the essence of the multifaceted way schools must address barriers. The six content arenas encompass interventions for enhancing regular classroom strategies to enable learning, supporting transitions, increasing family and school connections, facilitating student and family access to effective services and special assistance as needed, responding to, and, where feasible, prevent crises, and increasing community involvement and support.

The oversight of the school bus transportation program provides transportation officials in local education agencies (LEAs) with a foundation for continued improvement in the execution of safe and effective pupil transportation programs that adhere to current state and federal regulations. In addition, the state's school bus and school bus driver resources are prepared to be utilized in Hurricane Preparedness as a backup resource in citizen evacuations. The goal of the driver education program is to train traffic citizens who will be safe, efficient and skilled users of the highway transportation system. To achieve this goal we must provide the best instructional system utilizing existing resources and modern technology.

Operations in this office also assist in managing emergency preparedness with Pandemic Flu planning.

**Explain How This Activity Advances State Outcome Goal:**

The State's Education Outcome Goal is to increase academic achievement for all students, resulting in fewer children dropping out of school, and an educated workforce. This activity addresses all four key factors contributing to the education of Louisiana's youth. There are many barriers that interfere with ensuring that all students have an equal opportunity to succeed at school. All these barriers contribute to large numbers of disconnected students who need learning supports to address barriers to learning and teaching and help them re-engage in the learning environment. Offering opportunities through this office that seek to provide a school environment that offers minimal distractions and provides knowledge, skills, and abilities that equip our young people to make safe, educated decisions that allow them opportunity to be effective citizens in a global market.

These programs will also support State Outcome Goals for 3-Transportation, 4- Hurricane Recovery and Emergency Preparedness, 5-Public Safety, and 6-Safe and Thriving Children and Families.

**Evidence:**

According to the tenets of the Whole Child Initiative through ASCD, there is evidence that students learn best when their academic, emotional, physical, and social needs are met. Educating the whole child, one who is healthy, safe, engaged, supported, and challenged, is a pre-requisite to creating a world class educational system. In reaching our goal of enabling all students to have an equal opportunity for success at school, the work of Drs. Howard Adelman and Linda Taylor through the UCLA School Mental Health Project, indicate the need for developing a comprehensive, multifaceted, and cohesive system of learning supports. Learning supports are the resources, strategies, and practices that provide physical, social, emotional, and intellectual supports to directly address barriers to learning and teaching and re-engage disconnected students. There are many barriers that interfere with ensuring all students have an equal opportunity to succeed at school. A comprehensive learning supports system is essential to ensuring higher academic achievement, closing the achievement gap, and preparing students to be effective citizens in a global market.

According to the National Highway Traffic Safety Administration (NHTSA), school bus transportation is one of the safest methods of transportation in the US. Students are nearly eight times safer riding in a school bus than in a car. The State Board of Education's policy on school bus transportation indicates that the application of federal and state minimum safety standards for school buses has been determined to improve the safety of passengers riding school buses within the state. According to NHTSA evidence suggests crashes are the leading cause of death among American teens, accounting for more than one-third of all deaths of 16- to 18-year-olds. Research shows which

behaviors contribute to teen-related crashes. Inexperience and immaturity combined with speed, drinking and driving, not wearing seat belts, distracted driving (cell phone use, loud music, other teen passengers, etc.), drowsy driving, nighttime driving, and other drug use aggravate this problem. NHTSA suggests a three-tiered strategy to prevent motor-vehicle-related deaths and injuries for teens: increasing seat belt use, implementing graduated driver licensing, and reducing teens' access to alcohol.

New	Key	Percentage of patrol vehicles receiving recommended 5000 mile oil changes	0	0	0	0	90
New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State

Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.

- Concealed Handguns processes permit applications.
- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

**Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sheriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

**Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.
- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.
- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.
- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.
- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.
- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.
- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**Activity ID:** 389  
**Activity Name:**  
 Lab Services  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 3000 Operational Support  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Last FY, the Crime Lab began an initiative to reduce the number of backlog cases, resulting in 20,013 completed requests. The Crime Lab was able to complete all the requests received, in addition to reducing 1,323 of the backlogged requests. Currently there are 7,194 backlogged requests.

A 5% reduction (equal to 1,000 requests) would result in our inability to reduce backlog and may increase the amount of backlog requests.

**DNA UNIT**

- Reduce the number of samples that could be analyzed
- Reduce the number of cases that could be outsourced
- Eliminate an analyst resulting in an increase in turnaround time therefore increasing the workload of other analysts and increasing the number of backlogs

**QUALITY ASSURANCE UNIT**

- Adversely affect our ability to maintain accreditation, including probation, suspension, or revocation

**CRIMINALISTICS UNIT**

- Impede the lab's ability to replace older and outdated instrumentation to improve our toxicology service to meet current needs.

**Activity Type:** Existing

**Objective:**

The Crime Lab will provide at least 20,000 lab requests analyzed yearly while decreasing overall turn-around-time for analyses, decreasing existing backlog, and more specifically decreasing turn-around-time for DNA forensic cases to 60 days for 85% of the DNA requests by 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6621	Key	Percentage of ASCLD essential criteria	100	100	98	100	100

20812	Supporting	Number of CODIS samples uploaded to the State DNA indexing system	69354	64686	24600	43000	41000
15554	Supporting	Number of CODIS (arrestee and convicted offender) samples accessioned	61422	89160	81951	78000	75000

**Narrative:**

The Crime Lab has a continuing commitment to ensure the superior work and provide the highest level of forensic

science services to all of the agencies we serve through complete, accurate, and consistent analyses by dedicated and highly trained employees. The Crime Lab is accredited through the American Society of Crime Lab Directors. Louisiana State Police Crime Lab provides leadership, training, forensic services, and assistance to state and local agencies.

A prime focus of lab priorities is currently being directed at reducing the backlog of violent crimes such as murder, rape and other crimes against persons. The goals of the lab's forensic services are:

- To provide accurate and timely analysis of evidence in the areas of toxicology, chemical analysis of evidence with controlled substances
- The examination of firearms and tool marks, latent prints, DNA, trace evidence, biology, and crime scene analysis and assistance
- To reduce backlog of cases older than 30 days in all areas, decrease case turnaround time to 60 days for at least 85% of services requested
- To maintain excellence in the quality of the forensic science services provided to our customers
- To provide optimal levels of forensic service to the State of Louisiana
- To upload and process CODIS samples to the National DNA Indexing System
- To facilitate improvement in all aspects of the lab's work
- To provide early identification and correction of problems and potential problems through corrective and preventive action

#### **Explain How This Activity Advances State Outcome Goal:**

Forensic scientists at the lab provide assistance in the statistical data collection of evidence at crime scenes along with performing scientific examinations of evidence. Analyses performed at the lab are often the definitive factor in proving the guilt or innocence of persons charged with criminal acts. Being the largest lab of its kind in the state, the Louisiana State Police Crime Lab has been utilized by many agencies, both law enforcement and judicial, for timely and successful prosecution of criminal investigations resulting in the safety of citizens and property.

#### **Evidence:**

The Combined DNA Index System (CODIS) database has specifically assisted in multiple cases throughout the State of Louisiana. The Crime Lab is the only forensic toxicology lab in the State of Louisiana. Work completed at the Crime Lab has directly resulted in the arrest and conviction of numerous offenders in both high and low profile cases throughout Louisiana. LSP is the only in-state laboratory certified to conduct drug analyses on blood/urine samples in DWI investigations.

Examples of cases include a 2007 double-murder from Franklinton that was solved this year. As of September 17, 2009, Baton Rouge Police Department has investigated 65 murders and has submitted evidence to the Crime Lab for 60 of these cases.

**Activity ID:** 488

**Activity Name:**

Transportation and Environmental Safety Section

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 1000 Traffic Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Through enforcement, TESS strives to reduce the fatal crashes from the previous year by targeting factors that create unsafe roadway conditions such as inoperable and faulty equipment, dangerous and impaired drivers, and hazardous material carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of violations cited during a FY	0	0	0	0	100000
New	Key	Percentage increase in number of violations from previous fiscal year	0	0	0	0	1

**Narrative:**

Transportation and Environmental Safety Section (TESS) is comprised of Weights and Standards, Towing and Recovery, Right to Know, and Hazmat.

The DPS Weights and Standards Police assure the safety of the motoring public and protect the highway infrastructure by enforcing state and federal commercial vehicle weight and size requirements. DPS Weights and Standards Police consists of POST certified officers who are the sole enforcement authority of Portable Scale operations and collaborate with DOTD fixed scale operations providing accurate and timely communication of related information.

LSP is the statutorily mandated authority to respond and investigate all hazardous material incidents to determine possible causes and enforce any violations of the Louisiana Hazardous Materials Regulations. Hazmat is responsible for coordinating a Statewide Response System for mitigating these incidents, inspecting chemical plants, conducting roadside inspections of commercial motor vehicles involved in transporting hazardous materials, conducting safety education to the chemical industry, and assisting all local and state agencies on hazardous material-related incidents.

Federal law mandates Louisiana to collect the previous year's chemical inventory from chemical manufacturing plants and other facilities located in the state. This data is then distributed to local governments in whose boundaries

these facilities are located to ensure the safety of the public as well as responding officers and firefighters in case of chemical spills or releases. The Hazardous Materials Hotline is maintained 24/7 by the LSP to receive reports of releases and spills from chemical plants or on waterways, airways, roadways and railroads. These reports are then distributed to local and state agencies which may be responding to mitigate these incidents. The Right-to-Know unit also reviews chemical incidents reported to the Hotline for possible violations including late notifications, failing to report chemical spills within the state, and giving misleading or false information when reporting an incident to the Hotline.

The primary responsibility of Towing and Recovery is to perform regular inspections of all licensed towing and storage facilities in Louisiana to ensure compliance with applicable regulations. All activities performed by Towing and Recovery are the exclusive responsibility of LSP.

**Explain How This Activity Advances State Outcome Goal:**

The TESS activity plays a critical role in advancing the Transportation and Public Safety Goals.

**Transportation:** Overweight vehicles accelerate the deterioration of our highway infrastructure leading to weakened roads and damaged road substructures which are data driven factors in serious injury and fatal crash incidents. By reducing the number of overweight trucks, the life expectancy of the state's roads are increased, thus reducing maintenance and repair costs. By conducting a Size and Weight Inspection in conjunction with a Motor Carrier Safety Inspection an officer can additionally take overweight vehicles which have safety equipment violations, such as defective brakes off the road. This activity promotes safe travel for commercial vehicles thereby reducing the number of crashes directly related to poor or weakened road surfaces creating safety for the motoring public.

**Public Safety:** Through proactive emergency planning, communication, and enforcement of regulations involving the release of hazardous materials provides public safety and security. The licensing process of all manufactures, sellers or handlers of explosives will provide an organized administrative process with continuity so that only persons suitable will be issued a license. Hazmat has experienced extraordinary regulatory changes in 2008 that resulted in significant increases in fees and revenue which generated \$287,000.

The Right-To-Know unit will maintain a 24 hour hotline that records emergency response information for chemical releases to ensure citizens of Louisiana are informed of critical information regarding hazardous materials.

Tow trucks operating in unsafe conditions, or operated by drivers in an unsafe manner can be contributing factors in fatality and serious injury crashes. By mitigating unsafe vehicle and driver conditions through education and enforcement initiatives, a safer environment is achieved on Louisiana's highways.

**Evidence:**

The DPS Weights and Standards Police method of determining effectiveness of the enforcement plan is measured by the number of vehicles weighed, and the number of violations issued. Of the 12,521 vehicles weighed during FY 08/09, 4,456 vehicles or 35 percent were cited for being overweight with 976 vehicles, or 8 percent being overweight more than 10,000 pounds. With the lack of weight enforcement efforts, the Highway Reconstruction Fund would lose approximately 1.5 million dollars generated by overweight penalties.

Numerous studies were performed at Louisiana Technical University and the Governor's Oversize and Excess Weight Vehicle Task Force to determine the impact of raising the legal gross vehicle weight from 80,000 lb. to 100,000 lb. on vehicles hauling sugar cane, rice, timber, and cotton. It was determined that any increase in the gross vehicle weight over current limits would substantially increase the cost of overlays and decrease the length of time before an overlay is required in which current revenues for road improvement were insufficient to provide for the damages that oversize and excess weight trucks would cause.

In addition, of the overweight violations, 4,567 brake violations, 2,023 tire weight-rating violations and 13,290 other safety violations were detected during the course of these inspections.

The primary funding source for the Towing Recovery comes from the Louisiana Towing and Storage fund through fines. During FY 2008-2009, fines from enforcement generated \$83,430.00 in revenue.

**Activity ID:** 392

**Activity Name:**

Support Services

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 3000 Operational Support

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To provide logistic support to both Louisiana State Police and all of Public Safety Services as well as emergency and tactical operations support to other local, state, and federal law enforcement agencies, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20911	Supporting	Percentage of convicted child predators and sex offenders information distributed	100	100	100	100	100
New	Key	Percentage of fingerprint cards processed	0	0	0	0	100
New	Key	Percentage of patrol vehicles receiving recommended 5000 mile oil changes	0	0	0	0	90
New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State

Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.

- Concealed Handguns processes permit applications.
- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

**Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sheriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

**Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.
- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.
- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.
- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.
- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.
- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.
- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**Activity ID:** 488

**Activity Name:**

Transportation and Environmental Safety Section

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 1000 Traffic Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Through enforcement, TESS strives to reduce the fatal crashes from the previous year by targeting factors that create unsafe roadway conditions such as inoperable and faulty equipment, dangerous and impaired drivers, and hazardous material carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of violations cited during a FY	0	0	0	0	100000
New	Key	Percentage increase in number of violations from previous fiscal year	0	0	0	0	1

**Narrative:**

Transportation and Environmental Safety Section (TESS) is comprised of Weights and Standards, Towing and Recovery, Right to Know, and Hazmat.

The DPS Weights and Standards Police assure the safety of the motoring public and protect the highway infrastructure by enforcing state and federal commercial vehicle weight and size requirements. DPS Weights and Standards Police consists of POST certified officers who are the sole enforcement authority of Portable Scale operations and collaborate with DOTD fixed scale operations providing accurate and timely communication of related information.

LSP is the statutorily mandated authority to respond and investigate all hazardous material incidents to determine possible causes and enforce any violations of the Louisiana Hazardous Materials Regulations. Hazmat is responsible for coordinating a Statewide Response System for mitigating these incidents, inspecting chemical plants, conducting roadside inspections of commercial motor vehicles involved in transporting hazardous materials, conducting safety education to the chemical industry, and assisting all local and state agencies on hazardous material-related incidents.

Federal law mandates Louisiana to collect the previous year's chemical inventory from chemical manufacturing plants and other facilities located in the state. This data is then distributed to local governments in whose boundaries

these facilities are located to ensure the safety of the public as well as responding officers and firefighters in case of chemical spills or releases. The Hazardous Materials Hotline is maintained 24/7 by the LSP to receive reports of releases and spills from chemical plants or on waterways, airways, roadways and railroads. These reports are then distributed to local and state agencies which may be responding to mitigate these incidents. The Right-to-Know unit also reviews chemical incidents reported to the Hotline for possible violations including late notifications, failing to report chemical spills within the state, and giving misleading or false information when reporting an incident to the Hotline.

The primary responsibility of Towing and Recovery is to perform regular inspections of all licensed towing and storage facilities in Louisiana to ensure compliance with applicable regulations. All activities performed by Towing and Recovery are the exclusive responsibility of LSP.

**Explain How This Activity Advances State Outcome Goal:**

The TESS activity plays a critical role in advancing the Transportation and Public Safety Goals.

**Transportation:** Overweight vehicles accelerate the deterioration of our highway infrastructure leading to weakened roads and damaged road substructures which are data driven factors in serious injury and fatal crash incidents. By reducing the number of overweight trucks, the life expectancy of the state's roads are increased, thus reducing maintenance and repair costs. By conducting a Size and Weight Inspection in conjunction with a Motor Carrier Safety Inspection an officer can additionally take overweight vehicles which have safety equipment violations, such as defective brakes off the road. This activity promotes safe travel for commercial vehicles thereby reducing the number of crashes directly related to poor or weakened road surfaces creating safety for the motoring public.

**Public Safety:** Through proactive emergency planning, communication, and enforcement of regulations involving the release of hazardous materials provides public safety and security. The licensing process of all manufactures, sellers or handlers of explosives will provide an organized administrative process with continuity so that only persons suitable will be issued a license. Hazmat has experienced extraordinary regulatory changes in 2008 that resulted in significant increases in fees and revenue which generated \$287,000.

The Right-To-Know unit will maintain a 24 hour hotline that records emergency response information for chemical releases to ensure citizens of Louisiana are informed of critical information regarding hazardous materials.

Tow trucks operating in unsafe conditions, or operated by drivers in an unsafe manner can be contributing factors in fatality and serious injury crashes. By mitigating unsafe vehicle and driver conditions through education and enforcement initiatives, a safer environment is achieved on Louisiana's highways.

**Evidence:**

The DPS Weights and Standards Police method of determining effectiveness of the enforcement plan is measured by the number of vehicles weighed, and the number of violations issued. Of the 12,521 vehicles weighed during FY 08/09, 4,456 vehicles or 35 percent were cited for being overweight with 976 vehicles, or 8 percent being overweight more than 10,000 pounds. With the lack of weight enforcement efforts, the Highway Reconstruction Fund would lose approximately 1.5 million dollars generated by overweight penalties.

Numerous studies were performed at Louisiana Technical University and the Governor's Oversize and Excess Weight Vehicle Task Force to determine the impact of raising the legal gross vehicle weight from 80,000 lb. to 100,000 lb. on vehicles hauling sugar cane, rice, timber, and cotton. It was determined that any increase in the gross vehicle weight over current limits would substantially increase the cost of overlays and decrease the length of time before an overlay is required in which current revenues for road improvement were insufficient to provide for the damages that oversize and excess weight trucks would cause.

In addition, of the overweight violations, 4,567 brake violations, 2,023 tire weight-rating violations and 13,290 other safety violations were detected during the course of these inspections.

The primary funding source for the Towing Recovery comes from the Louisiana Towing and Storage fund through fines. During FY 2008-2009, fines from enforcement generated \$83,430.00 in revenue.

<b>Statutory Dedication:</b>	P14	Emergency Medical Technician Fund
------------------------------	-----	-----------------------------------

**Activity ID:** 405

**Activity Name:**

Emergency Medical Services

**Department:** 09 Department of Health and Hospitals

**Agency:** 326 Office of Public Health

**Program:** 2000 Personal Health Services

**State Outcome Goal:** 7 Health

**Scalable:** True

**Scalable Description:**

EMS responds to all requests for pre-hospital medical care including cardiac, medical and trauma emergencies. The survival rate for persons subject to a cardiac, medical or trauma emergency is greatly increased when responded to by a well trained and appropriately certified emergency medical technician. Over 40% of the State is considered as either rural or in a professional health care shortage area. The State currently has only two Level 1 Trauma Centers located 300 miles apart. EMS personnel must be at the highest level to ensure a greater survival rate secondary to prolonged transport times. A reduction in funding would reduce the access to pre-hospital care impacting the rural areas of Louisiana dramatically. An increase in funding would improve the delivery of care and maximize the use of evolving technology leading to a decrease in morbidity and mortality. The cost per EMS professional is \$16.04 annually or \$0.076 per resident annually.

**Activity Type:** Existing

**Objective:**

Develop an adequate qualified medical workforce by mobilizing partnerships, developing policies and plans, enforcing laws and regulations, and assuring a competent workforce. Thus providing the same level of care 24/7/365 to all residents regardless of location.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Supporting	Percent Increase of EMS workforce in Louisiana	0	0	0	9	10
New	Supporting	Number of EMS personnel newly certified	0	0	0	3000	3000
New	Supporting	Number of EMS personnel re-certified	0	0	0	3100	6000
New	Supporting	Total EMS Workforce	0	0	0	19495	21495

**Narrative:**

The Emergency Medical Services activity advances the state goal of better health by developing an adequate qualified medical workforce. The Louisiana Bureau of Emergency Medical Services is a section within the Department of Health and Hospitals, Office of Public Health. The Bureau of EMS is responsible for the improvement and regulation of emergency medical services in the State; it is mandated to promulgate and enforce rules, regulations, and minimum standards for course approval, instruction, examination and certification; it is responsible for developing a state plan for the prompt and efficient delivery of emergency medical services. BEMS shall serve as the primary agency for participation in any federal program involving emergency medical services and may receive

and, pursuant to legislative appropriation, disburse available federal funds to implement any service program. The Automated External Defibrillator (AED) program was mandated by statute secondary to increases of deaths due to sudden cardiac arrest. This program has remained unfunded since its implementation. Therefore, a reduction of funding would result in zero impact. However, an increase in funding would result in the successful implementation of the activity and the Bureau of EMS would promulgate all necessary rules and regulations to implement the provisions.

The Emergency Medical Services-Children (EMS-C) program was mandated under the Department of Health and Hospitals, Emergency Medical Services in 1995 due to the lack of initial and continuing education programs for emergency medical services personnel that include training in the emergency care of infants and children.

The Bureau of EMS (BEMS) shall oversee medical transportation (emergency vehicles) as outlined in RS 40: 1235. This mandate is under the Bureau of Emergency Medical Services, but shall be promulgated by the Department of Health and Hospitals.

#### **Explain How This Activity Advances State Outcome Goal:**

BEMS is tasked to ensure they are appropriately trained and follow course objectives as outlined by the National Highway Traffic Safety Administration Curriculum. Persons applying to become an EMS educator are required to attend a nationally recognized EMS Educator Course and become affiliated with an approved program. This will create standardization of educators, and ensure that students receive consistent instruction. Examination: BEMS administers the National Registry Practical Examination to eligible candidates. BEMS has utilized an examination process consisting of uncertified examiners. BEMS utilizes a single practical examination site. BEMS will adhere to national recommendations by utilizing persons across multiple medical disciplines. These will include EMT's, Paramedics, Nurses and Physicians. BEMS will develop an Examiner Course to certify persons as State EMS Examiners. The course will utilize standard guidelines ensuring candidates receive an objective exam. The Examiner's approved to proctor the practical examination. BEMS will expand the States' examination availability by increasing the number of EMS examination sites. Certification: BEMS is required to specify requirements and issue certifications and recertification's; specify continuing education requirements; and assure medical direction over emergency medical services. The EMS Certification Commission (EMSCC) recommends and approves requirements and standards of practice for EMS personnel and conducts disciplinary hearings and investigations. BEMS will participate in the implementation of the National Registry electronic certification system combining both National and State Certification. BEMS will adopt National Registry recertification guidelines. BEMS will approve all EMS continuing education hours. BEMS will create State minimal treatment guidelines. The EMSCC will evaluate and expand the current EMS standard of practice; and formulate a conviction policy.

#### **Evidence:**

- The BEMS is responsible for the improvement and regulation of emergency medical services in the State; it is mandated (RS 40:1231) to promulgate and enforce rules, regulations, and minimum standards for course approval, instruction, examination and certification; it is responsible for developing a state plan for the prompt and efficient delivery of emergency medical services.
- BEMS shall serve as the primary agency for participation in any federal program involving emergency medical services and may receive and, pursuant to legislative appropriation, disburse available federal funds to implement any service program (RS 40:123.1.C.).
- The Automated External Defibrillator (AED) program was mandated by statute secondary to increases of deaths due to sudden cardiac arrest. The BEMS would promulgate all necessary rules and regulations to implement the provisions of RS 40:1236.
- The Emergency Medical Services-Children (EMS-C) program was mandated under the Department of Health and Hospitals, Emergency Medical Services in 1995. BEMS would promulgate all necessary rules and regulations to implement the provisions of RS 40:1300.104.
- BEMS shall oversee medical transportation (emergency vehicles) as outlined in RS 40: 1235. This mandate is under the Bureau of Emergency Medical Services, but shall be promulgated by the Department of Health and Hospitals.

**Activity ID:** 329

**Activity Name:**

Administrative

**Department:** 08B Public Safety Services

**Agency:** 424 Liquefied Petroleum Gas Commission

**Program:** 1000 Administrative

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

For the agency to maintain its level of inspections and training of Dealers, an increase in funding has been requested. There has been a fifty percent reduction in the number of accidents related to liquefied petroleum gas over the past three years. The agency has issued 1,526 licenses in 2008-2009 and expects an increase of 75 licenses for 2009-2010. The agency projects an increase of 50 licenses for 2010-2011. Currently, the agency has seven inspectors state-wide, who perform over 30,000 routine inspections yearly. In order to maintain and reduce the number of fires and accidents related to liquefied petroleum gas, stress, and work load, the agency would like an increase for two additional inspectors. Funding for new automobiles and fuel is needed due to the high mileage traveled by inspectors doing routine inspections. If there is a decrease in funding, compliance inspections would decrease, increasing the possibility of faulty equipment endangering the citizens of Louisiana.

**Activity Type:** Existing

**Objective:**

To reduce the number of fires related to liquefied petroleum gas and accidents by 5% in FY 2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20791	Supporting	Percentage of compliance audits with no violation charges	97	94	84	85	95
6734	Key	Number of LP gas related fires and accidents	8	7	16	15	14

**Narrative:**

The Liquefied Petroleum Gas Commission is to promulgate and enforce rules that will allow for the safest possible distribution, handling, and usage of liquefied petroleum gas and anhydrous ammonia, necessary for the protection, safety, and security of the public.

**Explain How This Activity Advances State Outcome Goal:**

Prioritize and plan our resources to provide the highest quality service and protection for the citizens of Louisiana. There has been a 50% reduction in the number of fires and accidents related to liquefied petroleum gas over the last three years. The Commission would like to see an additional 25% reduction through FY 2012-2013. Enhance interoperability and promote communication between federal, state, and local governments particularly in the areas of Homeland Defense and Economic Development. Embrace stewardship and accountability at an individual level to develop and promote programs that improve delivery of services focused on public safety to the citizens of Louisiana. This will be accomplished through diligent enforcement and education of those we license.

**Evidence:**

Related fires and accidents have reduced the past 3 years. In FY 2005-2006 there were 18 incidents. In FY 2006-2007 there were 16 incidents. In FY 2007-2008 there were 7 incidents.

------------------------------	-----	--

**Activity ID:** 488

**Activity Name:**

Transportation and Environmental Safety Section

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 1000 Traffic Enforcement

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

Through enforcement, TESS strives to reduce the fatal crashes from the previous year by targeting factors that create unsafe roadway conditions such as inoperable and faulty equipment, dangerous and impaired drivers, and hazardous material carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of violations cited during a FY	0	0	0	0	100000
New	Key	Percentage increase in number of violations from previous fiscal year	0	0	0	0	1

**Narrative:**

Transportation and Environmental Safety Section (TESS) is comprised of Weights and Standards, Towing and Recovery, Right to Know, and Hazmat.

The DPS Weights and Standards Police assure the safety of the motoring public and protect the highway infrastructure by enforcing state and federal commercial vehicle weight and size requirements. DPS Weights and Standards Police consists of POST certified officers who are the sole enforcement authority of Portable Scale operations and collaborate with DOTD fixed scale operations providing accurate and timely communication of related information.

LSP is the statutorily mandated authority to respond and investigate all hazardous material incidents to determine possible causes and enforce any violations of the Louisiana Hazardous Materials Regulations. Hazmat is responsible for coordinating a Statewide Response System for mitigating these incidents, inspecting chemical plants, conducting roadside inspections of commercial motor vehicles involved in transporting hazardous materials, conducting safety education to the chemical industry, and assisting all local and state agencies on hazardous material-related incidents.

Federal law mandates Louisiana to collect the previous year's chemical inventory from chemical manufacturing plants and other facilities located in the state. This data is then distributed to local governments in whose boundaries

these facilities are located to ensure the safety of the public as well as responding officers and firefighters in case of chemical spills or releases. The Hazardous Materials Hotline is maintained 24/7 by the LSP to receive reports of releases and spills from chemical plants or on waterways, airways, roadways and railroads. These reports are then distributed to local and state agencies which may be responding to mitigate these incidents. The Right-to-Know unit also reviews chemical incidents reported to the Hotline for possible violations including late notifications, failing to report chemical spills within the state, and giving misleading or false information when reporting an incident to the Hotline.

The primary responsibility of Towing and Recovery is to perform regular inspections of all licensed towing and storage facilities in Louisiana to ensure compliance with applicable regulations. All activities performed by Towing and Recovery are the exclusive responsibility of LSP.

**Explain How This Activity Advances State Outcome Goal:**

The TESS activity plays a critical role in advancing the Transportation and Public Safety Goals.

**Transportation:** Overweight vehicles accelerate the deterioration of our highway infrastructure leading to weakened roads and damaged road substructures which are data driven factors in serious injury and fatal crash incidents. By reducing the number of overweight trucks, the life expectancy of the state's roads are increased, thus reducing maintenance and repair costs. By conducting a Size and Weight Inspection in conjunction with a Motor Carrier Safety Inspection an officer can additionally take overweight vehicles which have safety equipment violations, such as defective brakes off the road. This activity promotes safe travel for commercial vehicles thereby reducing the number of crashes directly related to poor or weakened road surfaces creating safety for the motoring public.

**Public Safety:** Through proactive emergency planning, communication, and enforcement of regulations involving the release of hazardous materials provides public safety and security. The licensing process of all manufactures, sellers or handlers of explosives will provide an organized administrative process with continuity so that only persons suitable will be issued a license. Hazmat has experienced extraordinary regulatory changes in 2008 that resulted in significant increases in fees and revenue which generated \$287,000.

The Right-To-Know unit will maintain a 24 hour hotline that records emergency response information for chemical releases to ensure citizens of Louisiana are informed of critical information regarding hazardous materials.

Tow trucks operating in unsafe conditions, or operated by drivers in an unsafe manner can be contributing factors in fatality and serious injury crashes. By mitigating unsafe vehicle and driver conditions through education and enforcement initiatives, a safer environment is achieved on Louisiana's highways.

**Evidence:**

The DPS Weights and Standards Police method of determining effectiveness of the enforcement plan is measured by the number of vehicles weighed, and the number of violations issued. Of the 12,521 vehicles weighed during FY 08/09, 4,456 vehicles or 35 percent were cited for being overweight with 976 vehicles, or 8 percent being overweight more than 10,000 pounds. With the lack of weight enforcement efforts, the Highway Reconstruction Fund would lose approximately 1.5 million dollars generated by overweight penalties.

Numerous studies were performed at Louisiana Technical University and the Governor's Oversize and Excess Weight Vehicle Task Force to determine the impact of raising the legal gross vehicle weight from 80,000 lb. to 100,000 lb. on vehicles hauling sugar cane, rice, timber, and cotton. It was determined that any increase in the gross vehicle weight over current limits would substantially increase the cost of overlays and decrease the length of time before an overlay is required in which current revenues for road improvement were insufficient to provide for the damages that oversize and excess weight trucks would cause.

In addition, of the overweight violations, 4,567 brake violations, 2,023 tire weight-rating violations and 13,290 other safety violations were detected during the course of these inspections.

The primary funding source for the Towing Recovery comes from the Louisiana Towing and Storage fund through fines. During FY 2008-2009, fines from enforcement generated \$83,430.00 in revenue.

**Activity ID:** 275

**Activity Name:**

Motor Vehicle Administration

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

If funded at continuation budget level, this activity will provide executive and administrative direction and support for the organization and maintain the high level of customer service currently being provided to the citizens of Louisiana. A reduction in funding will result in the loss of infrastructure necessary to operate the organization on a daily basis.

**Activity Type:** Existing

**Objective:**

To administer the motor vehicle and driver's license laws of this state in a manner offering the highest degree of public confidence through integrity, efficiency and fairness to the citizens of Louisiana, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percentage of agency objective standards met	0	0	0	0	100
20930	Key	Percentage of customers satisfied or very satisfied	94.8	95.6	90.55	91	94
New	Key	Number of regulatory laws enforced	0	0	0	0	1326

**Narrative:**

This activity will administer driver license and motor vehicle regulatory laws in a fair and impartial manner; collect sales tax revenue owed; recommend changes to existing laws that coincide with changes in culture; provide professional and qualified staff; proactively seek alternative methods to accomplish more with less; and provide tools necessary to cultivate compliance with regulatory laws.

**Explain How This Activity Advances State Outcome Goal:**

This activity allows for staff whose primary efforts are oversight of operations and identification/implementation of strategies that enhance public safety efforts. Historically, executive administration has been responsible for recommending legislative changes and supporting or implementing changes sought by other entities. Executive administration serves as liaison between the agency and both its superintendent and subordinates; as well as, any contracted entities.

**Evidence:**

This activity has functional responsibility for monitoring, supervising, coordinating, administering and directing all processes of the Office of Motor Vehicles. This activity ensures that the OMV's mission and objectives are being

followed, pursuant to Louisiana's Statutes and Administrative Code. The Office of Motor Vehicles touches the lives of nearly every Louisianian and visitor to the state, thereby prompting this activity to be devoted to achieving the vision of a safer Louisiana.

This activity is focused and committed to proactively protecting our roadways; enhancing online services; increasing strategic relationships with stakeholders; improving customer service by continuing to make doing business with the OMV easier, faster, and better; measuring critical business indicators and managing based on those results; curtailing criminal activity by initiating investigations and providing assistance to other agencies; and responding to natural disasters and other emergencies to provide needed services in a timely manner.

This activity

- provides the administrative and management functionality to meet the challenge of highway safety and also support all activities of the department;
- provides assistance to local, state, and federal agencies and highway safety organizations through a comprehensive records management information system which reflects driver and vehicle status;
- provides title and registration services for motor vehicles; and
- maintains a professional and effective driver's license program which assures that only those drivers who demonstrate the necessary knowledge, skills, and abilities are permitted to operate vehicles on Louisiana's roads; removes from the highways and/or requires further education for those drivers who demonstrate an abuse of the driving privilege; and assures that drivers are held financially responsible for their actions.

The Office of Motor Vehicles is composed of seven divisions: Driver's Management, Vehicle Management, Records Management, Commercial Driver Licenses, Planning and Development, International Registration Program, and Field Services.

**Activity ID:** 279

**Activity Name:**

Issuance of driver licenses/identification cards

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

If funded at the continuation level, OMV will continue cooperation with law enforcement and ensure proper documentation is submitted to prevent fraud by applicants for driver licenses / identification cards. OMV will continue to ensure that only legal aliens are issued these credentials which serve as the primary source of identification nationwide. OMV will continue to review and evaluate applicants for the detection of medical conditions which may prevent the safe operation of a vehicle. If funding for this activity is reduced, the area of public safety would be impacted along with customer service due to loss of skilled personnel which would cause increased wait times, questionable credentials issued, possible allowance of fraudulent and criminal activity.

**Activity Type:** Existing

**Objective:**

To ensure that operators of motor vehicles have met the safety standards and paid the fees required by law and that the proper documents for identification have been presented prior to issuance of DL / ID cards through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20930	Key	Percentage of customers satisfied or very satisfied	94.8	95.6	90.55	91	94
New	Key	Number of examinations administered	213662	206894	194052	0	213662
New	Key	Number of drivers license issued	1108683	1105611	1174095	0	1108683
New	Key	Average cost to issue a driver license/identification card	14	14	13	0	14

**Narrative:**

This activity provides the issuance of driver examination/ licensing and issuance of identification cards for Louisiana citizens; provides indepth review of documentation submitted to prevent fraud and identity theft; creates permanent records of credentials issued; provides additional non-agency related services such as registering voters and requesting organ donor participation.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances public safety by compliance with Homeland Security standards through the issuance of secure credentials. This activity provides law enforcement with photos and other identifying information on persons operating vehicles or involved in suspected criminal activity. OMV promotes highway safety by properly screening all applicants and by taking necessary action to ensure problem drivers are removed from the highways. The screening process also detects fraudulent activity and medical conditions that would prohibit an individual from obtaining a credential. The screening process also allows for the detection and prevention of identity theft and aids in preventing

the issuance of credentials to someone with criminal intentions. Additionally, a graduating licensing program is in place which enhances highway safety.

**Evidence:**

The evidence has been presented on a national level that loss of credential integrity promotes/fosters the increase of identity crimes. Also, both national and local statistics have been presented showing the need for advancement in driver assessment and certification.

Every person who operates a motor vehicle which is designed as being in either Class A, B, C, D, or E , before driving or operating any such motor vehicle on any public street, road, or highway of this state, shall secure from the department an appropriately classified driver's license with all necessary endorsements. Louisiana has approximately 2.9 million driver's license and 1.4 million non-driver's license for a combined total of approximately 4.3 million credentials. Driving and non driving credentials have a 4 year expiration date. Approximately 1.1 million credentials are renewed each year.

Prior to issuance, all applicants go through a screening/interview process which is intended to verify identity and medical qualification. Applicants must present documents to prove their identity and legal presence. Issuance employees are required to examine these documents for their authenticity. Identity theft and fraud prevention is the top priority of all issuance personnel. All applicants must be medically qualified to hold a driver's license. If an issuance employee notices anything out of the ordinary during the screening/interview process, then the applicant is referred to a physician for a medical. Once completed, the medical is reviewed by the issuance employee to determine if the applicant is qualified. All initial applicants for driver's license must pass written and knowledge tests prior to issuance. Approximately 128,305 written tests were administered during the fiscal year 2008-2009. Approximately 93,297 road tests were administered during this same time. This is a 9% increase in the total number of examinations administered from fiscal year 2006-2007.

There are approximately 113,502 Commercial Driver's Licenses in the State of Louisiana. All Commercial Driver's Licenses must be issued according to all applicable Federal Motor Carrier Safety Regulations. The federally regulated CDL program (as a whole) is audited annually by the Federal Motor Carrier Safety Administration. Non-compliance by a jurisdiction can result in a loss of Federal Highway Funds.

**Activity ID:** 341

**Activity Name:**

Issuance vehicle license plates/registrations/titles/permits

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

If funded at continuation level, this activity can maintain the collection of over \$750,000,000 annually in state revenue. A large portion of the revenue collected is utilized to ensure highway safety through construction and maintenance of our highways and byways. If this activity experiences a reduction in appropriated funds, the impact will be a domino effect to state revenue and subsequently to the agencies budgets that depend on these funds collected to operate. Untimely deposit of taxes would also result in a loss of interest earned by the state. Currently, deposits are made the following business day. The reduction in funding would also impact the turn-around time in processing titles and registrations. Currently, the turn-around time is less than ten working days by mail.

**Activity Type:** Existing

**Objective:**

To ensure motor vehicle registration and titling laws are enforced, taxes owed are paid, vehicles are properly registered and plates are assigned to allow law enforcement to easily identify a vehicles owner and status prior to approaching the vehicles window, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Amount of vehicle sales tax revenue collected (Parish/Municipal)	318253781	392100777	412655375	0	318253781
11269	Key	Number of vehicle registrations processed by Public Tag Agents	1105691	1130067	1151683	1157465	1157465
New	Key	Number of vehicle registration transactions processed	1999243	1929727	1960666	0	1999243
New	Key	Amount of vehicle sales tax revenue collected (State)	275951322	341308792	330047677	0	275951322
New	Key	Percentage of vehicle registration renewals processed via mail, internet or automated phone	69.5	62.7	62.6	0	69.5

**Narrative:**

This activity is the "gatekeeper" of motor vehicle records. This includes motor vehicle sales tax collection, recordation of motor vehicle financial liens and proper registration and titling.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances state outcome goal "Public Safety" by taking primary responsibility for tracking a vehicles ownership from the manufacturer to the salvage yard. This tracking helps to protect individuals who have vested interest in a vehicle; whether that be the consumer purchasing the vehicle, the lienholder providing the financing or

the law enforcement officers patrolling our highways to keep all citizens secure and safe.

**Evidence:**

This activity touches every citizen of Louisiana at some point in their life if they purchase a motor vehicle. The evidence is provided below:

State/Parish/Municipal Sales Tax Collected - Sales/Use tax is collected by the Office of Motor Vehicles, as the agent of the Department of Revenue and all local taxing authorities, at the time of application for a certificate of title or vehicle registration license in compliance with rules and regulations issued by the Department of Revenue and in compliance with the law as interpreted by the Department of Revenue. No certificate of title or vehicle registration license shall be issued until this tax has been paid. The Office Of Motor Vehicles administers the Motor Vehicle Certificate of Title law (La. R.S. 32:701 et seq.) and is responsible to ensure that Louisiana's motor vehicle owners, dealers, or financiers, enjoy the benefits of secure title and interest in their vehicles. The certificate is proof that the person named on the certificate is the titled owner of the vehicle. OMV's function is to issue the certificate of title in the name of the legitimate owner of the vehicle, and that the certificate is a negotiable instrument. Evidence was obtained from the MAM145 and SRTPCH report.

Vehicles Processed by a Storage Facility - This function is utilized for the process of removing, preserving, storing and disposing of abandoned vehicles as required by Law Revised Statute R.S. 32:1711-1731. ORSV Agents process approximately 76% of all official report of stored vehicles inquiries. This activity allows the Office of Motor Vehicles the ability to track a vehicle for the life of the vehicle. Evidence was obtained from the fiscal year reports and from the ODRM1FRI2 report for revenue management .

Vehicle Registration Transactions - This function ensures that all vehicles are properly registered in accordance with all laws, rules, regulations, and policy/procedures for the safety of our citizens. Evidence was obtained from the MVM100 report.

Vehicle Registration Transactions (Permits to Sell) - This function allows for the sale of a vehicle that was placed in storage, or left in a repair facility and was subsequently abandoned by the owner. Evidence was obtained from the MIM850.

**Activity Name:**

Suspension of driver licenses and revocation of license plates

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

If funded at continuation level, this activity will continue to control problem drivers, ensuring vehicle owners and operators are responsible for injuries and damages caused in crashes. This activity imposes sanctions on those who violate Louisiana's highway safety and compulsory insurance laws through suspensions, revocations, or disqualifications and collection of statutorily required fees and fines. Loss of funding would result in untimely sanctioning of drivers and increase the number of uninsured motorists on the highways. This loss will also impact the collection of fees that currently fund Public Safety Services.

**Activity Type:** Existing

**Objective:**

To suspend and/or revoke drivers, process violations, and provide law enforcement with a mechanism for tracking and deterring non-compliance with Louisiana laws, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of driver licenses suspended	196224	185759	182096	0	196224
New	Key	Number of motor vehicles revoked	514391	525808	518316	0	514391
New	Key	Number of driver license records	2854441	2847303	0	0	2854441
New	Key	Number of motor vehicle records	6553068	7419695	0	0	6553068
New	Key	Percentage of driver license and motor vehicle records revoked and/or suspended	7.55	7	0	0	7.55

**Narrative:**

This activity provides a system that regulates vehicle owners and operators by providing law enforcement with the driving history, vehicle registration and compulsory insurance status.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the state's outcome goal of public safety by providing law enforcement with an additional tool that re-enforces the removal of unsafe drivers from the highways.

**Evidence:**

Traffic safety research has produced consensus on one central issue, and that is that traffic offenders present a much greater threat to their own and others' safety than do drivers whose records are offense free. OMV serves more members of the populace than any other agency and is the designated agency to enforce suspension of the driving privileges and revocation of registration privileges. In fiscal year 08/09, OMV added 265, 231 violations to

driving records. The suspension/revocation program takes dangerous drivers off the road sooner and research shows that the threat of immediate consequences is effective. If those consequences are delayed significantly, drivers will not understand the true consequences to their actions. Research provided by American Association of Motor Vehicle Administrators (AAMVA) Model Problem Driver Intervention and Education Program.

**Activity ID:** 344

**Activity Name:**

Outsourced services – management and oversight

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 9 Transparent, Accountable, and Effective Government

**Scalable:** True

**Scalable Description:**

If funded at continuation budget level, the agency can continue to reduce staff through outsourcing and privatization of services. If this activity experiences a reduction in funding and the agency is required to reabsorb those functions, the overall impact is to the customer seeking services in a timely and efficient manner as staff reductions have already occurred.

**Activity Type:** Existing

**Objective:**

To be in compliance with Governor Jindal's executive order to streamline state government through privatization and outsourcing of state functions while reducing the size of state government through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of business partners contracted/licensed to provide motor vehicle services	81	75	70	0	81
New	Key	Reduction of man-hours due to new outsourcing/privatization initiatives	0	0	0	0	22880
New	Key	Number of quality assurance reviews performed on outsourced/contracted vendors	0	0	0	0	530
New	Key	Mail-in renewals processed by a business partner	620863	633275	623504	0	620863
New	Key	Percentage increase of core business functions	0	0	0	0	10

**Narrative:**

Past budget reductions forced the agency to seek alternative methods for delivery of services. This resulted in cross utilization of staff and elimination of duplicative functions. The agency currently has over 200 contracted/licensed business partners providing OMV services to the public. Once the executive direction was given for all agency's to analyze existing activities, the agencies executive administrative team reviewed all programs, functions and services. Additional areas were identified that could potentially be outsourced and/or privatized. Request for proposals are currently being reviewed for vendor selection.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances state outcome goal "Transparent and Accountable Government" by increasing efficiency, productivity and customer service by pursuing new technologies and best practices to provide services currently being performed by state employees.

**Evidence:**

This activity has the functional responsibility of managing and monitoring all contracted vendors who perform certain services for the Office of Motor Vehicles. Due to past budget reductions, outsourcing has allowed OMV to focus on other business issues/areas while still being able to provide the expected customer service. The imaging vendor processes 79% of the documentation received by OMV. 100% of all Commercial Driver License skills test are processed by contracted third parties. Public Tag Agents process approximately 33% of all vehicle title and registration transactions. Official Report of Stored Vehicle Agents process approximately 76% of all official reports of stored vehicles inquiries. Approximately 50% of our vehicle renewals are processed through Lockbox.

**Activity ID:** 350  
**Activity Name:**  
Information Services  
**Department:** 08B Public Safety Services  
**Agency:** 420 Office of Motor Vehicles  
**Program:** 1000 Licensing  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

If funded at continuation level, the agency will continue to provide assistance to citizens via telephone and the internet. This activity has allowed individuals the flexibility to conduct business with the Office of Motor Vehicles at their convenience. This has aided in the reduction of wait times and increased customer service satisfaction. If funding is reduced, the innovative approaches that have been implemented to deliver services will become outdated and ultimately hamper the agencies initiative to expand use of alternate methods of service delivery. Also, the customer base would be affected whereas lines, wait times and public awareness would be affected. Information on requirements and laws that support public safety would not easily be accessible to the public without going into a field office. This will also cause a reduction in staff which would impact the ability of OMV's Call Center to operate in a prompt and efficient manner.

**Activity Type:** Existing

**Objective:**

To provide services to our customers through utilization of technology enhancements through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20923	Key	Percentage of toll-free telephone calls answered	74.74	76.12	78	75	75
20929	Key	Average wait time in telephone queue (in minutes)	4.33	3.44	3.5	4	4
New	Key	Number of transactions completed via internet	271526	246345	221793	0	271526
20930	Key	Percentage of customers satisfied or very satisfied	94.8	95.6	90.55	91	94

**Narrative:**

This activity is responsible for assisting customers via a call distribution system and online web services. Currently, customers are rarely unable to contact the agency via telephone due to the ability of management to monitor the telephone traffic and adjust staff accordingly. The call volumes are consistently monitored and if an influx of calls occur, OMV is able to provide the proper staff to address this increase. OMV's web services also provide the capability for individuals to correspond with the agency via email, and in return, receive prompt answers to questions. These services help to eliminate unnecessary visits by the public to field offices.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances state outcome goal "Public Safety" by allowing citizens to access agency services 24 hours per day. A customer has the ability to renew his/her driver's license, identification card or motor vehicle registration by utilizing OMV's web services. Eligible customers can also reinstate their driving and/or registering privileges by calling the toll-free line. Both of these services aid in preventing the customer from illegal operation of a vehicle on

the highways and byways.

**Evidence:**

A great probability exists that every Louisiana citizen will at one point in their life have contact with the Office of Motor Vehicles. This makes it imperative that the necessary tools and services be provided to aid with customer service and promote public safety. OMV's online web service provides access at times when "live" interaction cannot be made available; also, the only staffing necessary is the data back up in case of difficulty encountered during the automated processing or maintenance. The online web service also provides a wealth of information consisting of office locations/directions, policy and procedures, updated laws, etc. 23% of vehicle renewals and 12% of driver license renewals were processed using web services last fiscal year.

If the "toll-free" mandate was eliminated, the public would still see a need for "live" telephone operators who could answer general questions or give knowledgeable status of their OMV records. Customers would still expect the same level of service, regardless of this loss. This loss would impact performance indicators by increasing field office volumes, wait times and the lack of customer satisfaction. The possibility also exists for increased customer expense.

**Activity ID:** 351  
**Activity Name:**  
Document Management  
**Department:** 08B Public Safety Services  
**Agency:** 420 Office of Motor Vehicles  
**Program:** 1000 Licensing  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

If funded at continuation level, it will allow the state to be able to maintain the efficient and systematic control of the creation, receipt, maintenance, use and disposition of records, including the processes for capturing and reproducing "evidence of an event." If this activity experiences a reduction in appropriated funds, the potential risk of legal and financial penalties for the state will increase as we could not adequately preserve the "official" record as certifiably authentic. The integrity of documents could be jeopardized.

**Activity Type:** Existing

**Objective:**

To maintain evidence of events to help support Courts, Law Officials and the Dept. of Public Safety when necessary documentation needs to be reproduced in order to aid with the enforcement of laws through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Annual number of incoming mail files	9918288	8179976	7650712	0	3800142
New	Key	Annual dollars spent producing forms	554672	654373	548651	0	554672
New	Key	Number of forms eliminated and/or placed on web site	1	2	100	0	1
New	Key	Annual cost savings realized by elimination of forms and/or providing electronically	160369	160262	153063	0	160369

**Narrative:**

This activity is used for the storage and reproduction of all documentation created and/or received by the Office of Motor Vehicles. The activity also allows for workflow processes in order for employees to add driver license suspensions and motor vehicle revocations.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances state outcome goal "Public Safety." It promotes organizational efficiency by allowing necessary documentation to be readily available when requested by Courts and Law officials. These documents are also used by the Office of Motor Vehicles to process driver license suspensions and motor vehicle revocations and to provide evidence to help eliminate fraud, resolve conflicts and to allow for the accountability of actions.

**Evidence:**

Document Management is increasingly seen as a "bottom-line" organizational application with clear objectives such as reducing administrative costs, improving efficiency and enhancing profits. Document Management aids in the minimization of paper storage, the minimization of misplaced documents and the elimination of manual searches. It also enables immediate access of documentation and reduces storage cost of filing and maintaining filing cabinets.

Document management attributes to the enhancement of customer service by allowing employees to immediately respond to customer's questions and inquiries with limited downtime, by eliminating time delays, confusion and misinformation which can frustrate customers. It also allows for the speedy preparation of documents to be supplied to courts and law officials.

Statistical information as reported by Imersion Technologies, Inc. and The Gartner Group support that 90% of corporate memory exists on paper, an average document is copied 19 times, an average office spends \$20 an hour filing each document, \$120 in labor to find a misfiled document and \$220 in labor to reproduce a lost document, 7.5% of all documents get lost while 3% of the remainder are misfiled and professionals spend up to 50% of their time looking for information and only 5-15% of their time reading the information they retrieved.

**Activity ID:** 343

**Activity Name:**

Registration of apportioned vehicles through the International Registration Plan and UCR System

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

If funded at the continuation level, this activity will allow Louisiana to continue participation in the International Registration Plan (IRP) and the Unified Carrier Registration (UCR) system. The IRP requires commercial carriers involved in interstate commerce to obtain an apportioned license plate/cab card; OMV collects fees that allows carriers to travel throughout the United States and Canadian provinces. The UCR requires collection of fees for LA based interstate carriers based on the number of power units in the fleet. Loss of funding would affect the timely credentialing of interstate drivers and reduce the enforcement of motor carrier safety.

**Activity Type:** Existing

**Objective:**

To ensure the compliance and enforcement of both federal and state safety regulations for commercial carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of apportioned (commercial) carriers registered	4587	4923	4946	0	4587
New	Key	Percentage of carriers in compliance with UCR	100	0	0	0	100

**Narrative:**

This activity is responsible for the collection of appropriate International Registration Plan (IRP) and Unified Carrier Registration (UCR) fees. In addition, this activity is responsible for the issuance of license plates/cab cards to Louisiana based motor carriers operating under the IRP plan. Registering a fleet of inter-jurisdictional vehicles becomes a one-stop process for motor carriers, with a simple, one-step registration. Under the provisions of IRP, motor carriers can operate in any member jurisdiction displayed on the cab card.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the state outcome goal of public safety by ensuring compliance with federal and state safety regulations for commercial carriers prior to license plate issuance and providing law enforcement with essential information regarding the carrier and the vehicle.

**Evidence:**

The IRP program collects over \$14 million dollars, annually, as it fulfills Louisiana's responsibilities under interstate agreements and federal requirements. If this program is not funded, the federal government could withhold 10% of Louisiana's federal highway funding. It would also jeopardize Louisiana's ability to collect registration taxes on commercial motor carriers, which produced \$14 million in IRP fees. Although the UCR program is still in its infancy, \$1,828,866.00 in fees were collected in FY 2008-2009, which in turn helps fund the LSP Motor Carrier Section.

Due to the nature of IRP accounts and the carriers having the ability to transport hazardous materials, it is critical that the customer's credentials be examined for compliance with state and federal highway safety standards.

**Activity Type:** Existing

**Objective:**

To provide logistic support to both Louisiana State Police and all of Public Safety Services as well as emergency and tactical operations support to other local, state, and federal law enforcement agencies, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20911	Supporting	Percentage of convicted child predators and sex offenders information distributed	100	100	100	100	100
New	Key	Percentage of fingerprint cards processed	0	0	0	0	100
New	Key	Percentage of patrol vehicles receiving recommended 5000 mile oil changes	0	0	0	0	90
New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State

Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.

- Concealed Handguns processes permit applications.
- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

**Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sheriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

**Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.
- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.
- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.
- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.
- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.
- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.
- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**Activity ID:** 542  
**Activity Name:**  
 B - Field Services  
**Department:** 08A Corrections Services  
**Agency:** 415 Adult Probation and Parole  
**Program:** 8000 Field Services  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

To be effective caseloads must be reasonable in size. The current caseload for an average Officer is far above the southern average and too large for effective case management. Reducing staff and services would weaken public safety by increasing caseloads to over 200 per Officer and crippling the positive work the Division is doing regarding re-entry. This will result in more crime, more incarceration and increased costs. An increase in funding would increase staff and services which would result in reasonable caseloads where Officers would be pro-active in identifying and addressing problems before they lead to criminal behavior. Effective supervision allows offenders to remain in the community where they can work, support their families, pay taxes, participate in educational and job skills programs and substance abuse treatment while being held accountable.

**Activity Type:** Existing

**Objective:**

Reduce the average caseload per agent by 5% by 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
10695	Key	Average caseload per agent (number of offenders)	118	114	123	119	128
1758	Key	Average number of offenders under supervision	65147	62989	61985	65860	66860

**Narrative:**

The Field Services Activity provides skilled supervision of remanded clients; supplies competent investigative reports involved with sentencing, release and clemency; and fulfills extradition requirements. Supervision is also exercised over three contract work release centers and the intensive parole cases in the IMPACT program. The division is in charge of collecting various criminal justice funds, supervision fees, victim's restitution and so forth. Services are provided through offices located throughout the state.

**Explain How This Activity Advances State Outcome Goal:**

Field Services staff include 533 officers who provide supervision for the 66,004 felons and conduct investigations. Officers meet the outcome goals of public safety: they ensure the offender is abiding by the conditions of supervision and make referrals to community resources to assist the offender in rehabilitation. If an offender is not abiding by the conditions he is arrested and incarcerated. When appropriate the offender is considered for alternative programs.

There are several measures that can be used. In lieu of revocation, in FY 08/09 392 offenders were diverted to Francois Alternative Centers, 2,141 offenders utilized Act 402, the recently opened New Orleans Day Reporting Center is receiving offenders that normally would have been revoked. \$5,233,487 in victim restitution was collected. For those that did not abide by their conditions we made 5,934 arrests, 12,290 offenders were revoked and incarcerated: 7,362 for technical violations of which 2,141 were Act 402 and 4,928 for new crimes.

**Evidence:**

Budget Information (Adult Correctional Systems Annual Report, July 2008) prepared by the LFO.

Louisiana has the highest number of probationers and parolees per 100,000 population (1,528 versus southern region average of 1,125), or 35.8% higher.

Louisiana has the fifth lowest cost per offender supervised in the southern region (\$972 versus \$1,151). Based on the caseload of 65,613, this equates to an annual savings to the state of approximately \$11.7 million when compared to the southern region average.

Louisiana had the third highest caseload per agent at 118.0 verses the southern region average of 96.1.

**Activity ID:** 389

**Activity Name:**

Lab Services

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 3000 Operational Support

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

Last FY, the Crime Lab began an initiative to reduce the number of backlog cases, resulting in 20,013 completed requests. The Crime Lab was able to complete all the requests received, in addition to reducing 1,323 of the backlogged requests. Currently there are 7,194 backlogged requests.

A 5% reduction (equal to 1,000 requests) would result in our inability to reduce backlog and may increase the amount of backlog requests.

**DNA UNIT**

- Reduce the number of samples that could be analyzed
- Reduce the number of cases that could be outsourced
- Eliminate an analyst resulting in an increase in turnaround time therefore increasing the workload of other analysts and increasing the number of backlogs

**QUALITY ASSURANCE UNIT**

- Adversely affect our ability to maintain accreditation, including probation, suspension, or revocation

**CRIMINALISTICS UNIT**

- Impede the lab's ability to replace older and outdated instrumentation to improve our toxicology service to meet current needs.

**Activity Type:** Existing

**Objective:**

The Crime Lab will provide at least 20,000 lab requests analyzed yearly while decreasing overall turn-around-time for analyses, decreasing existing backlog, and more specifically decreasing turn-around-time for DNA forensic cases to 60 days for 85% of the DNA requests by 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6621	Key	Percentage of ASCLD essential criteria	100	100	98	100	100
6627	Key	Total number of lab requests analyzed (reported)	20013	15316	16086	20000	20000
20812	Supporting	Number of CODIS samples uploaded to the State DNA indexing system	69354	64686	24600	43000	41000
15554	Supporting	Number of CODIS (arrestee and convicted offender) samples accessioned	61422	89160	81951	78000	75000

**Narrative:**

The Crime Lab has a continuing commitment to ensure the superior work and provide the highest level of forensic science services to all of the agencies we serve through complete, accurate, and consistent analyses by dedicated and highly trained employees. The Crime Lab is accredited through the American Society of Crime Lab Directors. Louisiana State Police Crime Lab provides leadership, training, forensic services, and assistance to state and local agencies.

A prime focus of lab priorities is currently being directed at reducing the backlog of violent crimes such as murder, rape and other crimes against persons. The goals of the lab's forensic services are:

- To provide accurate and timely analysis of evidence in the areas of toxicology, chemical analysis of evidence with controlled substances
- The examination of firearms and tool marks, latent prints, DNA, trace evidence, biology, and crime scene analysis and assistance
- To reduce backlog of cases older than 30 days in all areas, decrease case turnaround time to 60 days for at least 85% of services requested
- To maintain excellence in the quality of the forensic science services provided to our customers
- To provide optimal levels of forensic service to the State of Louisiana
- To upload and process CODIS samples to the National DNA Indexing System
- To facilitate improvement in all aspects of the lab's work
- To provide early identification and correction of problems and potential problems through corrective and preventive action

**Explain How This Activity Advances State Outcome Goal:**

Forensic scientists at the lab provide assistance in the statistical data collection of evidence at crime scenes along with performing scientific examinations of evidence. Analyses performed at the lab are often the definitive factor in proving the guilt or innocence of persons charged with criminal acts. Being the largest lab of its kind in the state, the Louisiana State Police Crime Lab has been utilized by many agencies, both law enforcement and judicial, for timely and successful prosecution of criminal investigations resulting in the safety of citizens and property.

**Evidence:**

The Combined DNA Index System (CODIS) database has specifically assisted in multiple cases throughout the State of Louisiana. The Crime Lab is the only forensic toxicology lab in the State of Louisiana. Work completed at the Crime Lab has directly resulted in the arrest and conviction of numerous offenders in both high and low profile cases throughout Louisiana. LSP is the only in-state laboratory certified to conduct drug analyses on blood/urine samples in DWI investigations.

Examples of cases include a 2007 double-murder from Franklinton that was solved this year. As of September 17, 2009, Baton Rouge Police Department has investigated 65 murders and has submitted evidence to the Crime Lab for 60 of these cases.

New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.
- Concealed Handguns processes permit applications.

- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

#### **Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sherriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

#### **Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.

- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.

- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.

- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.

- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.

- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.

- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

------------------------------	-----	------------------------------------

**Activity ID:** 50

**Activity Name:**

Investigations

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 2000 Criminal Investigation

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

A reduction in the current budget would negatively affect the number of cases opened and closed, arrests, and other agency assists. Detectives provide expertise/assistance to other law enforcement agencies that do not have the experience or resources necessary to investigate cases which are complex and multi-jurisdictional.

A 5% reduction of the budget would ultimately lead to a reduction in man-power by 20-25% therefore leading to a decline of enforcement throughout the state. In 2008, the criminal program opened over 2,000 cases. With a reduction in man-power, the number of cases opened would likely decline to approximately 1,600. The effect of those 400 cases not able to be opened would lead to an increase in criminal activity in many parts of the state.

Over 1,000 requests for assistance from other agencies would be denied due to the lack of resources available to the Criminal Program.

**Activity Type:** Existing

**Objective:**

To prevent and detect crime, apprehend criminals, and perform any other related duties by increasing the number of criminal investigations by 5% by June 30, 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
20804	Key	Number of criminal investigations initiated	2015	1506	1162	1220	1232

**Narrative:**

The Louisiana State Police Criminal Investigation (LSP) activity is the only statewide law enforcement agency equipped to handle large scale, multi-jurisdictional criminal investigations. LSP investigates police shootings, corruption, politically sensitive cases, supports local agencies and jurisdictions with investigative assistance, violent crimes, and child predator investigations. LSP also enforces all local, state, and federal statutes that prohibit the possession, use, and distribution of narcotics, dangerous drugs, and prohibited substances. LSP concentrates on large-scale narcotics operations, with an emphasis on individuals/organizations implicated in interstate and international drug trafficking, and organized prescription fraud by practitioners. A great number of investigations result in the seizure of assets/proceeds from criminal activity. These funds are tracked and utilized to further/enhance criminal investigations.

**Explain How This Activity Advances State Outcome Goal:**

This program directly advances the Public Safety Goal. It aids local law enforcement with investigative resources not available at the local level, which enables the apprehension of criminals and the reduction of potential future crimes. LSP acts as a facilitator in criminal investigations that extend past the jurisdictional boundaries of local law enforcement. LSP targets areas in the state with a propensity for violence and/or drug abuse with saturated patrols and enforcement efforts. LSP focuses on the apprehension of violent crime fugitives, drug diversion violations, and child predators.

#### Evidence:

In 2008-2009, this activity exceeded its performance indicators of 1,200 criminal investigations initiated by opening 2,015 criminal cases. This activity also exceeded its performance indicator of 1,100 criminal investigations closed by closing 1,661 criminal investigations. The investigations resulted in over 1,000 arrests, over \$2,000,000.00 in assets being seized, and over \$10,000,000.00 in illegal controlled dangerous substances and property recovered. Over 30 training sessions/crime prevention classes have been presented throughout the state where approximately 2,000 individuals of all ages have attended. In addition, this program has obtained 100% compliance for investigators on the Information Reporting System.

**Activity ID:** 389  
**Activity Name:**  
 Lab Services  
**Department:** 08B Public Safety Services  
**Agency:** 419 Office of State Police  
**Program:** 3000 Operational Support  
**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Last FY, the Crime Lab began an initiative to reduce the number of backlog cases, resulting in 20,013 completed requests. The Crime Lab was able to complete all the requests received, in addition to reducing 1,323 of the backlogged requests. Currently there are 7,194 backlogged requests.

A 5% reduction (equal to 1,000 requests) would result in our inability to reduce backlog and may increase the amount of backlog requests.

**DNA UNIT**

- Reduce the number of samples that could be analyzed
- Reduce the number of cases that could be outsourced
- Eliminate an analyst resulting in an increase in turnaround time therefore increasing the workload of other analysts and increasing the number of backlogs

**QUALITY ASSURANCE UNIT**

- Adversely affect our ability to maintain accreditation, including probation, suspension, or revocation

**CRIMINALISTICS UNIT**

- Impede the lab's ability to replace older and outdated instrumentation to improve our toxicology service to meet current needs.

**Activity Type:** Existing

**Objective:**

The Crime Lab will provide at least 20,000 lab requests analyzed yearly while decreasing overall turn-around-time for analyses, decreasing existing backlog, and more specifically decreasing turn-around-time for DNA forensic cases to 60 days for 85% of the DNA requests by 2013.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6621	Key	Percentage of ASCLD essential criteria	100	100	98	100	100
6627	Key	Total number of lab requests analyzed (reported)	20013	15316	16086	20000	20000
20812	Supporting	Number of CODIS samples uploaded to the State DNA indexing system	69354	64686	24600	43000	41000
15554	Supporting	Number of CODIS (arrestee and convicted offender) samples accessioned	61422	89160	81951	78000	75000

**Narrative:**

The Crime Lab has a continuing commitment to ensure the superior work and provide the highest level of forensic

science services to all of the agencies we serve through complete, accurate, and consistent analyses by dedicated and highly trained employees. The Crime Lab is accredited through the American Society of Crime Lab Directors. Louisiana State Police Crime Lab provides leadership, training, forensic services, and assistance to state and local agencies.

A prime focus of lab priorities is currently being directed at reducing the backlog of violent crimes such as murder, rape and other crimes against persons. The goals of the lab's forensic services are:

- To provide accurate and timely analysis of evidence in the areas of toxicology, chemical analysis of evidence with controlled substances
- The examination of firearms and tool marks, latent prints, DNA, trace evidence, biology, and crime scene analysis and assistance
- To reduce backlog of cases older than 30 days in all areas, decrease case turnaround time to 60 days for at least 85% of services requested
- To maintain excellence in the quality of the forensic science services provided to our customers
- To provide optimal levels of forensic service to the State of Louisiana
- To upload and process CODIS samples to the National DNA Indexing System
- To facilitate improvement in all aspects of the lab's work
- To provide early identification and correction of problems and potential problems through corrective and preventive action

**Explain How This Activity Advances State Outcome Goal:**

Forensic scientists at the lab provide assistance in the statistical data collection of evidence at crime scenes along with performing scientific examinations of evidence. Analyses performed at the lab are often the definitive factor in proving the guilt or innocence of persons charged with criminal acts. Being the largest lab of its kind in the state, the Louisiana State Police Crime Lab has been utilized by many agencies, both law enforcement and judicial, for timely and successful prosecution of criminal investigations resulting in the safety of citizens and property.

**Evidence:**

The Combined DNA Index System (CODIS) database has specifically assisted in multiple cases throughout the State of Louisiana. The Crime Lab is the only forensic toxicology lab in the State of Louisiana. Work completed at the Crime Lab has directly resulted in the arrest and conviction of numerous offenders in both high and low profile cases throughout Louisiana. LSP is the only in-state laboratory certified to conduct drug analyses on blood/urine samples in DWI investigations.

Examples of cases include a 2007 double-murder from Franklinton that was solved this year. As of September 17, 2009, Baton Rouge Police Department has investigated 65 murders and has submitted evidence to the Crime Lab for 60 of these cases.

New	Key	Percentage of expungement orders processed	0	0	0	0	100

**Narrative:**

Support Services includes Crisis Response, Bureau of Criminal Identification & Information, Traffic Records, Internal Affairs, Aviation, Police Supply, Fleet, Applied Technology, and HQ Communications.

Crisis Response consists of Emergency Operations Center (EOC) and SWAT. Louisiana's Emergency Operations Plan mandates LSP as Primary Responders for Emergency Support Functions.

- Crisis Response is responsible for managing critical incidents involving natural disasters, terrorist threats, and criminal activities.
- SWAT ensures a highly trained, well-equipped unit to respond to hostage situations, barricaded suspects, high-risk warrants, or special security events.

The Bureau of Criminal Identification & Information is comprised of Criminal Records, Concealed Handguns, Traffic Records, and HQ Communications providing support & information to criminal justice agencies, public & private agencies, and citizens in accordance with state & federal guidelines.

- Criminal Records manages & maintains the State Sex Offender and Child Predator Registry, the State Computerized Criminal History Database, and the State Automated Fingerprint Identification System. Criminal Records provides educational training to local agencies, and communicates information to federal authorities.
- Concealed Handguns processes permit applications.

- Traffic Records provides LSP prepared Crash Reports to be purchased.
- HQ Communications serves as the state's liaison with the US Department of Justice, FBI, and Criminal Justice Information Services for accessing Federal Criminal Justice Databases by granting & establishing access to local agencies, enforcing administrative regulations for access, and conducting audits of local agencies for federal compliance.

Police Supply provides commissioned employees with uniforms, weapons, and other equipment.

Fleet Operations manages and provides transportation needs by conducting preventative maintenance and vehicle repairs.

Applied Technology accepts, tests and recertifies all alcohol breath testing instruments, ensures individuals are qualified to perform maintenance and inspection of instruments, and certifies officers.

Internal Affairs investigates procedural violations and complaints against employees of the DPS as well as conducting background investigations on all applicants applying for sensitive positions within DPS, the Lottery Corporation, and Governor appointees.

#### **Explain How This Activity Advances State Outcome Goal:**

Support Services advances Public Safety by providing law enforcement personnel with the knowledge and skills in drug impairment recognition, field sobriety testing, and tactical operations. It extends beyond LSP and has become vital to multi-agency collaboration in both law enforcement & public safety.

- Dept of Wildlife and Fisheries will be participating in a LSP taught SWAT course.

Crisis Response is at the forefront of emergency planning & management.

- Developed and directs contra flow within Louisiana & coordinates with bordering states.
- Serves as a Point of Contact for all local EOC's.
- Manages emergency traffic issues for orderly evacuation.
- Primary lead for site security & evacuation centers/shelters.
- Provides emergency escort during times of crisis for equipment, fuel, and medical supplies.
- Works in collaboration with DOTD to ensure emergency plans are successful.

Accurate & timely information of criminal activity is available through databases such as State Sex Offender & Child Predator Registry in collaboration with multijurisdictional sherriff's offices enabling the public to make informed decisions to their safety within their community.

Fleet & Policy Supply directly contribute to fiscal responsibility.

- Provides 11 garages throughout the State to service vehicles reducing the out of service down time for a vehicle and increasing the amount of time a trooper can be on patrol.
- Decreases repair cost by recycling parts and dismantling out of service vehicles.
- Utilizes inmate labor to reduce cost. Inmates are provided training and experience in an effort to deter recidivism.
- Manages a statewide fuel contract to purchase fuel at a savings.
- Manages and ensures quality vs. price on equipment.

HQ Communications conducts audits of local agencies ensuring compliance with federal regulations in regards to the Federal Criminal Justice database ensuring the integrity is maintained.

#### **Evidence:**

Crisis Response has mitigated a number of high-profile natural disasters such as Hurricanes Andrew, Katrina, Gustav, and Ike. Crisis Response coordinates statewide security resources for pandemic activity involving the Strategic National Stockpile.

Crisis Response has performed the following tactical activations amongst countless others:

- In 2007, served 13 High Risk Arrest and Search Warrants, responded to 7 Barricaded Suspects, and was collaborative in 2 High Profile Security Events.

- In 2008, responded to 14 Barricaded Suspects and 3 Hostage Situations, and was collaborative in 3 High Profile Security Events.

- In Jan-June 2009, served 11 High Risk Arrest and Search Warrants, responded to 4 Barricaded Suspects, 1 Hostage Situation, and was collaborative in 2 High Profile Security Events.

#### Bureau of Criminal Identification

- During FY 09, received over 100,000 Background Check requests, with a large volume from various agencies for the oversight of children.

- Provides the public with online access to information on 9,500 Sex Offenders and Child Predators located in Louisiana.

- Provides equipment and training for the electronic submission of fingerprints to the Automated Fingerprint Identification System to each LA Parish Sheriff's office and large municipalities.

- Provides State and Federal access to the Federal Criminal Justice database to over 650 agencies in the state while ensuring 24/7 accessibility.

#### Applied Technology in FY 09

- Certified 190 instruments every 4 months as required by law.

- Certified and Re-certified 2,222 law enforcement officers in operating breath testing instruments.

Police Supply and Fleet has done numerous internal studies on contracting out their activities. Results have shown the infeasibility of contracting to the private sector due to the accessibility and availability at a central location at all times, and immediateness of equipment in emergency situations. Also, the majority of cost for maintaining vehicles is labor therefore the utilization of inmate labor mathematically results in reduction of expenditures.

**State Outcome Goal:** 5 Public Safety  
**Scalable:** True

**Scalable Description:**

Current funding will maintain present Troop strength of 706. With the changes outlined in this offer along with other offers expected to be funded (LHSC), Patrol is targeting a 5% reduction in traffic fatalities in FY 2011 as follows:

- 13,849,372 miles patrolled
- 395,697 citations
- 21,148 arrests
- 225,513 motorist assists

Patrol responsibilities include accident response, motorist assists, and crime responses. A reduction will limit our ability to reduce traffic fatalities. An increase in funding will increase proactive activities and reduce fatalities.

LHSC final report of the "Targets of Opportunity: State Demonstration Program For Reducing Impaired Driving" states every life saved is equivalent to \$3 million in tax payer costs. Over the past 3 years, as the number of patrol troopers increased, the number of fatality crashes decreased. A reduction in the number of patrol troopers could increase the number of fatal crashes.

**Activity Type:** Existing

**Objective:**

To provide the citizens and visitors of Louisiana with the safest highways possible, by reducing the number of traffic fatalities by 6% over the next three years.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
13772	Key	Percentage of State Police Manpower Allocation Study coverage level implemented	75	66	58	70	80
20796	Key	Number of fatalities per 100 million miles	2	2	2	2	2

**Narrative:**

The Louisiana State Police Patrol enforces traffic and criminal laws, investigates crashes, performs drug interdiction, aids motorists, provides accurate communication of information to the public and other agencies, conducts crime prevention programs, promotes highway safety, and leads and assists local and state law enforcement agencies.

A 17% increase in the number of Troopers over the course of the prior three years has resulted in 53% more public assists, 20% more contacts with the public, and most importantly, the number of fatal crashes within the Patrol's investigation jurisdiction has decreased by 7%.

With improvements in research and data analysis capabilities and continued status quo funding, the Patrol activity

will continue attempting to reduce the fatality rate over the next 3 years through:

- Modifying the time and location of all the allocation of officers to focus on high risk situations.
- Increasing coordination with education and media components, including Highway Safety and LA DOTD, to magnify the impact that each would have separately.
- Leveraging existing Troopers to expand public education efforts on safe driving behaviors.
- Moving duties currently performed by sworn officers to lower-cost civilian positions which will require a TO increase in civilian support personnel which has taken the brunt of past personnel reductions.

#### **Explain How This Activity Advances State Outcome Goal:**

I want people and families, including children, to feel safe at home, school, work, and while traveling; I want less crime, including less drug abuse, and smarter, proactive policing.

State Patrol plays a critical part in advancing Public Safety goal by increasing the safety of our highways, enforcing our criminal laws, interdicting drugs, and reducing crime through assistance of local law enforcement and educating the public.

- Detailed statistical data of active patrol crash locations directs the deployment of various assets of the Patrol activity such as Motorcycle Patrol and Task Forces to concentrate enforcement in these target areas.
- Strategically located roadside safety checkpoints.
- Youth education about the consequences of negative behavior such as driving while intoxicated, drug use, and reckless driving.
- Utilizing various community forums, troopers educate the general public on safe driving habits and crime prevention tips which are approaches that have been proven to work.

While the State Patrol cannot control the number of fatalities, the Troops can have a strong and positive influence on the safe driving habits of the people of Louisiana that do reduce the number and severity of crashes.

#### **Evidence:**

State Police Manpower Allocation Study revealed that 937 troopers is the amount of personnel needed to effectively patrol the State. At the inception of the State Police Manpower Allocation Study in 2007, there were 543 Troopers dedicated to patrol. Currently the Patrol Activity has 706 Troopers patrolling Louisiana's highways, still over 200 officers less than the recommended level. As the numbers increased, public assists increased by 53% and most importantly, the number of fatal crashes on highways patrolled by the State Patrol has decreased.

Research conducted by the Louisiana Highway Safety Commission substantiates the impact that Troopers have in saving lives. The Commission's final report of the "Targets of Opportunity: State Demonstration Program For Reducing Impaired Driving" found that an increase of 100 Standardized Field Sobriety Tests will save 3 additional lives. They also found that an increase of 1000 hours of Saturation Patrol will save 4 additional lives. In 16 selected parishes for the program that utilized increased enforcement, alcohol-related fatalities decreased 14.8%.

#### **Targeting and Coordinating Enforcement:**

Multiple studies support the value of the Patrol's strategies to target their limited Patrol manpower. The Patrol's strategies, which are designed to reduce traffic fatalities and crime, rely on increased data analysis and new research to:

- Identify and target high crime locations or persons and implement target patrols to effectively deter and attack the cause of the crime, rather than react once a crime has occurred
- Leverage crash data, vehicle density, and other input to implement selective enforcement programs that have been demonstrated to impact speeding, intoxicated driving, and seat belt use, which save lives.
- Coordinate education and marketing efforts to amplify the impact of selective enforcement programs, achieving even greater reductions in the number of traffic deaths.

See:

"Gun Violence Programs: Directed Police Patrols," by the National Institute of Justice, 2008, asserts that based on two pilot projects that directed patrols reduced gun crime, homicide, aggravated assault with a gun and armed robbery,

New	Key	Number of child safety seats installed	0	0	0	0	750
New	Key	Percentage of requested safety/education presentations conducted	0	0	0	0	90

**Narrative:**

Operational Development is an activity within the Operational Support Program and provides staff functions for the Superintendent and his command staff. Operational Development consists of the Research, Planning, and Public Affairs. The Planning Unit is responsible for producing the Strategic Plan, Operational Plan, monitoring the department's performance indicators, the budget and the management of numerous federal grants. The Research Unit is responsible for the development of policy and procedure, serving as the department's liaison with the legislature to facilitate legislative initiatives; conducting research studies to develop innovative initiatives and internal policies to improve the effectiveness and quality of the service provided to the public. The Public Affairs Unit is responsible for all media relations, educational programs concerning the public safety, recruiting, and providing support for events and programs of interest to the superintendent.

**Explain How This Activity Advances State Outcome Goal:**

All units within Operational Development will contribute to the goal of Public Safety by providing the operational support necessary to the effective operations of the Office of State Police as a whole. The Public Affairs unit will conduct various educational programs targeted at training children including "Stranger Danger," a child safety program aimed at pre-school and elementary grade children and "Behind The Faces", a motivational video production aimed at Jr. High and High School students to guide them in good decision making regarding drugs, alcohol, suicide, bullying and peer pressure. Public Affairs also coordinates a bicycle safety program and a program called "Sudden Impact", a reality based educational program which combines classroom instruction on driver's safety and alcohol awareness.

The Planning Unit will develop, monitor, and administer federal and state grant applications and awards that are specifically aimed at reducing highway fatalities and crime reduction. These grant programs will include crash reduction grants, apprehension enhancements grants, and bicycle safety grants. Additionally, research will be conducted to identify the needs of the department to effectively implement these programs as well as assist in identifying new innovative technologies available to law enforcement personnel that will aid in the ability to reduce crashes and deter crime.

#### **Evidence:**

Operational Development manages grants and contracts related to highway safety, criminal apprehension, law enforcement instruction, and new technologies for our personnel and facilities. These funds have been utilized for the enforcement of traffic laws, seatbelt and child restraint laws, and D.W.I. violations. In the past, this funding has served as a primary source of the department's funding for safety education and public information. Additionally, grant funding has been utilized to purchase updated technology including in-car video cameras and radar and lidar units.

- The Planning Unit also assisted in the application process for grants totaling over \$6.8 million for the Crime Lab, DNA Lab, Investigative Support Services, the Training Academy, Narcotics, Detectives, and Homeland Security functions.

- In FY 2008-09, the Public Affairs Unit conducted 800 safety presentations to approximately 150,000 citizens, prepared 750 news releases to over 31,000 entities, and conducted over 2,600 interviews. Through Operation Lifesaver, Public Affairs conducted 37 train safety programs.

Public Information Officers also attended 42 child safety-seat events and installed over 900 child seats for members of the public.

DPS Police

**Department:** 08B Public Safety Services

**Agency:** 419 Office of State Police

**Program:** 3000 Operational Support

**State Outcome Goal:** 5 Public Safety

**Scalable:** False

**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To secure the Louisiana State Police Headquarters Complex, the Louisiana State Capitol Complex, and to supervise the Department of Corrections inmates assigned to the State Police Barracks by increasing the number of non-vehicle patrol hours.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21938	Key	Number of Non-Vehicle Patrol Hours	15516	19594	13025	14272	15500
10555	Supporting	Number of contacts, arrests, citations	6567	4477	5264	0	4750

**Narrative:**

The Department of Public Safety Police is comprised of Physical Security and the Louisiana State Capitol Detail.

•Physical Security provides safety and security for the Department of Public Safety Headquarters and the Joint Emergency Services Training Center. Physical Security houses and supervises approximately 185 inmates who are at the state facilities 24/7. Physical Security has operated for more than twenty years supervising inmates at the State Police Headquarters.

•The Louisiana State Capitol Detail is comprised of a communications center, patrol officers, and building security officers who are tasked with protecting the property and all employees and visitors in the Capitol Complex. Officers detect and apprehend criminals and strive to communicate with local, state and federal law enforcement agencies to proactively combat crime. Capitol Detail provides aggressive patrols and community policing tactics to ensure a safe environment for the employees, citizens, and visitors of the Capitol Complex

**Explain How This Activity Advances State Outcome Goal:**

DPS Police is mandated to maintain peace and order within the State Capitol Complex by regular patrols, education and other actions to ensure the general safety of the public. Through accurate and timely communication along with the protection of citizens, visitors, and property, DPS Police proactively contribute to Public Safety. The officers conduct Personal Safety Seminars that educate the employees at the Louisiana State Capitol Complex on preventing crime, awareness of their environment, and responding to emergency situations, which are all

fundamental components in personal safety and security.

**Evidence:**

Evidence

- The Capitol Detail has operated for over ten years with no major violent crimes such as murders, rapes, and batteries with serious bodily injuries being committed in the Capitol Complex.
- From 2006 to 2009, Capitol Detail arrested 599 persons including 226 fugitives from other jurisdictions. An additional 122 people were arrested for DWI.
- Over the past three years, DPS Police officers issued 6,465 citations and 1,468 warning violations for traffic offenses in an effort to reduce crashes and promote public safety.
- Collaboration with Department of Corrections through the use of inmate labor, saving the department thousands of dollars per year while providing training and work experience to the inmates.

**Activity ID:** 421

**Activity Name:**

Inspections

**Department:** 08B Public Safety Services

**Agency:** 422 Office of State Fire Marshal

**Program:** 1000 Fire Prevention

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

Continued funding will:

- Save and improve the lives and property of the citizens and visitors of Louisiana
- Expedite the opening of safe businesses and events, insuring positive economic growth and increase state revenue.
- Enhance collaboration with other state agencies, local governments, and private industry to promote safety and education.
- Improve the cultural and recreational opportunities available throughout the state by insuring safe venues pre-activity inspections and presence at activities
- Strengthen governmental ability to achieve results efficiently and effectively by the collection of data by inspectors which can be utilized in formulation of legislation to enhance public safety.

Reduced funding will:

- Increase the probability of death or injury with non-compliance to life-safety codes
- Impact economic growth by postponing the openings of new and expanding businesses
- Increases in insurance premiums or loss of insurability.

**Activity Type:** Existing

**Objective:**

To save lives and property while promoting economic growth by performing inspections of new/expanding businesses within 2 weeks of request, addressing all consumer concerns, increasing fire safety awareness and protecting the public and business community from consumer fraud through June 30, 2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
2035	Supporting	Percentage of Inspections performed within 2 weeks	97	98	98	93	95
2046	Supporting	Percentage of events(amusements) inspected	100	100	100	75	100
20156	Supporting	Percentage of public firework displays inspected	100	100	100	75	100
10564	Supporting	Percentage of Licensing Investigations cleared	134	70	76	80	80
2082	Supporting	Percentage of required healthcare inspections completed	93.6	90.4	87	80	93

**Narrative:**

The activities of the Inspections section insure the safety of the citizens and visitors of Louisiana, enhance the protection of property, and educate the public and industry in an effort to create a safe environment and promote economic growth and development. These activities include:

- 98 % of new and renovated structures are inspected within 2 weeks of requested inspection date allowing these businesses to open in a timely manner, promoting positive economic growth and development.
- The majority of fire deaths occur in private homes. As a result of inspections performed by this office 7,941 family daycare homes are now equipped with smoke detectors and fire extinguishers.
- Inspection of all commercial and public structures in the state, including in home child-care operations, which includes but not limited to all institutional occupancies requiring state and federal licenses and certification, detention, colleges, universities, state-owned or state-leased properties, hospitals and nursing homes, schools, manufactured homes, industrialized buildings, and licensing of private industries;
- Boiler and pressure vessel inspections per American Society of Mechanical Engineer (ASME) and the National Board of Boiler and Pressure Vessels (NBIC) inspection code;
- Amusement rides/attractions in accordance with American Standards Testing Material (ASTM) standards;
- Fireworks in accordance with all National Fire Protection Association (NFPA) related standards;
- Regulation of life safety and property protection contractors and employees of said contractors for compliance to all applicable NFPA codes and standards, including but not limited to sprinkler, fire and security alarms and systems, and locksmiths;
- Licensing of manufactured housing contractors, retailers, developers, salesman and installers,
- Perform criminal background checks on licensing applicants to reduce the number of convicted felons in homes and businesses.
- Collect and maintain records of fires occurring in the state, together with all facts, statistics, and circumstances thereof, including the origin of the fire, that have been determined by the investigations provided for in this section or otherwise.
- No fire deaths have occurred in functioning commercial properties that have passed inspection by the this office
- Recurring inspections reduce operations expenditures of business, through reduced insurance costs and reduced down-time.

**Explain How This Activity Advances State Outcome Goal:**

The Fire Inspection activity makes a direct impact on the Public Safety and Economic Development Goals.

The Fire Inspection activity enables new businesses to open and existing business to expand without delay. It further improves the business climate by reducing insurance rates, while protecting the health and safety of our residents and visitors.

The Inspection process:

- Provides data which assists in the development of or modification to codes making buildings safer thus saving lives and property;
- Assures the safety of individuals and families during all types of events;

The Licensing process:

- Promotes fair and equitable business growth;
- Ensures proper installation of systems and equipment for protecting life and property;
- Prevents convicted felons in home and businesses;
- Protects consumers from fraud.
- The collection and analysis of fire data helps to identify areas of concern and provides a basis for development of education materials and legislation to promote a safe environment within the state.

**Evidence:**

In fiscal year 2007-2008

- The inspections section received 10,038 requests to conduct final inspections of new and renovated properties, of which 9,882 (98%) of these inspections were conducted within two weeks of the requested date making it possible for these businesses to open in a timely manner thus promoting economic development.

- The inspection section conducted 70,993 inspections at family in home daycares, daycare centers, residential board and care facilities, public assemblies, schools, state leased buildings, colleges and universities, detention centers, and a multitude of other types of occupancies, insuring public safety while impacting the insurance rates by reducing the likelihood of injury, death or damage. In the State of Louisiana, from 2007-2008, less than 2% of all building fires, less than 4% of total property loss, and zero fire related deaths were in buildings that receive regular annual inspections by the State Fire Marshal.

- A majority of fire deaths occur in single family homes, however, as a result of this office inspecting in home family daycares 7,941 single or private homes are now provided with smoke detectors and fire extinguishers.

- There were no significant building damages or explosions from the 33,000 boilers that we have in the state .

- No major injuries or fatalities occurred on the 4,000 rides/attractions inspected.

- Dramatically decreased the number of illegal fireworks at the 800 fireworks retail stands and licensed over 350 public firework displays without incident. This is all done by cross training and certifying inspectors in a number of different disciplines.

- In fiscal year 2007-2008, the licensing section received 643 complaints and processed 8,265 applications. By providing proactive enforcement and collaborated training with the life safety and property protection industry, we have been able to reduce the number of complaints received in fiscal year 2008-2009 to 536 and have increased the number of new applications being submitted to 8,480.

**Activity ID:** 343

**Activity Name:**

Registration of apportioned vehicles through the International Registration Plan and UCR System

**Department:** 08B Public Safety Services

**Agency:** 420 Office of Motor Vehicles

**Program:** 1000 Licensing

**State Outcome Goal:** 5 Public Safety

**Scalable:** True

**Scalable Description:**

If funded at the continuation level, this activity will allow Louisiana to continue participation in the International Registration Plan (IRP) and the Unified Carrier Registration (UCR) system. The IRP requires commercial carriers involved in interstate commerce to obtain an apportioned license plate/cab card; OMV collects fees that allows carriers to travel throughout the United States and Canadian provinces. The UCR requires collection of fees for LA based interstate carriers based on the number of power units in the fleet. Loss of funding would affect the timely credentialing of interstate drivers and reduce the enforcement of motor carrier safety.

**Activity Type:** Existing

**Objective:**

To ensure the compliance and enforcement of both federal and state safety regulations for commercial carriers, annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Number of apportioned (commercial) carriers registered	4587	4923	4946	0	4587
New	Key	Percentage of carriers in compliance with UCR	100	0	0	0	100

**Narrative:**

This activity is responsible for the collection of appropriate International Registration Plan (IRP) and Unified Carrier Registration (UCR) fees. In addition, this activity is responsible for the issuance of license plates/cab cards to Louisiana based motor carriers operating under the IRP plan. Registering a fleet of inter-jurisdictional vehicles becomes a one-stop process for motor carriers, with a simple, one-step registration. Under the provisions of IRP, motor carriers can operate in any member jurisdiction displayed on the cab card.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the state outcome goal of public safety by ensuring compliance with federal and state safety regulations for commercial carriers prior to license plate issuance and providing law enforcement with essential information regarding the carrier and the vehicle.

**Evidence:**

The IRP program collects over \$14 million dollars, annually, as it fulfills Louisiana's responsibilities under interstate agreements and federal requirements. If this program is not funded, the federal government could withhold 10% of Louisiana's federal highway funding. It would also jeopardize Louisiana's ability to collect registration taxes on commercial motor carriers, which produced \$14 million in IRP fees. Although the UCR program is still in its infancy, \$1,828,866.00 in fees were collected in FY 2008-2009, which in turn helps fund the LSP Motor Carrier Section.

Due to the nature of IRP accounts and the carriers having the ability to transport hazardous materials, it is critical that the customer's credentials be examined for compliance with state and federal highway safety standards.

New	Key	Percentage of crashes reduced from prior fiscal year.	0	0	0	0	2

**Narrative:**

MCSAP is a coordinated and uniform program of inspection and enforcement activities relative to interstate and intrastate commercial motoring. No other agency within state or local government has the responsibility or authority to enforce the Motor Carrier Safety and Hazardous Material Rules and Regulations.

MCSAP reduces the number and severity of commercial motor vehicle crashes occurring in Louisiana by immediately placing unsafe drivers and defective vehicles out of service. MCSAP seeks to accomplish this purpose through the five national program elements of the Motor Carrier Safety Assistance Program: roadside inspections of commercial motor vehicles, traffic enforcement, compliance reviews/audits, public outreach and training, and data collection and analysis.

In addition, MCSAP manages the Louisiana Truck Center for the purpose of serving as one central location for motor carrier companies and operators to obtain all permits and payment of any fees/ charges allowing them to engage in the commercial motor carrier trade in Louisiana.

The Unified Carrier Registration Program, established by the Unified Carrier Registration Act, requires all individuals and companies that operate commercial motor vehicles in interstate, intrastate, or international commerce to register their business and pay an annual fee based on the size of the fleet. MCSAP has the sole responsibility of enforcing the Unified Carrier Registration Agreement in accordance with federal regulations.

MCSAP conducts and reviews safety audits in accordance with federal regulations to ensure that basic safety monitoring controls are in place for all new commercial motor carriers. Specifically, these safety audits review a new

entrant's safety management systems and a sample of required records to assess compliance with federal regulations.

#### Explain How This Activity Advances State Outcome Goal:

Commercial motor vehicles operating in unsafe conditions, or operated by drivers in an unsafe manner are known contributing factors in fatalities and serious injury crash statistics. By mitigating unsafe vehicle and driver conditions through proactive communication, education, and enforcement initiatives, a safer environment is achieved on Louisiana's highways contributing to the safety of motorists in Louisiana.

The primary funding source for the MCSAP comes from Federal Motor Carrier Safety Administration grant awards which require a 20% State match on all funding. MCSAP generated \$6,098,664.46 in revenue for Louisiana last Fiscal Year through fees and violations.

#### Evidence:

MCSAP gauges the effectiveness of their efforts by statically tracking and analyzing enforcement activity. Of the 46,786 roadside inspections conducted during State Fiscal Year 2008-2009, 68,095 vehicle violations were cited, in which 17,095 (25%) were identified as out of service violations. During the same time period, 36,145 driver violations were cited, in which 4,258 (12%) were identified as out of service violations.

**Activity Name:**

Legal Services

**Department:** 13 Department of Environmental Quality

**Agency:** 850 Office of the Secretary

**Program:** 1000 Administrative

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Legal will endeavor to maintain its performance standards if funding is decreased. More funding resources would allow for greater efficiency in completing the performance requirements; less funding will reduce this efficiency.

**Activity Type:** Existing

**Objective:**

To respond to all (100%) legal challenges to Louisiana Department of Environmental Quality actions so that human health and the environment are protected without interruption, and to ensure compliance of all (100%) environmental regulatory operations with applicable laws and regulations.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9747	Key	Percent of referrals for which an initial legal review is provided within 30 business days of receipt	99.2	99	98	96	96
23142	Key	Percent of legally supported decisions sustained after challenge	0	0	0	95	95

**Narrative:**

The Legal Division provides advice, consultation, and representation to all offices of the Louisiana Department of Environmental Quality and is organized to provide attorneys with expertise and experience for every major type of environmental (and internal) action. Attorneys litigate corrective and compensatory actions to repair environmental damage, pursue environmental violators, collect penalties and fees owed to the department, and defend permit and other agency actions. They also routinely draft, review, and negotiate contracts, agreements, and settlements, and research and prepare legal opinions, reports, and other documentation to support agency decisions and actions.

**Explain How This Activity Advances State Outcome Goal:**

The Legal Division's activity aligns with the Natural Resources statewide goal by supporting the Louisiana Department of Environmental Quality (LDEQ) in protecting natural resources, human health, and the environment with consideration of economic development by prosecuting enforcement and collection actions and defending challenges to permit and other actions.

The Legal Division assists the agency in ensuring transparency, accountability, consistency, and ethical behavior are standard throughout its statewide departmental operations by observing and participating in management

discussions and day to day operations, conducting legal risk analysis, and providing advice, consultation, training, and representation to the various offices of the LDEQ.

**Evidence:**

The evidence supporting this activity is based on past performance data for FY 09:

- Collection of \$ 1,420,346.42 in fees and penalties
- Court appearances 410
- Pleadings prepared 413
- Legal consultations 74,595
- Public hearings 52
- Cooperative and settlement agreements negotiated 102
- Ethics consultations 116
- Regulation packages prepared and reviewed 74
- Enforcement actions reviewed 1,272

Accountability legal services reports demonstrated a cost savings to the agency of \$ 617,822.58 in the fourth quarter of FY09, in comparison with the cost to the agency of the same services from outside counsel at current government contract rates.

**Activity Name:**

Financial and Administrative Services

**Department:** 13 Department of Environmental Quality

**Agency:** 855 Office of Management and Finance

**Program:** 1000 Support Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Less Funding: Probable missed deadlines, delays in providing information to LDEQ Management, Data quality impact, and Customer Service impact.

More Funding: Data quality improved, better customer service, higher quality of service to LDEQ Management & LDEQ employees.

**Activity Type:** Existing

**Objective:**

To facilitate the Financial and Administrative means for the departmental programs to achieve their mandated objectives by providing 100% of the required and necessary business services annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6939	Key	Percentage of completed business transactions.	97	100	97	100	100
6940	Key	Number of repeat audit findings by legislative auditors.	0	0	0	0	0

**Narrative:**

The Financial and Administrative Services activity includes Budget & Expenditure Reporting, Accounts Payable, Employee Travel Reimbursements, Billing & Data Management, Accounts Receivable, Funds Management, Grant Processing and Expenditure Reporting, Revolving Loan Financial Processing and Reporting, Contract Processing and Management, Procurement, Property Control, Fleet Maintenance & Reporting, General Services Support, Employee Safety & Training, Motor Fuel Trust Fund Reimbursement Processing, and Waste Tire Data Processing.

**Explain How This Activity Advances State Outcome Goal:**

The Financial and Administrative Services activity provides the financial information and the tools necessary by the department's decision makers to make the best decisions in operating the department's programs in support of conserving, restoring, and preserving our natural resources. The services provided by this activity ensure that the information and services provided comply with all state and Federal laws, and also in complies with department and state policies and procedures. This activity also supports the efforts towards providing transparency and accountability, in that it prepares, analyzes, compiles, and processes the data for the activities within the LDEQ and submits the data to the Control Agencies. This ensures that taxpayer dollars are well spent and that the information provided is accurate and reliable.

**Evidence:**

The processes, data, and results this activity produces are audited annually by the Legislative Auditor, the department's internal audit section, and occasionally by Federal review teams. In recent years, there have been no reported findings by these groups that would indicate that the information provided has not been complete and

accurate.

During FY 2009, LDEQ streamlined motor fleet operations by reducing the overall fleet size by 10%.

In FY 2009 LDEQ realized a savings of \$894,000 by reducing acquisitions, closure of the Mandeville office and no new vehicle purchases. In FY 2010 LDEQ will realize a savings of \$3.2 million by reducing acquisitions, professional services, closure of the Mandeville office, no new vehicle purchases, and a reduction in operating automotive supplies due to the previous streamlining efforts.

**Activity ID:** 233

**Activity Name:**  
Remediation Services

**Department:** 13 Department of Environmental Quality

**Agency:** 853 Office of Environmental Assessment

**Program:** 1000 Environmental Assessment

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

If this Activity receives less funding, fewer contaminated sites will be will investigated, evaluated, monitored, or cleaned up. If additional funding is received, additional sites will be addressed and risk to human health and the environment will be further reduced

**Activity Type:** Existing

**Objective:**

To investigate and clean up uncontrolled contamination and/or monitor on-going cleanup at abandoned properties and active facilities. During FY 10-11, this Activity will restore 105 sites by making them safe for reuse and available for redevelopment while preserving the state's natural resources.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23147	Key	Number of sites evaluated and closed out.	116	129	85	115	105
New	Key	Percentage of closed out sites that are ready for continued industrial/commercial/residential use or redevelopment.	100	100	100	100	100
22206	Key	Cumulative percent of Government Performance Result Act (GPRA) facilities with remedies selected for the entire facility.	28	28	17	37	47
22208	Key	Cumulative percent of GPRA facilities with remedy completed or remedy construction completed for the entire facility.	22	21	13	30	37

**Narrative:**

The Remediation Services (RS) activity investigates, evaluates, monitors and cleans up contamination at active facilities and abandoned properties. State mandates authorizing the RS activity are found in the Environmental Quality Act: La. R.S. 30:2001 et seq., 30:2171, et seq., 30:2221 et seq., 30:2271 et seq., 30:2011 (C)(1)(b) and (D)(25), 30:2015.1, 30:2077, 30:2154, and 30:2551 and 2552. Federal mandates include the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. §§ 9601, et seq. and the Resource, Conservation and Recovery Act, 42 U.S.C. §§ 6901 et seq. The RS activity universe includes hazardous waste sites, solid waste sites, large chemical plants and refineries, ground water sites, Superfund sites, and Brownfields sites. These sites may be the result of historic or more recent spills. All site cleanups, and any contaminants that may be allowed to remain at these sites, must meet the human health risk-based clean-up standards established by state regulation so the properties can be safely used.

The environmental evaluation and/or remediation of these properties allows contaminated properties to be returned

to active commerce while achieving the goal of natural resource preservation. For example, Brownfields are underutilized sites that are either contaminated or perceived to be contaminated. These sites are evaluated and/or cleaned up so that already developed properties can be safely reused, conserving undeveloped areas for other uses. Other sites are discovered during due diligence investigations prior to commercial sales transactions where money is being loaned by banks which require property assessments and some form of environmental "clearance" from LDEQ. The assessments completed under this activity often facilitate these commercial transactions and provide for the appropriate reuse of the property in question.

By cleaning up past contamination, the Remediation Services activity promotes the restoration and preservation of two of Louisiana's most important natural resources, land and ground water, for the continued benefit of Louisiana's economy and the use of future generations.

#### **Explain How This Activity Advances State Outcome Goal:**

The RS activity advances the restoration and preservation of Louisiana's natural resources through cleanup incentives, consistent application of risk-based cleanup standards, partnerships with government and other organizations at all levels, cooperation with innovative cleanup technology markets, and public outreach through workshops and conferences. Partnerships with the U.S. Environmental Protection Agency (EPA) and Dept of Defense and collaboration with state and local agencies are well established for specific programs and projects. These strategies provide the basis for promotion and enhancement of property restoration for reuse and redevelopment, and for assistance in improving the state's economic climate. Since FY 01-02 the RS activity has restored and closed out 691 sites. Without the RS activity, contaminated properties would remain uncontrolled threats to human health, and would lead to environmental deterioration and declining property values.

RS activity internal processes and regulatory requirements are frequently reviewed and updated as technologies advance. All RS site work is tracked electronically, and a federally funded system upgrade is currently underway. The RS activity outsources its site assessment, investigation and cleanup work, as well as lab analysis.

The statutorily dedicated Hazardous Waste Site Cleanup Fund is matched (10%) with EPA funding (90%) for Superfund site cleanups and contaminant source removals. EPA Brownfields funds (100% federal) and RS staff technical assistance is leveraged with non-profit and local government funding statewide. These RS programs include Brownfields site assessments, cleanup cooperative agreements, oversight cost waivers, and loans through the revolving loan fund, with the common objective of property cleanup and restoration for redevelopment. According to EPA, for \$63.3 million awarded within Region 6 for Brownfields grants, 14,300 jobs have been leveraged, with an economic benefit of \$2.5 billion.

#### **Evidence:**

The progression and success of the RS activity is documented in annual reports to the LA Legislature. Over the last 8 years, the RS activity has restored and closed out 691 sites statewide. This includes every type of site within the RS site universe. Site complexity varies by orders of magnitude – from drum removal in a remote location – to dozens of separate contaminated areas within a multi-hundred-acre active hazardous waste facility – to a multi-acre Superfund site near a populated suburb, requiring treatment of millions of gallons of contaminated ground water. Fiscal Year/Sites Closed Out: 01-02/48, 02-03/50, 03-04/98, 04-05/70, 05-06/95, 06-07/85, 07-08/129, 08-09/116, 09-10/115.

The rate of success of the RS activity is influenced by the degree of cooperation of parties responsible for contaminated sites. Participants in the Voluntary Cleanup Program (VRP) who clean up properties to risk-based standards receive a Certificate of Completion and are released from further liability under state law from past contamination, which effectively allows potential buyers to acquire and remediate Brownfields properties without fear of state superfund liability. The VRP has resulted in restoration of 51 such properties in Louisiana. Growth to municipal tax bases, creation of new businesses and jobs, and increases in property values are all benefits of Brownfields redevelopment, while also contributing to smart growth by minimizing environmental impact and preserving natural resources.

Additionally, the RS activity has consistently employed its statutory authority to recover costs from responsible parties for state expenses, including LDEQ staff oversight and contracted site work. Cumulatively, the RS activity has recovered \$1,893,662 from responsible parties for reimbursement to the state.

In recent years, property assessments required for commercial transactions funded by lending institutions have contributed to the number of sites evaluated and closed out within the RS site universe. However, economic decline, combined with loss of staff positions due to attrition and budget freezes, have contributed to the most recent downward trend in RS activity. Therefore, the RS activity proposes 105 sites restored and closed out for FY 10-11.

Regardless, the LDEQ RS activity will strive to continue performing at the highest level despite loss of staff and funding.

**Activity ID:** 233

**Activity Name:**

Remediation Services

**Department:** 13 Department of Environmental Quality

**Agency:** 853 Office of Environmental Assessment

**Program:** 1000 Environmental Assessment

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

If this Activity receives less funding, fewer contaminated sites will be will investigated, evaluated, monitored, or cleaned up. If additional funding is received, additional sites will be addressed and risk to human health and the environment will be further reduced

**Activity Type:** Existing

**Objective:**

To investigate and clean up uncontrolled contamination and/or monitor on-going cleanup at abandoned properties and active facilities. During FY 10-11, this Activity will restore 105 sites by making them safe for reuse and available for redevelopment while preserving the state's natural resources.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23147	Key	Number of sites evaluated and closed out.	116	129	85	115	105
New	Key	Percentage of closed out sites that are ready for continued industrial/commercial/residential use or redevelopment.	100	100	100	100	100
22206	Key	Cumulative percent of Government Performance Result Act (GPRA) facilities with remedies selected for the entire facility.	28	28	17	37	47
22208	Key	Cumulative percent of GPRA facilities with remedy completed or remedy construction completed for the entire facility.	22	21	13	30	37

**Narrative:**

The Remediation Services (RS) activity investigates, evaluates, monitors and cleans up contamination at active facilities and abandoned properties. State mandates authorizing the RS activity are found in the Environmental Quality Act: La. R.S. 30:2001 et seq., 30:2171, et seq., 30:2221 et seq., 30:2271 et seq., 30:2011 (C)(1)(b) and (D)(25), 30:2015.1, 30:2077, 30:2154, and 30:2551 and 2552. Federal mandates include the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. §§ 9601, et seq. and the Resource, Conservation and Recovery Act, 42 U.S.C. §§ 6901 et seq. The RS activity universe includes hazardous waste sites, solid waste sites, large chemical plants and refineries, ground water sites, Superfund sites, and Brownfields

sites. These sites may be the result of historic or more recent spills. All site cleanups, and any contaminants that may be allowed to remain at these sites, must meet the human health risk-based clean-up standards established by state regulation so the properties can be safely used.

The environmental evaluation and/or remediation of these properties allows contaminated properties to be returned to active commerce while achieving the goal of natural resource preservation. For example, Brownfields are underutilized sites that are either contaminated or perceived to be contaminated. These sites are evaluated and/or cleaned up so that already developed properties can be safely reused, conserving undeveloped areas for other uses. Other sites are discovered during due diligence investigations prior to commercial sales transactions where money is being loaned by banks which require property assessments and some form of environmental "clearance" from LDEQ. The assessments completed under this activity often facilitate these commercial transactions and provide for the appropriate reuse of the property in question.

By cleaning up past contamination, the Remediation Services activity promotes the restoration and preservation of two of Louisiana's most important natural resources, land and ground water, for the continued benefit of Louisiana's economy and the use of future generations.

#### **Explain How This Activity Advances State Outcome Goal:**

The RS activity advances the restoration and preservation of Louisiana's natural resources through cleanup incentives, consistent application of risk-based cleanup standards, partnerships with government and other organizations at all levels, cooperation with innovative cleanup technology markets, and public outreach through workshops and conferences. Partnerships with the U.S. Environmental Protection Agency (EPA) and Dept of Defense and collaboration with state and local agencies are well established for specific programs and projects. These strategies provide the basis for promotion and enhancement of property restoration for reuse and redevelopment, and for assistance in improving the state's economic climate. Since FY 01-02 the RS activity has restored and closed out 691 sites. Without the RS activity, contaminated properties would remain uncontrolled threats to human health, and would lead to environmental deterioration and declining property values.

RS activity internal processes and regulatory requirements are frequently reviewed and updated as technologies advance. All RS site work is tracked electronically, and a federally funded system upgrade is currently underway.

The RS activity outsources its site assessment, investigation and cleanup work, as well as lab analysis.

The statutorily dedicated Hazardous Waste Site Cleanup Fund is matched (10%) with EPA funding (90%) for Superfund site cleanups and contaminant source removals. EPA Brownfields funds (100% federal) and RS staff technical assistance is leveraged with non-profit and local government funding statewide. These RS programs include Brownfields site assessments, cleanup cooperative agreements, oversight cost waivers, and loans through the revolving loan fund, with the common objective of property cleanup and restoration for redevelopment. According to EPA, for \$63.3 million awarded within Region 6 for Brownfields grants, 14,300 jobs have been leveraged, with an economic benefit of \$2.5 billion.

#### **Evidence:**

The progression and success of the RS activity is documented in annual reports to the LA Legislature. Over the last 8 years, the RS activity has restored and closed out 691 sites statewide. This includes every type of site within the RS site universe. Site complexity varies by orders of magnitude – from drum removal in a remote location – to dozens of separate contaminated areas within a multi-hundred-acre active hazardous waste facility – to a multi-acre Superfund site near a populated suburb, requiring treatment of millions of gallons of contaminated ground water. Fiscal Year/Sites Closed Out: 01-02/48, 02-03/50, 03-04/98, 04-05/70, 05-06/95, 06-07/85, 07-08/129, 08-09/116, 09-10/115.

The rate of success of the RS activity is influenced by the degree of cooperation of parties responsible for contaminated sites. Participants in the Voluntary Cleanup Program (VRP) who clean up properties to risk-based standards receive a Certificate of Completion and are released from further liability under state law from past contamination, which effectively allows potential buyers to acquire and remediate Brownfields properties without fear of state superfund liability. The VRP has resulted in restoration of 51 such properties in Louisiana. Growth to municipal tax bases, creation of new businesses and jobs, and increases in property values are all benefits of Brownfields redevelopment, while also contributing to smart growth by minimizing environmental impact and preserving natural resources.

Additionally, the RS activity has consistently employed its statutory authority to recover costs from responsible parties for state expenses, including LDEQ staff oversight and contracted site work. Cumulatively, the RS activity has recovered \$1,893,662 from responsible parties for reimbursement to the state.

In recent years, property assessments required for commercial transactions funded by lending institutions have contributed to the number of sites evaluated and closed out within the RS site universe. However, economic decline, combined with loss of staff positions due to attrition and budget freezes, have contributed to the most recent downward trend in RS activity. Therefore, the RS activity proposes 105 sites restored and closed out for FY 10-11. Regardless, the LDEQ RS activity will strive to continue performing at the highest level despite loss of staff and funding.

**Activity ID:** 209  
**Activity Name:**  
 Enforcement  
**Department:** 13 Department of Environmental Quality  
**Agency:** 851 Office of Environmental Compliance  
**Program:** 1000 Environmental Compliance  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

A decrease in funding will likely result in reduced issuance of timely enforcement actions and collection of penalties which could result in detrimental impact to environmental media. An increase in funding would allow for greater efficiency in implementing the enforcement process statewide.

**Activity Type:** Existing

**Objective:**

To increase compliance with environmental laws and regulations statewide by implementing a comprehensive enforcement process including regulatory awareness in FY2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9765	Key	Percent of Enforcement Actions addressed within the prescribed timelines	79	72	93	80	80
23143	Key	Sanitary Wastewater Assistance Training Compliance School	0	0	0	90	70

**Narrative:**

Enforcement strives to ensure that the government, the private sector, and the public comply with federal and Louisiana laws designed to protect human health and the environment and sustain the environmental resources of the state. Enforcement works to achieve this goal by : 1) comprehensive review of inspection reports generated during inspections; 2) assign accountability to violators; 3) issue timely and appropriate enforcement actions designed to effectively obtain compliance; 4) assess and collect penalties issued to violators of state and federal environmental laws and regulations; 5) maintain environmental compliance databases; 6) provide regulatory expertise in the negotiation, litigation, and settlement of cases; and 7) provide awareness of environmental compliance. Priority is given to cases posing the greatest risk to human health or environmental resources in order to ensure prompt mitigation of any damages caused by the noncompliance.

**Explain How This Activity Advances State Outcome Goal:**

Advancement of Natural Resources Goal: By ensuring compliance with the state's environmental laws and regulations through an effective enforcement program, the Enforcement Division supports and contributes to a healthy environment and the use of renewable resources. The yearly compliance schools conducted through the state enhance awareness and knowledge of environmental laws and regulations for the public and the regulated community. The Enforcement Division minimizes the use of state resources in the remediation of environmental damages through proactive enforcement of the state's environmental regulations. The promotion of beneficial environmental projects as a component of settlement agreements provides project opportunities for: public health; pollution prevention or reduction; environmental restoration and protection; and educational programs. These are

projects which the facility is not otherwise legally required to perform.

**Evidence:**

From 2006 to August 2009, the Enforcement Division issued over 8,000 enforcement actions and fines totaling approximately 3 million dollars. From 2006 to 2008, the Enforcement Division also conducted 67 compliance schools with a total of 1,414 attendees. During this same time period, the Enforcement Division instituted initiatives to handle unauthorized dumping in the New Orleans East/Almonaster area and non-permitted water discharges in the Bayou LaFourche area. Over 135 actions were issued for the Almonaster initiative and 287 informal actions and 33 formal actions were issued or will be issued for the Bayou LaFourche initiative. Settlements finalized during 2006 through 2008 contained 22 Beneficial Environmental Projects were initiated by the non-compliant companies with an expenditure of over 7 million dollars.

**Activity ID:** 211

**Activity Name:**  
Air Permits

**Department:** 13 Department of Environmental Quality

**Agency:** 852 Office of Environmental Services

**Program:** 1000 Environmental Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

In general, permit processing rates are directly proportional to the number of permit writers within the division. Approximately 98.5% of the Air Permits Division's budget is attributed to salaries, related benefits, and building rent. More funding would allow for an increased permit processing rate; less funding will result in a lower rate of permit processing.

**Activity Type:** Existing

**Objective:**

The Air Permits Division protects Louisiana's air quality by providing high quality technical evaluations of air permit applications and taking final action on 90% of applications received for new facilities and substantial modifications within established timeframes (i.e., 300 processing days).

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23144	Key	Percent of air permit applications received for new facilities and substantial modifications where final action has been taken	88	87	88	86	90

**Narrative:**

The Air Permits Division (APD) maintains and protects Louisiana's environment and natural resources by conducting comprehensive technical evaluations of incoming air permit applications and by preparing air permits that are protective of human health and the environment. Permits must be compliant with the Clean Air Act (CAA) and the Louisiana Environmental Quality Act; accurately reflect all applicable laws and regulations; ensure compliance with federal and state air quality standards; and contain testing, monitoring, recordkeeping, and reporting requirements sufficient to assure compliance with the terms and conditions of the permit. Permit decisions are based on sound, comprehensive information that is scientifically and economically supported.

Louisiana has been delegated by U.S. Environmental Protection Agency (EPA) to implement the air permitting program established by Title V of the CAA. Other federal requirements implemented by the APD include the Prevention of Significant Deterioration program, the Nonattainment New Source Review program, and the permitting aspects of the Acid Rain Program and the Clean Air Interstate Rule.

The APD also processes applications for other actions such as administrative amendments, authorizations to construct, changes of tank service, exemptions to test, variances, Emission Reduction Credits, and issues applicability determinations and other letters of response.

While EPA retains oversight of the APD's Part 70 Operating Permits Program, no activities duplicate or overlap with

those of federal government or another state agency. Nor are APD's services available elsewhere in the public sector or in the private sector.

The Department of Environmental Quality (LDEQ) has been given jurisdiction over matters affecting the regulation of the environment within the state, including the regulation of air quality (R.S. 30:2011(A)(1)). Essentially all activities of the APD stem from statutory mandates, specifically R.S. 30:2054 and R.S. 30:2060.

**Explain How This Activity Advances State Outcome Goal:**

The Air Permits Division (APD) primarily supports the Governor's statewide goals related to Natural Resources. However, the Louisiana Constitution does not establish environmental protection as an exclusive goal, but requires a balancing process in which environmental costs and benefits must be given full and careful consideration along with economic, social and other factors.

APD functions to ensure that the impacts to air quality associated with a proposed project have been minimized or avoided to the maximum extent possible and that the social and economic benefits of the project greatly outweigh its adverse environmental impacts.

The APD also seeks to foster a consistent regulatory regime and legal climate. APD routinely receives feedback from permit applicants suggesting that predictability allows companies to engage in sound business planning and strategic investments. Specifically, the regulated community needs to know what the rules are and how they apply to their proposed projects.

To that end, APD strives to streamline the permit application and review process via, for example, the more frequent use of general permits and regulatory permits. Both general permits and regulatory permits provide a standard approach for the covered activities, thereby leveling the playing field and ensuring a "no surprises" permitting environment.

The APD also promotes innovation through investment in technology and e-business. The APD has, in conjunction with staff in the Information Services Division, initiated development of a functionality which will allow an applicant to apply for an air permit online.

APD is also supported in part by funding from the federal government.

**Evidence:**

In order to streamline the application process, LDEQ promulgated the following regulatory permits (RPs) on March 20, 2009:

- Oil and Gas Well Testing
- Release of Natural Gas from Pipelines and Associated Equipment
- Emergency Engines
- Portable Air Curtain Incinerators

Another RP for Concrete Manufacturing Facilities is under development and should be proposed by the end of 2009.

A minor source general permit addressing the Surface Coating and Fabrication source category has recently been approved for public notice, and another for the Crude Oil and Natural Gas Production sector should be noticed in October 2009.

Both general permits and regulatory permits provide a standard approach for the covered activities, again leveling the playing field and ensuring a "no surprises" permitting environment.

Through these and other streamlining efforts, the number of pending oil and gas applications decreased by 21% between July 1, 2008 and June 30, 2009; the number of backlogged Title V Renewal applications decreased by 33% during this same period.

Further, work continues on development of a functionality which will allow an applicant to apply for an air permit

online. The interface for the Oil and Gas Well Testing RP is in user testing, and the one for Release of Natural Gas from Pipelines and Associated Equipment RP is in the works.

On a large scale, air quality within the State of Louisiana, in general, is improving. For example, reported emissions of nitrogen oxides (NOX), carbon monoxide (CO), volatile organic compounds, and toxic air pollutants (TAP) have decreased substantially over the last ten years. Further, the Baton Rouge Nonattainment Area recently achieved compliance with both the 1-hour ozone National Ambient Air Quality Standard (NAAQS) of 0.12 part per million (ppm) and the 1997 8-hour ozone NAAQS of 0.80 ppm

**Activity ID:** 213

**Activity Name:**  
Waste Permits

**Department:** 13 Department of Environmental Quality

**Agency:** 852 Office of Environmental Services

**Program:** 1000 Environmental Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

More funding would expedite issuance of additional hazardous and solid waste permitting decisions. This would allow for greater coverage of currently unregulated and unpermitted facilities and inhibit illegal dumping and promiscuous dump sites. Less funding would adversely impact businesses' and local governments' decisions and negatively impact their economics. Additionally, less funding would adversely impact successful accomplishment of current goals, established standards, mandated federal, state and local objectives and operational plan requirements.

**Activity Type:** Existing

**Objective:**

To provide high quality technical evaluations of solid and hazardous waste permit applications and taking final action on 70% of applications received for new facilities, permit renewals and modifications, within established timeframes.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23146	Key	Percentage of waste applications received for new facilities and major modifications where final action has been taken	54	27	19	65	70

**Narrative:**

Louisiana has received authorization from the U.S. Environmental Protection Agency (EPA) for the administration of the solid and hazardous waste permitting programs. Through this authorization, the Waste Permits Division (WSTPD) performs comprehensive technical reviews of permit requests and regulatory determinations for generators, processors, and disposers of solid and hazardous waste. The WSTPD issues operating permits for hazardous waste treatment, storage, and/or disposal facilities. For solid waste, the WSTPD issues operating permits to municipal landfills, industrial landfills, construction and demolition debris landfills, surface impoundments, processing transfer stations, composting facilities, and separation, woodwaste processing facilities, and waste tire processors.

The WSTPD also supervises the proper closure of solid and hazardous waste management facilities. The WSTPD issues post-closure permits requiring monitoring of groundwater in the vicinity of closed landfills and surface impoundments.

Additionally, the WSTPD provides technical expertise and reviews groundwater monitoring reports, monitoring well installation and construction plans, assessment and corrective action monitoring reports and work plans, groundwater statistical evaluations, and plugging and abandonment of groundwater monitoring wells.

All permit applications and submittals are reviewed to ensure compliance with the Louisiana Environmental Quality Act and applicable local, state, and federal regulations. Permit decisions are based on sound scientific and economic principles, and are balanced to protect the natural resources of the state while providing an important benefit to the general public, municipalities, and industry for allowing waste to be handled in a manner that is protective of human health and the environment.

The WSTPD also reviews, processes, and responds to other requests such as solid waste beneficial reuse, one-time soil reuse, waste tire beneficial reuse, household hazardous waste collection events and facilities, local recycling collections, waste minimization plans, technical inquiries from the public, elected officials, and the regulated community.

Act 662 of the 2006 Regular Session of the Legislature enacted as LA R.S. 30:2413.1 and directed the LDEQ to develop and implement a comprehensive debris management plan for certain debris generated by natural disasters.

**Explain How This Activity Advances State Outcome Goal:**

The Waste Permits Division (WSTPD) supports the Governor's statewide goal related to natural resources. A goal of the Waste Permits program is to protect the environment by ensuring proper management and disposal of solid and hazardous wastes within the State. Under this program, solid wastes are managed and disposed according to strict federal EPA requirements and sound engineering practices.

The proper management of hazardous waste helps ensure that no new Superfund cleanup sites will be created. Hazardous waste may not be buried unless it is first treated to very stringent EPA land disposal standards, and then only in a specially engineered, double-lined landfill that is approved and permitted by the WSTPD. Hazardous waste may not be stored or treated except according to stringent EPA standards. Unsound practices such as dumping hazardous waste into unlined pits or waterbodies, or burning hazardous waste in incinerators not equipped with state-of-the-art pollution control equipment, are not permitted in this State.

The Waste Permitting program helps protect the land and groundwater resources of the State from pollution, and thus eliminates the potential threat to human health from such pollution.

LDEQ receives a special yearly grant from EPA under Section 3011 of the federal Resource Conservation and Recovery (RCRA) program to administer the hazardous waste permitting program.

The goal of the comprehensive debris management plan for debris generated by natural disasters is to reuse and recycle material in an environmentally beneficial manner and to divert debris from disposal in landfills to the maximum extent practical. As mandated by the Act, "Green and woody" debris must be reduced fifty percent by weight and volume. As a result debris management sites are approved by the LDEQ for staging, chipping, burning or other processing, and the amount of emergency debris is tracked.

**Evidence:**

1. By issuing solid and hazardous waste permits, the WSTPD ensures that facilities managing waste comply with all state and federal regulations and ensures that Louisiana's citizens and the environment are protected.
2. Recycling and reuse of solid waste is encouraged and allowed under the regulations. Hazardous waste facilities must have a Waste Minimization Plan that considers ways to reduce the amount and toxicity of the waste being generated.
3. Permitted solid and hazardous waste facilities are required to not only conduct clean-up activities of releases into soil and groundwater from the regulated units, but also conduct clean-up activities on a site-wide basis for all solid waste management units and areas of concern. In this regard, the LDEQ worked with the US Environmental Protection Agency (EPA) Region 6 to develop and implement permitting language that streamlined the remediation process and used a comprehensive risk-based approach.
4. Currently the WSTPD is working on developing general permits as well as site specific permits. Plans are to start generating permits using TEMPO, decreasing the number of notices of deficiency, eliminating the submittal of final copies of permit applications, and issuing permits with permit conditions.
5. LDEQ's comprehensive debris management plan has led to a coordinated and systematic approach to managing disaster generated debris. This resulted in over 90% of the total vegetative debris being diverted from Louisiana

landfills, far exceeding the reduction requirement of 50%.

6.LDEQ approved 308 emergency debris sites for use during the response to Hurricanes Gustav and Ike.

Additionally, in order to be proactive and plan for future disasters, LDEQ has initiated rulemaking and set up interim procedures for preapproving debris management sites. As of 10/1/09 LDEQ has received 177 requests for preapprovals in preparation for future events.

**Activity ID:** 216

**Activity Name:**  
Water Permits

**Department:** 13 Department of Environmental Quality

**Agency:** 852 Office of Environmental Services

**Program:** 1000 Environmental Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

More funding would facilitate issuance of additional Louisiana Pollutant Discharge Elimination System (LPDES) permitting decisions and also allow for greater coverage of currently unregulated and unpermitted facility and activity discharges. Less funding would adversely impact successful accomplishment of current goals, established standards, mandated objectives and operational plan requirements.

**Activity Type:** Existing

**Objective:**

To ensure statewide control and limitation of pollutant levels for the protection of Louisiana surface waters through the issuance of final water permit decisions, water quality certifications, and biosolids registration and management activities in FY 2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23145	Key	Percentage of water applications received for new facilities and substantial modifications where final action has been taken	90	87	88	86	86

**Narrative:**

Water Permits Division (WPD) was delegated by the Environmental Protection Agency (EPA) to implement the Louisiana Pollutant Discharge Elimination (LPDES) program. WPD is responsible for the issuance of LPDES water permits. Other responsibilities, not related to the LPDES program, include biosolids/sewage sludge permits and registrations, and Clean Water Act water quality certifications.

WPD is responsible for coordinating all water permitting and other related activities of the State's LPDES Program for approximately 12,000 permits. Water permits incorporate monitoring, record-keeping, and reporting requirements, to ensure that waters of the state of Louisiana meet all water quality standards, thus protecting human health and the environment. Point source entities which discharge pollutants into surface waters of the state of Louisiana must apply for and obtain a water discharge permit prior to any actual discharge.

WPD manages the water quality certification activities. These certifications are required for every United States Army Corps of Engineers permit which involves "discharge of fill material into the waters of the United States". The LDEQ 401 Water Quality Certification assures that all dredge and fill activity permitted under a 404 (type) permit will be protective of site specific water quality standards.

WPD oversees the regulation and permitting of all generators of sewage sludge and Biosolids for use or disposal. Additionally, the WPD manages the registration of sewage sludge haulers. This affects all domestic wastewater

treatment facilities; and selected industrial facilities. LDEQ's Permit Support Services Division processes and monitors administrative matters related to sewage sludge activities.

The Department of Environmental Quality (DEQ) has been given jurisdiction over matters affecting the regulation of the environment within the state, including the regulation of water quality, (La. R.S. 30:2001, et seq.).

**Explain How This Activity Advances State Outcome Goal:**

The WPD supports the Governor's statewide goals related to natural resources. A goal of the Clean Water Act (CWA) is to protect the environment by making every waterbody fishable and swimmable. Louisiana adds to this goal by assigning designated uses for every waterbody in the state. Uses include, not only being fishable and swimmable, but protection of drinking water, agriculture and Louisiana's shellfish, and outstanding natural resource waterbody (scenic stream). The Water Permits Division, through LPDES permits, water quality certifications, and biosolids oversight, controls and limits effluent pollutant levels to the regulated waters of the state of Louisiana. Water permits contain specific scientifically based limitations and requirements which ensure that the designated uses are achieved and maintained. When approved, Water Quality Certifications verify that there are negligible impacts on designated uses. By assisting in the maintenance of the designated uses of state waterbodies, WPD plays a crucial role in the contribution to a healthy environment, and affords protection to the citizens of the state and its visitors.

Controlled effluent discharges ensure sustainable, reusable and renewable resources to preserve Louisiana as a sportsman's paradise while balancing the need for economic development. The management of pollutant discharges versus coordination for expansion and growth is a challenge. LDEQ strives to allow our citizens to enjoy the unique character of the state's waterways, streams, and rivers (renewable and non renewable natural resources) consistent with appropriate stewardship while closely monitoring and controlling pollution. LDEQ strives for the preservation and conservation of the state's natural resources. These goals contribute to a strong and viable economy and an improved quality of life.

**Evidence:**

1. By issuing water discharge permits with specific limitations and requirements to qualified applicants, the state maintains a regulatory tool by which the state shall enforce the water quality regulations and ensure the protection of Louisiana's surface waters. Currently, there are approximately 12,000 permitted facilities in the state of Louisiana. Through permit requirements, facilities that are discharging levels of pollutants that are adversely impacting the surface waters of Louisiana are identified and addressed. Over the years, the Water Permits and Water Enforcement have coordinated to discover and address unauthorized discharges.
2. Through the implementation of LDEQ Total Maximum Daily Loads (TMDL) models into water permits, there have been numerous waterbodies which have been removed from the states list of impaired waterbodies (known as the 303(d) List). TMDLs are models that determine the maximum amount of a particular pollutant which may enter a waterbody without causing a water quality impact. The water permit is the tool that implements the results of the TMDL for direct discharges.
3. The WPD has been recognized by EPA Region 6 in its efforts to apply new standards into its water discharge permits. Specifically, LDEQ was the first Region 6 state to implement new Whole Effluent Toxicity requirements into permits. This revision addresses the overall growth and reproductive impacts of selected critical species rather than just the survival of a species.
4. The WPD has met or exceeded all its permit issuance goals set forth by the state and EPA for the past three years.
5. The WPD has developed memorandums of agreement with various agencies, including the Department of Wildlife and Fisheries (DWF), the State Historical Preservation Office (SHPO), the Department of Natural Resources (DNR) and the Department of Health & Hospitals (DHH) to ensure that crucial environmental issues are addressed across agency lines. The DWF, DNR, SHPO and DEQ communicate to ensure that all factors are considered with respect to endangered species and critical habitats. The DHH and DEQ communicate to address and resolve problems related to sewage treatment facilities, including biosolids.

6. To streamline the issuance of many LPDES permits, the WPD has developed several general permits. General permits are a single permit developed to cover many facilities which have similar wastewater types.

**Activity ID:** 225  
**Activity Name:**  
 Permit Support Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 852 Office of Environmental Services  
**Program:** 1000 Environmental Services  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Additional funding for permit support activities will result in quicker processing action, thereby allowing the Permits Divisions quicker response time to the public and the ability to meet permit issuance performance goals. In addition, additional funding for non permit support activities will result in quicker processing of these functions, thereby allowing quicker response time directly to the regulated community. Less funding will have a negative impact on response time to the public.

**Activity Type:** Existing

**Objective:**

To administratively process 86% of complete permit applications, registrations, notifications, and accreditations within established business timelines.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Process permit applications, accreditation applications, registrations, and notifications within established timelines.	0	0	0	0	86

**Narrative:**

Permit Support Services Division consists of 2 Sections: Permit Support Section (PSS) and Notifications and Accreditations Section (NAS).

PSS provides administrative services to the media permit divisions in processing applications and issuing permits within statutory and regulatory timelines.

Permits Application Administrative Review (PAAR) Group receives and analyzes all incoming documents for OES to ensure proper placement into the LDEQ's Electronic data management system (EDMS). PAAR conducts all initial administrative reviews, creates permitting records in TEMPO (Tools for Environmental Management Protection Organizations), and ensures that all permit fees received are properly handled.

Public Participation Group (PPG) ensures that permits generated by OES are properly public noticed as required by state/federal regulation. The group also organizes and conducts all public hearings for OES.

TEMPO Support Group (TSG) manages LDEQ's database, TEMPO, used by permits, surveillance, enforcement divisions, and fiscal staff to perform many of their duties. TSG converts federal and state regulations into standard database language for use in permits, surveillance checklists, and enforcement documents.

NAS issues multi media accreditations, notifications, and registrations.

Waste, Accreditations, and Reporting (WAR) registers Solid Waste (SW) Generators and Transporters, Sewage Sludge Haulers, conducts certification testing for SW Operators; and maintains information on Annual Hazardous Waste (HW) Reports submitted by Large Quantity Generators and Treatment, Storage, and Disposal facilities (TSDs), in the Resource Conservation and Recovery Act Information database.

WAR oversees asbestos and lead training of providers to ensure citizens working to remove asbestos and lead are

properly trained; verifies training and qualifications ensuring proper work practice controls to protect the public from exposure.

WAR also reviews Asbestos Management Plans for schools and State buildings to ensure safety of children and adults learning and working in these buildings; reviews project notifications to ensure contractors are licensed, approved transporters, landfills and manifests are used to track waste.

Louisiana Environmental Laboratory Accreditation Program (LELAP) accredits and audits commercial laboratories to confirm approved methods and quality to ensure accuracy, precision, and reliability of data provided to LDEQ.

**Explain How This Activity Advances State Outcome Goal:**

The review of applications, registrations and notifications by PSSD staff are proactive measures which ensure compliance, provide for clean water, air, land and improved quality of life for people to live, work, and play in a healthy environment, and promote a sustainable tax base. All of these activities support the Natural Resources Statewide Outcome goal.

Partial federal funding is utilized for Hazardous Waste Biennial Reporting, public participation regarding permit actions, and administrative review of permits through the USEPA Performance Partnership Grant. In addition, the Asbestos grant from EPA also provides funds for asbestos accreditation, training provider and trainer recognition, and asbestos management plan review for schools. Both of these federal assistance grants require matching funds from LDEQ.

**Evidence:**

Louisiana is an attainment area for all federal National Ambient Air Quality Standards criteria pollutants, with the exception of ozone in the five parish area that includes the city of Baton Rouge. Attainment status with criteria pollutants is a requirement of the federal government, and federal sanctions are levied against states that cannot meet the federal goals. By providing administrative support to the Air Permits Division, the Permit Support (PS) Section has contributed to overall accomplishments through the issuance of permits which limit the amount of pollutants emitted into the air, thereby protecting human health and the environment.

In the 2008 Louisiana Water Quality Inventory Integrated Report, LDEQ reports that Louisiana's water quality continued its gradual improvement between 2006 and 2008 in two important areas. For 2008, an additional 25 water bodies were assessed as fully supporting their designated use of primary contact recreation (PCR) or swimming. Six additional water bodies were found to be fully supporting their designated use of secondary contact recreation (SCR) or boating. This means that approximately 83% of Louisiana's assessed water bodies were meeting PCR water quality criteria for fecal coliforms. Approximately 97% were meeting the SCR criteria, which is less stringent than the criteria for PCR. While some of these improvements could be attributed to improved ambient monitoring and assessment, much of the credit also goes to extensive efforts to reduce the release of sewage from municipal sewage treatment plants, home sewage systems and agriculture. The PS Section provides administrative support to the Water Permits Division contributing to overall accomplishments through the issuance of permits which limit the amount of pollutants emitted into the state's water bodies thereby protecting human health and the environment.

The processing of applications and notifications by the Notifications and Accreditations Section ensures that qualified and trained applicants are working to properly remove and dispose of asbestos, lead, solid waste, hazardous waste, and sewage sludge, and manage the proper disposal of such wastes. Using these management tools reduces the illegal discharge and disposal of asbestos, lead, solid, hazardous, and sewage wastes thereby protecting human health and the environment.

**Activity ID:** 266

**Activity Name:**  
Financial and Administrative Services

**Department:** 13 Department of Environmental Quality

**Agency:** 855 Office of Management and Finance

**Program:** 1000 Support Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Less Funding: Probable missed deadlines, delays in providing information to LDEQ Management, Data quality impact, and Customer Service impact.

More Funding: Data quality improved, better customer service, higher quality of service to LDEQ Management & LDEQ employees.

**Activity Type:** Existing

**Objective:**

To facilitate the Financial and Administrative means for the departmental programs to achieve their mandated objectives by providing 100% of the required and necessary business services annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6939	Key	Percentage of completed business transactions.	97	100	97	100	100
6940	Key	Number of repeat audit findings by legislative auditors.	0	0	0	0	0

**Narrative:**

The Financial and Administrative Services activity includes Budget & Expenditure Reporting, Accounts Payable, Employee Travel Reimbursements, Billing & Data Management, Accounts Receivable, Funds Management, Grant Processing and Expenditure Reporting, Revolving Loan Financial Processing and Reporting, Contract Processing and Management, Procurement, Property Control, Fleet Maintenance & Reporting, General Services Support, Employee Safety & Training, Motor Fuel Trust Fund Reimbursement Processing, and Waste Tire Data Processing.

**Explain How This Activity Advances State Outcome Goal:**

The Financial and Administrative Services activity provides the financial information and the tools necessary by the department’s decision makers to make the best decisions in operating the department’s programs in support of conserving, restoring, and preserving our natural resources. The services provided by this activity ensure that the information and services provided comply with all state and Federal laws, and also in complies with department and state policies and procedures. This activity also supports the efforts towards providing transparency and accountability, in that it prepares, analyzes, compiles, and processes the data for the activities within the LDEQ and submits the data to the Control Agencies. This ensures that taxpayer dollars are well spent and that the information provided is accurate and reliable.

**Evidence:**

The processes, data, and results this activity produces are audited annually by the Legislative Auditor, the department’s internal audit section, and occasionally by Federal review teams. In recent years, there have been no reported findings by these groups that would indicate that the information provided has not been complete and

accurate.

During FY 2009, LDEQ streamlined motor fleet operations by reducing the overall fleet size by 10%.

In FY 2009 LDEQ realized a savings of \$894,000 by reducing acquisitions, closure of the Mandeville office and no new vehicle purchases. In FY 2010 LDEQ will realize a savings of \$3.2 million by reducing acquisitions, professional services, closure of the Mandeville office, no new vehicle purchases, and a reduction in operating automotive supplies due to the previous streamlining efforts.

**Activity ID:** 264  
**Activity Name:**  
Information Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 855 Office of Management and Finance  
**Program:** 1000 Support Services  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Demand for services such as application development, etc. always exceeds available resources, therefore prioritization must occur based on the available resources (people, time and money). While this prioritization need applies to other IT services as well, there is a point where reductions in funding would reduce services to the point of ineffectiveness in meeting minimum demands.

**Activity Type:** Existing

**Objective:**

To provide technical tools, expertise and service for data collection, information management and decision support to aid the Department in fulfilling its mission 100% of during FY 2010-11.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23152	Key	Percent of departmental information technology transactions completed	0	0	0	100	100
23153	Key	Percent of public records requests completed	0	0	0	100	100

**Narrative:**

Major services provided include:

1)Software Application Development:

- Support of existing applications & systems;
- Development of new applications, systems required by LDEQ;
- Application standards and policies;
- Testing

2)Geographic Information Systems provides:

- Mapping services to the agency and public to geographically display data layers of information to aid in research and decision making.

3)Technical Support provides:

- Support services to 940 LDEQ clients at Galvez headquarters & 8 regional offices
- Support for more than 70 servers running Windows & Linux operating systems in the Galvez building and at the ISB.

4)Helpline provides:

- A central Helpline service to LDEQ users to call for technical support;
- Client support so that installations, upgrades and patches are applied in a timely manner to all client machines

5)eBusiness Services provides:

- Architecture and application framework for LDEQ's intranet and public eBusiness Applications, Web Content Management System, internal web services, and the public web portal.

6)Forensics and communications

-Provides expert support in computer forensics and data recovery,

-Coordinates department IT purchases;

7)Disaster Recovery:

-Develops, coordinates, manages and maintains the Agency's overall disaster recovery planning

8)Records Management (Mostly Outsourced on 3 yr contract):

-Operates Public Records Centers at LDEQ HQ and regional offices,

-Document imaging and management of the Electronic Document Management System (EDMS) which house 45million + pages of public records

-Trains on records management policies and procedures.

9)Customer Service Center (Mostly staffed by part-time Grad Students):

-Focal point for all incoming inquiries to DEQ (about 1150 per month).

### **Explain How This Activity Advances State Outcome Goal:**

The Information Services activity provides the computer technology the department employees need in support of the department's overall mission and goal of conserving, restoring, and preserving our natural resources.

Information Services provides technical support, software support, query tools, and adequate data storage necessary so that both the department staff and the public have available the information necessary to allow for better decision making regarding the environment.

Additionally, as part of streamlining the department's operations, LDEQ is in the process of ceasing operations of its library. This streamlining effort will save \$270,000 annually, \$149,000 of which is rental space.

### **Evidence:**

LDEQ IS meets the needs of the public and fulfills State goals through:

IS/Technology Initiatives

- ePayment web based system allows the regulated community to pay annual monitoring fees online via credit card or electronic bank draft saving them and LDEQ time and money

- Net-DMR enables industry to submit their discharge monitoring reports via the internet instead of paper forms; this saves time and eliminates errors.

- ePermits will enable certain permit applications via the internet

Diversified Economic Growth

- 153 Online Stack Test Schedule's submitted / yr

- 74 Online Registrations for Enviro-School processed/yr

- Easy online processing of Permit Applications (in progress) and fee payments

General Performance Data

- Fulfills more than 32,000 IS requests for services per year with a 100% performance measure each quarter

- Records Management Team selected as first runner up in ARMA International's "Cobalt Award" for Excellence in Records Management Systems and Processes recognizing it as world class.

- 3700 Helpline Calls resolved / yr

- 1000+ attend 80+ IS "Tech Talks" /yr

Natural Resources / Public Safety

- Databases that house 1-2 Billion environmental records for 150,000+ regulated facilities

- 1715 Incident Reports submitted online by public/yr

Transparent, Accountable, and Effective Gov.

- About 1150 Customer Service Center info requests successfully processed/month,

- 1900+ public records request fulfilled/yr for more than 68,000 pages,

- 29,245,043 Public web site hits/yr,

- 3400+ registered public users of our online EDMS system access 5 Million public documents and more than 45 million pages.

**Activity ID:** 238

**Activity Name:**  
Underground Storage Tanks

**Department:** 13 Department of Environmental Quality

**Agency:** 853 Office of Environmental Assessment

**Program:** 1000 Environmental Assessment

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

The number of Underground Storage Tanks inspected and the number of contaminated sites remediated is directly proportional to the funds provided to the program.

**Activity Type:** Existing

**Objective:**

To ensure the integrity of and remediate, as needed, the registered Underground Storage Tank (UST) systems by inspecting 20% of the UST sites in FY 2010-11.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3694	Key	Percent of registered underground storage tank sites inspected.	21	20	13	20	20
23149	Key	Number of UST incidents closed	0	0	0	250	250

**Narrative:**

There are approximately 12,300 UST's (underground storage tanks) at 4500 fuel stations in Louisiana. At a given point in time, over 920 of these sites are undergoing some form of assessment and/or remediation from leaks in the UST's and associated piping. Many of these are in highly populated areas. When that happens, citizens and their property are adversely affected in a variety of ways. Groundwater becomes contaminated. Vapors enter enclosed structures, such as inhabited buildings, and utility lines, such as sewers, electrical, and phone lines. Fuel can discharge into surface waters. Aside from the public health impacts, this contamination adversely affects the property itself, restricting real estate transactions and limiting commerce. The UST program exists to assure that fuel does not leak from the underground storage tanks and associated piping into the environment or, if it does, that it is detected quickly and remediated in such fashion as to be protective of human health and the environment. As required by the Federal Energy Act of 2005, all tanks must be inspected at least once every three years. Regulations require that these facilities be constructed, operated, and monitored to minimize leaks, as well as leak discovery time in the event that leaks occur. Our inspectors seek to assure that these facilities are in compliance. In the event that spills occur, UST agents utilize various assessment and remedial action tools to assure that the sites are ultimately cleaned to levels protective of human health and the environment.

**Explain How This Activity Advances State Outcome Goal:**

The UST activity supports the Natural Resources statewide goal by minimizing the incident and impact of spilled or leaked fuel on the environment. This protects groundwater, surface water, fish, wildlife, air, and soil. From a public health standpoint, this prevents and minimizes human exposure to these contaminants. In the event of a spill, steps are taken to assure that the nature and extent of the leak is assessed, monitored, and remediated, when necessary. Remediation standards are developed from an existing state regulation called Risk

Evaluation/Corrective Action Program (RECAP). This regulation is a scientific health-based tool that has been developed over a long period of time in conjunction with other states, agencies, and the federal government. Once the facility is determined to be in compliance with those standards, the Department issues a "No Further Action (NFA)" determination. This document declares that the property is safe for use and is often utilized in property transfers. This allows the property to be actively utilized in commerce, creating all types of investment opportunities. This remediation is often funded by the Motor Fuel Trust Fund, which is funded by fuel sales and fuel station owners.

**Evidence:**

The UST program was delegated to the Department of Environmental Quality (LDEQ) by the Environmental Protection Agency (EPA) in 1992. The Division was eliminated during re-engineering in 2000 and the tasks performed by other divisions. However, at the urging of the legislature and the regulated community, the Division was re-instated in January, 2007. In the last three years UST inspectors have conducted 2558 inspections. LDEQ staff conducts approximately 800 of these inspections per year at a cost of \$325 per inspection. The recent passage of the Energy Act now requires us to inspect each station every three years, or approximately 1500 per year. As a result, we contract out approximately 700 inspections per year at a cost of \$196,700 (\$275/inspection) per year. Under state bid law, we will be required to put this contract back out for bid in FY11. The average bid (without the lowest and the highest) in FY08 was \$875/inspection. This includes only the initial physical inspection of the site, LDEQ is required to complete the rest of the process which may include civil enforcement and fiscal office personnel. In addition, UST specialists have closed out and/or cleaned up 809 sites. The numbers of inspections and cleanups have consistently risen for the last three years. It is clear from history that tanks and piping will leak into the environment over time regardless of the safeguards undertaken. When that occurs, it is important that the appropriate response be taken in a timely manner in order to protect human health and the environment, as well as to facilitate commerce and real estate transactions.

**Objective:**

To process 95% of analyses within specified holding times and meet quality control requirements to provide timely, accurate and cost effective analyses of environmental samples collected by the Department of Environmental Quality.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9776	Key	Percent of analyses processed within specified holding times and meeting quality control requirements	98	98	98	95	0

**Narrative:**

N/A. The Department of Environmental Quality is planning to outsource this activity for FY2011. At 10/5/09 the draft on this activity contains a dollar value request. When the final version is submitted, the request for this activity will be zero and proper placement of the request for the outsourced services will have been made.

**Explain How This Activity Advances State Outcome Goal:**

Outsource the LDEQ Laboratory Services Division. (savings assumes DHH takeover of facility; \$1.5m is rent alone) There are currently three requests for proposals (RFP) at DOA concerning the outsourcing of air, water and soil laboratory services. LDEQ commissioned Astrix Technology Group in early 2008 to conduct a laboratory cost-benefit analysis to determine the operational efficiency of the LDEQ Laboratory Services Division (LSD) housed in the LDEQ Laboratory at 1209 Leesville Avenue, Baton Rouge, Louisiana. The Study was designed to evaluate the financial health of the LSD. The evaluation was focused on developing an income statement using the number and type of tests conducted. FY08 income statement revealed losses in excess of \$3 million while costs of outsourcing all analytical testing would have been about \$2.2 million. Therefore, LDEQ chose to attempt to outsource all analytical testing utilizing the RFP process.

LDEQ is also in the process of relinquishing the laboratory facility to the Department of Health and Hospitals (DHH). This alone will save the DEQ about \$1.5 million in rental charges. Personnel will be allocated to core functions of the department such as permitting and water quality.

**Evidence:**

**Activity Name:**  
 Air Quality Assessment  
**Department:** 13 Department of Environmental Quality  
**Agency:** 853 Office of Environmental Assessment  
**Program:** 1000 Environmental Assessment  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Increased funding /staffing could shorten permit modeling review times and provide for increased ambient monitoring. Likewise, decreases in funding will provide for fewer outreach visits, discontinuance of some ambient monitoring sites, and extending the time required to conduct modeling reviews.

**Activity Type:** Existing

**Objective:**

To maintain and improve Louisiana's air quality statewide by fulfilling federal mandates of the Clean Air Act. This is accomplished by maintaining a comprehensive statewide air monitoring program, conducting timely air quality planning and making scientifically valid data assessments.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23150	Key	Percent data capture from ambient monitoring equipment measuring criteria pollutants	92	85	0	90	90
23151	Key	Percent of emissions inventory data available to public via website	85	80	0	96	96
New	Key	Percent of air modeling reviews completed within two weeks of receipt	0	0	0	0	90

**Narrative:**

The Air Quality Assessment Division (AQAD) provides an efficient means to develop and implement environmental regulations; maintains an accurate emissions inventory; and continuously monitors emissions. We operate and maintain a statewide ambient air monitoring network, and provide quality assurance checks on the data produced to determine compliance with requirements of the National Ambient Air Quality Standards (NAAQS). Staff evaluates trend changes in air quality throughout the state. The division maintains the Mobile Air Monitoring Lab - a self-contained mobile laboratory capable of real-time sampling and analysis. We review and perform air quality modeling for air permits and enforcement actions to ensure that emissions from permitted facilities will not cause a violation of air quality standards. The AQAD conducts the state's stack testing program; this ensures that industrial sources of air pollution are operating in compliance within permitted and regulatory limits.

The AQAD is responsible for developing and maintaining Louisiana's State Implementation Plan (SIP), which outlines control strategies to deal with pollution for areas that fail to achieve a federally mandated standard. The AQAD is responsible for developing comprehensive criteria and toxic pollutant emissions inventories for Louisiana and which are reported to EPA. The staff works closely with the regulated community, trade groups, and other state and federal agencies to develop and maintain high quality and current emissions data. The data is used in air modeling demonstrations, developing effective rules and regulations, "reasonable further progress" submittals

(demonstrating emission reductions in ozone nonattainment areas) to EPA, and modeling demonstrations for air permit applications. The AQAD also develops and oversees the federally mandated vehicle Inspection and Maintenance program for areas like Baton Rouge that are not attaining the federal ozone standard.

**Explain How This Activity Advances State Outcome Goal:**

The Air Quality Assessment Division supports the state's goal of natural resource preservation in several ways. Air quality is measured by comparison against EPA primary standards designed to protect public health, and secondary standards which protect public welfare. The AQAD implements this federally mandated program through developing air pollution control strategies. SIPs play a key role in attaining good air quality and protecting citizens' health. Strategy development is supported by data collected from statewide monitoring network as well as comprehensive emissions inventory. Having reliable and accurate emissions inventory is vital to determining where potential air quality issues may exist and which sources may contribute to the problem. The program has two main purposes: A) to implement control strategies that result in realized emissions reductions with the goal of maintaining attainment of the air quality standards (this helps future economic and infrastructure development); and B) to educate citizens of the state about air quality and provide up-to-date, accurate air quality data. This is done through providing daily air quality forecasts during summertime ozone season, and using the EnviroFlash messaging to home computers and wireless devices. The AQAD works in conjunction with the LDEQ public information section to broadcast ozone action day alerts and notices about exceedances of standards when necessary. This program is funded partially through federal grant monies (EPA Performance Partnership Grant Agreement) and through the environmental trust fund using fees collected through the emissions inventory system. The Inspection Maintenance program performs emission inspections on motor vehicles within the ozone nonattainment area. AQAD provides air modeling and emissions equipment testing support to permitting and enforcement section staff to ensure that industries comply with air pollution control strategies.

**Evidence:**

In 1978 there were 20 parishes listed as nonattainment for the ozone standard. As of 12/31/2008, based on monitoring data, all 64 parishes in Louisiana were in attainment with the 1997 8-hour ozone standard. Since 1995, LDEQ has successfully reduced pollutants released into the air accordingly: Volatile Organic Compounds (VOC) by 51%; Oxides of Nitrogen (NOx) by 44% and Toxic Air Pollutants (TAPs) by 54%. This was accomplished through urban airshed modeling and rulemaking joint efforts with the industrial and environmental community. In January 2009, the US EPA Region 6 recognized the state's achievements in improving air quality by presenting LDEQ with a Clean Air Achievement Award.

**Other Accomplishments:**

Implemented online emissions inventory reporting through ERIC (Emissions Reporting & Inventory Center) System; attainment of the 1-hour and 1997 8-hour ozone standards, use of monitoring data to develop new control strategies including emission reductions from barges along the Mississippi River corridor as well as fugitive emissions coming from leaks in petrochemical facilities.

Tracking pollution in newly developed or growing urban areas, especially the Mandeville/Covington area after Hurricane Katrina; maintaining transportation conformity in nonattainment areas to secure federal funding of transportation development projects; more than 25 Ozone awareness meetings and presentations to introduce newly promulgated ozone standards to local governmental entities since fall 2008.

If a state fails to produce or implement an acceptable State Implementation Plan (SIP), EPA has the power to impose sanctions or penalties on that state, including elimination of Federal Highway Funds and setting more stringent pollution control measures. Additionally, the federal government can replace the SIP with a Federal Implementation Plan (FIP). Implementation of the FIP by EPA would be more onerous to Louisiana citizens and businesses, as EPA Region 6 (Dallas) would become the permitting and compliance authority.

**Activity ID:** 263  
**Activity Name:**  
 Human Resources  
**Department:** 13 Department of Environmental Quality  
**Agency:** 855 Office of Management and Finance  
**Program:** 1000 Support Services  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Less funding: Would result in the inability to provide the resources required to effectively recruit, hire, pay or maintain the human resources employed by the DEQ. More funding: Improved internal and external customer service, expansion of HR programs to effectively implement Civil Service rule changes and State and Federal Laws.

**Activity Type:** Existing

**Objective:**

To provide 100% of comprehensive Human Resource Management services for the LDEQ management and employees through the development and administration of HR policy and procedures.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6939	Key	Total number of completed business transactions.	97	100	97	100	100
6940	Key	Number of repeat audit findings by legislative auditors.	0	0	0	0	0

**Narrative:**

The Human Resources (HR) Division activities includes the following HR Management programs:

- Classification & Salary Administration
- Recruitment/Selection & Placement
- Organizational Development
- Employee Administration/Benefits
- Employee Relations/Discipline/Grievances
- Performance Management
- Drug Testing Program
- Employee Rewards & Recognition
- Affirmative Action & EEOC
- Workers Compensation/Unemployment Compensation
- American's with Disabilities Act
- Family & Medical Leave Act
- Fair Labor Standards Act

**Explain How This Activity Advances State Outcome Goal:**

The Human Resources activity administers it programs assuring compliance with State Civil Service rules, and state and Federal laws, in order for the department to fulfill its overall mission and goals through its employees. Human Resources program activities are consistently evaluated in response to changes from these entities or to changes in employment law; thus HR activities are not outdated and are an integral part of the department's mission.

**Evidence:**

HR activities are audited annually by the Legislative Auditors, Civil Service, and LDEQ Internal Auditors. In addition, HR conducts spot audits for compliance with HR policies. In recent years there have been no significant findings that would indicate that the information provided has not been complete and accurate. The DEQ HR Division has produced the necessary results required for a successful and comprehensive HR program. In addition, the HR Division has developed and implemented many programs which have had a positive impact on the organization and its employees resulting in a more effective organization, improved employee morale and increased retention.

**Activity ID:** 228  
**Activity Name:**  
 Water Quality Assessment  
**Department:** 13 Department of Environmental Quality  
**Agency:** 853 Office of Environmental Assessment  
**Program:** 1000 Environmental Assessment  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Increased funding increases the development of regulatory and non-regulatory strategies for water resource protection; decreased funding reduces the ability to generate protective strategies and increases risk of lawsuit for not complying with Clean Water Act requirements.

**Activity Type:** Existing

**Objective:**

The objective is to protect water resources statewide by setting standards, assessing water quality, developing protective regulated permit allocations, and enabling local activities that address unregulated pollution sources through proper stewardship of federal funds in FY2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
21512	Key	Cumulative percent of community water systems where risk to public health is minimized by source water protection.	40	38	0	47	50
23148	Key	Cumulative number of watersheds with initiated Watershed Implementation Plans for non-point source pollution minimization.	0	0	0	14	20
New	Key	Percent of water quality modeling documents finalized for public notice within 80 days of beginning the review process in support of permit limitations for point-source discharges.	0	0	0	0	75
New	Supporting	Percent of water data received that is evaluated for technical acceptability for criteria development or assessments within 120 days.	0	0	0	0	95

**Narrative:**

The water quality assessment activity includes water quality standards development, surface and ground water quality assessments, permit limit determinations, nonpoint source pollution control planning and implementation, community outreach and education, and investment in local organizations and governments.

Water quality standards are regulatory, numeric and narrative criteria established to protect Uses of State Waters. These include drinking water, recreation, and habitat for fish and shellfish. Water quality data, literature, modeling, and national, regional, state and local information are used to refine existing or develop new standards to protect

uses while not requiring unnecessary treatment costs for businesses, industries and municipalities. Water quality standards are the basis for water quality assessments, permit limits, ambient surveillance and enforcement, and pollution control strategies for unregulated pollution sources.

Water quality assessments are conducted using data and information collected by WQAD, Surveillance Division, other agencies and external sources. Data and information are compared to state surface water quality standards or national drinking water standards for ground water to determine if water bodies and aquifers are impaired. Water quality of state surface and ground waters is reported biennially in the Integrated Report to EPA; detailed aquifer assessments are reported triennially.

Permit limits for point sources (permitted, regulated) and nonpoint sources (unregulated) are developed using state-specific water quality standard targets, data, coefficients, and models. Water quality models are a tools used to determine what treatment levels may be required by permits and what load reductions for unregulated pollution sources will be restorative and protective of state waters.

Watershed implementation plans and drinking water protection programs are developed to manage unregulated pollution or impairment sources (non-point). Non-point sources can be associated with land use, including hydrologic modification, storm water runoff from agriculture, forestry and rural residential areas, and seepage from poorly functioning septic systems. Protection plans and programs are provided to stakeholders and local communities allowing organizations and citizens to plan environmental restoration and protection actions that are eligible for federal funding.

#### **Explain How This Activity Advances State Outcome Goal:**

This activity is directly involved with the protection and improvement of the water resources of the state through objective scientific evaluation of water quality and the development of regulatory and non-regulatory approaches to address impairments. Water resources are assessed for support of uses designated in federal law (Clean Water Act) and/or in state regulation (Louisiana Environmental Regulatory Code), namely primary and secondary contact recreation (swimming, wading, boating, etc.), fish and wildlife propagation (fishing, waterfowl hunting), drinking water supply, oyster harvest, agricultural irrigation, and as outstanding natural resources. Federal and state regulatory criteria are compared to water quality data and other information sources to assess support for these designated uses. Verification that the criteria are adequate descriptions of water quality necessary to support the designated uses is a rigorous and scientific process to ensure that agency regulatory (modeling for water discharge permit support) and non-regulatory (enabling local water resource protection activity) decisions are efficient and effective at protecting the resource.

This activity works directly with the Environmental Protection Agency (EPA) to further national and state level goals of natural resource protection. Funding derived from a portion of LPDES Permit fees, as authorized by Louisiana Revised Statute 30:2089, is used to support this activity and to leverage federal funding through CWA Section 319 and support federal grant utilization of other CWA sources. Sound stewardship of these state and federal funds allows the agency, through this activity, to enable actions of local citizens to develop non-regulatory water resource protection issues within their purview, as well as to develop and quantify strategies for regulatory control of LPDES permitted waste water discharges that are protective of water resources.

#### **Evidence:**

As published in the Louisiana Water Quality Integrated Report and associated predecessor documents from 2000 - 2008: the number of water bodies supporting the designated use of primary contact (i.e., swimming) increased from 62.7% to 82.9%; the number of water bodies supporting the designated use of secondary contact (i.e., boating) increased from 80.7% to 96.9%; and the number of water bodies supporting the designated use of fish and wildlife propagation increased from 17.8% to 30.5%. These assessments were conducted using large volumes of water data, as evidenced in FY 2009, where total volume of data evaluated was 82,690 records.

Outreach to local governments and citizenry for protection of drinking water resources is evidenced in the support for development of the cumulative number of 50 local ordinances, protecting 47% of the state's community water systems by FY 2010 end. Enhanced efforts to promote and enable local water resources protection activities were initiated in FY 2009 by establishing 9 Watershed Coordinators to serve as community organizers for voluntary water resource protection and as network weavers to link state and federal resource agencies with established community organizations.

Recent agreement (January, 2008) with EPA was reached to begin an important effort to verify dissolved oxygen criteria across the state that had been established nationally in the 1980s. Inappropriate dissolved oxygen criteria can result in very low discharge limits for municipal sewage treatment systems and unnecessarily burden sewer user by increasing fees they pay. In a resulting rule revision in March 2008, dissolved oxygen criteria in sixty (60) watersheds were changed to more accurately represent natural expectations of the resource. The impairment status of 20 watersheds then changed from "impaired" to "fully supporting", thereby preventing unnecessary permit limit restrictions in 15 water bodies, and providing data for revision to water quality models (and therefore, permit limit calculations) in 5 other water bodies. This will be applied in other areas of the state.

Water quality modeling provides information for the development of permits that are calculated to be protective of water resources. Since 1999, models have calculated permissible limits for waste water discharge permits on 90 impaired watersheds subsegments in the state.

**Activity ID:** 178  
**Activity Name:**  
 Legal Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Legal will endeavor to maintain its performance standards if funding is decreased. More funding resources would allow for greater efficiency in completing the performance requirements; less funding will reduce this efficiency.

**Activity Type:** Existing

**Objective:**

To respond to all (100%) legal challenges to Louisiana Department of Environmental Quality actions so that human health and the environment are protected without interruption, and to ensure compliance of all (100%) environmental regulatory operations with applicable laws and regulations.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9747	Key	Percent of referrals for which an initial legal review is provided within 30 business days of receipt	99.2	99	98	96	96
23142	Key	Percent of legally supported decisions sustained after challenge	0	0	0	95	95

**Narrative:**

The Legal Division provides advice, consultation, and representation to all offices of the Louisiana Department of Environmental Quality and is organized to provide attorneys with expertise and experience for every major type of environmental (and internal) action. Attorneys litigate corrective and compensatory actions to repair environmental damage, pursue environmental violators, collect penalties and fees owed to the department, and defend permit and other agency actions. They also routinely draft, review, and negotiate contracts, agreements, and settlements, and research and prepare legal opinions, reports, and other documentation to support agency decisions and actions.

**Explain How This Activity Advances State Outcome Goal:**

The Legal Division's activity aligns with the Natural Resources statewide goal by supporting the Louisiana Department of Environmental Quality (LDEQ) in protecting natural resources, human health, and the environment with consideration of economic development by prosecuting enforcement and collection actions and defending challenges to permit and other actions.

The Legal Division assists the agency in ensuring transparency, accountability, consistency, and ethical behavior are standard throughout its statewide departmental operations by observing and participating in management discussions and day to day operations, conducting legal risk analysis, and providing advice, consultation, training, and representation to the various offices of the LDEQ.

**Evidence:**

The evidence supporting this activity is based on past performance data for FY 09:

- Collection of \$ 1,420,346.42 in fees and penalties
- Court appearances 410
- Pleadings prepared 413
- Legal consultations 74,595
- Public hearings 52
- Cooperative and settlement agreements negotiated 102
- Ethics consultations 116
- Regulation packages prepared and reviewed 74
- Enforcement actions reviewed 1,272

Accountability legal services reports demonstrated a cost savings to the agency of \$ 617,822.58 in the fourth quarter of FY09, in comparison with the cost to the agency of the same services from outside counsel at current government contract rates.

**Activity ID:** 206

**Activity Name:**

Emergency and Radiological Services

**Department:** 13 Department of Environmental Quality

**Agency:** 851 Office of Environmental Compliance

**Program:** 1000 Environmental Compliance

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Increased funding allows for an increased capability and capacity to respond to public safety concerns. Less funding limits all aspects of the capacity to respond and protect human safety and the environment.

**Activity Type:** Existing

**Objective:**

To protect the general public's safety regarding the operation of nuclear power plants, the use of radiation sources and radiological and chemical emergencies statewide.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3672	Key	Percent of emergency planning objectives demonstrated	100	100	100	97	97
9767	Key	Percent of radioactive material applications for registration, licensing, and certification processed within 30 business days of receipt	100	100	100	97	97

**Narrative:**

Emergency and Radiological Services (ERSD) encompasses several very different functions. Radiation Services (RS) administers testing of radiographers that certify competency to safely and knowledgeably handle and utilize radioactive sources. In addition, RS registers licenses and inspects all radioactive sources in the state. These sources, found extensively in medical and industrial settings, are used for the treatment and identification of disease, to locate flaws in construction where conventional inspection means would be inadequate and in maintenance of the thousands of miles of pipelines throughout the state. Chemical Emergency Response (CER) conducts monitoring at incidents where chemicals have been released or have the potential to be released into the environment or to affect public health. CER reviews and monitors cleanup activities at incidents to ensure the protection of the environment and the safety of Louisiana's citizens. Chemical Accident Prevention (CAP) inspects specially designated facilities, which if involved in a catastrophic release, would affect a significant segment of a population with life-threatening chemical exposure. CAP inspections verify these facilities are conducting required maintenance, have sufficient response resources allocated, have trained personnel and up-to-date plans in place to protect the public in the event of a catastrophic release. Radiological Emergency Planning & Response (REP&R) plans, coordinates and implements training to meet Nuclear Regulatory Commission (NRC) requirements for three nuclear power plants. REP&R provides training to likely first responders that would come in contact with low level radiation shipments that routinely travel Interstate 20.

**Explain How This Activity Advances State Outcome Goal:**

The way in which the ERSD supports the Natural Resources goal is by:

1.Meeting the training goals set by the Nuclear Regulatory Commission (NRC) and evaluated by the Federal Emergency Management Agency (FEMA) ensure that three nuclear power plants continue to operate providing this state with a source of clean, sustainable energy with a relatively small impact on the environment.

2.Louisiana's oil, gas, and chemical industry needs to remain competitive in the world economy. To do so, it needs to utilize the most up-to-date industry practices and it requires trained individuals to use those resources. The availability of radiological sources and a trained workforce certified to safely use this technology are necessary for this industry to excel. The uncontrolled release or ill-advised locating of these tools, which could result in acute and chronic health problems or irreversibly damage the environment, is controlled by the registration, licensing and inspection of these sources.

3.Likewise emergency response activities accomplish three goals. First, the citizens are protected, often from dangers that cannot be detected with regular human senses. Second, the environment, once remediated, remains accessible by the public. Lastly, the financial stability of our industry is protected by having consistent regulatory standards apply for addressing spills and discharges across the state

**Evidence:**

- The Nuclear Regulatory Agency (NRC) conducted its performance review of the Integrated Materials Performance Evaluation Program (IMPEP) for Louisiana. Louisiana received the highest rating possible for its best practices regarding the implementation and demonstration of NRC radiation protection requirements.
- Louisiana's radiation license termination language has been adopted by the Nuclear Regulatory Commission for use at all facilities it regulates directly.
- Seven parishes, ten agencies and fifty personnel located along the I-20 corridor have been trained in radiological response Modular Emergency Response Radiological Transportation Training (MERRTT). This training addresses low-level radioactive materials routinely transported through the state on this interstate.
- Since 2005 nuclear plant operation exercises have been evaluated on 539 individual criteria that have the potential to harm human health or the environment. 537 of these criterion have been successfully demonstrated to the Federal Emergency Management Agency by ERSD.

**Activity ID:** 205  
**Activity Name:** Surveillance  
**Department:** 13 Department of Environmental Quality  
**Agency:** 851 Office of Environmental Compliance  
**Program:** 1000 Environmental Compliance  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Reduction would require a curtailment in essential functions – inspections, sampling, response to complaints & releases; increase would prevent lay-offs, return of frozen positions; ability to carry out legislative mandates.

**Activity Type:** Existing

**Objective:**

Surveillance will inspect regulated facilities related to air emissions, solid and hazardous waste, waste tires and water discharges, investigate complaints and spills, and sample water bodies to provide data needed to assess impaired streams to protect the environment and public health statewide.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9756	Key	Percent air facilities inspected	33	28	37	50	50
9757	Key	Percent TSD facilities inspected	47	50	42	50	50
6886	Key	Percent water major facilities inspected	48	50	99	50	50
9758	Key	Percent solid waste facilities inspected	65	70	66	65	70
9759	Key	Percent tire dealers inspected	20	20	19	20	20

**Narrative:**

The Surveillance activity includes mandated compliance inspections, incident and complaint investigations, and water sampling. The U.S. Environmental Protection Agency (EPA) authorized LDEQ to administer, implement, and enforce federal statutes for air, water and hazardous waste. Surveillance, through effective planning, uses an inspection strategy that requires in-depth inspections that focus on achieving meaningful environmental results that promote compliance statewide while also meeting the requirements of state and federal statutory mandates and funding commitments. Planning flexibility allows opportunities to inspect and evaluate unpermitted facilities, and when needed, provide compliance assistance to small and medium facilities to ensure they understand the requirements of environmental regulations. Incident and complaint investigations/inspections are initiated based on information received from citizens, required upset/release notifications and from other sources of information (such as sister agencies). Ambient water monitoring is conducted statewide under Clean Water Act requirements and policies to ensure there is adequate data to evaluate and set standards related to uses for specific water bodies (swimming, fishing, drinking water supplies). The data is used by the Water Quality Assessment Division to set standards, and the Department of Wildlife and Fisheries for habitat and aquatic propagation, and Department of Health and Hospitals Drinking Water program.

**Explain How This Activity Advances State Outcome Goal:**

Surveillance supports the Natural Resources Goal by carrying out its mandated activities, specifically the Surveillance activity core function is inspections of permitted and unpermitted facilities, complaints and releases related to facilities operations. Inspections are conducted to ensure compliance with federal and state regulations. Ensuring compliance protects the state's natural resources and promotes economic development by providing a level playing field for all regulated entities. LDEQ is authorized by both federal agencies and the Louisiana Legislature to conduct compliance activities. The division plans and implements annual inspections related to air, water and waste (solid and hazardous) emissions, discharges and storage/handling, using a compliance monitoring strategy (Act 217, 2003) to focus on operations that have potential for significant environmental impacts and to assist regulated entities with compliance. Field staff in 8 regional offices conducts compliance inspections, assist local businesses, government entities and citizens through compliance assistance visits, public forums, town meetings to address environmental issues to protect public health and conserve natural resources in their regions. LDEQ regional personnel work closely with their counterparts in other state agencies (DNR, DWF, DAF and DHH) to address local concerns timely and efficiently. The Surveillance mission is to operate in an open, fair, and consistent manner; to strive for and assist in attaining environmental compliance in the regulated community; to protect environmental resources and the public health and safety of the citizens of the State of Louisiana. Annual goals related to inspections, investigations and sampling have been consistently met or exceeded, except for the year of and following hurricanes Katrina and Rita [2005-2006]. Surveillance activities are funded by Environmental Trust Fund and federal grants (such as the EPA –LDEQ Performance Partnership Grant).

#### **Evidence:**

Surveillance consistently meets or exceeds its goals. Surveillance met or exceeded the goals the past 5 years (FY05 -FY09) set forth in the Compliance Monitoring Strategy for each media, except for FY06, the recovery period from significant impacts of hurricanes Katrina and Rita. During this period Surveillance was involved in response, facility assessments to determine environmental impacts, air and water ambient sampling efforts and oversight of debris removal and disposal. Surveillance in FY10 will continue to oversee and inspect activities related to Katrina-Rita. It is anticipated that most of the Katrina-Rita projects will be complete by the end of 2010.

Surveillance regional staff (108 field inspectors in 6 regional offices) each year conduct between 8,000 – 10,000 inspections, handle on average 8000 complaints and spills/releases, monitor 120 streams and lakes monthly, and also conduct investigations to address specific compliance issues.

Regional staff supports the LDEQ ER responders in the regions after-hours and on weekends, serving in an ER response rotation on weekends and when the ER staff is on leave.

Regional staff participate at local events related to environmental topics, serve on local committees to address environmental concerns, participate in LDEQ's frontloading efforts and Enviro-School.

Surveillance staff collaborates with DHH on sewage issues, with DNR on oil field issues, with LWF on fish kills, with LOSCO on oil spills, with GOSEP and LSP on hurricane preparedness, and with DAF on pesticide complaints that have off-site impact to natural resources. LDEQ is streamlining its mercury fish tissue sampling program to eliminate duplicative program elements performed by other agencies. These include: atmospheric deposition monitoring, mercury-related research, remediation of mercury manometer sites, and data evaluation. LDEQ anticipates a projected savings of \$255,000.

Presently, regional staff is completing oversight and assessments related to Gustav-Ike. In FY09 field staff conducted approx. 6500 assessments and sampling events related to Gustav-Ike impacts.

LDEQ and DAF are working together to allow LDEQ to lease office & warehouse space at a reduced rate from commercial space currently utilized by the department. There is an estimated \$70,000 annual savings to be realized by LDEQ. The departments are still pursuing other resource sharing endeavors.

**Activity ID:** 166  
**Activity Name:**  
Public Information  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

With more funding, we can print more brochures, buy more Public Service Announcements (PSA) time, contract with professional services to create properly formatted PSAs (radio and TV) to best explain to the public how to protect the environment. Less funding will diminish our ability inform the public on how to protect our environment.

**Activity Type:** Existing

**Objective:**

To communicate environmental awareness information statewide to the public through all media formats in FY2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23140	Key	Percentage of responses to media calls	0	0	0	100	100
New	Key	Number of newspaper mentions	2400	2400	24930	0	2400

**Narrative:**

The Louisiana Department of Environmental Quality's (LDEQ) Public Information Section sends press releases to the media to provide information to the public on environmental activities such as ozone action days, public meetings or issues that may impact the state or a certain area of the state. We answer media inquiries from reporters throughout the state (and some nationwide media, too) concerning environmental and LDEQ related issues. These range in a variety of questions that reporters may pose. We have also utilized federal grant money and from investment from LDEQ partners to create statewide public service announcements to promote keeping the environment clean. The Public Information Section also assists in promoting workshops geared to specific audiences. For example, in FY 2009 LDEQ held workshops for the oil and gas industry on how to protect the environment while conducting its everyday business. Also, LDEQ helped promote a sewage sludge workshop to help those in the sewage business understand recent rule and regulations changes.

**Explain How This Activity Advances State Outcome Goal:**

This activity is beneficial to Natural Resources because the information we provide helps the public, industry personnel, small business owners and elected officials, understand environmental issues better. We help promote, through the media, public service announcements, brochures and trade shows, the importance of people working together to Be The Solution on environmental issues. The ultimate goal is to have the campaign slogan "Be The Solution" come to symbolize the importance of everyone in Louisiana pitching in for environmental protection. The campaign is working in conjunction with our non point water section and EPA to promote the regionalization concept of environmental protection.

**Evidence:**

For the year fiscal year 2008-2009, LDEQ Public Information section released 133 press releases, had 2,493 newspaper clippings on stories where LDEQ was a source of information and answered 750 reporter calls. We began a statewide campaign, complete with billboards in all metropolitan areas in the state, radio ads statewide and commercials on every major broadcast TV station in the metropolitan areas, plus cable in Baton Rouge, New Orleans, Lafayette and Alexandria.

**Activity ID:** 169

**Activity Name:**

Business and Community Outreach

**Department:** 13 Department of Environmental Quality

**Agency:** 850 Office of the Secretary

**Program:** 1000 Administrative

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

The BCO will strive to maintain performance standards should reduced funding occur. More funds would allow for greater resources to assist more businesses and communities in achieving voluntary compliance with environmental regulations. Less funding would prevent an increased efficiency in this endeavor.

**Activity Type:** Existing

**Objective:**

To improve compliance among small businesses, municipalities/communities and non-governmental organizations by providing statewide educational outreach and technical assistance services in FY2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent of municipalities implementing planned wastewater improvements to ultimately ensure compliance with the federal Clean Water Act using the Municipal Facilities Revolving Loan Fund.	0	0	0	0	100
New	Key	Percent of EnviroSchool class participants who demonstrate comprehension of the core subject matter.	0	0	0	0	80
New	Key	Percent increase in Environmental Leadership program participants committed to voluntary pollution reduction beyond regulatory compliance.	0	0	0	0	50
9768	Key	Percent of responses to requests by small businesses, municipalities and non-governmental organizations for compliance assistance within 10 business days.	100	99	100	100	100
New	Key	Percent of responses by Ombudsman to complaints involving public participation and environmental justice within 5 business days.	0	0	0	0	100

**Narrative:**

The goal of the Business and Community Outreach Division (BCOD) is to serve as the outreach arm for the Louisiana Department of Environmental Quality (LDEQ) by providing educational outreach and technical assistance

to small businesses, municipalities/communities, nongovernmental organizations, schools and the public at large. Components of the division:

- The Municipal Facilities Revolving Loan Program provides financial assistance through low interest loans to finance eligible wastewater improvement projects, bringing them into compliance with federal Clean Water Act requirements to protect human health and environment and promote economic development. Statutory Mandate: Title VI, Clean Water Act, amended; LA Water Control Law RS 30:2078-2089.
- The Environmental Leadership Program is a voluntary partnership with businesses, municipalities, nongovernmental organizations, federal entities, schools and universities and community organizations to reduce pollution and promote a cleaner environment. Statutory Mandate: LA Environmental Regulatory Innovations Programs RS 30:2561-2566, LAC 33:3701-3715
- The Small Business/Small Community Assistance Program provides free technical assistance and outreach services to small businesses and municipalities/communities to ensure compliance with environmental regulations. Statutory Mandate: Clean Air Act Amendments of 1990 SS 507; La R.S. 30:2060 N. (6).
- EnviroSchool is the educational arm of the department designed to provide relevant regulatory information to diverse members of the regulated community. Additionally, EnviroSchool helps the public at large to better understand the agency functions and operations of each office within LDEQ. Classes are free, offered statewide, and taught by experienced LDEQ employees.
- The Ombudsman receives and investigates complaints involving public participation and environmental justice issues. Through the collection of data and findings, the Ombudsman will identify and bring to the attention of the LDEQ Secretary systemic problems, and the need for system changes. Statutory Mandate: 42 U.S.C. §7661f (Section 507 Federal Clean Air Act), Title VI of the Civil Rights Act of 1964 (Title VI) R.S. 30:2061-2062. Title VI of the Civil Rights Act of 1964 (Title VI), 40 C.F.R. Part 7, R.S. 30:2011.

#### **Explain How This Activity Advances State Outcome Goal:**

The goal of the BCOD as stated in the Narrative section of this APR advances the Natural Resources statewide goal of preserving Louisiana as a sportsman's paradise while balancing our need for economic development from the management of our non renewable resources. Outreach and training sessions conducted by the BCOD encourage stewardship of the state's environmental resources and in so doing, improve environmental compliance and natural resource conditions. The BCOD fosters partnerships with local governments, small businesses, environmental leaders, schools and the public at large to create positive change in the public's behavior regarding the stewardship of Louisiana's environmental resources. LDEQ currently receives complaints from a litter hotline by citizens and in response sends "litterbug" warning letters to the subjects of said complaints. This activity is unfunded and state-wide efficiency dictates this program may be best consolidated with the current Louisiana Department of Wildlife & Fisheries (LDWF) litter education and enforcement programs. At present, LDWF maintains funding sources focusing on litter abatement and an overarching anti-litter campaign is best planned and coordinated by a single state office.

#### **Evidence:**

The evidence supporting this activity is based upon the performance data from previous program years. This division was organized in the summer of 2008 as a part of the streamlining re-organizational effort by LDEQ to maximize the efficiency, performance and productivity.

Performance data for the newly organized BCOD for FY2009 is listed below:

- Municipal Facilities identified 55 community projects throughout the state to receive \$43 million in American Reinvestment and Recovery Act (ARRA) funds; 250+ applications were received totaling over \$1.8 billion; the 55 projects represented 22 percent of all applications received disbursed statewide across 42 parishes. Per ARRA provisions, ARRA funding is recommended for disbursement in the form of zero (0) interest loans with 100% principal forgiveness.
- Small Business/Small Community Assistance staff assisted 1,372 small businesses in the areas of voluntary compliance assistance, permits assistance, outreach activities, workshops/seminars, wastewater surveys, and environmental publication distribution; assisted with regulatory oversight at hurricane debris sites and landfills.
- Environmental Leadership Program enrolled 48 new members: 29 businesses, 2 federal facilities, 6 municipalities, 8 schools and universities, and 3 non-governmental organizations (NGOs). This program promotes voluntary compliance and pollution reduction beyond permit and regulatory requirements.
- EnviroSchool conducted 57 sessions in Baton Rouge, New Orleans, Lake Charles, Alexandria, Monroe and Shreveport covering 12 environmental topics and attended by 824 participants.

**Activity ID:** 174  
**Activity Name:**  
 Audit Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Less Funding: Reduction in evaluation of risk and internal controls, fewer opportunities to recommend improvements within the department, less follow up on implementation of audit recommendations, fewer special projects, fewer external financial compliance audits, reduction in collection of delinquent waste tire fees and delinquent motor fuel fees

More Funding: Increase in assessments of risk and internal controls, increase in recommendations for efficiency and effectiveness, increase in financial compliance audits, increase in follow up of audit recommendations to verify they were implemented, increase in citing delinquent fees

**Activity Type:** Existing

**Objective:**

To ensure compliance with the department's rules and regulations among the states' new and used tire dealers and motor fuel distributors by conducting 96% of the audits prioritized through the annual risk assessment.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9744	Key	Percent of compliance audits conducted of those identified in the annual audit plan	100	95	71	96	96

**Narrative:**

Audit Services conducts performance, operational, investigative, and financial audits of the operations of the Department. Also, Audit Services audits those private entities that do not appear to be paying fees to the Department on a self-reporting basis. These include new and used tire dealers and motor fuel distributors. Audit Services assesses fees and interest on delinquent accounts. These audits provide the Department with assurances that fees are remitted promptly and accurately.

**Explain How This Activity Advances State Outcome Goal:**

The Audit Services Activity achieves its objective by providing independent required internal audits and reviews of the department's processes and programs, and that they are in compliance with Federal and state law, and with other National and State Audit Guidelines and Procedures. In addition, a financial compliance audit provides assurance that fees paid to the department are remitted in accordance with the laws and regulations of the state which substantiates that the taxpayers' dollars are well spent. By ensuring compliance with applicable federal and state laws, Audit Services assists the department in supporting/advancing the Natural Resources outcome goal.

**Evidence:**

Since fiscal year 1997, Audit Services has performed 1,190 audits on delinquent tire dealers and collected \$2,348,522.25. In addition, Audit Services has performed 132 audits on delinquent motor fuel distributors and

collected \$1,015,187.90.

**Activity ID:** 175  
**Activity Name:**  
Criminal Investigations  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Criminal Investigations Division (CID) currently has 7 investigators to cover the entire state. The Department received approximately 5, 000 citizens' complaints last year. CID investigated over 150 leads and referred 14 criminal cases in FY09. More funding and personnel would provide for greater and efficient regional coverage, and result in a greater number of timely referrals to District Attorneys. Less funding would result in less efficient investigative and referral operations.

**Activity Type:** Existing

**Objective:**

To ensure that 100% of the criminal cases investigated are forwarded to the appropriate district attorney once they are thoroughly and completely developed as required by the Environmental Quality Act in FY2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3237	Key	Percent of criminal cases referred to appropriate district attorney for criminal prosecution.	100	100	100	100	100
23141	Key	Percent of cases investigated referred to LDEQ civil enforcement	0	0	0	100	100

**Narrative:**

Pursuant to La. R.S. 30:2025.F (4), once a determination has been made that a criminal violation of the Louisiana Environmental Quality Act may have occurred, the Department is required to notify the district attorney in whose jurisdiction such possible violation has occurred. The department is required to provide the district attorney with any and all information necessary to evaluate the alleged violation for criminal prosecution. In doing so, the Criminal Investigation Division (CID) accomplishes the following functions:

- 1) Supports the overall mission of the Department which is to provide service to the people of Louisiana through comprehensive environmental protection in order to promote and protect health, safety and welfare while considering sound policies regarding employment and economic development. Specifically, CID acts as the ultimate deterrent to would be criminal violators of environmental laws. CID personnel utilize the following tools to effectuate this deterrence:
  - a. making arrests,
  - b. serving search warrants,
  - c. developing and investigating environmental criminal cases for prosecution;
- 2) Compliments the Department's civil enforcement efforts by focusing on the most egregious, habitual violators and escalating to criminal referrals to the district attorney when civil enforcement remedies fail or fall short; and
- 3) Partners with other state and federal law enforcement agencies on criminal cases with an environmental

nexus/link. These agencies include: parish Sheriffs and District Attorneys, EPA's Criminal Investigation Division, the Federal Bureau of Investigation, the United States Coast Guard Criminal Investigative Service, the Office of Inspector General, the Louisiana Department of Wildlife and Fisheries, the Louisiana State Police, and the Louisiana Office of State Inspector General.

#### **Explain How This Activity Advances State Outcome Goal:**

Pursuant to the Governor's Outcome Goal Statement for Natural Resources relative to Outcome Based Budgeting Request for Results and La. R.S. 30:2002 which states:

"Findings and declaration of policy

The legislature finds and declares that,

"The maintenance of a healthful and safe environment for the people of Louisiana is a matter of critical state concern."

CID aids in the prosecution of environmental criminal cases involving illegal dumping and illegal discharges of pollutants to waters of the state. Such crimes directly impact the scenic beauty of our state. Louisiana's reputation as the "Sportsman's paradise" would be in jeopardy without an effective criminal deterrence to the illegal discharge of pollutants and illegal dumping. CID indirectly affects the health and safety of families, children, the elderly, and veterans in Louisiana by the cumulative reduction of pollutants illegally released of into the air, water, and lands of the state.

#### **Evidence:**

In the spring of 2008, LDEQ executive staff commissioned an audit of the CID program, the audit findings recommended several changes to the CID program. Some of these changes include, but are not limited to, the following:

1)CID has hired a criminal enforcement attorney with 18 years of law enforcement and prosecutorial experience. This enhancement has provided valuable counsel with regard to search and seizure, subject interviews and interrogation, and legal issues that arise during a criminal environmental investigation.

2)CID has hired three investigators who will be based at LDEQ's Shreveport, Lake Charles and Lafayette regional offices. These changes will facilitate CID's timely response to leads while furthering this Department's commitment to regionalization of personnel and resources.

**Activity ID:** 159  
**Activity Name:**  
 Executive Administration  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** False  
**Scalable Description:**

**Activity Type:** Existing

**Objective:**

To ensure the 95% of the objectives in the department's programs are met.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6867	Key	Percent of LDEQ programs meeting objectives	100	94	94	95	95

**Narrative:**

Executive Administration provides executive oversight and leadership for the five agency functions of the Department of Environmental Quality. They are:

- Office of the Secretary 13-850
- Office of Environmental Compliance 13-851
- Office of Environmental Services 13-852
- Office of Environmental Assessment 13-853
- Office of Management and Finance 13-855

**Explain How This Activity Advances State Outcome Goal:**

This activity has allowed the department to fulfill its mission which is to provide comprehensive environmental protection and promote and protect the health, safety and welfare of the state while considering sound policies regarding employment and economic development. The leadership exercised by the Executive Administration also advances the state's Natural Resources Goal which is to sustain Louisiana's natural resources, to ensure a better environment and to preserve Louisiana as a sportsman's paradise while balancing our need for economic development from the management of our non renewable resources.

**Evidence:**

The evidence is based upon productivity demonstrated through the implementation of the LDEQ leadership 10 Point Plan, developed in the spring of 2008. The department has not only met but exceeded the 95% performance standard this past year.

**Activity ID:** 169

**Activity Name:**

Business and Community Outreach

**Department:** 13 Department of Environmental Quality

**Agency:** 850 Office of the Secretary

**Program:** 1000 Administrative

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

The BCO will strive to maintain performance standards should reduced funding occur. More funds would allow for greater resources to assist more businesses and communities in achieving voluntary compliance with environmental regulations. Less funding would prevent an increased efficiency in this endeavor.

**Activity Type:** Existing

**Objective:**

To improve compliance among small businesses, municipalities/communities and non-governmental organizations by providing statewide educational outreach and technical assistance services in FY2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Percent of municipalities implementing planned wastewater improvements to ultimately ensure compliance with the federal Clean Water Act using the Municipal Facilities Revolving Loan Fund.	0	0	0	0	100
New	Key	Percent of EnviroSchool class participants who demonstrate comprehension of the core subject matter.	0	0	0	0	80
New	Key	Percent increase in Environmental Leadership program participants committed to voluntary pollution reduction beyond regulatory compliance.	0	0	0	0	50
9768	Key	Percent of responses to requests by small businesses, municipalities and non-governmental organizations for compliance assistance within 10 business days.	100	99	100	100	100
New	Key	Percent of responses by Ombudsman to complaints involving public participation and environmental justice within 5 business days.	0	0	0	0	100

**Narrative:**

The goal of the Business and Community Outreach Division (BCOD) is to serve as the outreach arm for the Louisiana Department of Environmental Quality (LDEQ) by providing educational outreach and technical assistance to small businesses, municipalities/communities, nongovernmental organizations, schools and the public at large. Components of the division:

- The Municipal Facilities Revolving Loan Program provides financial assistance through low interest loans to finance eligible wastewater improvement projects, bringing them into compliance with federal Clean Water Act requirements to protect human health and environment and promote economic development. Statutory Mandate: Title VI, Clean Water Act, amended; LA Water Control Law RS 30:2078-2089.
- The Environmental Leadership Program is a voluntary partnership with businesses, municipalities, nongovernmental organizations, federal entities, schools and universities and community organizations to reduce pollution and promote a cleaner environment. Statutory Mandate: LA Environmental Regulatory Innovations Programs RS 30:2561-2566, LAC 33:3701-3715
- The Small Business/Small Community Assistance Program provides free technical assistance and outreach services to small businesses and municipalities/communities to ensure compliance with environmental regulations. Statutory Mandate: Clean Air Act Amendments of 1990 SS 507; La R.S. 30:2060 N. (6).
- EnviroSchool is the educational arm of the department designed to provide relevant regulatory information to diverse members of the regulated community. Additionally, EnviroSchool helps the public at large to better understand the agency functions and operations of each office within LDEQ. Classes are free, offered statewide, and taught by experienced LDEQ employees.
- The Ombudsman receives and investigates complaints involving public participation and environmental justice issues. Through the collection of data and findings, the Ombudsman will identify and bring to the attention of the LDEQ Secretary systemic problems, and the need for system changes. Statutory Mandate: 42 U.S.C. §7661f (Section 507 Federal Clean Air Act), Title VI of the Civil Rights Act of 1964 (Title VI) R.S. 30:2061-2062. Title VI of the Civil Rights Act of 1964 (Title VI), 40 C.F.R. Part 7, R.S. 30:2011.

**Explain How This Activity Advances State Outcome Goal:**

The goal of the BCOD as stated in the Narrative section of this APR advances the Natural Resources statewide goal of preserving Louisiana as a sportsman's paradise while balancing our need for economic development from the management of our non renewable resources. Outreach and training sessions conducted by the BCOD encourage stewardship of the state's environmental resources and in so doing, improve environmental compliance and natural resource conditions. The BCOD fosters partnerships with local governments, small businesses, environmental leaders, schools and the public at large to create positive change in the public's behavior regarding the stewardship of Louisiana's environmental resources. LDEQ currently receives complaints from a litter hotline by citizens and in response sends "litterbug" warning letters to the subjects of said complaints. This activity is unfunded and state-wide efficiency dictates this program may be best consolidated with the current Louisiana Department of Wildlife & Fisheries (LDWF) litter education and enforcement programs. At present, LDWF maintains funding sources focusing on litter abatement and an overarching anti-litter campaign is best planned and coordinated by a single state office.

**Evidence:**

The evidence supporting this activity is based upon the performance data from previous program years. This division was organized in the summer of 2008 as a part of the streamlining re-organizational effort by LDEQ to maximize the efficiency, performance and productivity.

Performance data for the newly organized BCOD for FY2009 is listed below:

- Municipal Facilities identified 55 community projects throughout the state to receive \$43 million in American Reinvestment and Recovery Act (ARRA) funds; 250+ applications were received totaling over \$1.8 billion; the 55 projects represented 22 percent of all applications received disbursed statewide across 42 parishes. Per ARRA provisions, ARRA funding is recommended for disbursement in the form of zero (0) interest loans with 100% principal forgiveness.
- Small Business/Small Community Assistance staff assisted 1,372 small businesses in the areas of voluntary compliance assistance, permits assistance, outreach activities, workshops/seminars, wastewater surveys, and environmental publication distribution; assisted with regulatory oversight at hurricane debris sites and landfills.
- Environmental Leadership Program enrolled 48 new members: 29 businesses, 2 federal facilities, 6 municipalities, 8 schools and universities, and 3 non-governmental organizations (NGOs). This program promotes voluntary

compliance and pollution reduction beyond permit and regulatory requirements.

•EnviroSchool conducted 57 sessions in Baton Rouge, New Orleans, Lake Charles, Alexandria, Monroe and Shreveport covering 12 environmental topics and attended by 824 participants.

**Activity ID:** 266

**Activity Name:**  
Financial and Administrative Services

**Department:** 13 Department of Environmental Quality

**Agency:** 855 Office of Management and Finance

**Program:** 1000 Support Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Less Funding: Probable missed deadlines, delays in providing information to LDEQ Management, Data quality impact, and Customer Service impact.

More Funding: Data quality improved, better customer service, higher quality of service to LDEQ Management & LDEQ employees.

**Activity Type:** Existing

**Objective:**

To facilitate the Financial and Administrative means for the departmental programs to achieve their mandated objectives by providing 100% of the required and necessary business services annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6939	Key	Percentage of completed business transactions.	97	100	97	100	100
6940	Key	Number of repeat audit findings by legislative auditors.	0	0	0	0	0

**Narrative:**

The Financial and Administrative Services activity includes Budget & Expenditure Reporting, Accounts Payable, Employee Travel Reimbursements, Billing & Data Management, Accounts Receivable, Funds Management, Grant Processing and Expenditure Reporting, Revolving Loan Financial Processing and Reporting, Contract Processing and Management, Procurement, Property Control, Fleet Maintenance & Reporting, General Services Support, Employee Safety & Training, Motor Fuel Trust Fund Reimbursement Processing, and Waste Tire Data Processing.

**Explain How This Activity Advances State Outcome Goal:**

The Financial and Administrative Services activity provides the financial information and the tools necessary by the department’s decision makers to make the best decisions in operating the department’s programs in support of conserving, restoring, and preserving our natural resources. The services provided by this activity ensure that the information and services provided comply with all state and Federal laws, and also in complies with department and state policies and procedures. This activity also supports the efforts towards providing transparency and accountability, in that it prepares, analyzes, compiles, and processes the data for the activities within the LDEQ and submits the data to the Control Agencies. This ensures that taxpayer dollars are well spent and that the information provided is accurate and reliable.

**Evidence:**

The processes, data, and results this activity produces are audited annually by the Legislative Auditor, the department’s internal audit section, and occasionally by Federal review teams. In recent years, there have been no reported findings by these groups that would indicate that the information provided has not been complete and

accurate.

During FY 2009, LDEQ streamlined motor fleet operations by reducing the overall fleet size by 10%.

In FY 2009 LDEQ realized a savings of \$894,000 by reducing acquisitions, closure of the Mandeville office and no new vehicle purchases. In FY 2010 LDEQ will realize a savings of \$3.2 million by reducing acquisitions, professional services, closure of the Mandeville office, no new vehicle purchases, and a reduction in operating automotive supplies due to the previous streamlining efforts.

			Prior FY	2 Yrs Ago	3 Yrs Ago		
10583	Key	Percent of loan applications and associated documents processed within 30 days of receipt	100	100	100	100	100

**Narrative:**

The Municipal Facilities State Revolving Loan Fund activity continues to maintain long-term goals to ensure it assists the State in meeting water quality goals and ensure the long-range integrity of the fund. These goals include:

1. To achieve statewide compliance with Federal and State water quality standards by providing financial assistance to municipalities and other qualified recipients.
2. To promote expanded eligibility under Title VI of the Clean Water Act that allows financial assistance for additional project categories. These additional project categories include non-point sources, reconstruction of waste water treatment facilities needed to accommodate population growth, estuary, and groundwater-related needs.
3. To maintain the fiscal integrity of the Municipal Facilities State Revolving Loan Fund and to assure its continuous enhancements in perpetuity through maintaining net assets equal to federal capitalization grants and state matching funds and the use of a cash flow modeling plan.

**Explain How This Activity Advances State Outcome Goal:**

This activity advances the state outcome goal of Natural Resources to protect human health, to improve the water quality and economic viability of Louisiana's rivers, lakes and groundwater by providing below market rate loans on eligible wastewater municipal projects.

**Evidence:**

Since inception of this program in 1990, there have been 88 loans sucessfully executed, totalling \$486,147,900. There are an additional 48 loan applications currently being reviewed by department staff. The increase in activity can be attributed to the department receiving American Reinvestment and Recovery Act of 2009 (ARRA) funding, and lowereing the interest rate from 2.95% to .95% making this program more affordable for smaller municipalities and communities.

**Program:** 1000 Support Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

Less Funding: Probable missed deadlines, delays in providing information to LDEQ Management, Data quality impact, and Customer Service impact.

More Funding: Data quality improved, better customer service, higher quality of service to LDEQ Management & LDEQ employees.

**Activity Type:** Existing

**Objective:**

To facilitate the Financial and Administrative means for the departmental programs to achieve their mandated objectives by providing 100% of the required and necessary business services annually.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
6939	Key	Percentage of completed business transactions.	97	100	97	100	100
6940	Key	Number of repeat audit findings by legislative auditors.	0	0	0	0	0

**Narrative:**

The Financial and Administrative Services activity includes Budget & Expenditure Reporting, Accounts Payable, Employee Travel Reimbursements, Billing & Data Management, Accounts Receivable, Funds Management, Grant Processing and Expenditure Reporting, Revolving Loan Financial Processing and Reporting, Contract Processing and Management, Procurement, Property Control, Fleet Maintenance & Reporting, General Services Support, Employee Safety & Training, Motor Fuel Trust Fund Reimbursement Processing, and Waste Tire Data Processing.

**Explain How This Activity Advances State Outcome Goal:**

The Financial and Administrative Services activity provides the financial information and the tools necessary by the department's decision makers to make the best decisions in operating the department's programs in support of conserving, restoring, and preserving our natural resources. The services provided by this activity ensure that the information and services provided comply with all state and Federal laws, and also in complies with department and state policies and procedures. This activity also supports the efforts towards providing transparency and accountability, in that it prepares, analyzes, compiles, and processes the data for the activities within the LDEQ and submits the data to the Control Agencies. This ensures that taxpayer dollars are well spent and that the information provided is accurate and reliable.

**Evidence:**

The processes, data, and results this activity produces are audited annually by the Legislative Auditor, the department's internal audit section, and occasionally by Federal review teams. In recent years, there have been no reported findings by these groups that would indicate that the information provided has not been complete and accurate.

During FY 2009, LDEQ streamlined motor fleet operations by reducing the overall fleet size by 10%.

In FY 2009 LDEQ realized a savings of \$894,000 by reducing acquisitions, closure of the Mandeville office and no new vehicle purchases. In FY 2010 LDEQ will realize a savings of \$3.2 million by reducing acquisitions, professional services, closure of the Mandeville office, no new vehicle purchases, and a reduction in operating automotive supplies due to the previous streamlining efforts.

**Activity ID:** 213

**Activity Name:**  
Waste Permits

**Department:** 13 Department of Environmental Quality

**Agency:** 852 Office of Environmental Services

**Program:** 1000 Environmental Services

**State Outcome Goal:** 8 Natural Resources

**Scalable:** True

**Scalable Description:**

More funding would expedite issuance of additional hazardous and solid waste permitting decisions. This would allow for greater coverage of currently unregulated and unpermitted facilities and inhibit illegal dumping and promiscuous dump sites. Less funding would adversely impact businesses' and local governments' decisions and negatively impact their economics. Additionally, less funding would adversely impact successful accomplishment of current goals, established standards, mandated federal, state and local objectives and operational plan requirements.

**Activity Type:** Existing

**Objective:**

To provide high quality technical evaluations of solid and hazardous waste permit applications and taking final action on 70% of applications received for new facilities, permit renewals and modifications, within established timeframes.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23146	Key	Percentage of waste applications received for new facilities and major modifications where final action has been taken	54	27	19	65	70

**Narrative:**

Louisiana has received authorization from the U.S. Environmental Protection Agency (EPA) for the administration of the solid and hazardous waste permitting programs. Through this authorization, the Waste Permits Division (WSTPD) performs comprehensive technical reviews of permit requests and regulatory determinations for generators, processors, and disposers of solid and hazardous waste. The WSTPD issues operating permits for hazardous waste treatment, storage, and/or disposal facilities. For solid waste, the WSTPD issues operating permits to municipal landfills, industrial landfills, construction and demolition debris landfills, surface impoundments, processing transfer stations, composting facilities, and separation, woodwaste processing facilities, and waste tire processors.

The WSTPD also supervises the proper closure of solid and hazardous waste management facilities. The WSTPD issues post-closure permits requiring monitoring of groundwater in the vicinity of closed landfills and surface impoundments.

Additionally, the WSTPD provides technical expertise and reviews groundwater monitoring reports, monitoring well installation and construction plans, assessment and corrective action monitoring reports and work plans, groundwater statistical evaluations, and plugging and abandonment of groundwater monitoring wells.

All permit applications and submittals are reviewed to ensure compliance with the Louisiana Environmental Quality Act and applicable local, state, and federal regulations. Permit decisions are based on sound scientific and economic principles, and are balanced to protect the natural resources of the state while providing an important benefit to the general public, municipalities, and industry for allowing waste to be handled in a manner that is protective of human health and the environment.

The WSTPD also reviews, processes, and responds to other requests such as solid waste beneficial reuse, one-time soil reuse, waste tire beneficial reuse, household hazardous waste collection events and facilities, local recycling collections, waste minimization plans, technical inquiries from the public, elected officials, and the regulated community.

Act 662 of the 2006 Regular Session of the Legislature enacted as LA R.S. 30:2413.1 and directed the LDEQ to develop and implement a comprehensive debris management plan for certain debris generated by natural disasters.

**Explain How This Activity Advances State Outcome Goal:**

The Waste Permits Division (WSTPD) supports the Governor's statewide goal related to natural resources. A goal of the Waste Permits program is to protect the environment by ensuring proper management and disposal of solid and hazardous wastes within the State. Under this program, solid wastes are managed and disposed according to strict federal EPA requirements and sound engineering practices.

The proper management of hazardous waste helps ensure that no new Superfund cleanup sites will be created. Hazardous waste may not be buried unless it is first treated to very stringent EPA land disposal standards, and then only in a specially engineered, double-lined landfill that is approved and permitted by the WSTPD. Hazardous waste may not be stored or treated except according to stringent EPA standards. Unsound practices such as dumping hazardous waste into unlined pits or waterbodies, or burning hazardous waste in incinerators not equipped with state-of-the-art pollution control equipment, are not permitted in this State.

The Waste Permitting program helps protect the land and groundwater resources of the State from pollution, and thus eliminates the potential threat to human health from such pollution.

LDEQ receives a special yearly grant from EPA under Section 3011 of the federal Resource Conservation and Recovery (RCRA) program to administer the hazardous waste permitting program.

The goal of the comprehensive debris management plan for debris generated by natural disasters is to reuse and recycle material in an environmentally beneficial manner and to divert debris from disposal in landfills to the maximum extent practical. As mandated by the Act, "Green and woody" debris must be reduced fifty percent by weight and volume. As a result debris management sites are approved by the LDEQ for staging, chipping, burning or other processing, and the amount of emergency debris is tracked.

**Evidence:**

1. By issuing solid and hazardous waste permits, the WSTPD ensures that facilities managing waste comply with all state and federal regulations and ensures that Louisiana's citizens and the environment are protected.
2. Recycling and reuse of solid waste is encouraged and allowed under the regulations. Hazardous waste facilities must have a Waste Minimization Plan that considers ways to reduce the amount and toxicity of the waste being generated.
3. Permitted solid and hazardous waste facilities are required to not only conduct clean-up activities of releases into soil and groundwater from the regulated units, but also conduct clean-up activities on a site-wide basis for all solid waste management units and areas of concern. In this regard, the LDEQ worked with the US Environmental Protection Agency (EPA) Region 6 to develop and implement permitting language that streamlined the remediation process and used a comprehensive risk-based approach.
4. Currently the WSTPD is working on developing general permits as well as site specific permits. Plans are to start generating permits using TEMPO, decreasing the number of notices of deficiency, eliminating the submittal of final copies of permit applications, and issuing permits with permit conditions.
5. LDEQ's comprehensive debris management plan has led to a coordinated and systematic approach to managing disaster generated debris. This resulted in over 90% of the total vegetative debris being diverted from Louisiana

landfills, far exceeding the reduction requirement of 50%.

6.LDEQ approved 308 emergency debris sites for use during the response to Hurricanes Gustav and Ike.

Additionally, in order to be proactive and plan for future disasters, LDEQ has initiated rulemaking and set up interim procedures for preapproving debris management sites. As of 10/1/09 LDEQ has received 177 requests for preapprovals in preparation for future events.

**Activity ID:** 225  
**Activity Name:**  
 Permit Support Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 852 Office of Environmental Services  
**Program:** 1000 Environmental Services  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Additional funding for permit support activities will result in quicker processing action, thereby allowing the Permits Divisions quicker response time to the public and the ability to meet permit issuance performance goals. In addition, additional funding for non permit support activities will result in quicker processing of these functions, thereby allowing quicker response time directly to the regulated community. Less funding will have a negative impact on response time to the public.

**Activity Type:** Existing

**Objective:**

To administratively process 86% of complete permit applications, registrations, notifications, and accreditations within established business timelines.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
New	Key	Process permit applications, accreditation applications, registrations, and notifications within established timelines.	0	0	0	0	86

**Narrative:**

Permit Support Services Division consists of 2 Sections: Permit Support Section (PSS) and Notifications and Accreditations Section (NAS).

PSS provides administrative services to the media permit divisions in processing applications and issuing permits within statutory and regulatory timelines.

Permits Application Administrative Review (PAAR) Group receives and analyzes all incoming documents for OES to ensure proper placement into the LDEQ's Electronic data management system (EDMS). PAAR conducts all initial administrative reviews, creates permitting records in TEMPO (Tools for Environmental Management Protection Organizations), and ensures that all permit fees received are properly handled.

Public Participation Group (PPG) ensures that permits generated by OES are properly public noticed as required by state/federal regulation. The group also organizes and conducts all public hearings for OES.

TEMPO Support Group (TSG) manages LDEQ's database, TEMPO, used by permits, surveillance, enforcement divisions, and fiscal staff to perform many of their duties. TSG converts federal and state regulations into standard database language for use in permits, surveillance checklists, and enforcement documents.

NAS issues multi media accreditations, notifications, and registrations.

Waste, Accreditations, and Reporting (WAR) registers Solid Waste (SW) Generators and Transporters, Sewage Sludge Haulers, conducts certification testing for SW Operators; and maintains information on Annual Hazardous Waste (HW) Reports submitted by Large Quantity Generators and Treatment, Storage, and Disposal facilities (TSDs), in the Resource Conservation and Recovery Act Information database.

WAR oversees asbestos and lead training of providers to ensure citizens working to remove asbestos and lead are

properly trained; verifies training and qualifications ensuring proper work practice controls to protect the public from exposure.

WAR also reviews Asbestos Management Plans for schools and State buildings to ensure safety of children and adults learning and working in these buildings; reviews project notifications to ensure contractors are licensed, approved transporters, landfills and manifests are used to track waste.

Louisiana Environmental Laboratory Accreditation Program (LELAP) accredits and audits commercial laboratories to confirm approved methods and quality to ensure accuracy, precision, and reliability of data provided to LDEQ.

#### **Explain How This Activity Advances State Outcome Goal:**

The review of applications, registrations and notifications by PSSD staff are proactive measures which ensure compliance, provide for clean water, air, land and improved quality of life for people to live, work, and play in a healthy environment, and promote a sustainable tax base. All of these activities support the Natural Resources Statewide Outcome goal.

Partial federal funding is utilized for Hazardous Waste Biennial Reporting, public participation regarding permit actions, and administrative review of permits through the USEPA Performance Partnership Grant. In addition, the Asbestos grant from EPA also provides funds for asbestos accreditation, training provider and trainer recognition, and asbestos management plan review for schools. Both of these federal assistance grants require matching funds from LDEQ.

#### **Evidence:**

Louisiana is an attainment area for all federal National Ambient Air Quality Standards criteria pollutants, with the exception of ozone in the five parish area that includes the city of Baton Rouge. Attainment status with criteria pollutants is a requirement of the federal government, and federal sanctions are levied against states that cannot meet the federal goals. By providing administrative support to the Air Permits Division, the Permit Support (PS) Section has contributed to overall accomplishments through the issuance of permits which limit the amount of pollutants emitted into the air, thereby protecting human health and the environment.

In the 2008 Louisiana Water Quality Inventory Integrated Report, LDEQ reports that Louisiana's water quality continued its gradual improvement between 2006 and 2008 in two important areas. For 2008, an additional 25 water bodies were assessed as fully supporting their designated use of primary contact recreation (PCR) or swimming. Six additional water bodies were found to be fully supporting their designated use of secondary contact recreation (SCR) or boating. This means that approximately 83% of Louisiana's assessed water bodies were meeting PCR water quality criteria for fecal coliforms. Approximately 97% were meeting the SCR criteria, which is less stringent than the criteria for PCR. While some of these improvements could be attributed to improved ambient monitoring and assessment, much of the credit also goes to extensive efforts to reduce the release of sewage from municipal sewage treatment plants, home sewage systems and agriculture. The PS Section provides administrative support to the Water Permits Division contributing to overall accomplishments through the issuance of permits which limit the amount of pollutants emitted into the state's water bodies thereby protecting human health and the environment.

The processing of applications and notifications by the Notifications and Accreditations Section ensures that qualified and trained applicants are working to properly remove and dispose of asbestos, lead, solid waste, hazardous waste, and sewage sludge, and manage the proper disposal of such wastes. Using these management tools reduces the illegal discharge and disposal of asbestos, lead, solid, hazardous, and sewage wastes thereby protecting human health and the environment.

**Activity ID:** 264  
**Activity Name:**  
Information Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 855 Office of Management and Finance  
**Program:** 1000 Support Services  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Demand for services such as application development, etc. always exceeds available resources, therefore prioritization must occur based on the available resources (people, time and money). While this prioritization need applies to other IT services as well, there is a point where reductions in funding would reduce services to the point of ineffectiveness in meeting minimum demands.

**Activity Type:** Existing

**Objective:**

To provide technical tools, expertise and service for data collection, information management and decision support to aid the Department in fulfilling its mission 100% of during FY 2010-11.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
23152	Key	Percent of departmental information technology transactions completed	0	0	0	100	100
23153	Key	Percent of public records requests completed	0	0	0	100	100

**Narrative:**

Major services provided include:

1)Software Application Development:

- Support of existing applications & systems;
- Development of new applications, systems required by LDEQ;
- Application standards and policies;
- Testing

2)Geographic Information Systems provides:

- Mapping services to the agency and public to geographically display data layers of information to aid in research and decision making.

3)Technical Support provides:

- Support services to 940 LDEQ clients at Galvez headquarters & 8 regional offices
- Support for more than 70 servers running Windows & Linux operating systems in the Galvez building and at the ISB.

4)Helpline provides:

- A central Helpline service to LDEQ users to call for technical support;
- Client support so that installations, upgrades and patches are applied in a timely manner to all client machines

5)eBusiness Services provides:

- Architecture and application framework for LDEQ's intranet and public eBusiness Applications, Web Content Management System, internal web services, and the public web portal.

6)Forensics and communications

-Provides expert support in computer forensics and data recovery,

-Coordinates department IT purchases;

7)Disaster Recovery:

-Develops, coordinates, manages and maintains the Agency's overall disaster recovery planning

8)Records Management (Mostly Outsourced on 3 yr contract):

-Operates Public Records Centers at LDEQ HQ and regional offices,

-Document imaging and management of the Electronic Document Management System (EDMS) which house 45million + pages of public records

-Trains on records management policies and procedures.

9)Customer Service Center (Mostly staffed by part-time Grad Students):

-Focal point for all incoming inquiries to DEQ (about 1150 per month).

#### **Explain How This Activity Advances State Outcome Goal:**

The Information Services activity provides the computer technology the department employees need in support of the department's overall mission and goal of conserving, restoring, and preserving our natural resources.

Information Services provides technical support, software support, query tools, and adequate data storage necessary so that both the department staff and the public have available the information necessary to allow for better decision making regarding the environment.

Additionally, as part of streamlining the department's operations, LDEQ is in the process of ceasing operations of its library. This streamlining effort will save \$270,000 annually, \$149,000 of which is rental space.

#### **Evidence:**

LDEQ IS meets the needs of the public and fulfills State goals through:

IS/Technology Initiatives

- ePayment web based system allows the regulated community to pay annual monitoring fees online via credit card or electronic bank draft saving them and LDEQ time and money

- Net-DMR enables industry to submit their discharge monitoring reports via the internet instead of paper forms; this saves time and eliminates errors.

- ePermits will enable certain permit applications via the internet

Diversified Economic Growth

- 153 Online Stack Test Schedule's submitted / yr

- 74 Online Registrations for Enviro-School processed/yr

- Easy online processing of Permit Applications (in progress) and fee payments

General Performance Data

- Fulfills more than 32,000 IS requests for services per year with a 100% performance measure each quarter

- Records Management Team selected as first runner up in ARMA International's "Cobalt Award" for Excellence in Records Management Systems and Processes recognizing it as world class.

- 3700 Helpline Calls resolved / yr

- 1000+ attend 80+ IS "Tech Talks" /yr

Natural Resources / Public Safety

- Databases that house 1-2 Billion environmental records for 150,000+ regulated facilities

- 1715 Incident Reports submitted online by public/yr

Transparent, Accountable, and Effective Gov.

- About 1150 Customer Service Center info requests successfully processed/month,

- 1900+ public records request fulfilled/yr for more than 68,000 pages,

- 29,245,043 Public web site hits/yr,

- 3400+ registered public users of our online EDMS system access 5 Million public documents and more than 45 million pages.

**Activity ID:** 175  
**Activity Name:**  
 Criminal Investigations  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Criminal Investigations Division (CID) currently has 7 investigators to cover the entire state. The Department received approximately 5,000 citizens' complaints last year. CID investigated over 150 leads and referred 14 criminal cases in FY09. More funding and personnel would provide for greater and efficient regional coverage, and result in a greater number of timely referrals to District Attorneys. Less funding would result in less efficient investigative and referral operations.

**Activity Type:** Existing

**Objective:**

To ensure that 100% of the criminal cases investigated are forwarded to the appropriate district attorney once they are thoroughly and completely developed as required by the Environmental Quality Act in FY2010-2011.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
3237	Key	Percent of criminal cases referred to appropriate district attorney for criminal prosecution.	100	100	100	100	100
23141	Key	Percent of cases investigated referred to LDEQ civil enforcement	0	0	0	100	100

**Narrative:**

Pursuant to La. R.S. 30:2025.F (4), once a determination has been made that a criminal violation of the Louisiana Environmental Quality Act may have occurred, the Department is required to notify the district attorney in whose jurisdiction such possible violation has occurred. The department is required to provide the district attorney with any and all information necessary to evaluate the alleged violation for criminal prosecution. In doing so, the Criminal Investigation Division (CID) accomplishes the following functions:

- 1) Supports the overall mission of the Department which is to provide service to the people of Louisiana through comprehensive environmental protection in order to promote and protect health, safety and welfare while considering sound policies regarding employment and economic development. Specifically, CID acts as the ultimate deterrent to would be criminal violators of environmental laws. CID personnel utilize the following tools to effectuate this deterrence:
  - a. making arrests,
  - b. serving search warrants,
  - c. developing and investigating environmental criminal cases for prosecution;
- 2) Compliments the Department's civil enforcement efforts by focusing on the most egregious, habitual violators and escalating to criminal referrals to the district attorney when civil enforcement remedies fail or fall short; and
- 3) Partners with other state and federal law enforcement agencies on criminal cases with an environmental

nexus/link. These agencies include: parish Sheriffs and District Attorneys, EPA's Criminal Investigation Division, the Federal Bureau of Investigation, the United States Coast Guard Criminal Investigative Service, the Office of Inspector General, the Louisiana Department of Wildlife and Fisheries, the Louisiana State Police, and the Louisiana Office of State Inspector General.

#### **Explain How This Activity Advances State Outcome Goal:**

Pursuant to the Governor's Outcome Goal Statement for Natural Resources relative to Outcome Based Budgeting Request for Results and La. R.S. 30:2002 which states:

"Findings and declaration of policy

The legislature finds and declares that,

"The maintenance of a healthful and safe environment for the people of Louisiana is a matter of critical state concern."

CID aids in the prosecution of environmental criminal cases involving illegal dumping and illegal discharges of pollutants to waters of the state. Such crimes directly impact the scenic beauty of our state. Louisiana's reputation as the "Sportsman's paradise" would be in jeopardy without an effective criminal deterrence to the illegal discharge of pollutants and illegal dumping. CID indirectly affects the health and safety of families, children, the elderly, and veterans in Louisiana by the cumulative reduction of pollutants illegally released of into the air, water, and lands of the state.

#### **Evidence:**

In the spring of 2008, LDEQ executive staff commissioned an audit of the CID program, the audit findings recommended several changes to the CID program. Some of these changes include, but are not limited to, the following:

1)CID has hired a criminal enforcement attorney with 18 years of law enforcement and prosecutorial experience. This enhancement has provided valuable counsel with regard to search and seizure, subject interviews and interrogation, and legal issues that arise during a criminal environmental investigation.

2)CID has hired three investigators who will be based at LDEQ's Shreveport, Lake Charles and Lafayette regional offices. These changes will facilitate CID's timely response to leads while furthering this Department's commitment to regionalization of personnel and resources.

**Activity ID:** 174  
**Activity Name:**  
 Audit Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Less Funding: Reduction in evaluation of risk and internal controls, fewer opportunities to recommend improvements within the department, less follow up on implementation of audit recommendations, fewer special projects, fewer external financial compliance audits, reduction in collection of delinquent waste tire fees and delinquent motor fuel fees

More Funding: Increase in assessments of risk and internal controls, increase in recommendations for efficiency and effectiveness, increase in financial compliance audits, increase in follow up of audit recommendations to verify they were implemented, increase in citing delinquent fees

**Activity Type:** Existing

**Objective:**

To ensure compliance with the department's rules and regulations among the states' new and used tire dealers and motor fuel distributors by conducting 96% of the audits prioritized through the annual risk assessment.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9744	Key	Percent of compliance audits conducted of those identified in the annual audit plan	100	95	71	96	96

**Narrative:**

Audit Services conducts performance, operational, investigative, and financial audits of the operations of the Department. Also, Audit Services audits those private entities that do not appear to be paying fees to the Department on a self-reporting basis. These include new and used tire dealers and motor fuel distributors. Audit Services assesses fees and interest on delinquent accounts. These audits provide the Department with assurances that fees are remitted promptly and accurately.

**Explain How This Activity Advances State Outcome Goal:**

The Audit Services Activity achieves its objective by providing independent required internal audits and reviews of the department's processes and programs, and that they are in compliance with Federal and state law, and with other National and State Audit Guidelines and Procedures. In addition, a financial compliance audit provides assurance that fees paid to the department are remitted in accordance with the laws and regulations of the state which substantiates that the taxpayers' dollars are well spent. By ensuring compliance with applicable federal and state laws, Audit Services assists the department in supporting/advancing the Natural Resources outcome goal.

**Evidence:**

Since fiscal year 1997, Audit Services has performed 1,190 audits on delinquent tire dealers and collected \$2,348,522.25. In addition, Audit Services has performed 132 audits on delinquent motor fuel distributors and

collected \$1,015,187.90.

**Activity ID:** 205  
**Activity Name:** Surveillance  
**Department:** 13 Department of Environmental Quality  
**Agency:** 851 Office of Environmental Compliance  
**Program:** 1000 Environmental Compliance  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Reduction would require a curtailment in essential functions – inspections, sampling, response to complaints & releases; increase would prevent lay-offs, return of frozen positions; ability to carry out legislative mandates.

**Activity Type:** Existing

**Objective:**

Surveillance will inspect regulated facilities related to air emissions, solid and hazardous waste, waste tires and water discharges, investigate complaints and spills, and sample water bodies to provide data needed to assess impaired streams to protect the environment and public health statewide.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9756	Key	Percent air facilities inspected	33	28	37	50	50
9757	Key	Percent TSD facilities inspected	47	50	42	50	50
6886	Key	Percent water major facilities inspected	48	50	99	50	50
9758	Key	Percent solid waste facilities inspected	65	70	66	65	70
9759	Key	Percent tire dealers inspected	20	20	19	20	20

**Narrative:**

The Surveillance activity includes mandated compliance inspections, incident and complaint investigations, and water sampling. The U.S. Environmental Protection Agency (EPA) authorized LDEQ to administer, implement, and enforce federal statutes for air, water and hazardous waste. Surveillance, through effective planning, uses an inspection strategy that requires in-depth inspections that focus on achieving meaningful environmental results that promote compliance statewide while also meeting the requirements of state and federal statutory mandates and funding commitments. Planning flexibility allows opportunities to inspect and evaluate unpermitted facilities, and when needed, provide compliance assistance to small and medium facilities to ensure they understand the requirements of environmental regulations. Incident and complaint investigations/inspections are initiated based on information received from citizens, required upset/release notifications and from other sources of information (such as sister agencies). Ambient water monitoring is conducted statewide under Clean Water Act requirements and policies to ensure there is adequate data to evaluate and set standards related to uses for specific water bodies (swimming, fishing, drinking water supplies). The data is used by the Water Quality Assessment Division to set standards, and the Department of Wildlife and Fisheries for habitat and aquatic propagation, and Department of Health and Hospitals Drinking Water program.

**Explain How This Activity Advances State Outcome Goal:**

Surveillance supports the Natural Resources Goal by carrying out its mandated activities, specifically the Surveillance activity core function is inspections of permitted and unpermitted facilities, complaints and releases related to facilities operations. Inspections are conducted to ensure compliance with federal and state regulations. Ensuring compliance protects the state's natural resources and promotes economic development by providing a level playing field for all regulated entities. LDEQ is authorized by both federal agencies and the Louisiana Legislature to conduct compliance activities. The division plans and implements annual inspections related to air, water and waste (solid and hazardous) emissions, discharges and storage/handling, using a compliance monitoring strategy (Act 217, 2003) to focus on operations that have potential for significant environmental impacts and to assist regulated entities with compliance. Field staff in 8 regional offices conducts compliance inspections, assist local businesses, government entities and citizens through compliance assistance visits, public forums, town meetings to address environmental issues to protect public health and conserve natural resources in their regions. LDEQ regional personnel work closely with their counterparts in other state agencies (DNR, DWF, DAF and DHH) to address local concerns timely and efficiently. The Surveillance mission is to operate in an open, fair, and consistent manner; to strive for and assist in attaining environmental compliance in the regulated community; to protect environmental resources and the public health and safety of the citizens of the State of Louisiana. Annual goals related to inspections, investigations and sampling have been consistently met or exceeded, except for the year of and following hurricanes Katrina and Rita [2005-2006]. Surveillance activities are funded by Environmental Trust Fund and federal grants (such as the EPA –LDEQ Performance Partnership Grant).

#### **Evidence:**

Surveillance consistently meets or exceeds its goals. Surveillance met or exceeded the goals the past 5 years (FY05 -FY09) set forth in the Compliance Monitoring Strategy for each media, except for FY06, the recovery period from significant impacts of hurricanes Katrina and Rita. During this period Surveillance was involved in response, facility assessments to determine environmental impacts, air and water ambient sampling efforts and oversight of debris removal and disposal. Surveillance in FY10 will continue to oversee and inspect activities related to Katrina-Rita. It is anticipated that most of the Katrina-Rita projects will be complete by the end of 2010.

Surveillance regional staff (108 field inspectors in 6 regional offices) each year conduct between 8,000 – 10,000 inspections, handle on average 8000 complaints and spills/releases, monitor 120 streams and lakes monthly, and also conduct investigations to address specific compliance issues.

Regional staff supports the LDEQ ER responders in the regions after-hours and on weekends, serving in an ER response rotation on weekends and when the ER staff is on leave.

Regional staff participate at local events related to environmental topics, serve on local committees to address environmental concerns, participate in LDEQ's frontloading efforts and Enviro-School.

Surveillance staff collaborates with DHH on sewage issues, with DNR on oil field issues, with LWF on fish kills, with LOSCO on oil spills, with GOSEP and LSP on hurricane preparedness, and with DAF on pesticide complaints that have off-site impact to natural resources. LDEQ is streamlining its mercury fish tissue sampling program to eliminate duplicative program elements performed by other agencies. These include: atmospheric deposition monitoring, mercury-related research, remediation of mercury manometer sites, and data evaluation. LDEQ anticipates a projected savings of \$255,000.

Presently, regional staff is completing oversight and assessments related to Gustav-Ike. In FY09 field staff conducted approx. 6500 assessments and sampling events related to Gustav-Ike impacts.

LDEQ and DAF are working together to allow LDEQ to lease office & warehouse space at a reduced rate from commercial space currently utilized by the department. There is an estimated \$70,000 annual savings to be realized by LDEQ. The departments are still pursuing other resource sharing endeavors.

Legal Services  
**Department:** 13 Department of Environmental Quality  
**Agency:** 850 Office of the Secretary  
**Program:** 1000 Administrative  
**State Outcome Goal:** 8 Natural Resources  
**Scalable:** True

**Scalable Description:**

Legal will endeavor to maintain its performance standards if funding is decreased. More funding resources would allow for greater efficiency in completing the performance requirements; less funding will reduce this efficiency.

**Activity Type:** Existing

**Objective:**

To respond to all (100%) legal challenges to Louisiana Department of Environmental Quality actions so that human health and the environment are protected without interruption, and to ensure compliance of all (100%) environmental regulatory operations with applicable laws and regulations.

**Performance Indicators:**

LaPAS Code	Level	PI Name	Actual Yearend			Existing Year Standard	Proposed Standard
			Prior FY	2 Yrs Ago	3 Yrs Ago		
9747	Key	Percent of referrals for which an initial legal review is provided within 30 business days of receipt	99.2	99	98	96	96
23142	Key	Percent of legally supported decisions sustained after challenge	0	0	0	95	95

**Narrative:**

The Legal Division provides advice, consultation, and representation to all offices of the Louisiana Department of Environmental Quality and is organized to provide attorneys with expertise and experience for every major type of environmental (and internal) action. Attorneys litigate corrective and compensatory actions to repair environmental damage, pursue environmental violators, collect penalties and fees owed to the department, and defend permit and other agency actions. They also routinely draft, review, and negotiate contracts, agreements, and settlements, and research and prepare legal opinions, reports, and other documentation to support agency decisions and actions.

**Explain How This Activity Advances State Outcome Goal:**

The Legal Division's activity aligns with the Natural Resources statewide goal by supporting the Louisiana Department of Environmental Quality (LDEQ) in protecting natural resources, human health, and the environment with consideration of economic development by prosecuting enforcement and collection actions and defending challenges to permit and other actions.

The Legal Division assists the agency in ensuring transparency, accountability, consistency, and ethical behavior are standard throughout its statewide departmental operations by observing and participating in management discussions and day to day operations, conducting legal risk analysis, and providing advice, consultation, training, and representation to the various offices of the LDEQ.

**Evidence:**

The evidence supporting this activity is based on past performance data for FY 09:

- Collection of \$ 1,420,346.42 in fees and penalties
- Court appearances 410
- Pleadings prepared 413
- Legal consultations 74,595
- Public hearings 52
- Cooperative and settlement agreements negotiated 102
- Ethics consultations 116
- Regulation packages prepared and reviewed 74
- Enforcement actions reviewed 1,272

Accountability legal services reports demonstrated a cost savings to the agency of \$ 617,822.58 in the fourth quarter of FY09, in comparison with the cost to the agency of the same services from outside counsel at current government contract rates.
